written consent of the author.

STAGES IN PROBLEM SOLVING

A thesis submitted in partial
fulfillment of the requirements for the
Degree of Doctor of Philosophy

by

Hazel Eleanor Steiger

Australian National University

September 1970

This thesis describes original
research carried out by the author in the
Department of Psychology of the
Australian National University
from January 1968 to July 1970.

Hazel Steiger

ACKNOWLEDGEMENTS

It is a pleasure to acknowledge the help of my supervisor, Associate Professor G. Seagrim who, in the midst of his myriad other responsibilities, was able to devote conscientious attention to the manuscript in draft form.

I am indebted to Dr. Michael Cook for his suggestions in the early stages of the theoretical and experimental design of this thesis, but especially for his technical advice and assistance in the computer programming relating to the Monte Carlo simulations. I am extremely grateful to Paul Moens for the many hours he spent to ensure that these programs were in working order.

I thank Professor P.A.P. Moran and Dr. Martin Ward for their statistical and mathematical advice. Robin Milne was extremely helpful in his comments on a draft chapter, and many of his suggestions are incorporated here.

I am grateful to Dr. William Steiger who originally brought to my attention many of the questions which I have tried to answer in this thesis.

I am especially grateful to Michael Kahan for providing me with stimulation and encouragement by his trenchant criticisms and invaluable suggestions.

Finally, I am indebted to the Australian National University for providing me with a scholarship which made it possible for me to embark on this doctoral thesis.

TABLE OF CONTENTS

Acknowledgements	iii
List of Figures	iv
List of Tables	v
CHAPTER 1 Theoretical Background	1
1.1 The Stages Model	4
1.2 Information-Processing Theory	7
1.3 Heuristics or Heuristic Methods	10
1.4 The Protocol Method	19
1.5 Experimental Effects of Verbalization	23
1.6 Protocol Analysis (Newell)	31
CHAPTER 2 The Theory of Waiting Times	41
2.1 The Theory of Waiting Times	41
2.2 Application of the Waiting Times Model	52
2.3 Application of the Model to Problem Solving	56
CHAPTER 3 Plan of the Study	73
3.1 The Problems	76
3.2 The Subjects	79
3.3 Procedure	86
3.4 The Data	96
CHAPTER 4 Quantitative Results of the Study	98
4.1 Solution Times	100
4.2 Estimates of K and λ	112
4.3 Fitting the Gamma Distribution	118
4.4 Analyzing the Protocols for Stages	122
4.5 Conclusion	138
CHAPTER 5 Monte Carlo Simulation Studies	140
5.1 The Monte Carlo Method	140
5.2 Sampling Distribution Experiments	144
5.3 Investigating the Assumptions of the Stages-Module Model	145
5.4 Results of Simulation Studies	151
5.5 Conclusion	163

CHAPTER 6	Analysis of the Problem Structure and Solution Paths	166
6.1	External Description	175
6.2	Path Analysis (Problems 1 and 3)	181
6.3	Transition Probabilities	195
6.4	Path Analysis (Problem 2)	197
6.5	Search Operations	202
6.6	Conclusion	207
CHAPTER 7	Analysis of Protocols	209
7.1	'Ideal' Protocols	211
7.2	Verbalization	235
7.3	Newell's Metalanguage for Protocol Analysis	243
7.4	The Stages-Module Model	253
7.5	The State Model	268
7.6	Behavioural Classification Scheme	272
CHAPTER 8	Summary and Conclusions	289
