FOREWORD

The present work consists of three parts. The first and second are a Grammar and Vocabulary of the Atchin language, from the island of Malekula, New Hebrides. The first two parts are the work of A. Capell, based on an analysis of the third part, Atchin Texts, collected by Dr John Layard in 1914, during his stay on the Small Islands, off the north-east coast of Malekula. The Atchin texts were transcribed and translated by Layard, and arranged into 'verses' by him for ease of cross-reference in the Grammar and Vocabulary sections. Capell prepared these first two sections in London in 1936-37, in consultation with Layard.

More than forty years have passed since the manuscripts were originally prepared for publication. A word of explanation is in order. It was originally intended that the whole work should form part of Layard's projected volumes on the Vao-Atchin people, of which *Stone Men of Malekula* (1942) was the first. For a number of reasons this was not carried out. As far as the Atchin work by Capell is concerned, this was held back to await the possibility of further checking of certain points of phonology with Atchin native speakers. Such checking was planned on a number of occasions by Capell, but was never carried out. On one occasion Capell, while passing through the New Hebrides, had arranged to meet certain speakers at 2.15 p.m. - and his ship unexpectedly sailed at 2.00 p.m.! The result was that the checking has not taken place.

In view of this fact and the long passage of time since the materials were prepared originally, it has been decided to publish them as they stand, as archival material. Both authors agreed to this. It is unlikely that the materials could be fully checked now, and even less likely that they could be collected again nowadays. The only areas of doubt concern the phonetic value of some of the symbols used in the spelling, particularly the central vowels and the palatal consonants
written ts, c and f. The interlabial consonants of Vao do not occur in Atchin and hence raise no difficulty.

In the present volume, therefore, the text material and interpretation are the work of Layard, who also supplied much of the detailed interpretation given in the vocabulary. Capell is responsible for the remainder. The volume will prove a valuable source document for students of Austronesian languages and cultures, especially those of Malekula, for virtually nothing has been published on them until the present.

The Editor
PART I

ATCHIN GRAMMAR
0. Introduction

The Atchin language forms one of the group of dialects spoken on the small islands off the north-east coast of Malekula, New Hebrides. These islands, reckoning from the north are: Vao, Atchin, Wala, Rano, Norsup, Uripiv and Uri. The grammar here given is that of Atchin chiefly, but reference will be made to Vao and Uripiv and occasionally to Wala. Side by side with these a general comparison will be made with the mainland dialects of Malekula.

Printed information on these languages is scarce. Nothing has been published concerning the language of Atchin itself, or the other small islands, with the exception of Uripiv, and a short article by the present writer.¹ For the other languages the following references may be used:

1) Pangkumu: Grammar and Vocabulary in MacDonald 1891.
2) Aulua, Sinesip, Meaun, Kuliviu and Uripiv: Grammars in Ray 1926.
3) Ahamb, Orierh: Scripture Translations by the Presbyterian Mission.
4) Sinesip, Lumbrmrbr, Laravat and Lagalag: Texts in Deacon 1934.

Shorter vocabularies and grammatical notes will be found in various periodicals, for which reference may be made to Ray 1926:258. The same book contains the first attempt to work out phonetic laws governing the taking of Indonesian words into the languages of Malekula.

¹See Capell 1935. A good deal of the actual forms of words there need correcting, owing to indifferent sources of information, but the general thesis of the paper is correct, and is worked upon in this grammar.
LANGUAGE MAP OF MALEKULA
1. PHONOLOGY

1.1. SOUNDS AND SYMBOLS

A modified form of the International Phonetic Script is used here for the transcription of Malekulan words, and all dialects are spelt the same. The following alphabet is used:

1.1.1. Vowels

\[
\begin{array}{ccc}
\text{i} & \ddot{\text{u}} & \text{u} \\
\text{e} & \ddot{\text{o}} & \text{o} \\
\text{a} & \ddot{\text{a}} & \ddot{\text{o}}
\end{array}
\]

[vowel length indicated \( \text{V:} \)]

Each of these vowel symbols has really to do duty for more than one sound.

- i represents the close tense i of 'machine', as well as the laxer sound of 'wit';
- e is normally the vowel of 'men', but in the diphthong ei tends to be closer;
- a is approximately the vowel in German \textit{Mann};
- o stands for both \( \ddot{o} \) and o;
- \( \ddot{o} \) is the sound of the Swedish á.

The mixed vowels ü and ò have their German values, but neither sound is perfectly stable. They have not been written, and apparently not noticed, by the Presbyterian and other missionaries, with the exception of the French Roman Catholics, by whom they are written in the languages of South Pentecost and other surrounding regions.

There is a principle of vowel harmony between the vowel of the verbal particle and that of the verb itself, into which inquiry will be made in the course of this grammar.

\[\text{Throughout the text the symbols ã and à also occur; they are to be interpreted as approximate equivalents to e and o respectively, appearing to be used interchangeably by the author. Their true phonetic values are unknown (see Foreword).}\]
1.1.2. Consonants

<table>

The bulk of these symbols are self-explanatory, if attention be paid to the particular columns in which each is placed. Those that occur twice are put in both places because they have more than one point of articulation in the mouth. All these consonants, it must be understood, are pronounced without the escape of breath that follows them in English. A distinction between v (a bilabial as in Spanish, and as generally in Melanesian), and w has to be made. v tends to occur in Atchin chiefly before front vowels, and the mixed vowels: vi, ve, vü, vō. It is of more general occurrence on the mainland. The dental consonants are pronounced with the tip of the tongue touching the top of the teeth, and are not alveolar as in English. l is trilled as in French and German. The r is definite, though not so strongly trilled as in Fijian. If previous accounts are right, a distinction must also be made between the Atchin sound of ts and the mainland sound of c, i.e. the unvoiced palatal plosive not heard in English, but suggestive of ch. The symbol ʃ stands for the English sound of 'sh' in 'shoot', though perhaps slightly more palatalised. By x is intended the sound of ch in Gaelic and Dutch, or the German ch after back vowels. It was written by Deacon (1934) as kh in some of the dialects, and apparently must be distinguished from its voiced counterpart γ, written gh by him. There is also a hh written by Deacon, of which no explanation is forthcoming, but which seems to be a bilabial f, the unvoiced mate of v. The voiced fricative γ, commonly called the Melanesian g, is replaced in Atchin by h, but is heard in Vao and throughout the mainland and the Maskelyne Islands (Kuliviu).

The present arrangement is adopted for the sake of the phonetic laws to be studied, and reference should be made to Dempwolff 1924–25:19ff. His particular system of spelling is not, however, adopted here.
One peculiarity of Vao consonants must be noticed, though as it is a regular rule of the language, no separate symbol is needed to mark the fact. All labial and nasal consonants are pronounced in Vao with the tongue slightly protruded between the lips, "so that pairs of consonants so pronounced, such as d and b, m and n, p and t are at first almost indistinguishable without comparative philological knowledge. One effect of this is that v and w assume a sound almost exactly corresponding to the English voiced th (Layard 1934:132, fn.). If this is realised from the start, Vao words will not need, for practical purposes, to be specially marked.

The sound written 5 for want of a better symbol in the languages of the west of Malekula is a voiced bilabial fricative trill, like an attempt to pronounce br with the lips alone, and without the tongue. It is the sound heard in the place name variously spelt as Lambumbu or Lambrmbr, which will here be spelt LumBmB.

The labials are practically interchangeable with each other in Atchin and Wala, so that a word may sometimes seem to end in v, sometimes in w, or again in b, p, mb and mp, and although there is dialectical interchange of these sounds, yet this is not simply a matter of dialect or individual speaker, but a perfectly real instability of the labials. Thus the ritual mask called in Atchin sapsap may in Wala be samsam or even sambasamba. The phenomenon is not limited to Malekula, but is found throughout the Central New Hebrides, and in the Santa Cruz Archipelago as well. At the same time, final b in Atchin tends to be unvoiced, and is generally represented by p in Uripiv.

Most of the labials may also be velarised in almost all Malekula dialects. In Atchin the resulting sounds, bw, pw, mw, have special occurrences that will be in a subsequent section of this grammar.

1.2. SOUND CHANGES WITHIN THE LANGUAGE

1.2.1. Vowel Harmony

The Atchin language possesses no such elaborate system of vowel harmony as the Finno-Ugrian languages, yet there is a type of harmony which needs to be understood. It consists in the change of a vowel, either medial or final, in certain words. These words are not numerous, and the changes seem to be limited to them. They are, however, common and important words. Chief among them are:

1) the article,

2) a few nouns when used along with the demonstratives and possessives,

3) the verbal particles of the 3sg. past and future.
1.2.2. The Agreement of the Article

The root form of the common article in Atchin is na, thus: na-mboŋ 'day'. The vowel, however, harmonises with the vowel of the following noun, as in nä-him 'house'; ni-al 'sun'; nö-تسين 'penis'; nu-mbo 'song'. In the last word, in fact, we have prenasalisation of the initial consonant also, for the phrase 'to sing a song' is tu-lu-lu po. It will be seen, however, that vowel harmony does not mean that the vowel of the article becomes the same as that of the noun. That is what happens in the Banks Islands (Codrington 1885:108), but the Atchin use is quite different. In all the changes undergone by words in Atchin, sentence accentuation plays a large part, a part which still calls for further study. There is no doubt whatever that laws of sentence accentuation lie at the root of the changes of the article in Atchin. The general laws of vowel harmony undergone by the article may be stated as follows:

Na is the normal form of article if the noun bears the accent: na-hut 'louse'.

N' is used before the homorganic consonant d, and its unvoiced counterpart t: n'das 'sea'; n'tal 'rope'.

Nä is used before e, i, ü, and before a if the article and not the noun bears the accent. Also nä-sak 'my name' (3rd person nä-산 'his name', by double umlaut), nä-tsai 'mat skirt'.

Ní before a, e, o in accented syllables: ní-al 'sun'; ní-säl 'path'; ní-tan 'ground'. This does not happen, e.g. in the Seniang dialect, where na-ai 'tree', answers to Atchin nä-i.

No before o, e.g. no-nò sak 'my things'; no-wōf 'paddle'. This form can then suffer umlaut, as in nö-تسين 'penis', where the following i modifies it to ö. It is also used in no-rän 'his food', without doubt by analogy with no-rak 'my food', though even here it is out of place.

Nu us used before back or low vowels.

Nd is used before r for ease of enunciation: n-dram 'yam'; n-dra 'blood'. Spelling n-dr in this fashion serves to show that it is the r which takes the corresponding stop before it, and to distinguish it, e.g. from n'das 'the sea', where the d is original. There is a secondary form also in the case of the word ram 'a yam', i.e. ni-rام, used for ní-ram under conditions to be mentioned later. This is presumably the older usage; n-dram being a later contraction. Similarly ní-tǎŋ and n-dǎŋ 'basket'.

1.2.3. The Agreement with Demonstratives and Possessives

Nouns ending in a change this into ° when followed by a demonstrative or possessive embodying the vowel a. This is really a type of backing, or "brechung", to use a German expression. Examples: nu-wa 'water', but nu-wò sak 'my water'; buha 'pig', but buhò sak 'my pig'. In this instance the usage extends to other compounds of buha: buhò pal-pale and buhò liv-töv, special types of pig. The vowel of the possessive itself undergoes this change in the 2sg., when sa-k becomes so-m. This represents an older *sa-mu, and the backing effect of the subsequently lost vowel persists. Combinations of backing and umlaut then give us the forms of the possessives: sa-k 'my', so-m 'thy', sā-n 'his'; or the possessive applied to things to drink: no-mak, no-mom, no-mwān.

Sometimes the same effect is obtained when a suffix which contained the back vowel u at an earlier stage of the language, but has now lost it, is added to a noun: miro-m 'thy mother', for *mir-a-mu; tōo-m 'thy elder brother', for *tua-mu, in just the same way as som above.

A more complicated example is seen in the expression no-nò som 'thy thing'. The root is na-na 'the thing'. This word has first become na-nò under the influence of the possessive, and then the article has been harmonised with it according to the laws stated above.

Rather different and not very clear is the grading in mwere 'man', mwar'ok 'that man', mwer'a 'this man'. That the original root vowel was e one gathers from comparisons outside the language, but it is not clear why the modification to a takes place before the demonstrative ok.

1.2.4. The Agreement of the Verbal Particle

The statement of the laws by which the vowel of the verbal particle, in the 3sg. past and future, harmonises with that of the verb following, is a very difficult matter, complicated by the fact that the initial consonant may also undergo velarisation. The simplest forms of the particles are mi past, and pi future; they may become mwi, mu and m' for the past, and pwì, pu and p' for the future respectively. Under what conditions does this happen?

The normal forms are the velarised mwi and pwì, and these only change when the use of a velar consonant is phonetically different. As language in general tends to work for ease of enunciation, so here Atchin is aiming at euphonic pronunciation.

---

This word is not really an exception to the laws just stated regarding the article. It answers to n-wa; the u being merely a fuller enunciation of the initial semivowel, and it is conceivable that it might be written n-uwa. It answers to Indonesian wayar.
1) Mi is used before such consonants as the native finds it difficult to pronounce w in combination with: these are initial m, initial t followed by a back vowel, and initial w followed by a front vowel. Examples of mi are seen in mi män 'he gaped'; mi mats 'he died'; mi ma 'he was hungry'; mi ma 'he came'; mi mä 'he went'; mi wa-wan 'he kept on going'; mi wiel 'he went away'. We also have a rather unexpected mi uroi for m'uroi 'he ate'.

2) Mu is used when the first vowel of the word is a rounded vowel or consonant, i.e. has the elements of the velar consonant w. These vowels are u, o, ö and frequently wa and we. Examples of this form are: mu luha 'he returned'; mu roge 'he heard'; mu rubatsi 'he untied'; mu ji 'it shone'; mu tori 'he led'; mu tsöv 'he fell'; mu tur 'he stood'; mu wala 'he ran'; mu wi-tsöv 'he made to fall'; mu womu 'he preceded'; mu wuren 'he said (to him)'.

3) M' is used normally before labial consonants other than w, and before initial u: m'pep 'she bore a child'; m'betseléhi 'he sought'; m'bon 'it grew dark'; m'pal 'he sacrificed'; m'un 'he dived'; m'uf 'it rained'.

The particle of the future is very similarly used. Pi is used for pwi before all labials, including w: pi ma 'he will come'; pi mara 'he will hunger'; pi mats 'he will die'; pi p'ok 'it will be true'; pi wan 'he will come'; pi wä 'he will go'. One verb - tigei 'marry' - takes both the velarised and the plain forms. Pu is used under exactly the same conditions as mu: pu luha 'he will come back'; pu ma-lake 'he will become a young man'; pu pono 'it will be dark'. The particle ar which indicates repetition, takes either pwi or pu. In the texts p' is used before uroi 'eat', and its frequentative uru roi.

Many verbs transgress these rules, however, being used with more than one form of the particle, apparently at the speaker's will. This serves to show that the whole system - which in its delimitation of uses is peculiar to the Small Islands - is still more or less in a state of flux. In other languages in the northern New Hebrides and Banks Islands the harmony is a simple agreement of vowel between particle and verb. In Atchin, however, the vowel of mwi cannot become e, for if it did the form would be the same as that of the lsg. of the same particle.1

Amongst the verbs which are variously used in Atchin may be mentioned the following: hitsi 'copulate' (mwi and mu); kete 'make' (mwi and mu); kila 'know' (mwi and mu); lihe 'drag' (mwi and mu); liwe 'shoot' (mwi and mi); rewitsi 'kill' (mwi and mi); tei 'fashion, form' (mwi, mi, mu); ma 'come' (mi, mu).

1See Codrington 1885:174 for Banks Islands and New Hebrides, and Ray 1926:339 for Ambrym (Fanting dialect).
1.2.5. Umlaut

The vowel change known as umlaut consists in the raising of a vowel (and incidentally the fronting of it also) under the influence of a neighbouring high front vowel, generally i. This i may precede or follow the vowel it affects, but in Atchin it normally follows. There are some cases in which a similar change takes place with no trace of an i in the word; sometimes it is the effect of an i which formerly existed, but has now been lost, in others the reason for the change is not known. The vowels affected by umlaut and their resultants are as follows:

- a followed by i becomes ä, which has the same sound as e.
- o followed by i becomes ö. This is not a regular change.
- u followed by i becomes ü. This also is not a regular change.

The same changes take place when u is the vowel of the following syllable, but not so regularly. Many words can be used with or without umlaut when u is the following vowel. It is possible to say either wanu or wānu for 'village'. This occasionally happens also before i: n'das or n'dās 'sea'. In the following examples the original IN root is given first, then the commonest Melanesian form, which can be regarded as that which first was brought to Atchin, and lastly the Atchin word as actually used, with its meaning:

<table>
<thead>
<tr>
<th>IN</th>
<th>MN</th>
<th>Atchin</th>
</tr>
</thead>
<tbody>
<tr>
<td>tānis 'weep'</td>
<td>tāni</td>
<td>tān 'weep'; tānši 'weep for'</td>
</tr>
<tr>
<td>hutan 'forest'</td>
<td>uta</td>
<td>hūt 'forest', through *huti</td>
</tr>
<tr>
<td>ma-huqip 'living'</td>
<td>mauri</td>
<td>māur 'live', for *māur</td>
</tr>
<tr>
<td>na-jaln 'the way'</td>
<td>sala</td>
<td>ni-sāl for *ni-sali</td>
</tr>
<tr>
<td>na-(q)aran 'name'</td>
<td>(s)asa</td>
<td>nā-sān for *nā-sani</td>
</tr>
</tbody>
</table>

Some umlaut effects occur within the Atchin language itself; thus the word for 'right, properly' may be either (w)uʃoni or (w)uʃon. In other cases there are modified vowels where no comparison with IN roots is possible, e.g. in tsünőb 'man', and as it so happens that this word has no relatives on the mainland of Malekula, it is impossible to say how the modifications arose in such a case.

The only other language, apart from Malekula, in which wholesale umlaut takes place is that of Rotuma, but in this case the umlaut modifications serve a grammatical purpose which they do not serve in Atchin. In the case of Atchin, the notes on comparative phonetics will show that an intermediate stage between the original IN (or nearest MN) form must often be understood in order to account for the umlaut. Many final vowels, found in other dialects (e.g. Malo) are lost in Atchin. It
would seem that these vowels first weakened to i, then disappeared altogether. This explains the uumlaut in the possessives:

<table>
<thead>
<tr>
<th>Atchin</th>
<th>Pronoun</th>
</tr>
</thead>
<tbody>
<tr>
<td>sak = *sa-ku 'my'</td>
<td>i-na</td>
</tr>
<tr>
<td>so-m = *sa-mu 'thy'</td>
<td>i-ni-ki</td>
</tr>
<tr>
<td>sā-n = *sa-ni = *sa-na 'his'</td>
<td>i-ni</td>
</tr>
<tr>
<td>sā-r = *sa-ri = *sa-ti = *sa-ta 'our(excl.)'</td>
<td>i-kir</td>
</tr>
<tr>
<td>sā-mam = *sa-mami 'our(incl.)'</td>
<td>kiam</td>
</tr>
<tr>
<td>sa-mi does not modify, = 'your'</td>
<td>kami</td>
</tr>
<tr>
<td>sā-r = *sa-ri = *sa-ra 'their'</td>
<td>i-ni-ri</td>
</tr>
</tbody>
</table>

Whether the pronouns have determined the forms of the possessives, or the actual stages have in all cases been passed through, cannot now be proved. If the pronouns are, as in some cases they must be, suffixed to the noun, the modification takes place in the final vowel of the noun: mira-k 'my mother'; miro-m 'thy mother'; mirā-n 'his mother'. In the Texts the letter ā has been introduced to indicate an e-sound that has arisen by uumlaut. It is thus a letter used for historical, not for phonetic purposes.

Uumlaut modifications arise also in some cases either within the body of the word or in the last vowel when it is compounded with another word containing i or e: reņa 'in', but reņān 'in it, therein'; tan 'earth', but nā-tan 'on the ground', apparently for nā+e+tan; nā 'at', but nā-in 'here'.

It must be stated, however, that uumlaut is not invariably the result of a meeting between i and another vowel. It does not take place when the transitive ending ni is added to a word. Thus waņāni 'feed'. This is perhaps the effect of the accent falling on the vowel that under other circumstances would be modified. Similarly, laŵi 'take'; tsalil 'out'. It does, however, occur in some reduplicated words, e.g. laŋa 'mad', reduplicates as laŋalāŋ.

1.2.6. Reduplication

This brings us to discuss the general phenomena of reduplication. There are six types of change in Atchin.

1) Uumlaut may take place, as already mentioned: laŋa - laŋalāŋ 'mad', see N.39.

2) The final vowel may be omitted in each syllable: liwe 'shoot' - liwilw, A.20.

3) The final consonant may be omitted in the first syllable of the reduplicated word: wan 'go' - wa-wan 'keep on going'; kal 'hold' - ka-kal 'hang oneself', B.12.
4) The first syllable only of the word may be reduplicated: wa-warong 'keep looking for shell-fish', from root warong; rawi 'extract' - ra-rawi.

5) A word ending in a consonant may be reduplicated in full, in which case a slight sound of a is heard between the two halves of the word, due to full enunciation of the final consonant of the first syllable: lek 'stay' - lek(a)lek 'stay a long time'; rep(a)rep 'preparatory movement in a dance'. A similar effect sometimes accompanies the partial reduplication mentioned above: mots(a)motsoul 'keep nibbling'. This connecting vowel is not written in the Texts, but a hyphen serves to show where the reduplication takes place. A similar linking vowel is developed in other languages, e.g. Eromangan dalayau 'with me', from dal 'with', and yau 'I', and in the Micronesian language of Ponape, where lap-a-lap = Atchin lep(a)lep 'very big'. In Ponape the connecting vowel is more clearly pronounced, and harmonises with the stem vowel of the original word.

6) In some cases the entire word is reduplicated with no change or other addition, if it ends in a vowel: wa 'go' - wa-wa; and again a word may be used in this form without any simple form existing: pwere-pwere 'a sow'.

The Vao language has a type of reduplication in nouns which does seem to have grammatical value: nātun 'a child' - nā-nātun tāhik 'my younger brother's wife (not child)'. There is nothing like this in Atchin.

1.2.7. Velarisation of Consonants

By velarisation of consonants is meant the addition of a w-sound immediately after the consonant. This is not such a close union as in the Banks Islands or Nguna. The Atchin mw is not quite the same as Mota m, which seems really to be ŋ, i.e. a nasalised w, and the Atchin pw is not the Mota q, which seems best described as a velarised p with simultaneous glottal closure, in the International Phonetic Script pʰ.

It is worth noticing in passing that this Mota sound answers to p or b in Atchin and mb in the Seniang of South West Bay, Malekula. Thus:

<table>
<thead>
<tr>
<th>Mota</th>
<th>Atchin</th>
<th>Seniang</th>
</tr>
</thead>
<tbody>
<tr>
<td>qoŋ</td>
<td>poŋ, boŋ</td>
<td>mbon</td>
</tr>
<tr>
<td>qatiu</td>
<td>bat(u)</td>
<td>(ni)mbatu</td>
</tr>
</tbody>
</table>

'darkness'

'head'

In Atchin any labial consonant may be velarised, which of course at the same time means that the consonant is also rounded when the lips are protruded to pronounce w. Examples can be given of words existing
both with and without velarisation: the possessive for drinks is no-mak 'my drink', which in the 3sg. becomes no-mwän.

In the same way a word may be velarised in one dialect and not in another: Vao bæræn 'cave', is Atchin pwäræn.

1.2.8. Nasalisation of Consonants

In some languages, such as Fijian, all the voiced plosives are habitually combined with the homorganic nasal, and cannot be pronounced without it. This is not so in Atchin, where, e.g. b and mb both exist independently of each other. Nasalisation of the root occurs, and seems to have definite grammatical function to perform in only one case, namely the plosive p. In some instances this is voiced and becomes b, in others it is nasalised and becomes mb. Following a verbal particle beginning with m the p is voiced, following the article it is nasalised. The latter phenomenon may have a historical explanation, for in some of the languages of central Celebes the article (which is really ñ) combines with the following noun to form the homorganic nasal. The following examples from Atchin will make the rules clear:

1) unvoiced form: e poñ 'it is dark'
   voiced form: mu boñ or m'boñ 'it was dark'
   nasal form: na mboñ 'the day or night (24 hour period)'
2) unvoiced form: tul-tulo po 'render a song'
   nasal form: nu-mbo 'a song'
3) unvoiced form: e pe 'it is like'
   nasal form: ne-mbe 'the place where'
4) unvoiced form: ar pal 'they sacrificed'
   voiced form: m'bal 'he hit'
   nasal form: nä-mbal 'consideration-pig'
5) voiced form: ra 'blood'
   nasal form: n'dra 'the blood'

1.3. Accentuation

The importance of accent in Atchin has already been illustrated in the rules governing the form of the common article. To state definite rules for the place of the accent really involves knowing the older form or forms of the word, the form which it possessed when it entered the Atchin language. This, of course, is not always possible. When a noun has been truncated of an original syllable, at any rate a final syllable, then it tends to bear the accent on the new final syllable if
it is disyllabic, or the last but one if it has more than two syllables. This is not always the case, however, and it is in this regard that the empirical element comes in. The accent, however, tends to recede: so much can be definitely stated. Thus 'norem a 'ma le'; 'na-mer 'parrot'; but against this, where a syllable is lost, 'ni-al 'sun', in spite of the fact that the IN original is a(ł)raw 'day'. This tendency, contrary to what has already been said, to draw the accent back to the beginning of the word, sometimes, at least, overcomes the accent which results from the shortening of the word. In a similar way, IN γumah gives Atchin 'nä-him 'house'. The tendency to penultimate accent is generally stronger than the tendency to keep the accent where it was in the original word.

1.3.1. Accent of Doubled Words

The phonetic aspect of reduplication was studied in the preceding paragraphs. The general tendency is to throw the accent back: 'wa-wan 'keeping on going'; 'ka-kał 'hang oneself'; 're-rei 'keep pulling'. If the entire word is reduplicated, the compound takes the accent on the first syllable: 'pwere-pwere 'a sow'. The same thing holds good if the original word ends in a consonant: 'lep-lep 'great', and that is why the neutral vowel a tends to creep in.

1.3.2. Effect of Proclitics on Accent

A proclitic is a syllable or word that is added in front of the main word, and which may, in different languages, either attract or fail to attract the accent to itself. Thus the verbal particles in Atchin are proclitics. As a rule they do not cause any shift of accent; one says, mwi 'ra la 'he sailed'. In specific instances, however, the accent shifts from the verb to the verbal particles. These instances may be grouped as follows:

1) The accent falls on the verbal particle e (a) before adjectives: 'e läp 'it is great'; 'tsünöb 'e läp 'a great man'. As against this, e 'wala 'he runs'. (b) before negatives: 'e tsiga 'it is not'; but this rule is limited to the actual negative adverb tsiga or tsa.

2) In compounds of the locative preposition e with a place name, a similar change of accent takes place: 'e Ra 'at Raga'; 'e Tsan 'on Atchin'.

3) The verbal particles mwi, etc. of the 3sg. past, and pwi, etc. of the 3sg. future, exercise the same effect on the accent as does e: 'mwi tsa 'he was not'; e ro 'pwi tsa 'he did not want'; 'mwi wise? 'How was
16

It should be noted, in connection with (1) above, that the fact of the assimilation of the e to agree with the following vowel, the attraction of accent still occurs: 'o-on 'six'.

4) The reference particle na also draws the accent to itself, whether it have its strict ligative force or be used, as it sometimes is, as a locative preposition: 'na Tsan 'at Atchin'; 'na la 'on shore'. This is seen even in a word that was compounded long before it reached Atchin: 'e sa'ngawül 'ten'. This particular type of attraction, then, is historically pre-Atchin.

5) The preposition ta is proclitic: 'ta Ba 'the people of Oba'; 'ta lim 'in five days'.

1.3.3. Enclitic Accent

An enclitic is a syllable appended to a word, usually without accent of its own, but liable to affect the accent of the word to which it is added. Some syllables in Atchin draw the accent forward, so that the penultimate accentuation is still maintained. Such a syllable is the transitive suffix -ni with verbs: wa'qani 'to feed' (IN 'wa'qan); tu'loni 'to lead'. Another is the syllable te, the second element of the negative se ... te: e se 'sa te 'there is no-one'. When te has its other, depreciatory or diffident meaning, the same change of accent takes place: A.52 'E, 'buho'k pwi 'tsa te 'Eh, not that pig, please!' This is directly parallel to C.12 Ini e ro pwi 'tsa ni 'he did not want it', and exactly counterbalances the normal accentuation, 'pwi tsa 'it shall not be'.

It is necessary to add that although, as shown, tonic accent is a definite factor in Atchin, this refers only to prose speech. Songs do not have the same strong accentuation; but as they are written in a special "song language" the problem does not meet us directly here.

2. Syntax

2.1. The Principles of Atchin Syntax

It is just becoming recognised that the grammar of a Melanesian language cannot be written in the same categories and order as that of a European language. The first real attempt to construct grammar in which European categories are set aside is that of Tagalog by Bloomfield (1917).¹

¹This work did not come to the writer's knowledge until after the writing of the article aforementioned and the preparation of the major part of the grammar. A study of volume two of Bloomfield's work, however, has led to the rearrangement of the work along lines rather similar to his, especially in the placing first of the most important and characteristic part of the grammar, i.e. the syntax. This now follows the section on phonetics, and morphology comes last.
In Atchin it is particularly necessary to set aside European categories, though it is convenient here for practical purposes to retain the division into the usual 'parts of speech'. These groups, however, must be rearranged into two larger groups, which are called 'time words' and 'object words' respectively. By 'object words' are meant such as are not subject to distinction of tense, and by 'time words' those that are. This distinction between object and time is the fundamental grammatical principle of the Atchin language, and indeed of the languages of Malekula in general, and is found to a slightly less extent in Ambrym and Paama also. This is the distinction that Bloomfield made for the first time in Tagalog, and he thus defines what he calls "transient words": "Transient words express an element of experience viewed as impermanent, i.e. belonging to some limited portion of time" (Bloomfield 1917). His term for 'object words' is "static words".

This development of time-aspect has not, however, been carried through to the complete neglect of the place or object principle; demonstratives and directives are still well in evidence, but it is important to observe that they are demonstratives not only of objects but also of times. The words that give emphasis to nouns may also give a similar emphasis to verbs. Thus le may be a demonstrative with all 'parts of speech'. It may be profitable to quite again from the earlier paper on the subject of Atchin syntax (Capell 1935:200-02).

Certainly here as elsewhere the unit of speech is not the word but the sentence. We express in a sentence a thought that is already complete in our minds. Emphasis is laid on various parts of the thought in different languages.

... In English we have simplified our statements to a very large extent; in the languages of the Far East, such as Tibetan and Chinese, they are simplified still further. When we come to Melanesia we find that although a considerable amount of simplification has taken place (and one need only refer to the "Papuan" languages and many of the tongues of western Indonesia in contrast), still a good deal of definition is made that is not made in English. That definition in most places tends to be definition of concrete things and acts. In the sentence "The man chased the boy round the tree", the Melanesian would tend to say "man that he chase him boy round tree" - i.e. the emphasis is not on the time of the action, but on the persons concerned. The act could be seen and the actor noted: when it happened was of less importance.

Now in Achin and Uripi we find the reverse tendency at work. True, there is still the definition of the agent and the object - the verbal pronouns and demonstratives are still well in evidence - but the time of the action becomes almost a ruling concept. That, of course, is where the difficulty for the foreigner comes in. He has not only to learn native words and idioms, but has to reorientate his methods of thought along the lines of native methods. He has to throw
the emphasis where the native would throw it. In the lan-
guage we have been studying this emphasis is on the time

element.

What is the effect of this emphasis on time, and what guides
its application? In the first place, the only things inde-
pendent of time relations are those that persist unchanged
throughout all experience. The man who acts is the same before
as after; so his name "man" is independent of time. The boy
who is chased is still a boy afterwards, so his name "boy" is
unchanged. If, now, we extend the sentence by adding the words
"till he caught him", we add elements that can be affected by
the time emphasis. "Till" is not the same in the given sen-
tence as in the sentence "The man will chase the boy round the
tree till he catches him" - to us, perhaps, it is, for all
practical purposes, the same, but not to the native. In one
case he says, "What happened?" - why, he chased him, "and it
came he caught him"; in the other, "What will happen?" - why,
he will chase him, "and it will come he will catch him".

Take now as further examples two complex examples of future sequence
from the Texts: K.44 Ko mo läsi na-mwer pwl sa pu row pwi tsövha, ko po
lihi po mats 'When you see a parrot flying by, hang yourself so that
you die'; K.52 Pe un pe kete pi-pe ni-se? 'What shall I do when I dive?'
The literal translation of the first is: "And you have seen parrot it
shall be one it shall fly it shall be past, then you shall hang-yourself
you shall die", of the second: "I shall dive/ I shall do/ it shall be
like what?" Neither of these two make sense so expressed in English,
"but in the native mind it must point to a definite analysis of the
whole idea, made before that idea has been expressed". The idea is the
connection between the sight of a bird and suicide, the bird being the
speaker's spirit, a sign to the girl that he himself is then dead. Let
us then analyse the stages of the suicide. First, before she carries
it out, she has seen the bird: mo läsi, past tense, 'you have seen it
first'. The bird, naturally, is not affected by the time relationships,
it is simply na-mwer; but at the time of speaking it has not yet ap-
peared, it is pwl sa "future-one" bird. Its flight also is future: pu
row, and if that is so, then its passing is also future - pwi tsövha
'it shall pass by'. Then, in the event of all those future possibil-
ities being realised, and you have seen it - the complete past of mo
läsi - you are to hang yourself - po lihi - and if you do that you will
die - po mats.

The second example is really simpler: the main idea is that I have
something to do. Before that, however, I shall dive - pe un. When I
have done that I shall do something else - pe kete. What sort of action
will that be that I am to do: it shall be like what - pi-pe ni-se?
This is the logical splitting up of the ideas that English prefers to
subordinate to the main thought, I shall do something. English takes
first that root idea - I have something to do; and subordinates the condition that I have to dive before I do it; Atchin takes the ideas in their strict time sequence: first I shall dive, then I shall do something, then what will that something be like?

To quote again (Capell 1935:202):

If it remains true that the unit of speech is the sentence, it seems true also that the sentence itself is not the same in every language (the Latin "periodic construction" and the English, say, of Macaulay is a case in point), and it would seem that to the Atchin native each section of the idea becomes a separate sentence.

- taking the second example above: Pe un - pe kete - pi-pe ni-se7, and similarly in the first example, or in U.44, another long example.

The words and phrases hang together (and this may be the psychological ground for the changeable vowel of the verbal particles),1 but all that connects the whole idea is the futurity of the matter. In fact, we have not really an elaborate logic carrying the idea of futurity to its utmost possibility, so much as a very elementary thinking in disjointed ideas, each expressed separately, and only bound together by the future particle.

A passage in Jespersen 1924:26-7 so aptly describes the principles of Atchin syntax - though à propos of something else, and quite unintentionally that the length of the quotation may be forgiven:

Apart from fixed formulas a sentence does not spring into a speaker's mind all at once, but is framed gradually as he goes on speaking. This is not always so conspicuous as in the following instance. I want to tell someone whom I met on a certain occasion, and I start by saying: "There I saw Tom Brown and Mrs. Hart and Miss Johnstone and Colonel Dutton ..." When I begin my enumeration I have not yet made up my mind how many I am going to mention or in what order, so I have to use and in each case. If, on the other hand, before beginning my story I know exactly whom I am going to mention, I leave out the ands except before the last name .... It is clear that the latter construction, which requires a comprehensive conception of the sentence as a whole, is more appropriate in the written language, and the former in ordinary speech.

This is exactly what Atchin does, each idea is treated as separate sentence, and this accounts not only for the paratactical arrangement of clauses, but also for the long series of ko's which may begin them, like English 'and'. The only difference is that English has reached the stage of reflection and rejects such a series of 'ands' as ungraceful, while Atchin is content with the natural order of things.

1And it might be added, for the fact that the future sequence is very definite, while that of the past is not so strict; the indefinite may supervene; see below, section 2.4.3.
We now go on to consider each aspect of Atchin syntax separately, beginning with the elements of the simple sentence. Then we take compound sentences, i.e. those that consist of more than one principle clause, connected or disjoined by 'and' or 'but', and thirdly the complex sentence, in which subordinate clauses are found.

2.2. SUBJECT, OBJECT AND PREDICATE

2.2.1. The Subject

(a) Its Nature

The subject of a sentence is normally a noun or a noun-substitute. The latter may be a pronoun or a phrase equivalent to a noun. It is not necessary to give examples of nouns serving as subjects. There is no special particle to indicate that the given noun is a subject or an object.

Pronouns are of two sorts, cardinal or verbal. The cardinal pronoun need not be expressed unless there is a certain degree of emphasis thrown upon it. When the cardinal is thus used, the verbal pronoun is also used after it.

Noun-equivalents require more detailed consideration. These are phrases consisting of more than one word, the whole of which together is treated grammatically as a noun and so becomes the subject of a sentence. Thus in C.11 Ko mwi sa ko e wurel e re i-sen 'Then one (of them) said he wanted it for himself'. Here the past tense sign mwi gives the time of the whole sentence; as sa, being a numeral, is a true time-word, needs such a tense-particle with it (at least when it definitely refers to 'one' in a numerical, not an indefinite sense). The subject of the main clause is then itself a clause, (ko) mwi sa '(and) one (sc. of them)', in the past tense. Similar in nature is K.46 Pwi sa pu un wä 'Let one (of you) dive' - except that here the sequence is future. Again in K.78 Ra kete ni-se pwi sa, na ikir pwi sa pwi tigel lit. 'we shall do something it will be one, that we it shall be one will marry (sc. her)', i.e. 'Let us do something so that one of us may marry her'. The subject of pwi tigel is ikir pwi sa 'we it shall be one', or in English idiom, 'one of us'.

(b) Its Position

The subject precedes the verb, the only intervening words allowed being any attribute of the subject that may be added to it. An explanatory or emphatic subject may follow, however, for emphasis: G.11 Noreman mar matur no-ut e pon, inir wi[jin sän 'the man slept that night, he and his wife'. A.20 Win a mu tsubul kele Norifere, inir tasin
watsin 'The girl came down again to Norishere, she and her younger brother this time'.

The inversion is normal after the verb we [or e] in the sense of 'to be', just as in English we say 'there is' with a noun following. Thus:

A.17 Pi we râm n'ëhi ok 'That fish shall be your food'.

C.14 Pi e sale sak 'This will be my landing place'.

cf. also JJ.21, where the subject is sa 'one (day)': Pi we sa po ar sekeni ... 'It will come about someday, that you will find ...', or 'A day will come when ...'.

(c) Expression of Number

As there is no inflection of the noun itself to indicate number, the fact of duality or plurality must be expressed by the verbal particle, which varies for person and number. As a general thing this suffices, and in the case of inanimate objects, even that may not be strictly adhered to, at any rate apart from the subject-words. Atchin has, however, a means of making clear the distinction of number when necessary, but does not employ this means when the context is sufficient to the speaker's mind. So in L.21, the speaker Ias, greets his two younger brothers with the words, Were-wereko tasik were-werek! Ko kom m'ok wiel ńa-mbe le? 'My dear, dear little brothers! Whence have you-two come here again?'

A personal plural, that is generally definite in nature, can be expressed by the addition of the cardinal pronoun after the noun. The use of a dual pronoun is impossible, as the only dual forms are the verbal pronouns. In this case, to express a dual, the plural cardinal is used, but the following verbal particle is in the dual. So we say tsünöb inir 'the men' (note that this does not generally mean just 'men'; the plural, as stated, is definite, and the indefinite is given simply in the verbal pronoun). The pronoun may precede the noun and give another sense: A.20 inir tasin 'she and her brothers'. This is the normal way of expressing 'and' with two personal nouns. The verbal pronoun is that of the implied person and number. So JJ.26 Ko kami Tahar ko wiel 'you and Tahar go away', the implication is 'you two', hence ko 2du. CC.1 Tsünöb sa niri wîjën sän or wan or pale ni-ăr 'A certain man and his wife go and build a fence'. The conjunctive pronoun is that of the 3pl., but the resultant phrase is equivalent to 'they two', hence verbal pronoun or, 3du. indefinite.

These are the general rules, which are further illustrated in the following examples:

A.25 Win a iniri tasin or mul 'The girl and her sister departed'.
F.6 Inir tewen sän mor wä e-hut 'She and her husband went to the mainland'.

G.11 Noreman mar matur no-ut e poŋ, inir wiʃen sän 'The man, he and his wife slept in the night'.

Q.14 Ko inir wiʃen sän e wä Wala 'He and his wife go to Wala'.

This example looks grammatically wrong, seeing that the verbal particle (e) is in the singular. The explanation is probably that the attention is concentrated on the person of the husband, although only the wife is mentioned, as though it read "He went with her (his wife) to Wala".

A trial number is shown in K.95 Inir buän ko win a ko inir e-toi mar wan 'He and the grandmother and the girl went all three'.

It is possible also to join two nouns with the conjunction e 'and', as in G.23 Miräm e timän e wa na wan nam e Siu ... 'Mother and father told me that, when we went to Malo ...'. The singular here treats the two parents as one combined idea, 'the family told me ...'.

There is a remarkable example of what seems to be bad grammar in Q.79 Ko po wan ko miräm por kete rin bua pu-roŋ, which appears to mean 'You go (with) your mother and the two of you shall (or are to) just prepare food for the pigs'. The first verbal pronoun is of the 2sg. future, po 'you are to ...'; then comes the noun miräm 'your mother', thrown in as a sort of after-thought; finally the idea becomes less directly expressed; instead of the expected ko 'you two shall ...', one gets por 'they two shall ...'.

2.2.2. The Object

(a) Its Nature

The object may be of the same nature as the subject, i.e. a noun, a pronoun, or some noun-equivalent other than a pronoun. The first group does not call for illustration, the second will be fully illustrated below, in the discussion of suffixed pronouns. What has been said in the previous section about transitive verbs must also be borne in mind. The 3sg. pronoun object is frequently - indeed regularly - understood. So in A.2 Nu-a e koi e 'the river carried (him) away'. In other persons and numbers, however, clarity generally requires the object to be expressed: A.7 Mi waŋani-ri 'he fed them', as contrasted with A.6 Mi waŋani 'he fed her'. The difficulty often is to decide whether the final i is the transitive ending or the pronoun of the 3sg. Much must depend on etymologies, which require excursions outside the bounds of the Atchin language, and it is probably safer to say that the third person object is really expressed, but in most cases coalesces with the transitive ending, both being i.
Sometimes objects of other persons can also be understood, but only if the context is perfectly clear. Thus in P.14, as Tahar distributes the fates of men, he says Inik po ron. N'das pu uroi 'You - you will be drowned. The sea will devour (you)'. In the preceding sentence the object is expressed, when Tahar says Ko bahi p'uroi 'm 'and a shark will eat you'. In the former example the person is decided by the previous sentence; in the latter not so.

(b) Its Position

The natural position of the object is immediately after its verb, and many examples in the preceding pages show it. There are two other possibilities, however. The object may in certain cases precede the verb, or it may be attached, if a pronoun, to something that is not a verb.

The object may be placed before the verb for added emphasis. An example of this practice is found in B.8 Mwar' a, ni-wat e wala roni 'As for that man, the rock is sailing away with him'; K.73 Masal re-re wu'onen ko ar mo[m] ni 'Fish at that time they refused her'. A similar inversion is possible in many other languages, including Latin, for the same purpose.

If the verb is followed by an attribute, the pronoun object is attached to the attribute rather than to the verb. In a specifically transitive verb, thus in K.65 Ko e re pi ma pwi läs kele ia 'He intends coming to see me again', the adverb kele intervenes between verb and pronoun object (ia), where the transitive ending also is transferred to the adverb. So in N.6 Rets mi wehi luha-ni ni-mal 'Rets pulled the kite back'; A.67 Me läs woje-ni 'I knew it rightly'. An exception to this is provided by the negative of which the second element, te, comes at the end of its phrase: L.22 Me se läs kami te tua ok 'I have not seen you this long time'; K.92 No wa po se tsi're'r te 'I say you are not to follow them'. In fact it is really only adverbs of manner - themselves largely (though not exclusively) time-words, that admit of this transference of the objective pronoun. In some languages - as in the southern Solomons - such a limitation is not so fully made.

2.2.3. Predicate

(a) Verbless Sentences

The absence of the substantive and possessive verbs from the Atchin language brings about verbless sentences, as happens in other Melanesian languages as well. JJ.17 Ni-se le? 'What is this?' is a clear example. So is JJ.20 Na-nā'k nāsān na-ni 'the name of this thing is "coconut"'. Others are:
A.1 Na-sup sa, na-tun e-ru 'A certain man had two sons'.
A.41 Timak kisen le, niri pu roṣ 'My fathers are here, just they'.
C.1 Tsünöb sa, mwærä Mejeware 'There was a man, a native of Mejeware'.
H.1 Tsünöb sa mwi rewtsi Maki, ko wĩewĩn sän 'A certain man killed a Maki; now he had a wife ...'.
H.12 I-si maliŋen? 'Whose bed is it?' Lit. 'who his bed?'
BB.6 Iki le rik? 'You here indeed?'
HH.24 Na-wün nä-nä rak sa ni-ok 'There is a smell of some food for me there'.

Many of these are naturally the beginnings of stories.

The verb to 'remain', at times approaches the substantive verb in meaning, and the same is true of we 'go', which weakens to e. The following are examples of the latter verb:

A.12 I-se pi we râm n'ehi ok 'Here shall be your food - that fish'.
A.17 Pi we râm n'ehi ok 'That fish shall be your food'.
A.23 Pi we rami n'ehi ok 'This fish shall be your food'.
C.14 Pi e sale sak 'This will be my landing place'.
U.57 Ro lihe buha na inik, pi wâ hi:m 'Let us two lead your pig; it shall go to the village'.

JJ.21 Pi we sa po ar sekeni hanän a mwi-res re-nän 'It will come about that someday you will find good food in it'.

An interesting case is A.28: Ko pi we tewen ko pin we 'If he will become her husband, then let it be so'.

Tô, however, definitely refers to remaining in a place, not simply to existing. No lop 'I am smart'; no tô e-hüt 'I am (staying) on shore'.

(b) The Predicative Article

The predicative article in Atchin is ko. Sometimes it hovers between a personal article and a predicative article in meaning, exactly as in some Polynesian languages. In a sentence such as Näsän ko Mal 'His name is Mal', the combined use is evident. More clearly predicative is R.15: Ko ngo ko buha nen ko 'That, then, is the pig!' The final ko appears to add emphasis. So also is S.14 Mar wa, 'Mwär' a ko ngo' 'They said, 'That's the fellow there!''. cf. JJ.15 Ko näsän i-se? 'What's his name?'

(c) Expression of Time

The occurrence of tense will be studied below. Here we are concerned with the use of the tense signs in simple sentences; the laws of the sequence of tense in sentences containing more than one clause will be dealt with in Section 2.4.3. In the previous section it was seen that in spite of apparent paucity of tense signs, Atchin has really quite an
efficient mechanism of tense. It remains for us to discuss now how this mechanism of tense is used. The main thing to observe is that the particles compounded with ma can sometimes be indefinite in themselves if used with another verb sign that shows the past tense, such as tsi le or ko. Even there there is often a slight difference of emphasis which can be expressed by an English perfect as against the past. Mu ju ko would mean 'it was finished'; e ju ko 'it is finished', 'that's the end'. In L.34 as an interrogative e ju ko? 'Is it over?' The one case in which this interchange does not appear to happen is when ko is strengthened by watsin: DD.9-10 Mwi te ni-al sän ko watsin. Mu sän ko watsin '(Tahar) made his sun (and) it shone'. DD.21 Mar tseli pu roñ ko watsin 'Now they just wandered about'. The omission of ko makes no difference; it is the watsin that calls for the ma particle: DD.22 Wanu mwi res watsin 'The place (became) good'.

The case in which ma has a future reference will be mentioned in the treatment of conditional clauses below (Section 2.5.1.(e)).

The future can never be expressed, however, by the indefinite particles, but always requires the pa forms. The only instance in which these forms lose their future force is in the still unexplained phrase pu roñ, which has already been illustrated.

There have been a large number of examples already of combinations of two particles apparently incompatible with each other. A special case is seen for instance in L.19: Po e ma po wala pwi ser-ser 'Come here and run quickly'. The future particle, 2sg., is combined with the indefinite particle, 3sg., before the one verb. The same phrase recurs in A.49. The indefinite particle is fairly often retained with numerals, e.g. in the same A.49: Po e ma, ikir pwi e-ru 'Come, and we shall be two'; as though the phrase e-ru were regarded as a single unit. Again in A.51 Inik, po e wan 'go, you!' Perhaps in these cases also the frequent use of e ma and e wan in ordinary language has tended to reduce the phrases to a mental unity, to which another particle can be preposed.

The following are the uses of the indefinite particles, of which e is the 3sg.:

(a) It marks a real present tense, of indefinite duration: No mata 'I am afraid'; ko se wuretun te 'you are not telling the truth'; no wuretun 'I am telling the truth'; no tsualeni na-ak sa e wiel 0ba ko mu wít ko 'I am cheering a canoe which is coming from Oba and has appeared (on the horizon)' (part of a magic text). If a past tense sign is added after the verb the result is a complete present, i.e. perfect tense: Or tabu tsile watsin 'They-two have finished cooking now'.
(b) It serves as a historical or narrative past. It may be preceded by a clause containing the ma-particle, but not necessarily. The first tale in the appended collection begins with a long series of sentences whose only verbal particle is e, which must be rendered by an English past. "There was an old man, who (e) had two sons. The younger (e) had sores, and his father (e) did not like him. He (e) smelled badly. He (e) threw him away ..." Under this heading, too, comes the use of the phrase e fu as the ending of a story. See e.g. K.142.

About ma there is one thing to be said, and that is that under certain conditions it can be indefinite even without a past tense sign. This is easier to understand when it is realised that in the neighbour­ ing Vao and Wala, on each side of Atchin, as well as in Oba, Raga and Maewo, farther away, ma is normally an indefinite particle. In a magic text come the words: Me were-were-ni nu-wa sak le 'I pray over this water of mine'. To translate 'I prayed' or 'have prayed' is clearly out of place. The text goes on:

M. pi mini. 'Let M. drink it.
Tä-mäts ok mwi sa we. There is some spirit here.
Mumun ni-wat, mumun näl, It is the spirit of a stone, of a tree,
na-won ok mwi sa näl. let it be nothing that is here.'

There can be no question of a past here; the man on whom the incantation is being said is still sick! In the text previously quoted about cheering a canoe, the last clause mu wöt ko is past: 'it has just appeared'.

2.3. ATTRIBUTES

2.3.1. Attributes of Object and Time Words

(a) Attribute of Subject and Object

An attribute is a qualifying word, or word-equivalent, and the des­ criptive attribute of the object-word is called in European languages an adjective. We have already seen above that Atchin has no real ad­ jectives. Hence the term "attribute of the noun" or object-word. At the same time a purely adjectival construction is possible, and that has been illustrated.

The second construction of the descriptive noun-attribute is a purely verbal one, in which it agrees with the verb of the main sentence in tense and with its own subject in number and person. The following examples will show how the adjectival attribute may thus be used in the indefinite, past, and future tenses.
1. Indefinite:

Wowo vanu e lep 'a big mountain'; no worsurim e pe ko res 'I believe (you) that you are good', i.e. 'I believe you are good'. In the texts:

B.28 E tei na-ak sa e lâp 'He fashions a large canoe'.
E.1 Tsünöb sa e ma-hömb 'A (certain) man was hungry'.
H.32 Se re na-mboŋ e lâp wor 'Not many days yet'.
Q.27 Na-mboŋ e nats kele 'Another day again'.

2. Past:

A.70 Mar läsi buhâ sün mwi lâp 'They saw his many pigs'.
H.9 Mu kete na-na mwi tsats pitew wîfëwîn 'He did a bad thing to the woman'.
L.40 Na-tum rorin mwi tsats 'Your son's mind was bad'.

3. Future:

K.122 Po tsiri wâ ni puloh nats pwi sa 'Let out another bamboo (full) of ants'.
L.7 Ra re-roŋ ikîr ni-wa pwi lâp 'We think we a great crowd', i.e. 'we think there will be a great crowd of us'.

From the Mission translations: Par läsi matsinân sami pu res 'they shall see your good works'; po kete lolomam pi ran 'make thou our hearts good'.

In these future examples the construction is particularly clear; the thing has not yet come to pass, hence the quality cannot be ascribed by an attributive word. 'They shall see your good works', lit. 'works your (shall be) good - "shall be" - because you have not yet done them'. 'Make our hearts (shall be) clean - but they are not yet so!' "We see how the futurity of the main action is transferred to the action also: the quality cannot be present until the act which is to produce it is done. All this is perfectly logical; but Atchin has carried out the logic thoroughly; the majority of languages do not." (Capell 1935:196).

We have also seen that this attribute may stand by itself and form a subject in its own right (Section 2.2.1.). The treatment of the numeral attribute is exactly similar to that of the adjective.

(b) Attributes of the Time-word

This expression is used here in place of the European name 'adverbial modifier of the verb'. It should, first, be observed that an interrogative adverb comes last in its clause. Thus:

A.18 Po wa-waron kele swelîn? 'When will you be gathering shell-fish again?'

The attributes of the time word agree in Atchin with the word they modify as far as tense is concerned, but they are always in the 3sg.
Bearing in mind that just as there is a purely attributive use of the adjective, so there is also of the adverb, we may now illustrate the cases where the adverbial expression agrees in tense with the main verb. Thus:

K. 106 Kami kab ral pwí-res 'As for you, go about your business decently'.

L. 19 Po wala pwí ser-ser! Pe wise? 'Run quickly! Why should I?'
L. 40 Ram ral mwi res 'We walked peaceably' (lit. 'well')
L. 44 Ra ral pwí res watsín 'We shall walk peaceably now'.
M. 3 Na-vül ok mwi sa a e re p'ok kisen 'Another month has passed and it is the same again'.
P. 11 Po tar a pu wele-wele, ko po mats 'You will grow old a little and you will die'.
R. 2 Po lai buha pwí sa pwí ser-ser 'Get a pig ready'.
R. 3 Inik mwi tsíga ko maki mu to m'parav 'You were not there and the Maki has been put off till later'.
R. 43 Mwi ran mwi res 'It dawned fully'.
U. 19 Inik po wala pu womu 'You set sail first!'
DD. 3 No-uʃ m'uf mwi láp 'the rain rained greatly'.

2.3.2. Prepositions and Case Relationships

For the actual forms and lists of the prepositions, see Section 3.3.1. The first point to notice in the syntax is the entire absence of the preposition with names of places, either 'to' or 'at', and this is contrary to the usage of many of the surrounding Melanesian languages.

A. 12 E tsubul wä la Norisfere 'She goes down to the shore at Norishere'.
A. 15 E tsubul kele Tiwil 'She goes down to Tiwil again'.
C. 15 Ko mar tewni Mejüware 'and they buried him at Mëshüware'.
F. 10 Wiʃeșin mi wikel na-ok Mäľübëk 'The woman walked there, to Mäľübëk'.
G. 24 Timän e mlrän or tur Onema 'The father and mother stood at Onema'.

The rule has occasional exceptions, as in C.14 Ko ina pe haj te watsín re na-amp hon, si Oremal 'And perhaps I shall go ashore at the sacred fire, at Oremal'. Here the preposition indicates 'situated at', 'belonging to' a place, rather than simple location in it, and si is in any case the possessive preposition.

With other nouns, however, a preposition must be used. For motion towards, this preposition is tsí(hi), which is really a noun, as it takes the suffixed pronouns of the possessive forms. At the same time it must not be confused with the actual possessive si. Both the long and the short forms of tsí are in use. The suffixed forms are:
Singular    | Plural
---|---
1sg. tsik    | 1pl.incl. tsir
2sg. tsim    | 1pl.excl. tsimemam
3sg. tsin    | 2pl. tsimam(i)

The irregular form of the 1pl.excl. is to be noted. This is the form given by Layard, but no examples are to hand. The use of the preposition can now be shown:

H.29 E wä tsi mätuak 'He goes to my mother's brother'.
K.20 Pe tuloni tsihim 'I will bring her to you'.
P.9 Po luha ma tsihik 'Come back to me!'
U.16 Ko e wan tsi ta-Ba natun 'He came to the Oba man's son'.

The preposition is omitted in some temporal phrases, such as A.60 ta lim weral 'in five days (from) today'.

The occasional use of double prepositions calls for mention next.

Two types of doubling are found: (i) combination with ọa, and (ii) combination of prepositions of similar meaning. In one instance both types are combined.

(i) ọa. The root meaning of this word, when it is a preposition, seems to be motion towards a place, very much like tsi. In compounds, however, that meaning is not retained. Re has general locative significance, and re-ọa seems to be merely a little more definite. The compound re-ọa takes the personal suffixes, though neither element of the compound does so when used separately. Similarly ne is locative, but the compound ne-ọa indicates motion towards and takes suffixes.

B.26 Ko tala ne ọa-hi:n? 'Have you an adze at home?'
B.30 Na-mban ne ọa-hi:n 'I have a sail at home'.
H.23 Ko e hili meliën, e lek re-ọgan 'He digs a place and gets inside it'.
K.54 Lebon Sa e mats; e matur re-ọgan 'Lebon the First is dead; he lies in it (sc. a certain clam shell)'.
K.85 Ko pwere re n'ài e-lâp ne-ọa la 'But there are plenty of holes in the trees along the shore'.

(ii) Two prepositions of similar meaning may be juxtaposed. Thus wä has already been treated as an adverbial directive of motion away from the speaker. It is also prepositional in, e.g.:

D.4 E tabe na-ak wä la 'He carried his canoe to the shore'.
K.121 Mwi re pwi sam wä Lebon Sa 'He wanted to strike at Lebon the First'.

It is compounded with re and the resultant compound occurs, e.g. in:
A.38 E sa we re mwerek sa 'He climbed into a mwerek tree'.
B.11 Wawa sa mu wolo we re nu-a 'A wawa tree spread its roots into the water'.
It is perhaps possible to connect the we in some of these cases to the verb and still treat it as a directive, independent of the preposition, but not in all. An interesting example of the combination of (i) and (ii) is seen in K.85, where the double preposition is again compounded with ǝq as above, and then the 3sg. is added: Ra how we re-ǝn ǝn ǝn 'We can take shelter in it'.

Another compound is ǝ re, and there is also an example of ǝ re itself reduplicated in K.73 Masal re-re-ǝ-

The form ǝ-e-tan for 'at this place' appears to be similarly compounded of ǝ-e- and the word ǝ-tan, originally a noun meaning 'earth, land'.

Atchin and English do not always agree in their methods of expressing case relationships. Thus in ǝ-ak ǝ-e- ǝ-ak 0ba ǝ-ak 'a canoe coming from Omba'. there is no preposition at all, because the place-name Omba is used. In other connections ǝ-ak ǝ-ak = 'from'. It seems as though 0ba itself is already compounded with a preposition not native to Atchin (or possible an article?), as we have ǝ-ta-Ba 'men of Oba'.

The transitive ending often takes the place of an English preposition, e.g. Pe ǝ-ak ǝ-ak ǝ-ak 'I will speak to (or pray over) my salt water' (magic text); Ko ǝ-ak ǝ-ak ǝ-ak 'And tonight let her dream of me' (magic text); Pe ǝ-ak ǝ-ak ǝ-ak 'I will knock (out) his tooth' (magic text), ǝ-ak usually = 'fully, rightly, properly'.

2.4. THE COMPOUND SENTENCE

By compound sentence is meant one which consists of a number of parallel principle clauses, not subordinated one to another. Sentences containing subordinate clauses are dealt with in Section 2.5.

2.4.1. Methods of Joining Clauses

There are two methods of combining clauses into more complex units, viz. parataxis and subordination. Some languages prefer to subordinate all ideas to one main thought. This is the method of Latin, Greek, Sanskrit, Japanese and other languages. Others join ideas in a series
of successive statements, all on the same grammatical footing, and rather like links in a chain. English tends to favour this analytic, or disjunctive method, which is most fully developed in Chinese, Siamese and kindred languages. Atchin also follows the analytic method, even more definitely than many Melanesian languages. This much will be apparent from the Texts.

To join its sentences—or ideas, for we have seen at the beginning of this section that idea and sentence tend to be one and the same in Atchin—Atchin makes liberal use of conjunctions, of which the chief is ko.

Ko is the equivalent of English 'and' in joining clauses, while e more properly joins individual words: mirān e timān 'his mother and father'. Apparent exceptions to the proper use of ko are found, e.g. A.37 Iniiri tsūnōb e-saṅawul ko wifewin e-saṅawul mar wan ... 'The ten men and ten women came ...', but here it must be remembered that the occurrences of the verbal particle e turns the two phrases into two clauses in Atchin though they are not so in English. There is a real exception in Q.64 Mar lūsī jουwul, Mal-weawen ko Wala 'they saw Shουwul, Mar-weeang and Wala', where the third place-name is joined to the others by ko. Examples of ko joining clauses are very frequent, and we take only a couple:

A.3 E tor-tōni wawa sa ko e wā e-hūt 'He catches hold of a wawa tree and goes ashore'.

AA.9 Tuān mu wala ḏa-ok ko tuān mu wala ḏa-ẹl 'One ran that way and another this'.

Ko is also used at the beginning of a sentence where no conjunction at all is required in English, and in this it is sometimes difficult to distinguish between the predicative article ko and the conjunction ko. The following cases, however, are clear:

H.1 Tsūnōb sa mwi rewtsi maki. Ko wifewin sān 'There was a certain man who killed a Maki. Now he had a wife'.

P.1 Ko na-mboŋ sa kele ko e tei wen-wa-saṅawul 'Another day again he makes a thousand'.

BB.10-11 Wa-i-e! ko po ḏu e-pe ko? 'Hello! Where are you paddling then?'

HH.10 Na-riv, ko pe e-be? 'Rat, how did you get here?'

The P.1 example shows that ko can also be used inside a sentence before a verb has been expressed. The preceding phrase in P.1 is of a similar construction: Mewi ko e tei wen-wa-saṅawul 'One day he makes a thousand'. This usage is only to be by recalling the fact that expression of time, even though they may not vary for tense, and so have been treated in this grammar as object-words, are still by nature time words, and in essence verbs; therefore they can practically form a clause in their
own right, and hence be followed by a co-ordinating conjunction. The construction is given a little more explicitly in P.2: Ko na-mboŋ sa kele ko e tei ... 'And one day again he makes ...'. There being no verb 'to be', one cannot say "there was another day when he made ...".

Atchin does not stand alone in Melanesia in this respect; Omba also makes frequent use of ko at the beginning of sentences, Raga uses ke, and a similar usage is found in Indonesia, where Malay and some other languages have maka or its local equivalent.

Other co-ordinating conjunctions are dealt with elsewhere. Treatment of conditions is reserved for Section 2.5.1.(e). One that has not elsewhere been noticed is an adversative use of qa, to disjoin clauses like English 'but'. For example:

B.18-19 Pwere-pwere le me waŋani, qa e-wise re-ŋaN? 'I have fed this sow, but what is there in it?'

The same word can also mean 'because', as in K.104 Ko mwi res ko ini mu tur tser, ko qa mwi kete qa ka māur ko 'It was good that he remained fixed, for because he did so you are alive now'. The first qa here means 'because', the second 'so'. The same word sometimes answers to English 'while': K.86 Mar wan qa la qa no-uʃ m'uf 'They went to the shore while the rain was falling' (second qa = 'while').

Another conjunction that has co-ordinating force is a, as shown in the examples that follow:

A.74 Pi wan a pwi sa pwi läsi nā-rahin re lamōʃ 'If it should happen that a man sees the track in the bush'.

K.76 Win a e mats, a ni i-si mor rets ne ŋū-in? 'That girl is dead, so who are the two talking in there?'

It may be adversative: L.7 Ra re-roŋ ikir ni-wa pwi läp re no-ur el, a mu ror mwi tsats 'We thought we should be a great crowd on this island, but his mind was bad'. One example is rather doubtful in meaning:

N.29 A ko e-wise mo hatsi tsuŋon pitewi? 'And why did you bite your lip at him?'

In very many cases Atchin dispenses with the conjunction altogether, as we shall see in the following paragraphs. The whole method of the language is one of parallel arrangement of principle clauses; even such subordinating conjunctions as 'when', 'in order that' are not represented. Thus, where English would say, "When I have finished I shall come", Atchin will say "I will finish and I will come"; the conjunctions in use are co-ordinating and not subordinating, with very few exceptions.

2.4.2. Omission of Conjunctions

Side by side with this tendency to express conjunctions more than - to English ways of thought - is necessary, Atchin frequently employs a
series of parallel clauses without conjunction at all. The clauses thus ranged side by side may stand in any one of three relations to each other. They may be (a) simple co-ordinated clauses, (b) noun clauses, (c) temporal clauses, (d) causative clauses.

(a) Simple Co-ordinations

Simple co-ordination is made without co-ordinating conjunctions when the subject of both clauses is the same. Thus:

A.69 Ina pe to tsire fiuri natuk 'I shall wait (and) follow after my son'.

B.6 Mwi kəli pe pu luha, mwi kila wə-tan 'He turned as though to come back, (and) looked down'.

B.8 Mwala mi wə-hi=m mo wurei timən mirən 'He ran (and) went home (and) told his father (and) mother'.

As the last example shows, another subject may intervene without requiring a conjunction, providing this subject refer to the same person or persons as the first. This naturally leads to the treatment of noun clauses.

(b) Noun Clauses

Noun clauses are clauses which take the place of a noun, i.e. are expansions of a noun, and therefore subject or object, themselves, of a verb. In the following examples the clauses shown are subjects or objects of a verb, but they follow it immediately without expressed conjunction.

F.16 Tsunob mar re par rewtsi re-ŋa mu kete no-uf m'uf 'The men wanted (that) they should kill him because he had made it rain'.

Here what they wanted is the natural object of the verb re 'want', but it happens to be a clause, viz. par rewtsi 'they should kill (him)'; the reason is given next by a clause introduced by re-ŋa 'because' (lit. 'in-that').

G.4 Ko se ləsi te mwi liw-liw ehi le? 'Don't you see she has been shooting fish here?'

The object of ləsi 'see', is the clause following, mwi liw-liw ehi le. A slightly different example follows, one of the rare cases in the texts in which the noun clause is subject of the other verb: Q.5 Ko e wan tuwənən mi wi-wiel 'And it came (to pass that) his elder brother was walking about'. The subject of wan - what came to pass - is given in the following clause, which, however, is in no way joined to the verb. A complex case is seen in Q.25 Ko mar re par mul par tabu 'They wanted to go home and cook'. Two things are the object of their wish (1) going home, and (ii) cooking. Both follow each other without conjunction. The first comes under the heading we are discussing at
present, the second under that which we have already discussed. A curious example is that of A.38 Mwi ləsiri iniri e ləp 'He saw that they were numerous'. Literally it is 'He saw them, they are many', and with its anticipatory object it is exactly the idiom commonly known in Greek.

(c) Temporal Clauses

There will be more to be said about the methods employed in Atchin to express time relations. Suffice it to say here that the method of parataxis is followed here also, and very frequently without any conjunction at all. It is the latter point that is illustrated in the following examples:

A.59 Mor lə-ləp watsin, mwər' a timən mwi kete maki 'When the two were grown up, the man's father made a maki'.

K.7 Na-nəbük pwi ləp ko po ar tigəl 'When my grand-daughter is grown up, you shall marry her', lit. 'shall grow up and you shall ...'.

K.52 Pe un pe kete pi-pe ni-se 'When I dive, what shall I do?' lit. 'I shall dive (and) I shall do it shall be like what?'

(d) Causative Clauses

The reason for an act may sometimes be indicated without a conjunction, in spite of the example given above involving re-ŋa 'because'.

A.1 Timən e ro pwitsa ni, na-wüŋ e tsats 'His father didn't like him because his smell was bad'.

2.4.3. The Sequence of Tenses

One result of the fondness of Atchin for expressing time relations in preference to spatial relations is that the verb occupies the centre of attention. Hence the necessity arises to decide, when there is more than one verb in a sentence, what scheme of tense construction shall be followed. As a general principle a past tense will be followed by a past, a future by a future, but it is not necessary to insert the various signs of tense that follow the verb, such as ko, etc. The main tense is first defined, then only the verbal particles need follow the sequence. We have already seen this scheme in operation in the compound and complex sentences which have formal examples of other points of grammar. We now proceed to group them.

(a) Future Sequence

The first examples we shall take will be those of future sequence, because the future particles are the most clearly defined, and hence illustrate the principles most clearly. We begin with K.44, which we have already analysed from another point of view at the beginning of this section (see 2.1.):
Ko mo läsi na-mwer 'And you will see a parrot
+ pwi sa + it will be one
+ pu row + it will fly
+ pwi tsövha, + it will pass
+ ko po lihi + and you will hang yourself
+ po mats + and you will die'.

Schematised in this way, it is clear that the main verb - po lihi - sets the tense for all that follow. Everything depends on the flying by of a parrot, and that is in itself future; the only thing that is not contemplated as future in relation to the main verb is the seeing the parrot; that must be past (mo) before anything else takes place.

Now K.52-53:
Po un wä 'You will dive
+ ko po se tsibari te, + and you will not touch it,
+ ko po luwä mäm we-renjän + but you will put your tongue into it'.

This example is simpler in every way - though the ultimate English translation of it will remain to be considered below (2.5.1.(a)) - and it is obvious that one action depends on the action preceding it. Each is future in relation to the preceding. This is the principle behind the syntax of the adjective and adverb, treated as time words.

P.12 Po wor wan 'You shall be born (hither),
+ boŋ pwi sa + day it shall be one,
+ ko po mats: + and you shall die:
+ ko pwi sa, + And it shall be one,
+ boŋ in pwi e-lim, + his days shall be five,
+ ko pi mats. + and he shall die'.

The logical dependence of each clause is here perfectly clear.

(b) Past Sequence

Although one does come across passages of equally consecutive past tenses, yet the rule in the past is not so strict; providing the time is definitely set by the main verb, the others may be in the indefinite tense. A passage in the past tense is DD.1-2, describing a famine that once occurred on Atchin. Here we have:

Mar läsi ni-mara, 'They saw the famine,
+ ni-mara mwi láp; + the famine was great,
+ mar ok ṣobwe kiam ni; + they also related it to us,
+ nam ok roŋe nà mar wurei, + we heard how they spoke,
+ mar roŋe ni-laŋ + they heard the wind,
+ e sär e-láŋ ... + it is great, it is great'.

...
Here the past sequence set by the main verb mar lâsi is held until the last clause, which describes the wind, and is not of such paramount importance to the story: one can presume the wind was a hurricane! That is how the past sequence is regulated: that which must logically be described as past is so described; that which can be presumed to agree in time with the preceding goes into the indefinite. So in A.3:

\[
\begin{align*}
\text{Nu-}a \text{ mu kole.} & \quad \text{The water carried him off.} \\
+ \text{Mi ma,} & \quad + \text{It came to pass,} \\
+ e \text{ tor-toni wawa sa} & \quad + \text{he catches hold of a wawa} \\
+ k\text{o e wâ e-hüt.} & \quad + \text{and he gets ashore}.
\end{align*}
\]

Logic tells us that if the one first event is past, then the others are so. But at the same time the narrator is at liberty to change back into the past when he wishes, and in this tale he proceeds:

\[
\begin{align*}
\text{Ko e lek.} & \quad 'And he stays.' \\
+ \text{mwi lek-lek ...} & \quad + \text{He stayed and stayed ...} \\
+ \text{Ko e hili e-hi:m sa ...} & \quad + \text{And he chooses a house ...'} \\
\end{align*}
\]

and so forth with apparently indiscriminate mixture of tenses. How much of this mixture is due to the fact already pointed out that the ma-forms are originally themselves also indefinite in meaning cannot be said, but the result is the same.

(c) Indefinite Sequence

In the same way it is possible to have a long sequence of indefinite tenses, and these may not all necessarily be present in meaning; they may be "historic" tenses, i.e. pasts. The use of the indefinite adds vividness to the telling, and that has been felt so widely that many European languages also permit the use of a historical present. French goes so far as to use a historic infinitive for vividness's sake. An Atchin example may be drawn from B.32-42, which need not be quoted in full here. It is interesting that after that long passage in the indefinite tense, we get a sudden shifting back into the past: in B.41 we read: Timân mirân ar wala, mar lâsi buha 'his father and mother run, they saw the pigs'. Perhaps the fact that the indefinite sequence is in B.40 interrupted by a short passage of direct speech accounts for the breach of sequence almost immediately afterwards.

2.5. THE COMPLEX SENTENCE

It is conceivable that a language might verbalise its adjectives and adverbs and yet have a full set of subordinating conjunctions for such ideas as time, reason, condition and result. Atchin, however, is defective in this respect also, and all these types of clause - adverbial
clauses in English and therefore subordinate - and rendered in Atchin by clauses arranged in parallel. In the section on the omission of conjunctions we saw that it was possible to render many of our English ideas of adverbial clauses in Atchin without a use of conjunctions at all. We go on now to consider the various methods employed, within the bounds of parataxis, to express the fivefold relations of time, place, result, purpose and condition.

2.5.1. Types of Clauses

(a) Temporal Clauses

Temporal clauses state the time an action takes place. In the Mission translations we find an occasional example of swelig (there spelled sivelig) introducing a temporal clause. This, however, is incorrect. The word is an interrogative, not a relative. The relative 'when' is usually expressed by a circumlocution built on the verb 'to come', very much in the manner of the Biblical English "it came to pass". Some of the preceding examples will be recalled in which a literal translation in those terms has been offered. The literal English rendering is thus 'it came and ...', or in the future 'it will come and ...'. Sometimes the 'and' is omitted, as we have already seen. In the following examples, the translation 'when' is given to save space, but a mental rendering into the literal English will always make any given case clear. First an example where the literal translation is also the final translation:

P.8 Mi wan ko tewen sän mwi karasi wisen, e wa ... 'It came to pass that the husband deceived his wife, and said (or saying) ...

H.11 Mi wan ko tutuʃan mwi lösí tev-tev re wi ewi, ko e se wurei te ... 'When the elder brother saw the scarification on the woman, he said ...

Examples in the future:

P.7 Pi wan tewen sän pi wë e-hüt samen, ko no-uʃ e uʃ 'Whenever the husband went to the bush alone, it rained'.

From the Mission translations, with spelling changed to suit the system used here:

Mi wan e ro-rom lom tono nònò'k 'While he was thinking about these things'.

Pi wan ko pi pep natun noreman pwi sa 'When she (shall) bring forth a male child'.

Kab wan kab betselëhù pu res tipwis qa mi ar wor, pi wan ka sesewe 'Go and seek diligently for the child that has been born, and when you find him ...'.

Sometimes the word wan is used without verbal particles, and then the meaning is somewhat different. Thus:
P.9-10 Ko inik, po tur, po tur wan na-vül sam pu wele-wele pu-roŋ ko po mats 'You will remain, you will remain until your months are a few, only, and you will die'.

P.12 Po wor wan boŋ pwi sa, ko po mats 'You shall be born until one day, and you will die'.

Q.48 E lai lai wan e lai buh a e-saŋawul 'He brought and brought till he had brought ten pigs'.

In other cases again, the time relationships are resolved into relations of cause and effect, and the two clauses are joined by 'and'. They are expressed then in order of their occurrence, not in the English order: "When I come I will buy" becomes 'I will come and I will buy': Pe ma pe wul; 'We will see when I have finished doing it': Pe kete tsile ko ra läsi; 'I will fetch it when I have finished eating': Pe han tsile, pe wan pe lai; these are the simplest possible terms in which temporal sequence can be expressed.

(b) Local Clauses
Place where is expressed in Atchin by means of the ligative article combined with a preposition.

E.1 Mwi läsi ne-ŋa mu te re-gan 'He found a place where he planted it', i.e. 'he found a place where he planted'.

The wh- expresses the relative part of the English 'where', as contrasted with the demonstrative 'th' of 'there'.

K.85 Ra how we re-ŋan 'We can take shelter therein'.
This example already quoted, shows a similar use of the ligative.

(c) Consecutive Clauses
Consecutive clauses express the result of a prior action. There is only one clear example in all the texts, viz.:

0.29 Mar re-rake pini, mi mats 'They embraced him altogether, so that he died'.

In this there is no equivalent for the English 'so that', simply the cause and the result side by side.

(d) Final Clauses
A final clause indicates purpose. In Atchin it may be expressed by the conjunction ŋa followed by a future, or by a future without ŋa.

In the second case it is hardly distinguishable from two main clauses.

Q.85 Po wan po fu te na-amp si timam 'Just go and light your father's fire' (or: 'just go to light ...')

S.38 E so roŋ wofe ni te ŋa pi ma 'He did not think that ought to come'.

U.32 Ko e se weh i te na-ha ŋa pi we talin na-mban 'But he did not pull out a creeper to be a rope for the sail'.
(e) Conditional Clauses

The expression of conditions is rendered difficult in Atchin by the fact that the equivalent for 'if' is a time word, and so can itself vary for tense. This word, or rather phrase, is mwi re, pwi re. It has already been suggested that this phrase may be a functional passive, and that the construction therefore may mean 'it being wished' or 'intended', or better perhaps the French 'étant que', 'given that'. The past tense of this is employed when a condition must be completely fulfilled before the result follows; the future tense is used in other cases. There is one instance in the texts in which the equivalent of 'if' is omitted, viz. 0.14 Mar re par wurei na-na pwi sa '(if) they wished to say anything'. It might perhaps be better to regard such an example as a sort of telescoped form, standing for mwi re mar re par ... 'it being given that they wished ...'. Other cases in which a similar telescoping best explains the construction are the following:

G.8 Pwi re pu wurei ni-se, ... pi ma pu wureim ni 'If it wants to tell you anything let it come and tell you'.
G.10 Pwi re po wurei ni-se, ... ko po ma ... 'If you want to say anything, then come ...'
G.9 Mwi-re ka wurei ni-se, ko kab ar ma ... 'If you wish to say anything, then come back ...'

In all these examples the verb of the first clause is 'wish', which is also the verb that goes to make the Atchin equivalent for 'if'; hence the telescoping.

Where the ideas all have their full expression, the following types of conditions are found:

1) Conditions that can be fulfilled, i.e. that lie in the future.
   (a) Mwer a mwi re mi ma ko po wurei ni pe wä tsì Mal-tabe 'If that man comes tell him I have gone to Mal-tabe'. Lit. 'that man, it shall have been given that he has come, then say to him I shall have gone to Mal-tabe'. The going must be completed before it can be told of; hence mwi re followed by the past tense, mi ma. The method of making up for the lack of a real future-perfect tense is interesting. In the Texts:
   R.6 Ko mwi re-ŋa mwi-res, ko no lai sa 'If all (shall have) gone well, I shall bring one'.
   R.7 Ko mwi re-ŋa mar rewtsi a, ko e ju 'If they shall have killed me, then that's all about it'.

Notice the strengthening of mwi re with ŋa. This is optional. This type of condition is the one known in Latin grammar as the nearer future.

(b) G.8 Pwi re pu wurei ni-se, ... pi ma pu wureim ni 'If it wants to say anything, let it come and tell you'.
We have already had this under consideration above. The tense seems to be decided by the fact that the creature in question is at liberty to come if it shall (in the future) make up its mind to say something. (Future sequence, answering to the incomplete form of the nearer future condition in Latin.)

(c) Futures in all the clauses. Examples:

- P.I0 Pwi-re pwi sa, pi we ma-lakel pu-roŋ, ko pi mats 'If there be another, he shall become just a young man and (then) die'.
- T.9-10 No kete hore, pwi-re ŋa mirak wū-ŋa tsōtsik ... pwi namp, ko pe hiti re-ŋān 'I tabooed it, so that if my mother or sister ... rested, then I would copulate with her'.

The essential difference in these clauses is the mere possibility of the condition's being fulfilled; it is a "remoter future" condition. If they were to rest at the given stone, then the result would follow. It is possible, but may not happen.

2) Conditions that cannot be fulfilled, i.e. that lie in the present or past.

(a) Conditions lying in the present begin in English with "if it were ...", then something else would be the result. This is the Latin incomplete impossible. In Atchin the 'if' is future, and the main verb present (indefinite), but unfortunately neither example shows what happens to the verb of the 'if' clause. The examples are:

- S.30 Pwi-re ŋa ina, ko no mwāir 'If it were I (who am the culprit), I should be left-handed'.
- S.36 Pwi-re ŋa ina, ko no woji pwere-pwere nen 'If it were I, I should be bringing the sow'.

Both these are obviously impossible conditions, as they depend on what is happening at the present moment, and that is something quite different.

(b) Conditions that are completely past and can never be fulfilled.

- K.104 Mwi tsa ko kab mats nōv-nōv ŋa-ok 'If it had not been so you would all have died there'.
- S.28 Pwi re ŋa ina, ko kab lāsi pe mōt-mōt 'If it had been I, you would have seen that I was blackened'.

The better translation would probably be, 'If it is I, then you will see that I am blackened (but I am not, so it is not I)'. This makes it a cross between an incomplete impossible (first clause) and a nearer future (second clause), and such crosses are quite possible.

2.5.2. Speech, Direct and Indirect

In the Mission translations indirect speech is always introduced by the words e pe ŋa 'so that', e.g. mar roge e pe ŋa mar tāŋ e lep 'They
heard that they were crying greatly', i.e. 'that there was much lamentation'. This is clearly a misunderstanding of a construction, and in the Texts speech is never introduced in that way at all. In fact the native always prefers the vividness of direct quotation, and generally avoids indirect report of a speech. In telling a story, he will switch across from the third person in which the narrative is told, into the first or second person of the speaker, simply putting in e wa 'he says', or whatever form of the verb is called for. It is to be noticed that as in Mota this wa is the quotational verb; the ordinary verb 'to say' or 'speak' is wurei, which may also be transitive (incidentally transitive verb), meaning 'to say to a person'. Take a passage such as JJ.4: Ko mu wurei, mu wa, "Inik, sa-mem le-ro?" 'He spoke saying, 'Are you all by yourself here?'" In the same story, JJ.7 Lebon Sa e wurei e wa, "Tsünöb sa mwi ma mwi lăsi a" 'Lebon the First said: "a man came and saw me"'. There is no real English equivalent for e wa. Examples will be found on almost every page of the Texts.

Should it become absolutely necessary to report another person's speech in the indirect form, then this is done in a similar way. Take 0.20: Tasin e wa, "Timär e wureï-ri ra se uroi te" 'The younger brother said, "Our father said we were not to eat it"', or 0.22-23 Tasin e wurei ni, "Mirän e timän e wa na wan nam e Sîu ... 'The younger brother said, "Mother and father said we should go to Malo ..."'. Here there is no connecting word at all except the formula words e wa, and then the first person expressing the instructions as required.

3. MORPHOLOGY

3.1. THE NOUN

3.1.1. Noun Formation

In most cases noun and verb are alike in form. Uf 'to rain'; no-uf 'the rain'. In other cases, verbal nouns may be formed by the addition of -en to the corresponding verb: rets 'to talk'; retsen 'talking'. These take the sa- possessive: retsen sän 'his talking'. Amongst underived nouns, there are some special vocative relationship terms which are worthy of note: te 'father!'; pe 'mother'; tu-tu 'elder brother'. An instructive example is R.45: Te, po ma. Timak e re-roq ra hani na-lok 'Father, come. My (other) father wants us to eat the pig'. See also:

K.21 Tutu, ko kam läsi le-tür a? 'Brothers, did you see that old woman?'

L.11 Pe, po lek nga-ok 'Mother, you stay there'.
Q.37 Te, re-ronq kob tuloni a le 'Father, you intend to bring me here (to be married)'.

R.39 Timak buh å sün sa ne lolo'm 'There is one of my father's pigs in the house'.

LL.14 Te, nə-nə qa mui tsats 'Father, that was a bad thing'.

3.1.2. Kinds of Nouns

Atchin does not readily form compounds; nouns of instrument and agent are expressed by circumlocutions. The ligative nə is used in a number of ways. Thus a murderer is tsünob nə e rewtsi 'a man who kills'. The most interesting formation is that of nouns expressing time, some of which are compounded with no-ut 'the place'. Thus: no-ut e poŋ, no-ut m'boŋ 'night'; or sometimes a mere impersonal phrase suffices as in məroŋ poŋ '(when it was) morning'. These phrases really come under the heading of time words, since they vary for tense, but they can for convenience be recorded here. Examples of them are:

0.9 Mwi re ka wurei ni se, ko kab ar ma no-ut pu poŋ weral, ko kab wurei a ni 'If you want to say something, come later, this evening (lit. 'when the place shall be dark today') and tell me it'.

0.15 No-ut m'boŋ mor matur ko mar ma 'At night they-two were sleeping and they (the others) came'.

C.1 Mi wan-wan no-ut pwi räv-räv 'He continued till nightfall' (lit. 'the place it evening-ed').

C.2 Ko mu to mori no-ut pu poŋ 'It was nearly night'.

The inhabitants of a place may be expressed in various ways. (1) By a preposition that in the original IN is taw, and becomes in Atchin variously to, ta or ti. Thus: To-Vao 'the people of Vao'; to-Wala 'the men of Wala'; to-Rano 'the men of Rano'; to-Tsan 'the men of Atchin'. These forms seem to be restricted to the inhabitants of the Small Islands. Ta is used before accented a: Ta-Ba 'men of Oba' (also Ta-Mbai in D.7). Before other vowels ti is the form: Ti-Era 'the people of Raga'. (11) By the word mwere before the noun: mwere Pinalum 'the man of Pinalum'. (111) By nor before names of villages: nor-Senhar 'the people of Senhar'. This is really the word norema 'male'.

3.1.3. Number

The number of a noun is not expressed at all unless absolutely necessary for clearness of meaning. In the same way the singular may be emphasised if needful by the use of a demonstrative or pronoun. Thus:

A.29 Ko ta-ru nen ko ini norem na e tsubul Tiwil 'And on the second day that man goes down to Tiwil'.

The normal method of forming the plural is by the addition of the plural pronoun inir either before or after the noun. Examples:
K.21 Pe wurei ni tutufak iniri 'I shall tell it to my elder brothers'.

K.90 Kia nam wá la, tutufak inir 'We went to the shore, my elder brothers they', i.e. 'I and my elder brothers went to the shore'.

The verbal pronoun can be used before the noun in a similar way:

0.18 Nga-nga na me läsir, ar ma 'The things which I saw (them), came'.

The dual may be similarly expressed by the dual pronoun: Natun or we 'the two children went'. At the same time, a pronoun of another person can be used if necessary:

L.41 Ikir tsünöb le pu ro we 'We are merely human beings'.

The cases in which the separate expression of the plural is not necessary are (i) when the noun is attended by a word which is naturally plural itself: tala e lep 'many adzes'; (ii) when the idea is plural in itself: mátär tsünöb 'men's eyes' (lit. 'their-eyes man'). In 0.22 we have natur, not 'their child', but 'her children'.

G.13 Natum noremen e-sañawül 'Your ten boys'.

The complete plural can be expressed in several ways by words meaning 'all': row or Rowe, tsile, nóv-nóv. Thus:

B.34 Or tsall rowe buhla 'They-two tie ropes to all their pigs'.

P.28 Mi wihe ni rowe na-na tsile 'He foretells all things' (Note both words together.)

P.24 Na-mbon som tsile ko po mats '(Those are) all your days and you will die'.

K.19 No wu[ji n'ämben nga mar woj ar ruts row 'I poulticed all the sore parts of her body and they are all healed'.

K.104 Miwi tsa, ko kab mats nóv-nóv nga-ok 'If it were not for him, you would all have died there'.

A partial plural is expressed by the noun jopon 'a piece, some':

G.7 Po lāsi na-na jopon mar re-rakere 'Look at some things embracing each other'.

S.15 Ko jopon ar wurei 'Some of them spoke'.

3.1.4. Gender

There is no grammatical gender in Atchin. In some cases separate words are used for male and female beings, such as man or woman. The use of the feminine prefix le has already been mentioned. This can be compounded in some instances: le-ter 'old woman'. Usually, however, the words noremen 'male', and wifewin 'female' are placed after the noun to be qualified: natun noremen 'a son'; tò wifewin 'a hen'. Note, however:

Q.25 Mwi lāsi wifen tipis sa 'He saw one female child'.

AA.3 M'pep, pe-pe' noremen e-ru 'She brought forth two male babies'.

Note, however:
3.1.5. Expression of the Genitive

The possessive relationship is expressed in several ways: (i) by simple juxtaposition of the two nouns. In this case the governing noun precedes the noun governed: H.27 Ne-kal na-wits e-lim 'Bunches bananas five', i.e. 'five bunches of bananas'; H.42 Ni-ās na-amp sa 'Ashes of a fire'; wānu masal 'a place of fish'. These are descriptive rather than possessive genitives; (ii) a really possessive genitive, expressing ownership by a person, admits of three ways of arrangement: (a) if the noun possessed is capable of taking suffixed pronouns then these will be used; (b) if the noun is constructed with a separate possessive then this will be employed; (c) the possessive preposition a will be used, or the commoner si. Examples of each subdivision are:

(a) U.3 Ta-Ba natun 'The man of Oba's son' (lit. 'man Oba his son').
   Q.10 Tutufān lolen 'The brother's inside' (i.e. 'emotion').
   L.40 Na-tum rorin 'Your son's mind' (lit. 'your-son his-mind').
   and Mal-mal-oba'.
   B.33 Tali bhah, tali na-ban 'Rope for the pig, rope for the
   sail'.
   K.58 Win a buān 'That girl's grandmother' (a = demonstrative, not
   possessive).

(b) P.20 Noreman pipi sān 'The man's sexual organs'.

(c) H.14 Māliŋ a tasin 'The younger brother's bed'.
   L.13 Nas-up a qā-tan 'The old man of this place' (perhaps locative).
   C.10 Mar lāsi nā-nā qa si mwar'a 'They saw the thing belonging
   to that man'.
   H.3 Lolo'm si wāufen 'The woman's house'.
   H.3 (wāufen) si tutufān 'His elder brother's wife'.
   Q.78 Po fū te na-amp si timām 'Please light your father's fire'.

Si may express a purposive genitive:

AA.4 Mu hoi n'āi si natun e-ru 'She fashioned clubs for her two
   sons'.

AA.8 Mor roge nu-mbo a Ias 'They-two heard Ias' song'.

If the nature of the idea to be expressed requires another possessive
than sa-, then they may be similarly used: ta-hit rin tamats 'the
octopus the food of ghosts', i.e. 'the starfish'; ar lop-lop rin buha
'they give-food-scrapings to the pigs'; nā-nā ri wāufen 'the woman's
food'. Some phrases are elliptical, A.59 re isen 'at his (village)'.

3.1.6. The Article

(a) Indefinite Article

The numeral sa 'one', is used without connective particle in the indefinite sense:

B.1 ni-wat sa 'a stone'
H.42 Po läsi niäs na-amp sa? 'Do you see the light of a fire?'
B.10 Mu wala juri nu-a sa e Ra 'It sailed up a river on Raga'.
It is similarly used with pronouns:
B.5 Inir sa e tur tser 'One of them stands fast'.

(b) Personal Article

The common MN personal articles a and i do not occur in the free state, but i is found in combination in the nominative forms of pronouns: i-na 'I'; i-nik 'thou', etc.

There is a feminine article le as in le-ter 'old woman' (K.4), all female names of Ret and le-rets in N, and also with the names of certain male culture heroes. This seems to connect with the Ponape li but is not so widely used.

(c) Predicative Article

Ko is a predicative article used in two ways: (1) before the noun, and (ii) after it.

Examples of (1):

Q.29 Ko mar wa, "Ko n'ehi qa inlk?" 'And they said, "What of your fish?''.
K.18 Ko win a ni-ler, mo lai masal a pitewi? 'And this girl here, you gave her that fish?'
K.24 Tutu, ko le-tär ok e re pe tigei ... 'Brother, that old woman wants me to marry ...'
K.42 Ko win ok pwi lek ok 'Let that girl stay so' (lit. 'as for that girl ...').
N.23 Ko Le-rets a mwi lek ne lolo'm 'as for that (woman) Le-rets, she was sitting in the house'.
R.10 Ko mu ūu-junir, e wa, "Ko timami?" 'And he asked them, "What about your father?"'.
O.16 Ar wa, "Ko natum pwi saŋawül! 'They said, 'Your children shall be ten'". (disjunctive)
N.15 Ko tasin inir, tasin ar liw-liwe na-riv 'As for her younger brothers, her brothers were shooting rats'.
Q.43 Ko olowâm mu hulöwi win el 'Your sister's son beckoned this girl'.
L.10 Ko mirär e sisen na-hases pletewir 'And (as for) their mother, she twines rope for them'.
U.10 Ko sa pu ron? 'Only one?'
In some cases it seems to be almost a personal article in its own right:

K.64 Ko Lebon sa, mar karasi 'As for Lebon One, they tricked him'.

This ko is used with pronouns and demonstratives:

R.15 Ko ngo ko buhə nen ko 'That, then, is the pig'.
S.14 Mar wa, "Mwūr' a ko ngo" 'They said, "(it is) that fellow there"'.

This pronoun may combine with a noun for emphasis:

K.37 Ko ini tipwis ko-roŋ ko e-wise ŋa pwi tigei? 'As for him, (he is) only a child, why should he marry her?'
S.17 Ini ko ŋgo mwi liw-liw ehi mwi kara-karas 'The one who was shooting fish there played a trick on us'.

Again it seems to be predicative in:

R.55 Tasik, inik ko wele-wele, inik tū-mūts wor wieta 'Brother, you are indeed the youngest, you are the "ghost born last"'.

A doubtful instance is:

O.23 Kab wā Siu, ko wānu masal ko ŋa-Siu 'You are going to Malo; now Malo is a place where there are many fish'.

Examples of (i) (ii):

A.22 E wa, "Hai! Kami tasin ko!" 'He said, "Hi! You (brought your) sister this time!"

H.17 E wa, "Ko i-se meli'en ni-le?" Ar wa, "Tasim ko". 'He said, "Whose is this bed here?" They said, "Your brother's"'.

O.20 E ar wa, "Io. Tahar ko." 'She said: "Yes; then it must be Tahar's doing"'.

A.50 Timak kisen ko, niri pu-roŋ 'There will be no-one but only my fathers'.

A.43 E wa, "Na-amp ko. Kab ūre". 'He said, "Well then, the firewood. You make fire"'.

There is an undetermined use in

U.26 Ko re-ŋa ta-Ba ko natun ko ar kalatsi 'And for that of the Oba man's son they give in exchange ...'

(d) The Ligative Article ŋa

There is a particle ŋa of wide use, and it must be thoroughly understood. It is also of fairly widespread occurrence in Melanesia, and derives from an Indonesian ñ or ŋa. The primary meaning of ŋa in Atchin is 'that', and as such it follows the noun immediately, S.8: To Vao ŋa 'those Vao men'. It also refers back to people already mentioned:

O.26 Ar uroi hoři ńa-nä ŋa 'They eat up the thing'.
N.26 E wa, "Tutu, pe wurei ńa-nä ŋa?" 'He said, "Brother, shall I tell him that thing?"'

The use of ŋa after a noun in a demonstrative sense is closely allied to its use as a relative, and some examples are on the borderline between both. So a clause may follow immediately: Tahar ŋa pwi mäur tatser 'Tahar who will live for ever'; ńa-nä ŋa na-wūn nen e res 'the thing which its scent good', i.e. 'the sweet smelling thing'.

Q.29 N'ehi qa inik 'The fish which (of) you' (i.e. 'the fish which belongs to you').

Q.84 Natun qa tū-mūts wor wieta 'The son, namely, "ghost born last"' i.e. 'the son called "ghost born last"'.

G.31 Timūr qa mi mats, nāsān Winbweris 'Their father, who died, was called Winbweris'.

Further examples of the relative use of qa:

Q.75 Natun bātiram (qa mu wor womu) 'The eldest son (he who born first)'.

R.4 E mo-ron ni qa mar rets 'He listens to that which (what) they say'.

S.9 Ko mwi lek-lek mu roñ ni qa-mbe qa par luha ma 'He stayed on (till) he thought it was time they should come back'.

H.18 Mwi kete qa-qa me lāsi na qa-him re wisewin 'He did the thing which I saw at home on the woman'.

O.24 Kab ro-romi qa-qa qa mirami mu wurei 'You remember the thing which your mother said'.

So qa is also used with pronouns as well as nouns. Ini qa mi te nial 'he who made the sun'. An Uripiv example is deluŋ qa mara məsi 'the people who are sick'. The real English equivalent of qa in all these examples is really the wh- of 'who, which, what, where, when'. It is the relative element in the expression, the appropriate noun, pronoun or adverb being superadded. Similar phenomena are found both in Rotuman and elsewhere. With adverbs we find qa used in K.47: Ko e-wise qa pwi tigei? 'And so why should he marry her?' (lit. 'how that ...').

The word qa is also used with the preposition re to form a compound, re qa, which appears often indistinguishable in use from the simple preposition.

E.1 Mwi lāsi ne-qa mu te re-ŋān 'He found a place wh- he planted in it', i.e. 'he found a place in which he planted'.

Sometimes the compound conveys something of a relative sense as well:

Q.3 Kab kete bonon re-qa mwār' ok 'You shall make the "cap" on that-of that man'.

K.85 Ra how we-reŋān 'We can take shelter therein'.

The translation in the last instance shows that a relative-demonstrative force is still to be found in the compound. Occasionally it is used merely to add emphasis:

L.26 Ar-ru qa or wa ... 'Those two said ...'

qa becomes a simple conjunction:

R.9 E wan ko mu to mori qa ni-al pu nun 'It came to pass that it was nearly that the sun should set', i.e. 'when it was nearly time for the sun to set'.

There is a prepositional use of qa which seems not to derive directly from the preceding, though preceding, though probably the two are ultimately the same. Thus qa-hi:m 'at home'; qa-el 'here, hither'; qa-ok
'there, thither'; ꞌŋă-in 'there, thither'; ꞌŋa-mbe 'whence, time when' (S.9 Mi le lek-lek mu roŋ ni ꞌŋa-mbe ꞌŋa par luha ma 'He stayed till he thought it was time for them to return'); ne-ŋa 'in at'; ꞌŋa-hūt 'inland'. Thus ꞌŋa finally becomes a simple preposition: K.9 Mar we-we ꞌŋa e-siu 'They counted up to nine'. As such it is limited almost entirely to certain phrases of common use both in time and space: ꞌŋa-him 'at home'; ꞌŋa-hūt 'in the bush'; ꞌŋa-tan or ꞌŋā-tan 'on the ground, down, later'. So weak, however, is it, that ne may be placed before it. Thus: B.27 Ko no-un ne ꞌŋa-him 'And sinnet at home', i.e. 'have you sinnet at home?' A.39 Mar se lāsi te ꞌŋa-him sān 'They did not find him at his house'. K.85 Pwere re n'ai e-lāp ne-ŋa la 'There are plenty of holes in the trees on the seashore'. U.63 Ko e woñi balak a mwi lai ꞌŋa e-Ra sa 'And he carries an exchange pig which he had got at Raga'. Q.77 Ko tutuñən me wiel ꞌŋa-hūt 'The elder brother went away from the mainland'. A.21 Mirān timān mor jilei, mor jok ꞌŋa-hūt 'The mother and father watched, hidden in the bush'. N.10 Or te ꞌŋa-hūt ko or wiel 'They two put it on shore and went away'. B.26 Ko tala ne ꞌŋa-him? 'Have you an adze at home?' D.13 Ko wiel ꞌŋa-mbe? 'Where do you come from?' A.71 Ra lek tser ꞌŋā-tan watsin 'Now we will always stay here'. L.3 E wā Emil Lēp, e rewtsi tsūnōb ꞌŋā-in 'He goes to Emil Lēp and kills men there'. Q.76 Ko tasin e tori natun tā-māts wor wieta (ŋa mu wor ꞌŋa-tan) 'The younger brother adopts a son "ghost born afterwards", who was born later'. Q.15 E wala e tsubul ꞌŋa-la 'He runs and comes down to the shore'.

3.2. PRONOUNS
3.2.1. Cardinal

The cardinal pronouns in Atchin are:

<table>
<thead>
<tr>
<th></th>
<th>Singular</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.incl.</td>
<td>--</td>
<td>ikir</td>
</tr>
<tr>
<td>1.excl.</td>
<td>i na</td>
<td>k iam</td>
</tr>
<tr>
<td>2.</td>
<td>i nik(i), iki</td>
<td>kami</td>
</tr>
<tr>
<td>3.</td>
<td>i ni</td>
<td>i nir(i)</td>
</tr>
</tbody>
</table>

There are no separate forms for the dual and trial except in the verbal pronouns. Examples of the cardinals:
(a) Unsupported

1sg.

A.69 Ina pe to tsire ụrụ natuk 'I shall wait and follow after my son'.
A.49 Ina no mata 'I am afraid'.
H.40 Ina pe wiel 'I shall go away'.
K.33 Ina pu-ro ọ pe tigel 'I alone should marry her'.
K.46 Lebon Saŋwul e wa, 'Ina' 'Lebon Ten says "I (will go)"'.
G.12 Kab se uro i a te. Pi we ŋopami ina 'Don't eat me. I shall be as one of you'.
L.43 Ina me tara 'As for me, I have grown old'.
N.25 Se-re Ina tîpwi s pwl kara-karas 'I am not a child that I should fool (you)'.

2sg.

K.86 Ko po wà wieta po-ro inik 'You go last, you alone'.
K.18 Mo lai masal a pîtewi? E wa, "Inik, o" 'You gave fish to her? He said, "You (are right)"'.
E.12 Inik wele ne-wù, e-res mo lai ia ma ŋa-hùt 'You dear turtle, it is good that you brought me here to the shore'.
F.8 Inik, po le-lek, ko ina, pe wà e-hùt 'You stay here; as for me, I am going ashore'.
H.41 Inik po luha we 'You come back indeed', i.e. 'be sure you do come back!'

Iki is found in BB.6: Iki le rík 'You here indeed'.

3sg.

H.18 Io; ini le-roŋ mwi kete ŋa-ŋa ŋa me lásì ne ŋa-hì:m re wisewin 'Yes, he was the only person I saw who did anything to the woman at home'.
N.7 Ini e wà la 'He goes to the shore'.
C.12 Ini e ro pwi-tsa ni 'He doesn't want it'.

1pl.incl.

N.33 Ikir-ram wureli ŋa e mats 'We have been saying that she is dead'.
K.23 Ikir pwi sa pwi tigel 'Let one of us marry her'.
K.37 Ikir a ram là-làp 'el 'We who are grown up here'.
U.76 Ko buha tsi ọ lì:v rowa we tsi tsùnòb tsiile, to-Rano, to-Wala, Ikir ŋa-Tsan 'As for all the pigs, he gave them all away to everybody, to the people of Rano and Wala, and to us on Atchin

1pl.excl. Note the occasional omission of the final consonant.

S.3 Kia namb-wan Lol-narọŋ 'We are going to Lol-narong'.
K.80 Kla m ko 'Just we (two)'.

Note the occasional omission of the final consonant.
K.90 Kia wä la 'We went to the shore'.
K.96 Kia nam mats 'We are dying'.
L.12 Kia nob te läsi Ias 'Please let us two see Ias'.

2pl.
K.80 Kami, si kom rets? 'Who are you two talking?'
K.106 Kami kab ral 'You go about your business'.
0.8 Al! kami le pu-roŋ 'Hi, you here!'
Q.82-83 Kami, ko watsi kab le-lek, kab wiwsi na-ak 'You stay now and lash together the canoe'.
S.37 Kami kam läsi hoşi tsünöb mwï nats 'You look out for another man'.

3pl.
A.30 Ko wîni iniri tasin or tsubul Norişere 'She and her sister went down to Norishere'.
F.6 Inir tewen sän mor wä e-hüt 'They went into the bush, she and her husband'.

All these are more or less emphatic; when there is no special emphasis on the pronoun the verbal form only is used, and this is treated under "Verbs" below (3.4.). The longer forms are still more emphatic and are frequently used in conjunction with the emphatic particle ko. The final i of iniki and iniri is historically wrong. It is an example of false analogy.

K.73 Ko iniki, no lai masal pite na-mbük 'As for you, you gave fish to my grand-daughter'.

The only examples of iniri show it either in the objective or else simply as a plural sign (for which latter see under "Nouns").

K.21 Pe te wan pe wurei ni tutufak iniri 'Please let me go and tell it to my elder brothers'.
T.24 Me kete ni-wat mu hor-hor, ko me wurei iniri ma rope 'I made the stone taboo, and I told them and they heard me'.

(b) Supported
The pronouns may be all supported by the demonstrative ko either before or after. Thus:
T.20 Ko ina me kete ni-wat mu hor-hor 'I made the stone taboo'.
R.5-6 Ko ina pe wiel, pe wä ok, pe bëtsëlehë buha pwi sa 'I, for my part, will go away somewhere, and look for a pig'.
K.91 Ko ina no tur tser 'As for me, I remain standing still'.
K.70 Ko ina watsin, me un 'As for me, then I dived'.
F.8 Inik, po le-lek; ko ina, pe wä e-hüt 'You stay here; as for me, I am going ashore'.
C.14 Ko ina pe haf te watsin re na-amp hon 'As for me, let me go ashore now at the men's cooking place'.
K.34 Ko ina me lai buha mu womu 'It was I who brought the largest pig'.
K.25 Ko inik tsünőb res ko sa! 'Aren't you a fine fellow!'
B.40 Ai! ko inik, mo ma 'Hi, you, so you've come!'
P.5 Ko inik ńgo, ko po pal ko 'As for you there, you will be killed then'.
N.20 Ai! ko inik, ko lek ni-el pu-ron 'Hi, you just stay here!'
C.8 Ko inik le wu-ŋa e tsiga? 'Is it really you or not you?'
N.50 Ko inik po ńroi, ko pi we ńa rowe wānu ok 'You eat, and all that land shall be yours'.
P.5 Ko inik, ko namboŋ ńaŋ e p'ok, po mats ni 'And as for you, your day will be such and such, you will die on it'.
F.6 Ko inik, mwi le-lek mi wāt-wat 'As for her, she stayed and plaited'.
K.104 Ko mwi res ko inik mu tur tsér 'It was good that he, for his part, remained fixed'.
N.24 E wa, 'Es! Ko inik'. 'He says, "No! It is indeed she"'.
K.38 Ko ikir pwi sa pwi tigel 'Then one of us will marry her'.
K.25 Ko kiam a, nam re-res le wor ko 'But how about us? We are fine fellows too'.
H.33 Ko kami kab lek, ko i-si pwi lai ńa-ńa rami? '(If) you all stay, who will fetch your food?'
H.34 Ko kami pwi sa pwi lek 'One of you shall stay'.
L.16 Ko kia no re nob läsi 'But we want to see her'.
L.43 Ko kami kom rewtsi 'You two killed him'.
K.36 Ko inir mar wan, ar wā re ne-hi:m sār 'The others went off to their houses'.
K.71 Ko inir mar jumar ma ńa-ńa ńa-hüt 'They paddled and came to land'.
L.20 Ko inir ne-mbe? 'But where are they?'
R.25 Ko inir mar wan, mar kete na-ńbwe 'But they went and gave the gong-signal'.

In some cases the ko follows the pronoun, and occasionally both precedes and follows it. Examples:
Q.90 Kami ko kam han? 'Have you eaten?'
R.32 E re nam wala, nam tāw-tāwni, kiam ko nam hitsits 'He wants us to dance and lie down and then to copulate'.
T.23 Inik ko e-wise? 'What do you mean by it?'
S.32 Ini ko roŋ ńgo 'It is he all right!'
Inik ko po loloʃ 'You bathe!'

The double use is shown in L.34: E wa, 'E ju ko?' Mal-mal-mari e wa, "Io. Ko ikir ko". 'He said, "Is it ready?" Mal-mal-mari replied, "Yes; now it's our turn".'
The pronoun is sometimes used in conjunction with a noun, and is then of course pleonastic. Thus L.33 Ko Ias ini mätän e ju 'As for Ias, his eyes were closed'. Others:

Q.34-35 Ko mirän ini re batun na-ak, ko timän ini re jowun 'His mother was in the stern of the boat and his father in the bow'.
Q.39 Ko mwär' a ini mu wala 'As for that man, he ran away'.
Q.78 Ko ml ma, ko timän ini mu kete na-lok 'He came, and behold, his father was making a pudding'.
R.17 Buha, ini e tsel ko watsln 'As for the pig, it is lost now'.
R.19 Mwär' a ini mu llhe buha ml wiel ronl 'The man dragged the pig away and went off with it'.

As objects also the cardinal pronouns are occasionally used. Thus:

R.26 Po läsl ina me wala ŋa-el ko inik re tawtsen 'When you see me dancing on this side and yourself on the other'.
K.112 Tutu, pwl säm pin-pin ikir 'Elder brother, he will club us to death'.
T.26 Me htsl inir a e-ru 'I copulated with those two'.
R.23 Mar läsi ko inl 'They saw him'.
P.17 Tahar mwl tel ikir 'Tahar made us'.

In many instances the objective pronoun can be understood:

P.14 Inik po ron; n'das pu urol 'As for you, you will be drowned; the sea will eat you up'.
P.16 Ko inl ko-roŋ mwl tel 'He alone made us'.

This is the general rule in the 3sg., for which no suffixed form (see below) exists.

A.1-2 E wirenl re nu-a; nu-a e kole 'He throws him into a river; the river sweeps him away'.

In the first and second persons of both numbers, and in the 3pl., there are suffixed pronouns which indicate the object of the verb. These forms are:

<table>
<thead>
<tr>
<th></th>
<th>Singular</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>incl. ---</td>
<td>(i)kir</td>
</tr>
<tr>
<td></td>
<td>excl. (i)a</td>
<td>kla(m)</td>
</tr>
<tr>
<td>2.</td>
<td>(i)m</td>
<td>kami</td>
</tr>
<tr>
<td>3.</td>
<td>---</td>
<td>-r(i)</td>
</tr>
</tbody>
</table>

These forms are direct objects. The use of the preceding i depends upon whether the verb ends in a vowel or in a consonant. They are also used reciprocally, and the plural forms may be used also as duals, with or without supporting numerals. Thus:

E.12 E-res mo lal a ma ŋa-hüt 'It is good that you brought me here to shore'.
K.26 E wurel a ni 'She told me it'.
L.16 Kom läsi a e ñu, ko kam', kob luha 'You have seen me enough, so now go back'.

Q.37 Te, ko re-roq kob tuloni a le 'Father, you intend you two should take me here'.

R.7 Ko mwi re-ña mar rewtsi a, ko e ñu 'But if they kill me, then it is finished'.

U.48 Ina me haf womu ko e jowuri a 'I landed first and he is swearing at me'.

P.13 Ko bahi pu'uroim 'And a shark will eat you'.

P.25 Par liwom 'They shall shoot you'.

K.10 Ko n'ehi le wof-wof ikir 'There is one fish here for each of us'.

M.7 E se jowur ikir te 'He does not swear at us'.

P.1 Mor tei kir 'They-two made us'.

R.27 Ko e wa-wan ram taw-tawnikir 'When the time comes, let us lie down together'. (R.32 Nam taw-tawni '(He wants) us to lie down together').

O.16 Ko po se uroi kia te 'But you are not to eat us'.

K.132 Leboriweriv e wa: "Pe rewtsi kami niauk wor" 'Leboriweriv said, "I will kill you there yet"'.

L.15 Ko no läsi kami e ñu, ko po luha 'Now I have seen you, go back'.

N.29 Sa e jowuri kami 'Someone speaks disrespectfully to you'.

S.6 Ko pe ar tsali pwere-pwere nen ko pu tur taravi kami 'I will later tie up that sow and she will be waiting for you'.

N.39 Natuk mpepe na-woni kami 'My daughter bore you-two in vain'.

K.94 Ko ko ro-roq, rar tol läsiri 'If you wish, let us three go and see them'.

O.26 Timän mwi lek taravir Onema 'The father waited for them at Onema'.

R.11 Ko ini e karasir 'He deceived them'.

R.28 Ar we taw-tawnir te 'They two did not cover one another' (i.e. 'copulate').

The same set of suffixes is added to some prepositions also that are by nature verbs. The following are examples:

R.56-57 Inik, pwí-re po rewtsi, ko tsövi a 'If you were to kill it, you would be (putting yourself) before me'.

O.12 Tsünöb sa e rets pitewim 'A certain man speaks to you'.

R.52 Pe uroi, pe lai ni-se pitewim? 'If I eat it, what must I give you?'

Q.28 Ini e wireni n'ehi qá ini pitew wifewin 'He throws his fish to the woman'.

This preposition shows a variation in the 3sg., where the form belonging to noun-prepositions is frequently used:

S.8 Ko to Vao qá ar lai ne-hir ne-se e-ru pitewin 'So those Vao men gave him two parcels of nese leaves'.

Noun-prepositions take the ordinary noun suffixes:

H.9 Po tiwei te na-na pwi sa tev-tev pwi sa re-ŋak 'Please scarify something, a design on me'.

H.10 Mwi tiwei tev-tev kele re-ŋân 'He scarified a design on her again'.

P.9 Po mats, po luha ma tsihik 'If you die you will come back here to me'.

A.13 E wâ tsi timân 'She goes to her father'.

K.20 Ko pe mak, pe tuloni tsihim 'I will go first and bring her to you'.

The subject will be dealt with more fully at a later stage.

3.2.2. Possessives

Possession may be indicated in Atchin in three ways:

1) The cardinal pronoun may be coupled with ŋa. In this case a possessive preposition a has really coalesced with the ligative. Is this usage legitimate?

A possessive a is not Melanesian. One example shows the a plainly, however:

U.21 Ko Bat-pila natun e wehi na-ak a ini 'Bat-pila's son drags his canoe'.

Examples of ŋa:

U.9 Ro riŋeni buhâ ŋa timâr 'We-two take aboard the pig belonging to our father'.

Similarly in U.12.

The usage becomes clearer when the possessive is pronominal, i.e. when the noun is not expressed:

U.53 Ro woʃ toni re-ŋa inik 'Let us-two take out that belonging to you'.

U.54 Or wan, or woʃ toni ŋa ta-Ba natun 'They-two go and take out that belonging to the Oba man'.

U.55 Ro woʃi kele ŋa inik 'Let us carry yours again'.

R.58 Mwi rewtsi ne-ŋa tutuʃân e wieta 'He killed his elder brother's afterwards'.

The constructions in the first and last examples in this section are difficult. It is possible to construe ne ŋa as really nê ŋa, i.e. article and ligative, with a vanished a coalesced with the latter. On the other hand, ne itself is a preposition meaning 'of' both in Atchin and in other neighbouring languages. Thus A.4 Or silel na-mbun nen 'They sewed together sails for them (canoes)'. An extension of this is found in R.47 Timak e re pe ar lai nen pi wan 'My father wants me to take back his (pudding)'.

Another pronominal possessive is a combination of the normal possessive sa with a prefix i which is probably instrumental in origin. Thus:
L.9 Mal-mal-mari i-san ne-sar e-ru, n'ai sa 'For Mal-mal-mari two
pears and one club'.

C.11 Ko mwí sa ko e wurei e re i-săn. E wa "Ina i-sak ni-mben si
tuår 'Then one said he wanted it for himself. He says, "Our
friend's foreign body is mine'."

2) Possession may be indicated by suffixed pronouns. The suffixes are:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.incl.</td>
<td>-r</td>
</tr>
<tr>
<td>1.excl.</td>
<td>-k</td>
</tr>
<tr>
<td></td>
<td>-mam</td>
</tr>
<tr>
<td>2.</td>
<td>-m</td>
</tr>
<tr>
<td>3.</td>
<td>-n</td>
</tr>
</tbody>
</table>

These suffixes cause certain vowel changes in the final vowels of
words to which they are added. These changes are of the nature of um-
laut, and point to a time when the consonant was followed by a final i,
or in the case of the second singular, a final u. Thus timak 'my
father', but timän 'his father', show an original tima-ni from a still
earlier tima-na. Thus we have the stages

tama-nya :: tama-na :: tama-na :: tama-ni :: timä-ni :: timän.

The 2sg. suffix changes original a to o: timom 'your father'. The
1pl.excl. also undergoes umlaut, although there is no lost i, but this
is probably merely due to weakening of accent. The retention of a in
the 2pl. even before i is probably to be explained as due to a stronger
accent.

The suffixed pronouns are used with most kinship terms, parts of a
body or of any object. The following are some examples:

<table>
<thead>
<tr>
<th>'father'</th>
<th>'mother'</th>
<th>'brother'</th>
<th>'grandchild'</th>
<th>'mother's brother'</th>
</tr>
</thead>
<tbody>
<tr>
<td>timak</td>
<td>mirak</td>
<td>tuak</td>
<td>nambük</td>
<td>mätuak</td>
</tr>
<tr>
<td>timom</td>
<td>mirom</td>
<td>tuom</td>
<td>nambüm</td>
<td>mätuom</td>
</tr>
<tr>
<td>timän</td>
<td>mirän</td>
<td>tuän</td>
<td>nambün</td>
<td>mätuän</td>
</tr>
<tr>
<td>timär</td>
<td>mirär</td>
<td>tuär</td>
<td>nambür</td>
<td>mätuär</td>
</tr>
<tr>
<td>timämam</td>
<td>mirämam</td>
<td>tuämam</td>
<td>nambümam</td>
<td>mätuämam</td>
</tr>
<tr>
<td>timami</td>
<td>mirami</td>
<td>tuami</td>
<td>nambümi</td>
<td>mätuami</td>
</tr>
<tr>
<td>timär</td>
<td>mirär</td>
<td>tuär</td>
<td>numbür</td>
<td>mätuär</td>
</tr>
</tbody>
</table>

The following examples will illustrate the use of suffixed pronouns in
the Texts:

K.70 Ko mwí häts to-toni mämak 'So it bit off my tongue'.

T.9-10 No kete hore, pwi-reña mirak, wü-na tsötsik, wü-na buak,
wü-na pwi sa pwi namp ... 'I tabooed it, whether it were
my mother or my sister, or my grandmother, or any woman
who took a rest ...'

K.21 Pe te wan pe wurei ni tutu|ak iniri 'Please let me go and
tell my elder brothers'.
N.11 Or wá Bwat-narer tsi mätuänr 'They-two went to Bwat-narer to their mother's brother'.

Q.78 Po wan, po jü te na-amp si timäm 'Please go and light your father's fire'.

G.13 Natum noreman e-sañawül 'You (shall have) ten male children'.

K.52-53 Po un wá, ko po se tsibari te, ko po luwá màm we-regän 'Go and dive; don't touch it, but put out your tongue into it'.

(Note that this word is slightly irregular: memak - mem - memän).

H.21 Po numbwe-numbwe po wan po tei tsi mätuänr 'Wrap it in leaves, and go and give it to our mother's brother'.

D.11 Tasir wele na mul ma 'Our dear younger brother who has arrived'.

O.24 Kab ro-roml në-në na mirami mu würei 'Remember what your mother said'.

R.10 Ko mu jü-junir, e wa, 'Ko timami?' 'He asked them saying, 'What of your father?''

M.5 Ka m-ok wël sälär ka wan ka re kab lësir 'You are always going their road to see them'.

T.5 Ko inir wëjëwëln mar se tsu toni te re salar 'The women did not remove the strap from their necks'.

Q.13 Mätuänr Emil Murur 'Their mother's brother (was a man of) Emil Marur'.

Another word which takes the suffixes is seen in:

Q.19 Olowak, po lu e'm 'My sister's son, go back'.

Q.43 Ko olowam mu hülöwi win el ko nam jü lu ha 'Your sister's son beckoned the woman and we paddled back'.

Q.18 Olowan e tor-toni jowun na-ak 'His sister's son caught hold of the bow of his canoe'.

3) Independent possessive nouns. Words that are not relationship terms nor parts of a whole take a number of possessive nouns after them. Of these there are four varieties: sa- for ordinary objects; na- for cooked food, or food for cooking; ra- for foods eaten raw; and ma- for drinks. The following are the forms:

<table>
<thead>
<tr>
<th></th>
<th>Sa</th>
<th>Na</th>
<th>Ra</th>
<th>Ma</th>
</tr>
</thead>
<tbody>
<tr>
<td>1sg.</td>
<td>sak</td>
<td>naik</td>
<td>rak</td>
<td>mak</td>
</tr>
<tr>
<td>2sg.</td>
<td>som</td>
<td>nam</td>
<td>rom</td>
<td>mom</td>
</tr>
<tr>
<td>3sg.</td>
<td>sähn</td>
<td>nan</td>
<td>rän, rän</td>
<td>mwän</td>
</tr>
<tr>
<td>1pl.incl.</td>
<td>sär</td>
<td>nar</td>
<td>rär</td>
<td>mwär</td>
</tr>
<tr>
<td>1pl.excl.</td>
<td>sämam</td>
<td>namam</td>
<td>rämam</td>
<td>mwämam</td>
</tr>
<tr>
<td>2pl.</td>
<td>sami</td>
<td>nami</td>
<td>rami</td>
<td>mwami</td>
</tr>
<tr>
<td>3pl.</td>
<td>sär</td>
<td>nar</td>
<td>rär</td>
<td>mwär</td>
</tr>
</tbody>
</table>

The phonetics of the na-forms are difficult, for the umlaut effect is lacking. The velarisation seen in the ma-forms reminds one of the fact that in Mota the drink-possessive is always mwa-. The sa-forms admit
of an apparently emphatic suffix -ŋo: saŋo 'his', and samiŋo 'your'.
In some cases vowel changes take place in the noun which precedes the
possessive: buha 'pig', becomes buho sän 'his pig'; ni ram 'yam', be-
comes ni rom nak 'my yam (to eat)'. This seems to be a variety of
umlaut, and one suspects that it ought not to take place before all
persons, but only does so by false analogy. The possessives can be
used predicatively, as in A.12 Pi we ram n'ehi ok 'That fish shall be
your (raw food)'; A.23 Pi we rami n'ehi ok (plural of A.12). Pronominal
forms can be made by placing before the possessives (except sa-) the
prefix no, which is undoubtedly the word na-na, ną-ną 'thing, property',
cf. nono hanen 'food'.
B.14 Wifewin ti-e-Ra mwi lai no-rän pwer-pwer'a 'The Raga woman
took food for that sow'.
B.16 E lai no-rän ko e uroi 'He takes its food and eats it'.
The noun-prefix can be omitted:
B.16 Mewi nen ko win a e kete ran pwere-pwere sän 'Next day the
girl makes food for her sow'.

Examples of the possessives
1) Sa- is used for ordinary objects, such as nä-tuw 'belt'; buha 'pig'
treated as property); na-tò 'fowl' (treated as property); relü na-tò
'hen's egg' (for hatching, not eating); nä-him 'house'; na-amp 'fire-
wood'; sal 'dog'; ni-säl 'path'; nái 'tree'; ni-ram 'yam' (in garden);
etc. Thus:
D.12 Ar woʃ to-toni buhɑ sän 'They carry his pig away'.
E.9 Ne-wü, po lai a wá e-hüt; pe lemak sán 'Turtle, bring me to
shore and I shall reward you'.
N.48 Pi e sám batun tamauw ru. Pi e sám e row wánu ok 'Your food
shall be the head of the gelded curved tusker; all this land
shall be youre'.
P.5 Ko inik, ko na-mboŋ sám e p'ok, po mats 'As for you, your day
will be thus (and) you will die'.
R.56 Pe rewtsi buhɑ ɡa mu tur re ne-hi:m sám 'I will kill the pig
that is in your house'.
L.8 Po ho n'ài sámam, ne-sar sámam 'You trim clubs and spears for
us'.
S.21 I-si e lai ne-se sami? 'Who took your nese leaves?'
U.63 Pi e sami ni 'It shall be youre'.
L.12 Mor ma mor woʃi ne-sar sår 'The two of them came carrying
their speare'.
P.4 E wurei ko e te na-mboŋ sår 'He speaks and appoints their
days'.

Predicative uses:
P.17 Mi we sår watsin 'It is theirs now'.
Q.59 Ra tuwe sak pi pe tawi 'Let us pile up mine like a mound'.

Relationship terms used with sa- are: tewen 'husband'; wifewin 'wife'.
2) Na- is used for foods cooked or to be cooked, such as: ni-ram 'yam';
ron tarik 'wild yam'; na-lok 'pudding'; na-wits 'banana' (picked unripe
for cooking); biok 'taro'. Examples from A.12 and A.23 have already
been quoted. Others are:

B.24 Ko pe m'ok tabu na:m 'I will first cook food for you'.
N.14 Mar ket e mätsän na:n 'They performed the death feast for her'.
Q.72 Mar jure na-amp sûr, ar kete na-lok na:r 'They lit fire (in
their ovens) and cooked their puddings'.

3) Ra- is used for foods eaten uncooked: na-ni 'coconut'; na-wits 'ripe
banana'; relü na-tò 'fowl's eggs' (for eating in native fashion); fruits
such as ni-ra, tapol, tawor, etc.; masal 'fish'.

K.12 Inik no-râm pwi tsa te pu-ron 'Then you just shan't have any
food'.
N.48 Pi e sâm batun tamauw ru 'Your food shall be the head of the
gelded curved tusker'.
E.10 Mi wan mwi lai nà-nà no-rân ne-wü 'It went and brought food
for the turtle'.
Q.73 Ko ini ar lai na-to rän sa ko n'dràm na:n 'And for him, they
brought a fowl for his (raw) food and yam for his (cooked)
food'.
L.20 Po ma, po lâsî nà-nà râr sa e-ru 'You come and see to one or
two things for our (raw) food'.
H.33 Ko kami kab lek, ko i-si pwi lai nà-nà rami? 'If you all stay,
who will fetch your food?'

4) Ma- is used for all drinks: nu-wa 'water'; tipaŋ 'coconut milk'; na-
su 'coconut cream'; na-töv 'sugarcane'.

3.2.3. Demonstratives

The use of na as a demonstrative has already been pointed out. There
are also a number of other demonstratives, both simple and compound.
These are a, ok, el, le, ne, ni, ogò. The line of demarcation between
adjective and adverb is in some of the examples very hard to draw.
Thus le has three uses of which only one is adjectival. In some cases,
again, a cardinal pronoun is used to emphasise a noun: L.3 Ias ini 'that
fellow Ias'.

1) a is an enclitic, following the noun or pronoun immediately: mwer'a
'that man'; win a 'that girl'; Ias a 'that man Ias'; inir a 'they'.

2) ok is similarly enclitic, and if the vowel of the noun can vary, then
it suffers umlaut:

H.21 Po hill n'dràm ok 'Dig up that yam'.
H.13 Mwär' ok 'That man'.
It may also be preceded by the ko article:

K.24 Ko le-tä r ok e re pe tigei 'That woman wants me to marry her'.
K.71 Mar re-roŋ par tigei win ok 'They thought they should marry that girl'.

It follows the adjective, as in:

A.55 Mo la-lai buhä läp ok 'You have brought that large pig'.

The word easily assumes adverbial uses, as in:

B.10 Mi wä ok nän-in e-re masav 'It sailed right out into the open sea'.
K.42 Ko win ok pwi lek ok 'That girl will stay so'.

3) el

L.45 Ko mi mats wofe ni no-ur el 'He died just so on this island'.
Q.43 Ko olowam mu hulöwi win el 'Your sister's son beckoned this girl'.
K.10 Ko e- wise ni n'ehi el? 'What is the matter with these fish?'
A.34 Lolom e wurei win el ko ro po tigei 'Your inside says it is this woman you want to marry'.
A.47 Tewen, ko lai melker ni-le buhä el 'Son-in-law, you have brought too many (of) these pigs here'.
L.28 Ra lek re mälün ni-mbek el 'Let us stay in the shade of this banyan tree'.

Pronominally in K.63 Ko e wise'el? 'Then why this?'

4) le lends itself more readily to adverbial uses, but the following are worth noting:

A.54 Mwi kila läsi win a mwi lihe na-ru le pa 'He looked and saw that girl dragging that curved-tusker!'
B.23 Io, inik le pu-roŋ mo m'ok ururoi rän pwere-pwere sak 'Indeed, it is you who keep on eating my sow's food'.

A good example of the pronominal use of the word, even with suffixed pronoun is:

K.8 Ni-le'r nir, ar se läs wofe te 'Those people failed to recognise (us)'.

The remaining demonstratives are less frequent and not so well defined:

5) ne

G.21 Ne re wänu sîhovile 'It is in a different place'.

In A.2 we have a partial reduplication:

A.2 E uroi na-ñi nen tawtse n 'He ate half that'.

Again in:

A.14 Mewi nen kele 'On the next day again'. (This is a regular phrase).
A.74 Pwi läsi lumweik nen, ... ko pu luha 'Should he see that sea-snake, ... then he would draw back'.
Q.57 E wurei na-mboŋ nen par tuwe i-sän 'He announced the day when they were to pile up his (yams)'.
R.31 E roŋ wose ni nə-nə nen 'He understands that thing all right'.

6) ngo: this is mostly used with pronouns or other demonstratives:

P.5 Ko inik ngo, ko po pal ko 'As for you there, you will be killed then'.

Adverbially in:

P.23 Po matsiŋ ngo ko 'You will work in that way'.

N.49 Pi we sâm tsile ko ngo'k 'Then all that will be yours'.

3.2.4. Interrogatives and Indefinites

The same words fulfill the functions of both interrogatives and indefinites in Atchin as in other Melanesian languages. The word i-si = 'who' or 'someone'; ni-se = 'what' or 'something'. The latter can also be used adverbially, = 'in what way, in some way'. Other indefinite pronouns and adjectives are: nats 'some, another'; row(e), tsile 'all'; fopon 'some'; sa 'one'. Examples:

1) i-si 'who?'

A.26 I-si e lai? 'Who brought it?'

K.76 Po te läsi i-si mor rets re ne-hl:m si Lebon Sa 'Please see who are talking in Lebon the First's house'.

S.21 Ko kam läsi i-si e lai ne-se saml? 'Did you see who took your nese leaves?'

A variant is seen in:

O.3 I-se mu wi-tsöv? 'Who threw it?'

H.14 I-se le maligen? 'Whose bed (is) this?'

'Oblique cases are shown in two examples:

F.13 Ram m'ok re i-si, inik pu-roŋ 'We have been wondering who it is, and it's only you'.

H.12 I-si maligen? 'Whose bed?'

2) ni-se 'what'

H.6 Ko betseleli ni-se? 'What are you looking for?'

K.52 Pe un pe kete pi-pe ni-se? 'When I dive, I am to do like what?'

K.113 Tasik, ko ra kete pi pe ni-se? 'Brother, how are we to act?'

N.9 Ko läsi ni-se? 'What did you see?'

N.22 E wa, "Tutu, pe wurei na-na sa." Ar wa, "Ni-se?" 'He said, "Brother, let me tell you something." They said, "What?"'.

N.28 Mwär' ok e re pu wurei ni-se? 'What does that fellow want to say?'

R.52 Pe uroi, pe lai ni-se pitewim? 'If I eat it, what do I have to give you?'

U.9 Ro riğeni ni-se? 'What are we two to take aboard?'
3) ni-se 'something'

G.8 Pwi re pu wurei ni-se, weral no-ut e poŋ pi ma pu wureim ni 'If it wants to say anything, let it come tonight and say it'.

L.44 Ka re kab kete ni-se watsin, kab kete watsin 'If you intend doing anything (at all), then do it now'.

An example of the noun use of ni-se is seen in:

K.78 Ra karasir, ra kete ni-se pwi sa ḋa ikir pwi sa tigei 'Let us deceive them by acting in some way that one of us may marry her' (ni-se is lit. 'a something').

4) Other words

(a) row(e) 'all'

See further on the plural of nouns, and the following:

K.19 Ko no wan no wuʃoi n'āmbeŋ ḋa mar wọr ar ruts row 'For I went and poulticed (the sores on) her body and they are healed now'.

L.4 Mi wahal row, we-re wün ok tsile 'He fought all, (made war on) all those places'.

(b) tsile 'all'

P.24 Na-mbon sam tsile ko po mats 'All your days (will be done) and you shall die'.

(c) Jopon 'some'

This word takes the suffixed pronouns.

G.7 Ko lāsi na-na Jopon mar re-rakere 'Look at some things embracing each other'.

S.14 Ko to-Vao ḋa, Jopon mar lāsi woʃe, mar wa ... 'Of those Vao men, some recognised him and said ...'

G.12 Kab se uroi a te; pi we Jopami ina 'Don't eat me; I shall be as one of you'.

The following example shows that Jopon really means 'a piece':

H.24 Ko Jopon wele e mambur 'But a small piece broke off'.

This accounts for the use of the suffixed pronouns.

3.2.5. The Relative

One method of expressing the relative has already been dealt with, viz. the use of ḋa. This need not be repeated. Others are:

1) Relative understood but unexpressed:

G.7 Po lāsi na-na Jopon mar re-rakere 'Look at some things (which) are embracing'.

2) The word a:

N.36 Mo pepe tsünōb sa lāŋ a mu ror mwi tsats 'You have borne a demented man who thinks all wrongly'.

U.63 Ko e woʃi balak a mwi laŋ ḋa e-Ra sa 'And he carried the exchange pig he had received at Raga.

This is the demonstrative a already treated.
In K.86 we have an interesting example of qa in an adverbial-relative sense:

K.86 Mar wan qa la qa no-uʃ m'uʃ 'They went to the shore while the rain was falling'.

3.3. OTHER NOUN PHRASE MORPHOLOGY

Certain other words that would be classed in English as prepositions and conjunctions belong in Atchin partly to the class of object-words and partly to that of time-words. It has already been pointed out, for instance, that some prepositions take the pronouns suffixed to verbs, others take the set suffixed to nouns instead. Those that take the noun-suffixes are invariable for tense, and are by nature themselves nouns, and therefore call for treatment as object words. Similarly there are some words that, though they would be classed in English grammar as conjunctions, yet in Atchin vary for tense, and therefore must be classed as time words. It means splitting up in this grammar a group that would be one in English, but the splitting up is necessary.

Regarding prepositions it is sufficient to quote a paragraph from Capell 1935:194, in which it was said:

Most prepositions can be classed as object-words, because they are invariable for tense - and indeed it is hard for us to see how a "preposition" can vary for tense. The preposition shows a persistent relationship between things and is therefore independent of time. Thus, ar we tsihín 'they went to him': their movement towards him was permanent, not dependent on the moment, at any rate, as long as it lasted. Similarly in the expression rewānū sār 'in country their', there is obviously no temporal change going on. The one exception to this is the preposition pitewi 'for'. Here pī is certainly the particle of the future tense. In Uripiv the preposition is tevi, and the same word seems to be seen in Eromangan tòvuni. The reason for prefixing pī seems to be that until a person has a thing actually in his hands it is only "for" him, the possession is still future, and logic bids one indicate that future by the use of pī. This is perfectly clear when the entire sentence is future, but the feeling for a relative future can be noticed even when the main idea of the sentence is past, e.g. ar lāv nawon no-nō qa mu res pitewi 'they took freely thing wh- it good (to be) for him', i.e. 'they took a liberal supply of good things for him'. He had not received them yet; they were still only "for" him. The preposition is then a sort of relative future even though the verb is past. On the other hand the particle mu with res shows concomitance: the things were already good when they took them. Other examples are: Mare e tapar wats lín pitewi 'the heaven was opened for him'; reguŋ taronen mī mok res pitewi 'during the time he was still speaking to them' (these show a slight change in the meaning of pitewi, but only similar to that of the classical dative). In all these examples Uripiv lacks the future prefix. So does English, and so do most languages; yet it cannot be denied that an event which has not yet occurred is still future!
It remains therefore to treat the prepositions that come under the heading of object-words, along with the few conjunctions, and, of course, the interjections.

3.3.1. Prepositions

In the first place, the simple locative with a place name is not generally indicated. Ar mul Norifere 'They returned to Norishere'; mwi tsubu Tiwil 'He went down to Tiwil'.

A.16 E ma e lü-si win a Norifere 'He came (and) saw that girl at Norishere'.

If the noun is not a place name, however, a preposition must be used:

A.17 E wä hi:m tsi timän 'She goes home to her father'.

In a few cases it seems possible to doubt whether the locative preposition has not become permanently attached to a place name. The chief instance is e-Ra 'Raga'. The island of Atchin derives its name from A-Tsan, which is really a locative, given, as often in Melanesia, in answer to a geographical question. The following is the list of the prepositions invariable for tense:

- **a**: 'at, of'
- **e**: 'at, in, of' (often compounded with re)
- **hasa**: 'across, away from'
- **hore**: 'round about'
- **i**: 'at, to, for'; in = 'for him' (G.29; see below)
- **la-**: 'in', as lamöf 'in the bush'; also pleonastically re lamöf;
- **lo-ut**: 'in the place'
- **le**: 'at, in'
- **lol(o)**: 'inside, among';
- **mare**: 'upwards, above'. N.5 and Q.11 have we mare
- **marur**: 'through'
- **ne**: 'in, at'. Often compounded as ne nö
- **nö**: see under ligatives for prepositional use
- **rali**: 'around'
- **re**: 'at, on, onto, under'. We re 'into, to, up to'; re-nö
  'with it, inside it, at it'
- **rieni**: 'in front of'
- **roni**: 'away from, out of'
- **föri**: 'into'
- **töni**: 'away'; reduplicated as tä-töni
- **tsi**: 'to, towards, for'
- **wä**: 'to'; compounded as we re or we re nö-n
- **woñi**: 'up, overhead'
None of these prepositions take the pronoun suffixes proper to verbs; those that take the suffixes proper to nouns are: hore; i; rali; re ŋa; rieni; tsi. The following examples will illustrate both the variable and the invariable prepositions on the above list:

A Tsan 'At Atochín'; also e Tsan 'at Atochín'

K.75 Mør rets e-re ne-hi:m si Lebon Sa 'They-two conversed in Lebon the First's house'.

K.53 Mu luwá mem we-reŋān 'He poked his tongue into it'.

K.53 Tele-pur-pur e hátsibut horen mámän 'The clam shell anapped around his tongue'.

N.18 Tutufār mwi sere hore ne-hi:m sān 'Our elder brother has shuts up his house'.

G.30 Mar hili nu-al in 'They dug a hole for him'.

K.89 Ar tāŋ e-lāp lolon bahur 'They wept much inside the bahur tree'.

N.13 Mwi lek lolo'm a 'She stayed in that house'.

K.15 Ar hor-hor kele rali e-Tsan 'They drove fish again round Atochín'.

H.9 Po tiwei ... tev-tev pwi sa re-ŋak 'Scarify a design on me'.

U.42 Po wala rieni natuk 'You will run in front of my son'.

K.20 Pe tuloni tshim 'I shall bring her to you'.

K.85 Ra how we-reŋān 'We shall take shelter in it'.

S.1 Mu tsbul ŋa-la 'He went down to the shore'.

O.30 Kab wan, kab te lāsi timami lo-ut 'Please go and see your father in the inner court'.

N.5 Mwi ror we mare 'He turned upwards'.

B.27 Ko no-un ne ŋa-hi:m? '(Have you) sinned at home?'

L.29 E tsa-li ni na-hases e re batun 'He ties that rope to his head'.

L.31 E bub toni re ni-mbHek 'He makes it fast to the banyan tree'.

L.45 Or lai siw-siw nen e-saŋawül 'They-two place ten stones for him'.

A.39 Mar se lāsi te ŋa-hi:m sān 'They didn't see him in his house'.

Q.77 Tutufān ni wiel ŋa-hūt 'The elder brother went away from the mainland'.

O.4 E wā e-hūt 'He goes to the mainland'.

A.71 Ra lek tser ŋā-tan watsin 'We shall always stay here now'.

U.62 Ina pe wā tan 'I must go down (the coast)'.

N.1 Rets e wal' toni na-tò 'Rets runs after a foul'.

In A.60 we have again the complete omission of a preposition: ta-lim weral 'in five days from today'.

1 Presuming that ŋā-tan = ŋa+e+tan, to account for the umlaut.
3.3.2. Conjunctions

It is not always necessary to insert conjunctions in Atchin, where we feel it needful in English. Thus in B.33: Talin buha, talin na-mban 'Rope for the pig and rope for the sail'. Similarly between clauses: A.38 Mwi läsiri, iniri e-läp 'He saw them (that) they were many'. The normal conjunction for 'and' between clauses, and sometimes between nouns, is ko, but clauses are often juxtaposed with no conjunction, as in the above example. Other conjunctions are:

a 'for, if'

N.29 A ko e-wise mo hatsi tsungen pitewi? 'For why did you bite your lip at him?'
A.74 Pi wan a pwi sa pwi läsi ne-rahin re lamöf 'If it should happen that someone should see a track in the bush'.
K.76 Win a e mats, a ni i-si mor rets ne gà-in? 'That girl is dead, so who are the two talking in there?'
L.7 Ra re-ron ikir ni-wa pwi lăp ra no-ur el, a mu ror mwi tsats 'We think there should be a big population of us on this land, but he had a bad mind'.
K.116 Mi wa-wan a mu jù 'It continued (thus) until the end'.

e 'and'

G.23 Mirän e timän 'Mother and father'. Similarly G.27.

ŋa. This is really the ligative again, but one or two special uses may be conveniently listed here:
B.18-19 Pwere-pwere le me wąganı, ŋa e-wise re-ŋän? 'This sow I have fed, but what (has it) in it?'
K.86 Mar wan ŋa la ŋa no-uʃ m'uf 'They went to the shore while the rain rained'.
K.124 Pe säm kами niaok wor. Ka e be ŋa sëmi? 'I will club you here yet. Where are you that (I may) club you?'

ŋgo 'so, thus'
K.103 ŋgo ko kam läsi bahuru ok 'So you see this bahuru tree'.

pe 'in order that'. This is really the pe = 'like' that will have to be treated under time-words, but it can also be used without tense to indicate purpose:
B.6 Mwi kali pe pu luha 'He turned to go back'.

re ŋa. As a preposition this means 'in'; as a conjunction it means 'in that, because':
E.11 Mwi lemak ni, re-ŋa mu jàkele wà e-hüt 'He rewarded it, because it had carried him on its back to land'.
The methods of expressing 'and' are of interest. Besides e and ko, the pronouns can also be used to connect two nouns, as in some other Melanesian languages. Thus: mātuān inir wisen 'mother's brother and his wife'; win a iniri tasin 'that woman and her younger brother'.

More clearly dual in A.20: inir tasin 'she and her younger brother'. This could not mean 'they and their younger brothers', which would require tasir, so that the absence of a well defined dual is not serious. An interesting case is Q.79 mirām por kete rin buha 'your mother and father shall make food for the pigs' (por is the dual 3pl. pronoun in the future tense). Similar is G.11 inir wisen sān 'He and his wife'.

3.3.3. Adverbs

Although it might seem that only adverbs of time can be time-words, yet in point of fact some adverbs of manner take the verbal particles, and so come under the same heading. The adverbs of place, however, do not vary for tense, and so can be listed here:

<table>
<thead>
<tr>
<th>EL</th>
<th>&quot;here&quot;</th>
<th>nā-in</th>
<th>&quot;here, there&quot;</th>
</tr>
</thead>
<tbody>
<tr>
<td>I-se</td>
<td>&quot;here&quot;</td>
<td>ngo</td>
<td>&quot;there&quot;</td>
</tr>
<tr>
<td>Kelo</td>
<td>&quot;again&quot;</td>
<td>ok</td>
<td>&quot;here, somewhere&quot;</td>
</tr>
<tr>
<td>le</td>
<td>&quot;here&quot;</td>
<td>par-par</td>
<td>&quot;elsewhere&quot;</td>
</tr>
<tr>
<td>Lolo'm</td>
<td>&quot;indoors&quot;</td>
<td>tan</td>
<td>&quot;down, low, north-west, past'</td>
</tr>
<tr>
<td>Mare</td>
<td>&quot;above&quot;</td>
<td>tawtsen</td>
<td>&quot;on the other side&quot;</td>
</tr>
<tr>
<td>Ne ŋa</td>
<td>&quot;thither&quot;</td>
<td>tsalil</td>
<td>&quot;outside&quot;</td>
</tr>
<tr>
<td>Niaok</td>
<td>&quot;there&quot;</td>
<td>wietā</td>
<td>&quot;down, behind, last, next'</td>
</tr>
<tr>
<td>Nile</td>
<td>&quot;here, hither&quot;</td>
<td>womu</td>
<td>&quot;in front, first&quot;</td>
</tr>
<tr>
<td>ŋa-el</td>
<td>&quot;here&quot;</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The Texts show, amongst others, the following examples:

U.62 Po ma, po haj el 'Come and land here'.
K.108 Nam m'ok ral el 'We keep walking here'.
L.1 Mwi ral el 'He used to walk about here'.
A.12 I-se pi we rām n'ehi ok 'Here is a fish for your food'.
A.15 E wā la kele 'He goes to the shore again'.
R.34 Ar wala kele 'They dance again'.
G.4 Ko se läsi te mwi liw-liw ehi le? 'Don't you see he is shooting fish here?'
Q.37 Te, ko re-roŋ kob tuloni a le 'Father, you (and my mother) intend to bring me here (to be married)'.
K.109 Kab šure na-amp lolo'm 'They light the fire in his house'.
L.22 Kom ma ra le-lek te ŋa-el lolo'm 'You two please come and let us sit here indoors'.
K.129 Ar sa wa mare 'They all climb up higher'.
N.2 E wa-wan mare 'He goes on to the top'.
Amongst adverbs of quality and degree that are time-words we find the following, though naturally any word that is used to describe an object may also describe an action.

**mol-toni 'gradually'**

DD.32 Nam läsi mol-toni wanu mu res le watsin ko 'We saw how gradually the land became good again now (after a famine)'.

**moni 'fully'**

K.34 Ra wul moni 'We have paid in full'.

**mori 'nearly'**

0.1 Mu to mori pwi tara 'He was near old age'.

0.4 E to mori pi ma ko ni-ok we 'Alas! it is nearly (time) for him to come back!'

R.9 E wan ko mu to mori nga ni-al pu nun 'When it was nearly sunset'.

**ntek 'perhaps'**

S.29 Ko n'tek tsünöb a mwi nats kam lai pitewin ne-se sami 'Perhaps that was another man to whom you gave your ne-se leaves'.

---

K.124 Pe sam kami ni-aok wor 'I shall club you here yet'.

Q.38 Ko tsünöb sa mu hulöwi a ni-aok 'One man has beckoned me there'.

R.12 Buha sa e tur ni-aok ne lolo'm 'One pig stands there in the house'.

A.47 Tewen, ko lai melker ni-le buha el 'Son-in-law, these are too many pigs you have brought here'.

B.10 Mi wä ok nā-in e-re masav 'It went there again into the open sea'.

H.5 E ha ma nā-elu ko pin. Miterik e ha e-pe nā-in 'It curved over just here. Perhaps it curved over thus in here.'

Q.43 E wala e-pe nā-in? 'In what direction is he running?'

D.1 Ko mwi lek nā-in watsin 'And he stayed there then'.

S.15 Ini mwäir ko sa mwi liw-liw ehi nyo 'The person shooting fish there is a left-handed fellow'.

R.5-6 Ko ina pe wiel, pe wä ok 'I shall go away, I shall go somewhere'.

U.14 Po tur ok! 'Stay here!'

U.62 Ina pe wä tan 'I must go down'.

R.26 Me wala nā-elu, ko inik re tawtsen 'I dance here and you on the other side'.

N.35 E wä tsali! 'He goes to the other court'.

Q.84 Nata nā tā-māts wor wiela 'His son who (was called) "Ghost born last"'.

K.69 Mar m'ok jil par-par pu-ron 'They just kept swimming elsewhere'.

---

Amongst adverbs of quality and degree that are time-words we find the following, though naturally any word that is used to describe an object may also describe an action.
"thus"

P.23 Po matsiŋ ngo ko 'And you will ask thus ...'

"in vain, too much"

A.52 E läp-läp na-won 'It is far too much'.
U.41 Inik na-tun ni-wät na-won 'You are only the sun of a stone' (too-much in derogatory sense).

"somewhat"

Q.11 Ko ina pi we mare jopon 'I will go a little higher'.

"properly, right"

L.35 Läs mwi re pi mara ma wof 'Ias wanted him to rise altogether'.
L.45 Ko mi mats wofe ni no-ur el 'He died just so in that island'.
A.64 Ram se läs wofe ni 'We did not see him properly'.

"truly", lit. 'speak-true'

A.62 Ikir wä wure-tun 'We are really going'.

Some of these words are already known to us in other usages; they serve to emphasise the uselessness of European divisions into "parts of speech" for Melanesian languages.

It may seem a paradox that adverbs of time are themselves object words, but most of them are single words, indicating an event, the time of which is already marked in the verb. Hence they come under this heading. The following is the list, which still leaves a few compound phrases to be treated in the next section of the grammar.

"again"

D.9 Kab te roge kele? 'Did you hear it again?'

"again, back"

G.14 Mu ūu, ko e tsiën luha 'Afterwards she conceived again'.

"last"

Lebon e-Ru e tsi, Lebon Sa ŋa-ta 'Lebon the Second next, Lebon the First last'.

"earlier in the day"

S.23 Kam läsi paraŋ ko mwär' nen e pe ni-se? 'Did you see this morning what the fellow was like?'

"yet"

Ko Ret e ma ŋa-hüt pin? 'Has Retee come from the mainland yet?'
See under "tenses of verbs" for a fuller treatment of a somewhat different use of this word.
furi 'last'
U.77 Ko ini mwi riği Żuri 'But (that which) he had taken on
board last'.

swelini 'when'
taron'ok 'now, nowadays'
DD.30 Pi kete kele taron'ok 'It may happen again nowadays'.
A variant of this is taron le watsin.
te 'then'
Inik no-rom pwi tsa te pu ron 'Your food will be nothing then'.
telep 'immediately'
Q.9 Kab kete wan telep bonon ne-na mwär' ok 'You make that fellow's
cap (on his yam mound) immediately'.
tser 'always'
B.7 Tasin mwi taŋ tser 'His younger brother kept on weeping'.
R.37 Mor lek tser na-hi:m 'They-two stayed all the time in the
village'.
A variant of this is seen in:
T.6 Na-mbon tata-tsår mar wä lamój 'Every day they went into
the bush'.
tsire 'next'
O.21 Mu wor tsiře 'She was born next'.
tua 'a long time, of old'
L.22 Me se läsi kami te tua ok 'I've not seen you for this long
time'.
watsin 'now'
Full examples of this will be given when dealing with the tenses
of the verb.
weral 'today'
A.36 Ra wan weral 'Let us go today'.
R.15 Mwi re mi ma weral 'When he has come today'.
wä-sa 'once'
S.1 Wä-sa mwi karasi to-Vao 'Once he tricked the men of Vao'.
wä-ta, wieta 'last'
Q.84 Tä-mäts wor wieta 'Ghost born last' (a name)
R.57 Ko tsövi a; ina, no wä-ta 'You go before me, I am last'.
wor 'yet'
H.32 Se-re na-mboŋ e-lēp wor 'Not many days yet'. Also K.14.
Q.4 E tsiga wor 'Not yet'. See also a compound in DD.1.

wujonen 'last time'
K.73 Masal re-re wujonen ko ar moʃ-moʃ ni 'Last time they refused her fish'.
DD.49 Pwi te-rík pi kete kele taron'ok pwi-re pe ṣa wujonen 'Perhaps it will happen again nowadays as it used to before'.

3.3.4. Emphatic Particle
The emphatic particle le may be classed with the invariable adverbs.
It may follow any word to give added emphasis to it, as seen in the following cases from the Texts:
K.63 No li le 'I just hanged myself'.
N.35 Mwar' a e laŋa le 'That fellow is just demented'.
N.36 Ko pepe ni-se le? 'What have you given birth to?'
N.8 Ina le me ma 'I indeed have come'.
N.10 No lāsi na-tò le sa 'I saw one fowl'.
N.23 Le-rets a mwi lek no lolo'm le pu-roŋ 'That Le-rets is just sitting in the house (and that's all)'.
O.17 Ko me tara le watsin 'But now I have grown old'.
A combination of this particle with roŋ is seen in:
H.18 Ini le-roŋ mwi kete na-na ṣa me lāsi na ṣa-hi:m re wifewin 'He only, he did the thing I saw at the home of the woman'.

3.3.5. Interrogative Adverb of Place
The word be or mbe means 'where?', but is used with a number of prepositional adjuncts that must be noted. It may become e-mbe, ṣa-mbe, ne-mbe, he-mbe, all of which, except the last, that is so far explained, will be recognised as prepositions of place. The distinctions in the use of these, if there are any, remain still to be discovered, but the following examples will show the compounds in use:

be or mbe
K.67 Ko wiel be? 'Where have you come from?'
A.39 Ko betselehí e be 'You look where he is'.
A.63 Mwar' e-be ko? 'Where have the men come from?'

e be
H.29 Ko tasim e be? 'Where is your brother?'
K.41 Ra e-be? 'Where shall we go?'
S.2 Kab e-be? 'Where are you going?'
3. THE VERB

3.1. Formation of Verbs

As a general principle, verb and noun are alike in Atchin: no-uj m'uj 'the rain rained'. Verbs may be divided into two groups: stative and active. No confusion results from this use of the word active, as there is no passive voice in the language, so that 'active' may be used to indicate a type of verb rather than a voice. By a stative verb is meant one which expresses a state or condition, such as kar'a 'to have sores' - obviously not an action. Active verbs express an action, and are again divisible into intransitive and transitive verbs. To tabulate:

<table>
<thead>
<tr>
<th>Verb</th>
<th>stative</th>
<th>active</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>intransitive</td>
<td></td>
<td></td>
</tr>
<tr>
<td>transitive</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The transitive verb is often recognisable by the termination ni, e.g. no mata 'I am afraid'; no matani'm 'I am afraid of you'. Many, however, have no transitive termination. Taking the following Atchin text (the beginning of Tale A), the verbs may be classified as indicated above:

Tasin e kara. Timän e ro pwi tsa ni. Na-wün e-tsats. E wireni. E wireni re nu-a. Nu-a e kole. 'The younger brother had sores. His father didn't want him (to be). His smell was bad. He threw him. He threw him into the water. The water carried him away.'

In the above passage the stative verbs are kara 'to have sores'; tsats 'to be bad'; the active verbs are ro 'to like'; wire 'to throw', kole 'to sweep away'. All three are transitive, but the last carries
no sign. Verbs that do not carry a transitive sign may be called by the name used in Churchward 1926, "incidentally transitive", and those that do carry a transitive sign may be called "specifically transitive".

It will be noticed immediately that the inclusion of tsats '(be) bad' as a stative verb eliminates the category of adjectives from parts of speech. In a following section it will be shown that this is a legitimate procedure for this particular language.

Amongst incidentally transitive verbs are found the following:

- kete 'to do'
- ki-kí 'to step out (distances)'
- kole 'to carry off'
- urol 'to eat'
- pepe 'to bear child'
- läsi 'to see'
- sere 'to close'
- roñe 'to hear'

It is interesting to observe that in other Melanesian languages some of these verbs become specifically transitive by means of a suffix, as for instance in Fijian roño-a 'to hear', sere-ka 'to unloose'. Even in the neighbouring Malo this occurs.

Amongst specifically transitive verbs formed by adding -ni to the intransitive we have:

- wurei 'to say'
- mata 'be afraid'
- sufu 'to ask'
- wul 'to buy'
- tigei 'take (in marriage)'
- trans. wure-ni 'to say it'
- mata-ni 'to fear'
- sufu-ni 'to question'
- wul-ni 'to pay for'
- tigei-ni 'to remove'

Worthy of special note is taŋ 'to weep', trans. tāŋ-sí 'to bewail', which involves a different suffix, and umlaut of the root vowel. Historically it can be shown, in such languages as Fijian and Samoan, where considerable variety of transitive endings exist, that the consonant preceding the -i is frequently thematic, i.e. it was originally the final consonant of the word, and though normally lost, it is resuscitated in the transitive form. Only tāŋ-sí 'bewail', from IN taŋis 'weep', is here thematically constructed. As a general rule Atchin has made -ni do duty all round. It is so for instance in mata-ni, although this represents IN matakut, and usually becomes matausi in Melanesia.

In some cases the use of a transitive ending is optional. Thus ro 'like', trans. ro-ni, but:

A.1 Mu ro pwi tsa ni 'He wanted-him not-to-be'.
N.50 Ko ar ro pwi tsa 'But they didn't want (it) (to-be)'.

How loose is the connection of -ni with its verb is shown by the fact that another pronoun or adverb can intervene between the verb and the suffix: no wure mi ni 'I tell you it'; me karasi mi ni 'I tricked you
about it'; R.31 E reọ wọje ni ọọ-ọọ nen 'She knew rightly that thing'; Q.90 Ko po ọọbọ ọahọ ni na-ọok ni tiṣẹm 'You just take back the pudding to your father' (the second ni is a preposition meaning 'to').

3.4.2. Voice and Tense System

(a) Voice

There is no distinction of voice in Atchin. A passive form in European languages must here be rendered into the 3pl. active. While, however, this is true, it is possible to have what may be called 'functional' passives and reflexives, the verb remains 'active' in form and is constructed with the usual person and tense signs, but its meaning is passive or reflexive, as the case may be. Thus:

A.68 Maki tiṣẹm mwi rewtsi tsile 'His father's maki was killed entirely'.
M.2 Ka wa m ko ka re maki e pal ne ọa-Tsan 'You go and watch the maki sacrificed at Atchin'.
M.7 Ko maki m'pal mwi ser-ser 'And the maki was sacrificed frequently'.
P.14 Inik, po ron 'As for you, you will be drowned'.

A functional reflexive is seen in:

P.26 Pwirẹ nọ pwi li, ko e li 'If he is to hang himself, then he hangs himself'.

(b) Tense

Tense may be indicated by the regular tense signs, which are verbal pronouns, and which will be defined later; or it may be indicated also by adverbs placed after the verb; or thirdly, by the process of reduplication. The verbal pronouns serve by themselves to indicate both person and tense, in the past and future, and there is also a group which is indefinite in meaning and may be either present, past or future according to context. In such cases, and where emphasis is needed, adverbs or an adverbial phrase can be used to indicate completeness. Such are pin(i), tsile, mu ọju, ko. Examples:

1) pin(i)

E.5 M'bale, m'bale pin 'He hit it and badly wounded it', lit. 'he hit it, he hit it finish'.
H.26 Ko tutuʃən mwi rewtsi, mwi rewtsi pin 'His elder brother struck and belaboured him so that he died', lit. killed him, killed him finish'.

Both examples show by their repetition of the verb that the use of these adverbs is always emphatic.

2) tsile

H.20 Mu tei tsile nu-ah 'He completely fashioned a digging stick'.
A.44  Or tabu tsile watsin 'They-two now finished cooking'.
A.68  Maki timän mwi rewtsi tsile 'His father's Maki was killed entirely'.
K.13  E mases; ar uroi tsile 'It cooked and they ate it up'.

3) mu ū
K.101 E wala, e wala mu ū 'He circled round and round it', lit. 'he runs, he runs, it finished'.

4) ko. The particle ko stands on a different footing. It indicates a perfect, pluperfect or future perfect according to the verbal particle preceding the verb. It is often combined with watsin 'done, completed' to form a compound ko watsin. Thus:

O.33  E ū ko 'That's the end' (conclusion of a story).
N.49  Pi we sām tsile ko ūgo'k 'Then all that will be yours'.
R.23  Mar lāsi ko ini, ko e wōji ūa ini 'They saw him, how he carried (one) for himself'.
L.34  E ū ko? 'Is it over?'
N.51  Ko mwi lek tser Olep ko watsin 'And he stayed at Olep for good'.
K.45  Mar ū, mar ū, mar wan ko watsin 'They paddled and paddled and got there at last'.

Another rather difficult phrase that seems to indicate completion is pu roŋ 'simply' or 'only'.
N.20  Ko inik ko lek ni-el pu-roŋ 'You simply stay here!'
N.18  Ko pe ar sere kele ko pu roŋ 'I will simply shut it again'.
K.44  Pe lāsim ko pu-roŋ 'I'll see you, all right!'
In N.18, for instance, the idea is of completion, 'shut it and that will be that!'.

A.41  Timak kisen le ūniri pu-roŋ 'It is only my fathers who are here, they alone', i.e. 'only they comprise the audience'.
Notice that the particle used is generally that of the future, (pu), no matter what be the tense of the main verb, and the phrase always has the decisive tone of the English colloquialism used above, 'and that's that!'.

3.4.3. Directive Particles

Many Melanesian languages make large use of deictic particles, indicating action towards or away from the speaker. The former is usually mai or ma, really the verb 'to come', while the latter has no fixed form. Atchin possesses two such particles, ma and wā or luha. Ma indicates movement towards the speaker, wā and luha movement away or back (they are not quite synonymous). To quote Ray (1926:290), speaking of
the Uripiv dialect, "These are apparently verbs used either separately or combined with other verbs". Examples:

A.24 Mu luha wä 'Go back!' (shows one particle used as a verb, supported by the other)

P.9 Po luha ma 'Come back' (a similar example)

Q.43 Nam ju luha ma 'We paddled back here'.

K.121 Mi wi re pwí sam wä Lebon Sa 'He wanted to strike (away) at Lebon the First'.

K.46 Pwí sa pu un wä 'Let one dive' (down from speaker)

U.14 Ina pe wala wä hi:m 'I shall run to the village'.

CC.26 Natuk, po luha ma, wele 'My child, come back, my dear!' A slight variant is provided by the verbs wan 'to come', and wa 'to go', as directives:

U.16 Mi rén ... e lai wan ni-war e-ru 'His mother ... brought two re-entrant tuskers'.

T.4 Mar kete wa na-mbün ni-tän 'They placed the bottom of the basket on it'.

3.4.4. Reduplication

The phenomenon of reduplication is another means of expressing time relations for the reduplicated verb generally indicates continuity of action. It thus supplies the part of an imperfect tense, present, past or future. The reduplication may be either entire or partial, and no difference of meaning appears to be involved.

(a) Complete Reduplication

A.4 Ko e lek, miw lek-lek 'He stayed here'; 'He continued to stay there'.

N.13 Mar lek-lek-lek 'They waited and waited and waited'.

(b) Partial Reduplication

A.4 Mi wa-wan ko e lüsi na-tò sän sa '(Time) went on, and he saw a fowl (suitable) for him'.

3.4.5. Signs of Tense and Their Use

The tense particles, or signs of tense, are called verbal pronouns in most Melanesian grammars. The term is not quite exact, in that they can be used along with the cardinal pronoun as well as in place of it. Morphologically they are constructed from root-forms of pronouns used in combination with a tense sign. Of these tense signs, Atchin possesses three, of which the roots are ma, e and pa. The whole scheme of tense, however, is very vague from the European point of view. Ma is past in Atchin, though still indefinite in the neighbouring Vao and Wala. Pa is definitely future, being a form of the verb 'to go', while e simply
marks the word following as a time-word, neither past nor future. That is why it is used, e.g. with numerals. The following are the forms assumed by these three roots in combination with the pronoun roots:

1sg.

Past: me

A. 67 Tawtsen na-ni qa me lawi pitewi, me las wose ni 'The half of coconut which I gave him, I recognised it'.
K. 11 Ko me lai pitew le-tär a 'I gave it to that old woman'.
R. 11-12 Ko ina me wiel, me ma, hore ni-se ni-aok lamōf 'I went and came and chased something there in the bush'.

Indefinite: no

K. 113 No wuretun 'I am speaking the truth'.
L. 11 Ina no ter-ter 'As for me, I am brave'.
A. 41 No mata e-lüp 'I am greatly afraid'.

ne

T. 24-25 Ar re ina ne kara-karasir 'They want me to keep on tricking (him)!'

Future: pe

K. 111 Pe wan, pe lai n'dram 'I will go and fetch yams'.
Q. 83 Ina pe wä e-hüt te 'Please let me go into the bush'.
Q. 79 Te, pe ṣu na-amp? 'Father, shall I light the fire?'

2sg.

Past: mo

Q. 91 Mo wan mo hani na-lok na:r 'You went and ate their pudding'.
E. 12 E-res mo lai a ma ṣa-hüt 'It is good that you brought me here to shore'.
N. 29 A ko e-wise mo hatsi tsůnon pitewi? 'For why did you bite your lip at him?'

Indefinite: ko

K. 113 Ko wuretun? 'You are speaking the truth?'
K. 67 Ko wiel be? 'Where have you come from?'
L. 14 Ko re pi wise? 'How do you want it to be?'

Future: po

Q. 79 Po ṣu na-amp, ko po wan ko miram por kete rin buha pu-ron 'Take a light from the fire, and go with your mother and let them two prepare food for the pigs'.
Q. 20 Po han ṣa-mbe? 'Where will you eat?'

3sg.

The indefinite tense offers no difficulty, and has been amply illustrated in the preceding pages, but the past varies between mwi, mi, mu and m', and the future between pwi, pi, pu and p'. There appear to be
phonetic reasons for the use of the various forms, but they are extremely complicated, and seem to depend not merely on what sounds follow immediately, but on the whole sentence-rhythm, and a special phonetic study of the language from this point of view will be needed to elucidate them fully. This study has not yet been carried out, and until it is, the only thing possible is to set forth certain empirical rules, which, however, are not without exceptions. These rules are as follows:

1) The root forms are m+i, p+i, which are normally velarised and become mwi and pwi respectively.

2) The vowel is deleted before u, and for mwi also before labial consonants (excluding w), giving m', p', e.g. m' pep 'she bore (a child)'.

3) Mu and pu are used when the first vowel of the verb is a back vowel, o, ö, u, or the first syllable of the verb is hi-, ke-, ki-, ma-, li-, ji-, ta-, wa- or we-. The reasons in this case are not obvious, but seem to rest on muscular interplay between back and front tongue positions and tense and lax lip positions.

4) The unvelarised mi and pi are used as follows: (a) Mi, before m-, and sounds sufficiently close to the lip position of m and the tongue position of w to make articulation difficult, i.e. before le-, li-, wa-, we-, wi-. The rule, however, is not absolute, as the examples below will show. (b) Pi before labials including w. One case - tigei 'to marry' - varies between pwi and pi.

The following lists give examples actually culled from the Texts:

Mwi is used before ake, asas, aşi, ha, har, has, hitsi, kale, karasi, kete, kila, la, lai, lawi, ṭās(i), lek, lemak, lep, lihe, lildrōre, liŋ, liwe, na, nats, ral, rali, ran, re, rer(e), rerake, res, retserets, rewtsi, rieni, riri, sa, sal, sasale, sasawi, se, ser(e), subj, subjwe, subj, ta, taŋ, talasi, tara, tarer, tatser, tawif, te, tei, tsa, tsali, tsats, tsibari, tsiga, tsilewere, tsir, tsirinwe, tsuri.

Mi is used before the negative phrase se läsi te ('did not see'); mara, mat, mats, māŋāŋ, meremerir, metemet, miteni, mwel, tomaru, uroi, wahal, wahe, wan, waŋoni, wawan, we, wei, weta, wetewat, wetsi, wewe, wie, wiel, wiri, wiwiel, wiwsi.

Variant constructions are: rewtsi (mwi), tei (mwi, mu).

Mu is used before hore, horhor, hoʃ, hu, kole, koni, loŋ, luha, ma, ɡon, nu, nunre, ro, ron, roŋe, ror, rorak,roromi, row, ru, rubatsi, ruʃi, ji, so .. te (negative), ʃok, ʃakele, ʃoʃera, ʃu, ʃuni, ʃuroni, ʃuʃulo, tei, to, tori, toŋsa, tsōv, tsbul, tuhuni, tur, turan, wa, wala, we (?), weldra, witsōv, womu, wor, woʃi, wotsanlr, wurei, wuw, wuwun.
Mi' is used before bale, berteni, betseleh, boŋ, pal, para, parar, pep, ulōwi, un, uf.

The following are examples with the future particle:
Pwi is used before ar (repetitive particle), e (numeral particle), han, hasi, keli, läsi, lep, li, namp, rewtsi, sa, sawe, saŋawũl, sem, serser, so ... te (negative), tala, tara, te, tigei, tsilari, tsire, tsōvha; tigel also may have pi.

Pi is used before ma, mara, mats, parava, pe, p'ok, tigei, wan, we, wiel, wof.

Pu is used before ar (repetitive particle), luha, ma-lakel, molemol, poŋ, roŋ, row, se, so, to, tuloni, un, urol, welewele, womu. The repetitive particle thus takes either pwi or pu.

P' is used before uroin and the frequentative form ururoi.

Thus far the Texts; it now remains to give some illustrative sentences of the particles of the 3sg.:

Past
A.6 Mi waŋani 'He fed her'.
A.9 Mi pep kele 'She bore again'.
H.22 Mwär' a mwi hili n'dram 'That man dug up the yam'

Future
A.75 Pu se tala tlehi te ne-rahin. Pwi tala tileni ko pi mats 'He should not step over the track. Should he do so he will die'.

ldu.incl.
Past: No examples in the Texts.

Indefinite: ro
A.42 Po mak, ro wan 'You lead, we two shall go'.
L.34 Ro mul te 'Just let us-two go'.
U.8 E-res ro wā e-Ra 'Let us-two go to Raga'.
Q.20 Ro wā Tsan 'We shall go to Atchin'.

ldu.excl.
Past: nom
A.25 Te, nom lái n'ehi sa le 'Father we two got this (one) fish'.

Indefinite: no, nob
L.13 Ko kla no re nob läsi na-sup a ḱu-tan 'We-two want to see the old men of this place'.

Idu.excl.
Past: No examples in the Texts.
2du.

Past: kom

L.16 Kom läsi a e ju, ko kam' kob luha 'You-two have seen me enough, so go back!'

N.40 Kom lağalän, kom kete na-na e tsats 'You two are demented, you have done a bad thing'.

Indefinite: kom

K.80 Kami si kom rets? 'Who are you two (who are) talking?'

Future: kob, ko

L.27 Ko mak, ra wan 'You-two lead, let's all go'.

L.43 Ko kami, kom rewtsi, ko kob ta-tali, kob wan, kob tawni 'Since you-two killed him, carry him (?), go and bury him!

3du.

Past: mor

L.12 Mor woji ne-sar sär 'They-two carried their spears'.

L.13 Mor läsi Ias a mirän mwi lek 'They-two saw that (fellow) Ias and his mother (who was) sitting'.

L.21 Mwi läsi mor lek La-mare 'He saw they were at La-mare'.

R.38 Ko inir mor wan 'The two of them went'.

T.26 Mar ma ko mor namp re-ňän 'They all came and two of them took a rest on it'.

Indefinite: or

L.26 Ar-ru, na, or wa ... 'Those two, they say ...'

A.44 Or tabu tsile watsin 'They-two have finished cooking now'.

L.17 Or se luha te; or tur tser 'They-two don't go back; they stay on'.

L.38 Or par-pari na-ambwe 'They-two beat the gongs'.

Q.47 Or wà hi:m 'They two go home'.

N.10 Or tabe na-ak a wä e-hüt 'They-two carry that canoe and go ashore'.

Future: por

Q.18 E re-roń por tsil-tsile-were 'He meant them two to have a talk'.

Q.79 Ko po wan ko miräm por kete rin buha pu-roń 'You and your mother go and the two (of you) just prepare food for the pigs'.

Ipl.incl.: ra(m)

S.39 Ram se läs woje ni te tsünöb nen 'We did not recognise that man'.

K.37 Ikir a ram lä-läp el, pwi sa pwi tigei 'One of us who have grown up here will marry her'.

M.3 Ram le-lek mu se parav te, ka re ra wan ra läsi maki 'We have waited a little time, and you want to have us go and see the Maki'.

---

Note: The text appears to be a mixture of languages, possibly a transcription of a conversation or a narrative. The context is not clear due to the formatting and lack of clear separation between different sections.
G.26 Ram rets pitewir, e-tsiga 'We kept on telling them, but all in vain'.
L.5 Ram ra l ni-el, ko Ias rorin e tsats 'We walk about here, but Ias' mind is bad'.
A.36 Ra wan weral. Ra tuloni win el 'We are all going today; we are going to lead this woman away'.
C.4 Ko pi ma, ra loloş 'Then let him come, and we shall wash'.
L.26 Ikir ra wā hamal 'Let us go to the dancing ground'.
K.15 Ra hor-hor kele 'Let us drive fish again'.

1pl.excl.: namb, nam, hab, na
namb
S.3 Kia namb-wan Lol-narong 'We are going to Lol-narong' (indef.)
S.4 Namb-wulí pwere-pwere 'We are going to sell the sow' (fut.)
K.68 Mar re namb un-un wā 'They wanted us to keep on diving' (fut.)

nam
K.90 Kia nam wā la 'We went to the shore' (past)
K.93 Lolak e tsats inir tutujak weren nam korta 'My heart is sad for my dear brothers whom we have accompanied' (past)
G.23 E wa na wan nam e Siu 'He said we should go off to Malo' (fut.)

nab
S.20 Na we nab wā ri eni pwere-pwere' sa mo tsall 'We want to take on board the sow you (were to) tie up' (fut.)
This form only occurs in the future, but the corresponding dual form nob is found in the indefinite as well.

na
G.23 See under nam, above, last example. (fut.); S.20 (indef.), see first example under nab above. There are no examples with a past.

2pl.: kam, kab, ka
kam
K.21 Tutu, ko kam läsi le-tär a? 'Elder brothers, did you see that woman?' (past)
Q.62 Kam läsi Mal-weaweng sówul, wū e-tsiga wör? 'Can you see Mal-weaweng at Showul, or not yet?' (indef.)
Q.90 Kami ko kam han? 'You then, have you eaten?' (past)
S.19 Kam wurei e-wise le 'Say what you want here'. (indef.)

kab
Q.4 Kab şuhu wör 'Heap it up yet more'. (fut.)
A.43 Kab şure! 'Make fire!' (fut.)
A.61 Kab ma kab lai na-rel nā:k 'Come and take up my na-rel dance'.
Other examples in Q.3, Q.63, Q.83, K.109, A.35, H.33, T.9, K.57,
G.18, G.29, K.42. Kab is the regular form before the negative...te.

K.105 Kab se karasi te Lebon Sa 'Don't play tricks on Lebon the First'.

See also for the positive: K.106, G.12, O.24, K.86, K.104, K.124, S.40, L.44. It is interesting to note that an adverb which contains the particle e retains it when coupled with kab:

S.2 Kab e-be? 'Where are you going?'

K.124 Kab e-be na sämi? 'Where are you that (I may) club you?'

ka

G.19 Ko ka lëv hösi tekau 'Take up the tekau shell-fish' (fut.)

O.9 Mwi re ka wurei ni-se, ko kab ar ma 'If you want to say anything, come back again' (fut.)

S.38 Kami ka mul 'Go away, you!' (fut.)

See further: K.142, K.108.

3pl.

Past: mar

G.23 Tutuñak mar uroi 'My brothers have eaten'.

K.16 Mar luha, mar ma 'They returned back, and came'.

Q.66 Mar lai watsin, mar mul 'They took them and departed'.

B.9 Mar tsubul Tiwil, mar läsi na-amp 'They went down to Tiwil and saw the fire'.

Indefinite: ar

Q.50 Ko ar tei na-ak na-tor sa Emil-Parav 'They fashion a canoe of na-tor wood at Emil-Parav'.

K.15 Ar hor-hor kele 'They drive fish again'.

K.36 Ko inir ... ar wä re ne-hi:m sär 'They go into their house again'.

Future: par

K.55 Ar re par rul pur-pur no-wof.'They wanted to break off their paddles'.

K.71 Mar re-ron par tigei win'ok 'They wanted to marry that girl'.

P.6 Pwi-re pwi sa, par liwe 'If there should be one, they will shoot it'.

3.4.6. Other Verbal Particles

Besides the particles of person and tense, there are two other particles in common use, viz. ar and ok. Of these the particle ar denotes repetition and frequency, while ok, which we have already met as a demonstrative, serves to express continuance of the action indicated by the verb.
The particle ar follows the verbal particle of person or tense, and in the past does not affect the form of that particle, i.e. if mwi would be used in the sentence, apart from ar, then mwi is still used. The same applies to the future particle. The following examples will illustrate the combination of this particle with the verbal signs.

**eer**
- Q.63 E ar wa 'He again says ...'
- 0.20 E ar wa, "Io" 'She replies, "Yes".'
- U.38 Ko Bat-pila natun e ar iwei kele na-mban 'Bat-pila's son again let go his sail'.

**mu ar**
- 0.20 Mu ar wureim ni ko? 'He came back and told you, did he?'

**mwi ar**
- A.48 Mwi ar ma warasi ne-hi:m 'When the time came again for you to pay a (ceremonial) visit to (my) house'.

**mar ar**
- 0.8 Mar ar re-rakere 'They were embracing' (continued and frequent action)

**pe ar**
- K.44 Ko pe ar ma pe lāsim 'I will come again and see you'.
- R.47 Timak e re pe ar lai nen pi wan 'My father wants me to take again his portion (to him)'.
- S.6 Ko pe ar tsali pwere-pwere nen 'Later I will tie up that sow'.

**po ar**
- P.7 Ko inik, po tara, po ar mats 'As for you, you will grow old and die (later, or, as a result)'.
- Q.74 Ko inik po ar wan, po tabu 'You go on again and cook!'

**pwl ar**
- A.29 Ko na-mbon kele ta-ru, pwi ar ma 'After two days he will come again'.

**pu ar**
- Q.80 Timām pu ar ma, ra hanl na-lok ni-le 'Your mother will come again and we shall (all) eat this pudding'.

**ro ar**
- B.3 Ro ar lawi ko pu-roŋ 'This time we two shall be able to take it up easily'.

**r'ar**
- L.41 R'ar ikir pwl lāp nā-tan re no-ur el 'We shall always be many here on this island'.
These examples make it clear that ar is a consecutive particle, expressing either the repetition of one act, or a second that follows as a consequence upon the first.

The particle of continued action is variously ok or m'ok. The following examples from the Texts will illustrate it:

B.13 Mi wan, m'ok lek re wowon-n'wat sa 'He went and stayed on a cliff'.
T.1 Ko m'ok wiel 'He kept on walking'.
T.8 Ko ini mu ok lāsi 'He kept on seeing (them)'.
F.15 M'ok tepel re-nēn 'He continued to work magic with it'.
B.23 Ko pe m'ok tabu na:m 'I shall (habitually) cook your food'.
C.6 Ko i-si le ni m'ok wits? 'But who is it here keeps on throwing?'
O.8 Ka m'ok kete ni-wat mu tsōv? 'Was it you who kept on casting the stone(s) that fell?'
Q.69 Ini tipwis, ko m'ok wan mar wul-wul pitewi 'He is only a child, yet they keep on going and buying from him'.
P.13 Inik mo m'ok kete no-uʃ m'uʃ 'You have kept on making it rain'.
K.108 Nam m'ok ral el ko pu-roŋ 'We've simply been walking about here'.
L.22 Ko kom m'ok wiel ŋa-mbe le? 'Where have you two come here from?'
K.102 Ka m'ok karasi tser ni Lebon Sa 'You are always playing tricks on Lebon the First'.
K.83 Ar mok karasim ko we! 'They keep playing tricks on you, alas!'
C.14 Pe m'ok haf ni-le watsin 'I will always land there now'.

mar ok

P.17 Mar ok kete no-uʃ re-nēn 'They continue to make rain with us'.
Q.23-24 Ko inir nor Emil Marur mar ok hor-hor, mar ok hore n'ehi 'The men of Emil Marur kept on driving fish, they kept on driving fish'.
Q.24 Ko mar ok ma ŋa-ok Ramason 'And they all again come here to Ramason'.
T.2 Mwi lāsi ŋa mar ok ʃu-ʃuolo 'He saw how they kept on carrying loads'.

3.4.7. The Imperative and the Particle te

The imperative is expressed by the future tense particles: po luha ma! 'come back!'; ka fú! 'Paddle(pl.)!' Many of the examples given as futures in the preceding pages have been imperatives. It remains to notice one point, and that is the use of the particle te with an imperative to modify the directness of the order, like the English 'just'
or 'please'. This is a particle fairly widespread in Oceania, and may precede or follow the verb:

A.48 Po wof nőtin na-na pu roq pwi sa watsin 'Please carry just one suckling-pig now'.
A.52 Ra wof te nőtin na-na pu roq mwi sa (plural of preceding)
G.29 Ko kab te läsi timam! 'Just look at your father!'
H.9 Po tiwei te na-na pwi sa 'Please scarify something (on me)'.
H.25 Po te wetsi 'Please scrape it'.
H.35 Po te läsi tasim wele ńa 'Please look at that dear brother of yours'.
JJ.1 Ko ra te wan ra läsir 'Just let us go and see them'.
JJ.6 Ko po te mak, ro wan ro läsir 'You just lead, and we two will go and see them'.
K.21 Pe te wan pe wurei ni tutufak iniri 'Let me just go and speak to my elder brothers'.
L.12 Ko kia, nob te läsi Ias 'Let us-two also see Ias'.

This particle te has still another use, expressing doubtful assertion, in English represented by 'maybe':

C.14 Ko ina pe haj te watsin re na-amp hon 'As for me, perhaps I shall go ashore at the sacred cooking-place'.

There is a separate word for 'perhaps', miterik:

D.9 Miterik Lebon Sa wele ńa 'Perhaps that is our dear Lebon the First'.
H.5 Miterik e ha e-pe ńa-in 'Perhaps it curved over this way'.

3.4.8. The Negative

The negative in Atchin is expressed by the word se before the verb and te after it, exactly like the French 'ne ... pas'. The vowel of the first element is variable, and may become o when preceded or followed by u or o, thus:

U.47 Mo so wof toni te 'You did not carry it'.
JJ.18 Nam se roge woje ni te n'āsān 'We don't know its name'.
K.72 Po se tsirer te 'Don't follow them'.
S.38 E so roq woje ni te 'He did not think it rightly'.
O.1 Mu so pep te 'She did not bear child'.
Q.10 Ra wurei na-na mo so roq woje ni te 'We'll tell you something you did not understand properly'.

3.4.9. Causative and Reciprocal Forms of the Verb

In most parts of Melanesia it is possible by means of prefixes to construct verbs indicative of causing to act and of acting upon one another. These are called causative and reciprocal verbs respectively. In Atchin, however, as in the northern Malekula area in general, such
prefixes are not in active use. The Indonesian causatives are pa and paka, and it is possible that a weak grade of the former may be found in Atchin, e.g. in wi-tsöv 'throw', lit. 'make-fall' (see 0.5 I-se mu wi-tsöv? 'Who threw it?'). As a general thing, however, the verb kete 'make' is used very much as 'make' is used in English. Examples:

0.3 Mar kete ni-wat mu tsöv 'They made the stone fall' (lit. 'made the stone it fell', and contrast 0.5 above)

R.28 E kete na-amp e mats 'She made the fire it dies' (i.e. 'she extinguished the fire')

R.29 Ko e-wise ini mwìi kete na-amp mi mats? 'Why did she extinguish the fire?'

As far as the reciprocal form is concerned, there are no clear examples in the texts, but in those that seem to be reciprocal the re-duplication of the verb appears to do duty:

G.7 Po läšöi na-na jopon mar re-rakere 'See some things embracing each other'.

Another possibility is the use of the ordinary suffixed objective pronoun in a reciprocal sense:

GG.2 Mar liw-liwer 'They shot at each other' (or 'they shot them')

3.4.10 The Adjective

In a number of Melanesian languages the adjective is always or frequently verbalised; in nearly all it can be varied for person and tense if used predicatively. That is to say, it always partakes of the nature of a verb, or at least of a time-word. We have already seen that in Atchin it will vary regularly for number, person and tense also when used attributively. We saw also how close the sentence tsünöb e res is to the Mota o tanun we wia, meaning either 'the good man' or 'the man is good', and that in the English 'everybody will like the good man', Atchin varies the particle of both 'verbs', while Mota varies only that of the former; Mota says o tanun we nól te tape o tanun we wia; Atchin with more self-consistency will say tsünöb tsile par-re-roŋ tsünöb (ŋa) pwi res, lit. 'People all will like the man (wh-) he will be good', where wh- represents the relative element of the English 'who'. The 'adjective' becomes future like a verb because it also is a time-word to the mind of the Atchin native.

The scheme is not entirely complete and self-consistent, however, as there are in Atchin two different uses of the adjective (or descriptive time-word), one of which is the attributive, without verbal particles, as in English: nu-mbo top-tap 'a sacred song'; na-amp hon 'the sacred fire'; tsünöb sa 'a certain man'; in the Texts:

D.11 Tasir wele ŋa mul ma 'Our dear (younger) brother who has come'.

N.1 E wal' toni tó-bati 'He runs after a dappled fowl'.
Q.75 E we natu bātiram 'He is the eldest son'.

H.2 Ko tasin sa noreman ma-lakel 'And one younger brother, male, youthful'.

Here we have a collocation of three adjectives which are difficult to render into good English as they stand.

(a) The Formation of Adjectives

Whilst the majority of adjectives - or stative verbs, to use the classification accepted in the last section - are underived words, such as lep 'great'; jopon 'some', yet some are derived words, formed by the prefix ma-. This prefix, however, is not in active use in the language. It is of Indonesian origin, and some adjectives have come into Atchin already formed with it: ma-höm 'hungry'; ma-mbur 'broken, snapped (of twig)'; ma-lakel 'young (of persons)', in this instance corresponding to a verb lakel 'become adult'. Such examples as there are of these formations will be found in the Atchin Vocabulary.

Nouns can also be used attributively with other nouns, i.e. na-ak na-tor 'a na-tor canoe', i.e. one made of na-tor wood.

(b) Comparison of Adjectives

The following table will show the methods adopted in Atchin for comparison of adjectives:

<table>
<thead>
<tr>
<th>English</th>
<th>Atchin</th>
</tr>
</thead>
<tbody>
<tr>
<td>'big'</td>
<td>lep</td>
</tr>
<tr>
<td>'bigger'</td>
<td>e lep-lep</td>
</tr>
<tr>
<td>'biggest'</td>
<td>e lep-lep nirl; e lep-lep na-won</td>
</tr>
<tr>
<td>'small'</td>
<td>wele</td>
</tr>
<tr>
<td>'smaller'</td>
<td>e wele-wele</td>
</tr>
<tr>
<td>'smallest'</td>
<td>e wele-wele we-sa</td>
</tr>
</tbody>
</table>

The correspondence of Atchin and English is not exact. An example is seen in KK.5 Tasin a mu wele-wele 'That brother was the smaller'. The last phrase given above is interesting; we-sa means 'once', and the expression e wele-wele we-sa corresponds exactly to the Malay dikit sa-kalian, lit. 'small once' = 'very small'.

There is one example of the particle a used in a superlative sense: H.44 Mu ro-romi mwi-lāp a mwi-lāp 'He grieved very greatly'. It will be remembered that a is a demonstrative following a noun in the sense of 'that'.

3.4.11. The Adverb

Some of the adverbs - those that do not vary for tense - have already been treded above as object-words. These were adverbs of place. We
still have adverbs of time, manner and degree to deal with. These do vary for tense and so are time-words.

Just as there is an attributive use of the adjective, so there is of the adverb: Lolon e har melker 'his invisible was bitter greatly', i.e. 'he was very angry'.

U.48 Ina me haj womu 'I landed first'.

It is far more usual, however, for the adverb to agree with the main verb in tense, and examples in Section 2.3.1.(b) will make this clear. We have already faced the paradox that most adverbs of time are object-words, and have listed them; those that remain to be considered are not numerous, and are mostly compound phrases whose verbal nature is obviously the reason for their functioning as time-words. The first group is that of the compounds of no-ut.

Compounds of no-ut: this word means 'a place', but is used in Atchin, as in most languages of the central New Hebrides, in certain set phrases, of which the following are examples:

1. No'ut m'boŋ lit. 'the place was dark', i.e. 'at night'
2. No'ut poŋ lit. 'place dark, when it was dark, at night'
3. No-ut pu poŋ future tense of the preceding two phrases.

B.4 No-ut m'boŋ, or woʃi roʃer, or wiel la 'When it was night they-two took torches and walked to the shore'.
N.11 Or le-lek no-ut poŋ 'They stayed till night'.
B.3 Weral no-ut pu poŋ, ko ro wa ruʃi 'This evening (lit. today, when it is night) we two will search with torches'.

A kindred usage is that of e räv-räv, lit. 'it is evening', i.e. 'in the evening'.

N.25 Ar lek e räv-räv 'They stayed till evening'.

E ser-ser = 'suddenly, often'.

K.19 Ko ma-lakel e ser-ser pu-roŋ o 'Oh, she has suddenly become a young woman'.
M.7 Ko maki m'pal mwi ser-ser 'The maki was sacrificed often'.

The literal meaning of this is 'suddenly' or 'quickly'; 'often' is a derived meaning. We see the original in:

R.2 Inik po la buha pwi sa pwi ser-ser 'You take a pig quickly'.
Parav 'later', is also a time-word:

R.3 Ko maki mu to m'parav 'The maki has been put later'.
Te-rik 'perhaps', is rather difficult word which is treated as a time-word, although the meaning of te is not clear; rik means 'indeed'.

Examples:

D.9 Mitelik Lebon sa wele ŋa 'Perhaps that is our dear Lebon the First'.

DD.30 Pwi te-rik pi kete kele taron'ok 'Perhaps it will be done so again nowadays'.
(a) Adverbs of Manner and Quantity

Many of these words are also used adjectivally, and some will therefore be familiar already. If these are used to qualify nouns, they are adjectives; if used to modify a verb, they are adverbs; there is no difference in the nature or use of the word. In either case they remain time-words, and are used as in the following examples:

A.41 No mata e-läp 'I am greatly afraid'.

P.11 Inik po tara pu wele-wele, ko po mats 'You will grow old a little and you will die'.

The interrogative adverb of manner is e-wise, and although this is here given with the indefinite particle, it does not seem to be used with any other, no matter what the agreements would require. The following examples will show its use. The word itself appears to be a causative form from ni-se 'what', lit. 'doing what?'. See the preceding section on causatives in verbs.

K.59 Pe wä tan pe läsi e-wise nà mi mats 'I will go down and see how she died'.

U.47 Ko inik, ko wise mo so wof toni te buha pi wä e-hüt? 'Why haven't you carried out the pig that is to go on shore?'

U.49 Inik ko wise mo wurei mwär' el? 'Why have you spoken to the man?'

H.32 E-wise ko mo ro ro wiel? 'Where did you want us two to go?'

K.63 Ko e-wise'? 'And why this?'

K.10 Ko e-wise ni n'ei el? 'And what's the matter with this fish?'

(N.B. the word wise becomes a specifically transitive verb with ni in this example)

K.37 Ko e-wise nà pwI tigel? 'Why should he marry her?'

L.6 E-wise mu ro rew-rewtsi tsünöb? 'And why did he wish to kill the man?'

N.29 A ko e-wise mo hatsi tsünöng pitewi? 'For why did you bite your lip at him?'

N.31 E wa, e-wise? 'He says "What?"'

A.40 Ko ko e-wise mo jok? 'And why did you hide?'

Another word that calls for special notice is the word pe 'like'. This is definitely a time word, and is often combined with the ligative nà; the whole combination epe-nà, etc. is used by the missionaries as equal to the English conjunction 'that', but no such combinations are found in the Texts, and the use is probably illegitimate. The following examples will show the forms actually found in the Texts:

G.16 E se re pe te nà pi pep 'She is not such as will bear a child'.

H.5 Miterik e ha e-pe nà-in 'Perhaps it curved over like this (arrow in flight)'.

K.115 Ra kete pi pe ni-se? 'How are we to do it?'

L.25 Ias, po se kete te pi-p'ok 'Ias, don't do it like that'.
M.3 Na-vül ok mwi sa nga e re p'ok kisen 'Another month has passed and it is the same again'.

M.4 E-pe na-riv wànu le-lek ko pu-ron (They are) like rats staying always in one place'.

N.19 Ko pe ar sere kele ko pu-ron pi pe nga mwi sere 'I will shut it again just as he shut it'.

P.5 Na-mbon sam e p'ok 'Such are your days'.

R.17 Ko ina tuak e se sa te n'äsän pi p'ok 'I have no friend with such a name'.

Q.59 Ra tuwe sak pi pe tawi 'Let us pile up mine (the mound for yams) to be like the mound (I built before)'.

(b) Adverbs of Affirmation and Negation

The ordinary word for 'yes' is io, that for 'no' is tsiga. The former is an object word, the latter a time word, as seen in these examples:

G.5 Mwi tsiga 'It was in vain'.

H.7 Ko läsi wù-na e-tsiga? 'Did you see it or not?'

H.39 Ko e wa, 'E-tsiga' 'But she says, "No".' Similarly N.30.

R.1 Ko ini buhã e-tsiga 'But he had no pigs' (lit. 'he pig it not')

R.3 Ko inik mwi-tsiga 'But you hadn't any (pigs) ...'

Another form of the negative, also a time-word, is tsa:

G.19 Ko mwi tsa 'But it was not (so)'.

K.104 Mwi tsa, ko kab mats 'Were it not for him, then you would have died'.

A.1 Timän e ro pwi tsa ni 'His father didn't like him'.

A.52 E, buh'ok pwi-tsa te 'Eh, not that pig, please!'

C.12 Ini e ro pwi-tsa ni 'He did not want it'.

C.13 No ro pwi-tsa pe wä Woremet watsin 'I don't want to go to Woremet now'.

E.8 E ro pwi-tsa 'It will not (do what is asked)'.

K.12 Inik ko rãm pwi tsa te pu-ron 'Then there will simply not be any food for you'.

Q.89 E ro pwi-tsa e hani na-lok 'He does not want to eat the pudding'.

3.4.12. The Numeral System

Numerals are very definitely time-words in Atchin, as they are almost always combined with a verbal particle, which agrees in tense with the verb of the main clause. In such an example as K.37 Pwi sa pwi tigei 'Let one (of us) marry her', the marriage has not yet taken place, so the bridegroom is to that extent also hypothetical. He is still a 'future-one'.

1See Capell 1935:199 for other examples from the Mission translations.
The plain numerals, bereft of all accompanying particles are:

(a) Cardinal Numerals

<p>| | | |</p>
<table>

<td><em>saŋawul</em> romon e-<em>ru</em></td>
</tr>
<tr>
<td>20</td>
<td></td>
<td><em>saŋawul</em> mowil e-<em>ru</em></td>
</tr>
</tbody>
</table>

This system could be continued indefinitely as far as needed. It will be noticed that it is a fully decimal system. The meanings of the component elements do not concern us here.

A few examples of these cardinal numerals with the added verbal particles of the different tenses follow:

H.15 *Mu nunre re malin e-siu 'He examined at nine beds'*.  
K.4 *Ar lai masal e-saŋawul 'They take ten fish'*.  
K.9 *Mar we-we ña e-siu pu-roon 'They counted up to nine only'*.  

It is to be noticed that with the numeral on 'six', the verbal particle of the indefinite becomes o by assimilation, being felt as part of the word; the same applies to *wal* 'eight', where we have ò-*wal*.

**JJ.30** *Tahar mu hoti buha e-mow saŋawul 'Tahar brought a hundred pigs'*.  
**P.1** *Mewi ko e tei wen-wa-saŋawul 'In one day he makes a thousand'*.  

Examples of the past tense particle are seen in the following cases:

C.11 *Ko mwi sa ko e wurei e re i-sän 'One said he wanted it for himself'*.  
L.23 *Inir mwi sa mi wahe 'One of them deloused him'*.  
M.1 *Na-vül ok mwi sa 'Every month'*.  

**Future tense:**

A.48 *Po woʃ te nötin na-na pu-roon pwi sa watsin 'Just bring one sucking pig now'*.  
H.20 *Ko po tei nu-as pwi sa 'Now fashion a digging stick'*.  
H.34 *Ko kami pwi sa pwi lek 'Then one of you shall stay'*.  
K.86 *Kab wan ko kab wà re na-na pwi sa 'Go and all go into something (to protect you from the rain)'*.  
O.14 *Mar re par wurei na-na pwi sa '(If) they wished to tell me anything'*.  

In many instances, however, the numeral sa is used attributively without particle to express the indefinite 'a', 'any'. Examples of this have already appeared. A good example of this is seen in:

A.1 Na-sup sa, natun e-ru 'Once there was a man who has two sons'.
L.8 Sa ne-sar e-ru ko nei sa '(For) each two spears and a club'.
K.23 Ko pe te wurei na-na sa 'Please let me tell (you) something'.
K.61 Mwi lai kele marwiri sa 'She took a cane again'.

This usage is naturally limited to the first numeral, which alone can be indefinite in sense. If the sentence is negative then the numeral takes the negative particles exactly as a pure verb would:

R.17 Ko ina tuak e se sa te nüün pi p'ok 'But I have no friend whose name would be like that'.

The only noteworthy point is the use of the particle e in addition to the negative, as though the whole complex 'not-one' were regarded as a single verbal idea.

As already shown, the verbal particle can occasionally be replaced by the emphatic particle le. The particle ko can also take this place, though what the exact force of it is does not seem clear. An example is seen in:

JJ.17 Ko na-na ko sa me lai pîtwi m 'Just something I have given you'.

In the missionaries' work I find: Ni-sâl na mu nats ko sa 'some other way'; mar ma re moral na mi lep ko sa 'They came to a big place'. Also:

N.28 E re pu wurei na-na ko sa 'He wants to say something'.

(b) Ordinal Numerals

'First' is womu; above that number the ordinals are formed by the addition of -en to the cardinal, the verbal particles of course remaining just as before. So we get:

1st womu, täs-en
2nd ru-en
3rd tol-en
4th wats-en
5th lim-en
6th won-en
7th mbüt-en
8th wal-en
9th siü-en
10th saqawül-en

Above tenth, the method of expression, according to Layard's notes, is different, but unfortunately he did not collect examples, nor do any occur in the Texts. He gives:

11th e saqawül romon sa, or e saqawül e-täs kele, i.e. '10th and 1 again'
12th e saqawül romon e-ru kele '10th and 2 again'
(c) Multiplicative and Other Numerals

So many times a thing is usually expressed by the preposed particle wa, in some cases varied to wä. So we have as multiplicatives:

- 'once'  wä-sa
- 'twice'  wa-ru
- 'three times'  wa-tol
- 'four times'  wa-wats
- 'five times'  wa-lim
- 'six times'  wò-won
- 'seven times'  wä-mbüt
- 'eight times'  wò-wal
- 'nine times'  wä-siu
- 'ten times'  wa-sağawül

The following are Text examples:

K.62 È süp wä-sa 'She moves it once'.
R.39 Liwon e tal wa-ru 'Its tusks curve round twice'.

This wa is really the Indonesian causative prefix pa-, pa-ka-, used in the Banks Islands and northern New Hebrides not only with verbs but with numerals as in Atchin. In Atchin, as we have seen it is practically not used with verbs at all.

(d) Other Particles with Numerals

In some instances particles other than those of a normal verb are used with numerals in specific senses. Thus ta is used before numerals expressing a number of days:

A.19 È wa, 'Ta-ru' 'She says "In two days time"'.
A.35 Ta-lim weral kab ma kab tuloni 'In five days (from) today come and take her away'.
B.31 Maki sa e-Ra we notout, ta-lim le weral '(There is) a Maki at Raga among the bushmen, five days (even) from today'.
JJ.28 Tahar e wa, 'Mwi-tsa, ko ta-ru' 'Tahar says, "Never mind, then in two days!"'

The particle may also be used with the numeral when the noun is expressed:

A.29 Ko na-mboŋ kele ta-ru, pwi ar ma Noriʃere 'In two days' time, then they will come again to Norishere'.

In this case, however, it is not obligatory:

A.19 Mwi lek na-mboŋ e-ru 'He stayed two days'.

ATCHIN AND ENGLISH VOCABULARY
INTRODUCTION

The chief abbreviations are the following:

S.L. denotes the song language of Atchin.

Comparatives from Malekula dialects: MidN = Middle Nambas; BN = Big Nambas; Sin = Sinesip, South West Bay; Boi = Boinelaŋ, near Aulua; Lolng = Lolŋaroŋ, Port Stanley; other dialects generally not abbreviated.

Omba dialects: Lg = Lologaro; Lm = Lolmaŋwe; Dui = Duindui; Wl = Walurigî; Raga dialects: NR = North Raga (terms supplied by Rev. Dr W.G. Ivens); CR = Central Raga (MSS. vocabulary with Mota equivalents by Rev. L. Levuhi); SR = South Raga (from Père Tattevin's texts in Anthropos 1929, 1931). Maewo = Maewo or Aurora I.; Mta = Mota of Sugarloaf I., Banks Group; Erom = Eromanga, southern New Hebrides.

A few words of interest are given also from Lb = Lembel, New Ireland.

The letters IN = Indonesian, PN = Polynesian, MC = Micronesian, and MN = Melanesian, i.e. forms fairly common throughout Melanesia. In some cases references to the Texts are given by letter and figure.
That. Mwär' a 'that man'; win a 'that woman', etc. See A.13,14; K.18; H.4, *inter alia*. There are two extensions of the meaning: (i) general emphasis: Q.87; N.13, etc.; (ii) a relative meaning, 'who, which': F.3; N.36; R.48, 55, 58; S.29.

Belonging to. seq. H.16; U.5 et seg.

Conjunction, if. A.74; K.7.

Interjection. B.40; K.25, indicating anger.

Suffixed pronoun, objective, lsg., sometimes euphonically ia.

Suffixed pronoun, 3sg., e wureia tūān 'he told it another'.

Water (nu-a). MidN no-wi; BN na-vā; SR wa; NR wal, not CR.

Interjection of surprise; see also hai.

House; used only in the phrase lol'aim 'indoors'. The general word is hi:m. IN yumah.

Canoe (na-ak). U.5 et seg.; Also a toy canoe; na-ak wala 'long distance canoe'; no-wof na-ak wala 'steering paddle of this canoe'. MidN n'āk; BN na-wāk; Lg ange; Vao nu-wāk; IN waŋka.

To draw (a bow).

The sun (ni-al). P.1; R.9; U.56, etc. Ni-al rur hore 'to "thatch out" the sun', 'extension of thatch on gable end of a lodge'. Times of day: ni-al e wā tsalil 'sunrise'; ni-al mu wā tan 'sunset', which is also ni-al e nun, or ni-al e ju-juwo ni 'the sun dives', 'the sun paddles away'.

In n'āl alal 'sticks for making fire'.

On the shore. S.L. for ŋa-la.

The dancing ground of a village (namal). See also hamal. Vao and Lalap (mainland) yamal; Wala namal for namal; also amal.

A sacred jar (na-amboi).

Fire; firewood; light of torch (na-amp). IN apuy. Na-amp hon 'the sacred fire', Q.78; na-amp jūl-jūl 'white band with markings produced by fire'; ni-ās na-amp 'smoke, ash'; par juri na-amp 'the cooking (and eating?) of puddings'; ratse na-amp 'embers'; no ki-ki na-amp wū han 'I have kindled the firesticks and the fire has caught'.

A fruit whose juice is used for stunning or poisoning fish. See also tuw. Wulu nu-amp 'mushroom type club'. (nu-amp).

Not yet. S.L. for tsiga wor.

Atchin pronunciation of English 'anchor', used as personal name of a pig.

Verbal pronoun, 3pl.indef. See also rar; ar-ru ŋa 'those two', L.26.

Particle between verbal pronoun and verb, indicating reiteration. E wok ŋā-in pwī ar ma ŋā-tn ko ro 'he went there and is going to come back again'; pe wā ko po ar luha ma ko ro 'I am going but will come back again'.

The casuarina, used for purlin in lodge construction; ridge pole of lodge; also arrow used for removing upper canines of tusker; also for making spears and clubs. Mta aru 'casuarina'.

In buj are 'index finger, second toe'.

Interjection of astonishment. K.22; N.39.

Pig's jaw. Name of a ceremony (ni-as). Na-ni ni-as
'coconut thrown to the women';
na-mbu ni-as 'the bamboo of the
ni-as'. IN ajay 'jaw'. See
also ås.

as² Luck. Ni-as e-res 'good
luck'; ni-as e-tsats 'bad luck'.

asar Name of a gong signal.
Asarân 'giving the asar'. Vao
and Wala ditto.
as To blacken the face.

asten Name of a plant employed
in magic (n'asten).

äi For hâi, q.v.
at Thatching palm, thatch (ni-
at). Vao ditto; IN atop. Nam
pelasi ni-at 'we remove the
fronds of the thatch palm'.

awawan Name of a ceremony.

äi Tree, wood, club (n'äi). IN
kayu 'tree'. N'äi alal 'sticks
for making fire'; n'äi na-mbwe
'gong stick' (contrast na-mbwe
n'äi 'a gong rhythm'); n'äi res
'good club'; batn'äi oremam
'small green shoots'; no-on
n'äi 'face of the club', the
square end of it; talin n'äi
'club rope or shoulder strap';
wenen n'äi "flower of the
club", pointed projections on
it.

är A fence of reeds (ni-är).
Vao ni-ar. Ar pale ni-är 'they
build a fence'; ar pali ni-är
'the fence is shaken down';
i-är merer 'fence built round
a clearing'; na-mbu re-re ni-är
'bamboo poles for fence'; ar
buri ni-är 'bamboos are brought
for the fence'; ni-är tağöv
'fence built after a special
pattern'. Le ar.

ås Pig's jaw (ni-ås). See also
as. Ni-ås sam e-tsiga 'have
you no pigs jaws'? SR bwel-ase
'jawbone'; Oba bal-ahe 'jaw';
IN ajay.

åsän His jaw, his chin (n'åsän).
IN ajay. Also used for beard
or moustache (n'åsak, n'åsäm
n'åsän). cf. ni-en. N'åsän
bahi "shark's jaw", type of
entrance reserved for lodges
and dance enclosures of older
men; n'åsän man "bird's beak",
term for pattern on dancing
dress. cf. tsuŋ bâti-ram.

älawan Sister's son. Fiji
lawana 'helper'; Bwaidoga
(Papua) lawana 'relationship
term'.

Ba The island of Oba. Mta Opa.

ba-ba In e ba-ba ra riv 'jum-
ping movement in a dance'. See
riv 'rat'.

bag In bag e ran 'cloud'. See
ran. MidN pâk-ne-ran; BN bâ-
na-rân 'sky'. cf. Kuanua, New
Britain bak-ut 'cloud'.

bahi Shark. Bahi e hâtsi "a
shark bites him", operation of
incision; mâmän bahi "shark's
tongue", instrument of hard-
wood used in incision; n'åsän
bahi "shark's jaw", type of
entrance reserved for lodges
and dancing enclosures of older
men; mew làn bahi 'headress
of fowl's feathers worn in
dance'; na-vûl bahi e pari
"shark attacks", name of a
month. Vao baye; MidN bagi;
BN ni-mbay, contrast Mota payoa,
but both from IN pa-Iwak 'giant
fish'.

baho Incision. Baho tureput
'the older use of incision';
baho nôsôs 'the newer use of
incision'; pâtî bahô 'chief can-
didate' or "head" of incision;
no-ut bahô 'incision garden';
ser bahô 'initiation fooler';
o no-hûl bahô 'I kill pigs at
incision'. Vao bayo.

babor(e) Species of tree. K.87,
etc. A kind of nut. Vao
bayure.

bal Voiced form of pal, q.v.
Po ma pe balim 'come here that
I may give your your consider-
atation pig'. SR bal. cf. Mota
ma-lai.
bala-n Leg, shin, foot, peg.
Tsin balan 'ankle bone, medial and lateral malleolus'; n'ôtsin balan 'heel-bone', lit. 'penis of the foot'; lolon balan 'in-step', lit. 'inside of the foot'; owön balan 'upper surface of the foot'; balan wulu 'the leg of the tree-fern image'; e riŋ-rigeni balan 'to shake the patient's leg after massage'. Uripiv bûlan; MidN bulon.

balak A number of small pigs received in exchange for a large one. cf. palak.

ban-ban Kind of armlet. Ban-ban taŋôv 'shell arm ladle'. cf. Mta pane'.

bâri-n Calf of the leg. Tsin barin 'bones of the calf; tibia and fibula'.

bas In batin bas 'coconut leaf'. Ne-rum bas 'principal solo dancer'.

bat Used in a number of personal and place names, may be the same as bût, pût, bât, and ultimately ni-vât 'stone'. IN batu. On the other hand it may also connect with the Qat, Ambat mythology. One of the compounds is To-bat, the name given to those who have been to Wânû si tahar. Bat-pîla is an Atchin proper name.

batav The breadfruit. Tauwtsen bataw 'halves of a breadfruit', used to describe the two halves of the painted body in initiations. Mota patau. Common on the Malekula mainland also.

batenar In ar ta-tal batenar 'a triangle of stars representing a clump of yams slung over a pole'. See ta-tali.

batî-n The upper canine teeth of a tusker. Ra bâti buha 'they extract pig's upper canines'; ar bâti tamaw 'they extract the upper canines from a castrated pig'. Wala batin ditto. See also mbat.

batu-n The head of a person.
IN batuk. Roin batu-n 'hair (of the head)'; batun is also used to mean "origin": batun wanu 'places of origin'; batun bahur 'the trunk of a bahur tree'; batun na-ak 'the stern of a boat'; batun na-to 'base of a to-creeper'; ra raŋ utômî batun n'ai 'we pull out (?) the stump of a tree'; ne-lüp re-res batun maiwet 'thatching batun's projecting beyond the thatch, retaining their roots which make a fringe'; batu ram "head of a yam", the name of a constellation. MidN batun; BN bûtôn; Lg ñgwatun.

bân-ban In ro-ware bân-ban 'species of leaves'. cf. ban-ban.

bâŋa-n The orifice of the penis. IN bânga 'opening, mouth'. In the other Malekula dialects it is generally 'mouth', e.g. Aul bâŋän.

bêt Source, origin, end. Retracted form of batu-n, q.v. Kîla bêt 'to see that the gongs are finished'; bêt rofer 'stump of a torch', 'seventeenth day of month'; bêt na-tân 'buttocks'; bêt rül-rülôm nan 'his adam's apple, thyroid cartilage'; bêt marl 'verticle bamboo supports for front wall of house'; bêt mew 'type of dance'; bêt-mew e habwe reñwe 'a charm to bind people of present pigs'; bêt-mau 'earth, dust'; bêt-mow 'a mortuary gong signal'; bêt-i-ram "head of the yam", eldest child (with possessive nan). Bêt-rum proper name, which seems to mean "the earliest woman heard of"; bêt-e-rum 'a giant clam shell, in the myth of the Brothers Ears; a shell, Hippopus'; ro-bêt tawe 'leaf by means of which ro-kari leaf is tied round a stick at the death-feast at Emil Luëp'; bêt-n'ai araman 'small green shoots', lit. 'the male beginnings of a tree'.

bûtî-n The commencement. Bûtin teren e sor 'swelling at the base of the intestine'. See preceding word.
beik In re nøn beik 'a kind of shell'.

bekarkar A sweet scented shrub whose leaves are used in a bouquet called segur, q.v.

bel Hawk. Bel-∫uljulān "Communion feast of the hawk".

belet In ro-belet 'banana leaves', also the dance of the "banana leaves"; 'dress of banana leaves'; ar tamwe ro-belet 'they dance Banana Leaves in turn'.

ben In mātān ben nan 'patella, knee-cap'.

beggenum Name of a fish with curved lines on it. No-ul sin beggenum 'a curved design painted (ul) on the cheeks'.

berte-ni To turn one's back to.

betselahli To look for. Frequentative, bets-bets-betselahli. Perhaps Mota taloi 'to seek'.

biok Taro. Pweren biok "taro stem", a kind of club; mawun biok 'small taro'. MidN and BN boak.

biton Umbilical cord. Vao ditto; Wala bütun; MidN biton; BN buton; IN (m)pusar 'navel'.

biwat A bamboo. Wala büwät, pübät.

bonon Small heap on top of yam mound surrounding base of nusur vow-vow. Triangular projection in middle of sail. "Forehead"?

bọq Voiced form of pọq 'dark-(ness)', the articular form being mbọq. SR buj; Mota qọq; common MN mboqi; IN mbọqi 'night'. In Atchin the word covers the whole 24-hour period, and so may often have to be translated 'day': bọq hoal wele 'days of little food (?rain)'; bọq hoal lāp 'days of much food (?rain)', 'names of months'.

bọjin By-form of preceding, with crystallised possessive suffix. Bọjin ta-mbūt wērāl e tār-tār 'exactly seven days from today'; bọjin sa 'first day of the new moon'.

boron Ear (bora-k, bora-m, boro-n). Projections at bottom of knife blade. Le-bori-weren "Rat's Ears", proper name, K.107 et seq.

borot(o)won Sleeping mats.

borsūs In met borsū 'young coconuts' (about as big as a man's thumb).

bos To cover with leaves.

bouru A person. Special word used on the Oba Pilgrimage.

bu A bamboo pipe. Bu pal-pal 'pan pipes'. cf. mbu, wu.

bua- Grandparent (buak, buam, buān, etc.).

Buaror The name of a month.

bub To fasten, tighten. E bub toni pwe-pwe e-re batun 'he fastened the rope round his head. LL.

buha Generic term for pigs. See also poho, mbo. Ne-hi:m slā buha 'pig-sty'; nōtin buha 'newly weaned pig'; līhwen buha 'teething pig'; tālin buha 'pig rope'; rabati buha 'to extract the upper canines of a pig' (see bati); līwon buha 'boar's tusk bracelet', 'spiral shells'; wener buha 'pig's legs'; līlin buha '?pork cutlets'; ar tiwel buha 'they cut (the cheeks) of the pigs'; nekel buha 'soft yam'; e tsibo buha na-mbwe 'he gives back the
buhā Retracted form of preceding. 
Buhā Qur-Qur 'pig's grunting', 'the bullroarer'; buhā liv-tōv 'young pig with tusk just erupted'; buhā pal-pale 'young tusk with upper canine'.

bulun Word used in counting beyond a hundred. Mōw sāgawūl bulun e-sāgawūl romon e-mbūt 'a hundred and seventeen'.

bumbu Term of address to grandparents. Rel and Lalep use bua-k; SR bibi; MidN bubu; BN bumbu.

bunon The end of a thing, e.g. a taro.

bunun In R.8 possibly a mis-hearing of punun "it will sink", i.e. the horizon.

buobu Name of a ceremonial object.

buok Name of a ceremonial object.

buri ?To bend. Ar buri is a term used in thatching: Ar buri nl-ār 'they bring bamboos for the fence'; ar tāl buri 'they fell a tree'. Frequentative transitive bur-burenīl: na-mbwe bur-burenīl 'a gong rhythm in which the dancers take a serpentine course'; ar burenīl 'to advance in serpentine course'; bur-burenīl nosos 'a gong rhythm', on the feast of jur-hamben.

bur-tān Tail, fork projection on canoe figurehead; tail of bird. Takes suffixed pronouns.

bwaq-hwaq In bwaq-bwaq balan 'calf of leg'; bwaq-bwaq weren 'radius and ulna, forearm'. See also bāṅ. Bwāñ-bwāñ 'garter'. Sinesip binbe.

bwaq Penis wrapper. Leq bwaq 'a type of square-dance'.

bwerew In kan bwerew 'a gong slit'.

bwetegatik Baby's rattle.

bwetelak Plain stout stick about six feet long. Pegs driven into outrigger float of canoe for attachment of outrigger booms.

bweteman Hard yams.

d- Many words in the Atchin text beginning with d- or n-d- should be looked for under t, as d- is merely the voiced or articular form of this initial. The few given here do not exist in the unvoiced form or else are used in special phrases.

daṅ In win daṅ 'the thin lip of
the gong'. Also 'crying of woman': IN taŋis 'weep'; Atchin taŋ.
das Voiced form of tas 'sea'.
IN tasik. Mwarä n-das 'sea folk'; ar tsere owow das 'they remove the salt-water from the gong'.
dûŋ From tãng 'basket'. IN taŋ- 
an 'holder'.
drini From liŋi 'companion'.
Mar wel drini 'they danced to welcome him'.
droŋwe Paraŋ droŋwe 'beginning to hollow out'; ar riŋ dronwe.

e1 Verbal particle, 3sg.indef.
e2 And.
e3 At, in. e-Tsan 'at Atchin'.
It makes a compound with re, as e-re 'onto, into'.
e4 Interjection of impatience or of excitement.
ehi A fish (generic), before it has been caught; after it is caught it is called masal. E liw-liw ehi 'to shoot fish', but after the long phrase liwe, the article (n'ehi) is used; batun n'ehi 'fish's head'; n'ehi 'fish', is also used for the diamond pattern on a woman's skirt; n'ehi a n'ehi 'plenty of fish'.
el Dempostrative particle: this. Win el 'this girl'; buhã el 'the pigs here'; here, usually compounded as nga-el or ni-el.
It indicates closeness of position rather than demonstrativ-ness.
eel A sweet scented shrub used in the bouquet called segur, q.v.
embe-n The body (n'emben).
e-ra An exclamation: e-ra M ..., po matsiq sak 'Hello, M ..., will you work for me?'
es An exclamation of disapproval or incredulity.
 ewiŋ The name of a flower.
gunsun The nose. Takes suffixed pronouns. SR gususu-.
h1 To curve over (of an arrow in flight). H.3,5.
h2 Species of creeper used for making rope. U.32.
h3 Coil of hardwood used as bracelet.
h4 Fishtrap, used by adults for salt-water fish. Made from vine ha2, also na-ha mbuts-mbuts from plant called mbuts-mbuts; na-ha tiro 'a liana used for fishtraps'; na-ha tapar 'a special trap still used on Vao'. IN kaŋṭun 'a basket'.
habwe In bât-mew e habwe rongwe 'a charm to bind people to present pigs'.
hada The outside end of the outrigger boom of a canoe.
ha-ha Reduplication of ha', 'a trap for freshwater fish'; also from ha3 'bracelets made of strips of cane'.
hai1 Exclamation calling a person's attention.
 hai2 To take out of the fire, applied to a pudding.
hale To turn something. E riři hali-hale 'to dance with arms bent'.
hamal Public square, dancing ground, half-village. Lol-hamal 'initiation lodge'; also amal. SR mař; Ambrym mař; CR kamal.
hamben In jur hamben "cooking the feast of commemoration", a rite. Probably from jur and amb 'fire', with gerundial ending.
han(i) To eat. A ritual word,
the common word being uroil. Mta yana; BN hani, etc.; IN ka(o)n-i.

hanan Eating, food. Na-na hanan 'food in general'.

hap A pig grade, re-entrant tusker plus (e hap).

har To burn (intr.). Lolak e har 'my inside burns', i.e. 'I am angry'; me ral-dral har jopon ko me ar ma 'I came somewhat early and here I am'; cf. Orierh i har ran 'he rebuked him'; Vao har 'to shine'.

hasa To climb over. cf. sa 'climb'; sa-sa 'keep climbing'. Frequentative hasasa; row has ni 'jump away from him'; row hasa 'jump across.

hases String. Na hases wülu wawa 'plaited string from wawa tree'.

hafi To enter into. B.11; H.8; K.88, etc. Has tsali! 'come out, emerge', K.98,102; See also aşasi, warasi, aşi, Q.41, aşi wâ 'go into'; hafi-hafi 'go in one after the other', K.87.

hatsi To bite. Ni-tal e hatsi ni-wat 'the tether eats into the stone', a rite, tying the pig rope to stones. Wala n'tål mwi hatsi; Vao yati; IN kati. See also háts.

hatünsi A cure for fever is called hatünsi tsünöb in the magic texts.

hawe In ra haw-haw 'they take off (the head covering)', the name of a rite.

hawof A coconut shoot.

hätts The umlaut form of hatsi 'to bite'; hättsi totoni 'to bite off', K.70; hättsibut 'to close round', K.53 etc.

he Exclamation of disapproval. Q.19.

helena To yawn.

hepe To cut off. Q.88. Also written hibe.

here In the name of a dance, here mohewal. See also hiri: ar hiri mohewal.

hial A kind of bush, used in making fish traps.

hili To dig, to build a house. A.4; Q.30; H.21, etc.; to erect (a stone), Q.23, or rafters; reduplicated hili-hili 'dig in large numbers', e.g. yams, or pile up stones for dolmen; hili-hilân 'name of a feast', lit. "digging up", and name of a month. IN kali 'dig'.

h:im House (ne-hi:m). Ne-hi:m won mwi-lâp 'bachelors' house'; ne-hi:m wiyahân 'schooling house'; ne-hi:m homberon 'women's house'; ne-hi:m won 'men's house, "sacred house"'; ne-hi:m tabaveri 'type of house, possibly cooking house'; na-mbûr buto ne-hi:m 'back centre post (of lodge)'; ne-hi:m târ-tûrân 'strengthening eaves of thatch with pins'; ne-hi:m târ-tûrân la-tap 'lodge or bachelors' house with such strengthened eaves'; pitse ne-hi:m 'fill in the ridge with loose thatch'; no warasi ne-hi:m 'I enter the house', especially of a husband's returning to his wife's parents house on the tenth day of marriage; ne-hi:m tâsibon 'the stone platform, with house over it' (Wala ditto); ne-hi:m sajâwül 'ten houses, Maki shrines'. Vao ne-hi:m; IN, SR hi:m; MidN n'imâ; BN nimâx; IN yumah.

hi:r A bundle (ne-hi:r). IN bllit 'to twist'.

hisl In hisl na-tuq 'to bail'. Q.35.

hit The octopus (na-hit). A term for a mushroom club with four rounded projections; na-hit rin-ta-mats 'star-fish', lit. 'octopus food for ghosts'. SR hit; CR kit; Duindui kwita; Walurigi witâ; MidN wita; IN uytâ.

hitsl To copulate. Reduplicated hitsl-itsl. cf. tsitsi 'glans penis'.

hm Interjection of disapproval.
hó hó hó Cry used for rounding up pigs, and when chasing initiates on Obe.

ho To scrape; tr. ho-i 'to fashion clubs', L.8; 'to grate coconuts', R.50.

hoal In boŋ hoal wele 'days of little food (?rain)', the name of a month, and boŋ hoal lōp 'days of much food (?rain)', a month.

holo In mwiŋu holo 'a black wading bird'.

holol Sweet.

hoperuf Name of a leaf used medicinally in initiation (ron hoperuf).

hor To scrape coconuts for a pudding.

hore To chase, but the root idea seems rather to be simply action or movement against. E hore toni 'he seizes', B.15,17, 22; 'chase', K.118; Q.24. Lilits hore, N.12, sere hore, N.18. E hore 'name for dancers'; ram hore pila 'chasing rails, a game'; ser hore 'front and rear walls of house, closing the ends of the lodge'; ar tāw-tawu hore 'pong signal sealing the transaction of the exchange of presents after the Oba pilgrimage is completed'; nl-al rur hore "the sun is thatched out", extension of thatch on gable end of lodge; e te-te hore 'unofficial agreement made by man with a girl's father to marry his daughter'; no hun nate hore pin 'I have already tied the slip-knot'. Frequentative hor-hor 'to chase (fish)'; kete mu hor-hor 'to make taboo'; ar hor-hor 'catching crabs', an undulating step in dance; hor-hor 'catching eels, a character dance'; ar hor-hor 'beat the sides of a lodge'; 'to be chased (of initiates on Oba)'; ar su hor-hor 'they paddle and surround'; ser hor 'thick hurdle, a method of catching freshwater fish by means of it'. The root seems really to be horo, connecting with Mta yoro 'action against a person or thing'. SR goro.

horotsi To count. K.115?

hoʃ To land from a canoe, probably really haj, from hajl, q.v.

hoʃi Completely. IN ha(n)ti? Ar urol hoʃi nã-nã ga 'they ate up completely that thing'.

hösös In e siken hösös 'a young tusker with tusk occasionally visible'.

hoti To tie up, attach (pigs to stakes).

hotövi In ar juro hotövi 'a cry used in dancing'.

hotsin In pül hotsin 'nape of neck'.

how1 To take shelter. K.85. Howe?

how2 A crab; ar hor-hor how, see hore.

howän In pu-pu howän 'cleaning the dancing ground'.

höp An exclamation.

hu(w) To conceive a child, be pregnant. A.58; P.3.

hu-hu To borrow? Pe hu-hu tsin 'I borrow (a pig)'.

hulō Ar hulō 'a swimming stroke, initiated in dance'. Lōŋ = 'swim'. Hul-hulōe 'to heat in the fire (?waive over it), of green canoes for magic'.

hulōwi To beckon. Q.17.

humba-ni To clear the ground in the direction in which a tree is to be felled; cf. humbwän; humbwän = 'mouth'.

humbwän Atonement, "clearing".
hun To tie. Hun-hun na-tesen 'attach the slip-knot', in ceremony of reserving pigs for the Maki.

hupwanen The name of a month.

hur To cheer.

huru Name of a leaf with medicinal properties used in initiation (na-huru).

huf A by-form for uf-ufi 'to ask'. R.43.

huw To push a canoe ashore. D.13.

hül To seize, grab.

hüt A cry in dancing, o hüte, ehü ... te.

hüb To be satisfied, replete after eating. Hüb-hüb; no hüb 'I am full'.

hüri To kill pigs (at Maki); no hüri Maki.

hüt The mainland. Doublet with no-ut from IN. (h)utu 'bush'; wä e-hüt 'go by hand' (as opposed to river), A.3; B.37; E.6; 'go ashore', E.9; B.38; e-hüt 'in the bush, ashore'.

iki Abbreviation of iniki(i) 'you (sg.)'.

ikir Cardinal pronoun, 1pl.incl. 'we'. IN kita.

il To put a taboo on. Il hore = ? hill, q.v.

i:rn House, used only in certain contexts: lola'i:rn 'indoors'.

ina Cardinal pronoun, lsg. 'I'. IN root aku.

ini¹ Cardinal pronoun, 3sg. 'he, she, it'. IN root iva.

ini² In pulok ini weren 'my humerus'. See pelek, pulok.

inik Cardinal pronoun, 2sg. 'you'. The full form, iniko is very occasionally used in address, more usually iniki, a false lengthening.

inir(i) Cardinal pronoun, 3pl. 'they'; also used after personal nouns to indicate a plural: tutujak inir 'my elder brothers'. Note the phrase nga inir 'to their homes'.

io Adverb of affirmation, 'yes'. Fijian io. Atchin io rik 'yes, indeed'.

ira To go on a trial trip; as a transitive verb, 'to launch'. U.4.

iri Suffixed pronoun, 3pl. objective, 'them'. See iniri.

i-sän His; pronominal root isa, to which suffixed pronouns are added, and the resultant possessives are predicative, 'mine', etc. See sa³.

isi Who, anyone; also ise.

iwwe In ar iwwe ni-mbwen 'giving mats in payment'.

ka Verbal pronoun, 2pl.indef. and imperative.

kab Verbal pronoun, 2pl. future.
kal A bunch (of bananas) (ne-kal). H.27.
kalat The nettle plant, used also as a symbol of dangerous strength. Mta kalato.
kalatsi To give in exchange. U.26 et seq. Wala ditto.
kale To hold. Reduplicated kal.

kam Verbal pronoun, 2pl. past, sometimes indefinite.
kamb Verbal pronoun, 2pl. future; see also kab.
kami Cardinal pronoun, 2pl. Note: kami tasin 'you and your brother'; kami pwi sa 'one of you'; kam' i-se 'who are you?'; kami o! 'You, ready, go!'

kan bwerew A gong slit.

car A comb (ne-kar). Ne-kar narong 'comb of mangrove wood'; ne-kar pat-pat 'comb of separate wooden prongs lashed together'.
kara2 Covered with sores. A.l. Kar in K.5.

karasi To deceive, play tricks on. Karasi buha 'catch a pig by enticing it to eat and then seizing it'; kara-karas intr. 'to lie, deceive, play the fool'. N.25; Q.30; S.13.

care In mow care 'to open out (of bahuru tree)'. K.101.
kari Dracaena shrub, mostly used as ro-kari 'the leaf of the shrub', which is carried when a tusker that is not home-bred is killed. The leaf is used in incision medicine; the name is applied to a sweet scented herb used in the bouquet called segur (q.v.), and in making an armlet na-wbâl; Maki ro-kari 'pre-penetration degree taking rite'; ro-ro-kari 'child's rattle'. Lg na-kari; Mta karia.
karkara A purlin.

câw-kaw In waluf kâw-kaw 'steering paddle for long distance canoes', a special word used on the Oba pilgrimage.
ke To attach yams to a pole. Q.56.
kei In ar kei, term for stripes on the ne-tuw.
kela Term used in magic; rooro kela kele o 'they open their eyes'; oro pwi le kelao.

kelbwet The youngest of a family. K.3; N.47.

kele1 To stick fast. B.2.

kele2 Again, another, also, next, back. A.6; R.35; A.8,9, etc.
Poi lâi nu-a pu fopo kele 'fetch some more water'; pisa kele ko pe ar lâi pwisa 'I will get one some other time'. Mta kel(u); Rotuma kele. In Atchin the short phrase, kel is used in kel-bwet (q.v.) and were-were-kel.

kelinin See under segur.

kel-kel Small yam table, erected in house enclosure. Vao kal-kal. According to Père Jammond, kal = kel 'dig up yams'.

ker-ker Scented herbs worn at the back of the belt, part of the insignia of having undergone the Oba pilgrimage.

kete Do, make, prepare (food), put, put ... on .... Ina no se kete te, Tahar e te i 'I did not make it, Tahar put it there'; kete Maki 'to make Maki'; ar kete ne-sis na-mbwêr 'They erect a fence round the gongs'.

ketete To spill. L.41.
kiam Cardinal pronoun, 1pl.excl. 'we'.

kiki1 To mark out (ground). N.49. To light a fire (by plough method), i.e. to rub. No kiki na-amp mwi han 'I have
rubbed fire (sticks and the fire) has eaten, i.e. lit'.

kik(i)² A wooden knife for cutting pudding, and the action of cutting with it (ne-kik). No kiki na-lok 'I cut a pudding'. Contrast tiwei 'to cut with a sharp thing, a bamboo or knife'.

kila To look round, down. Kila luha 'look back'. Dr Ivens cfs. Mta kilau 'look'; but perhaps better Mta va-ylala 'look'; Hop Harbour kul-sa 'look for'; SR kele; Paama, Fijji kilo 'know'; Duindui kikilai; Walurige yiylaiyi 'a sign'; and in IN, Tagalog kikila 'know'.

kints To gather (a magic term). SR kinti 'gather'.

kirit In n'ai kirit 'carved shaft on arrow'.

kir-kiriel Small bird resembling a swallow, inhabiting the mainland.

kisen Only, alone. Timak kisen 'only my father'. A.41,50; M.3; T.6. SR kekes; Mta yese? cf. Mukawa (Papua) ekesina.

ko¹ Copulative particle beginning a clause, 'and'.

ko² Demonstrative particle before nouns, indicating that the emphasis rests on the following noun. Pi ar ma ta-ru, ko mewi le '(he said) he would come again in two days, which is now tomorrow'.

ko³ Verbal pronoun, 2sg.indef.

ko⁴ At end of sentence expresses impatience or interrogation or command. Probably identical with ko³.

koke To carry, take (of bow and arrow only). A.10; R.7; S.13.

ko-koröö Coconut full of milk. of which a little of the kernel is formed.

kole To carry away, of water carrying objects. A.2. Bring away. Kol-kol 'to leak, sweep away'.

kom Verbal pronoun, 2du. past and indefinite.

komts To rub, polish, make shine.

kon Sacred. See also hon. Vao yooyon; SR kon. No-ul kon 'holy paint'.

kon To send. Q.44;77. Kon toni 'send away', N.44; e kon ma "she sends news" (girl to man, that she wishes to elope with him); e kon wan "he sends news", the reciprocal of the preceding.

kor¹ Dry. In na-ni kor 'dry coconut'; 'coconut thrown by Maki men to the women'. cf. Mta yoryor 'coconut with meat scooped out after drinking; Mta kor 'dry'. cf. kul, kur.

kor² To pick up, select, choose out. Kor toni, E.1; ar kor toni na-leng 'they choose out na-leng dancers'.

koro To do without a thing? K.13.

korta To go about together.

kotsi To carry, drag a half finished canoe to the beach.

kots-kots To trim the inside of the dug-out.

kul In na-ni kul 'a dry coconut'. See kor¹.

kulän The name of a cycle of songs.

kul-kul Chief man. cf. Vao mara kur 'canoe magician'.

kumala The sweet potato. Apparently an introduced term from Polynesia.

kur¹ Dry. cf. kor¹, kul. Na-ak e kur 'the canoe is left to dry'.

kur² Seagull.
In na-vul e kur moni "the moon goes down in the east", name of a month.

they cut? ?'

To be married (of a girl). N.3. Apparently the intransitive of lai (q.v.), from IN laki 'male'; in which case the analogy is false, as the final -i is original, not a transitive suffix.

Locative prefix, occurring in lodge names, e.g. la-tap 'in the lodge', etc. Also in a few non-sacred names, e.g. la-mof in bush', for which Vao has na-moh 'bush'.

la The shore. Used in the following combinations: wā la 'go from inland to shore', A.12; B.1, 35, 41; D.11; K.39, 42, 84; N.7; qa-la; pie la, A. 73; wiel la, B.4; G.1. The IN root is lawd 'the sea', but in Atchin it means the shore as seen from farther inland.

Rattles (ni-la), ankle rattles, of hollow seeds.

lab To roast. cf. telab 'to roast, cook'.

labwen Root. Labwen mew 'pandanus root'; labwen mari 'a kind of bow and arrow', lit. 'root of the mari tree from which the bow is made - a fighting bow'; labwe ni-mbek "banyan root", bow-string; labwen-bek 'tree used for main wooden purlins of lodge'.

lahan Marriage; used in wisen lahan 'all women married into a village', i.e. all the wives of members of that village. Vao layân. See lai; lahan is phonetically older than lai 'marry', and better represents IN laki 'male'.

lahen The base of a club.

take. cf. lawi, lâv. Also 'to give'; 'to castrate'

(i.e. take away the testicles); 'to bring'; 'to take up (a dance), to carry'; 'to catch (fish)'; 'to give in payment (for a girl)'; e lai womu ni 'he takes it first'; ar lai e tsi're 'they take it next', etc. IN alap.

paraw Plaited mat worn round the thighs by Oba women.

pari To strike, sound, beat (the gongs). E pari na-mbwe 'without giving a special signal'; na-vüli bahi e pari 'the month a shark attacks (name of a month)'. Pari also 'to turn over and scrape a log'. See also pär-pari.

par-par Elsewhere, in different directions. K.47,50. Perhaps cf. Hog Harbour per-par 'assist, support', and Sa'a parapara 'side, loins'.

parum Nostril. Takes the possessive na:n.

pat-pat Comb made of prongs of wood tied together.

pawulala Panache of feathers worn during a dance.

pär-pari To beat the fighting signal on the gongs. In Vao pär-pärëan 'turning over and beating the log'.

pål In nèwís pål "killing the crayfish", name of a month. Pål = pål 'kill'?

pätä baho "Head of incision", the chief candidate for the rite.

pe¹ Verbal pronoun, lsg. future.

pe² To be like, resemble. E p'ok 'thus'; e re p'ok 'in this way'; e pe ña 'like (conjunction)'.

pe³ Mother, as term of address, used also to father's brother's wife, and father's sister. cf. pe-pe. Rel and Lalep have pepe.

pek(e) To carry on the head. Pek-pek 'a small fine occurring in initiation ceremony'; e peke ni-mbwen 'she wears the head-covering'. See ni-mbek. Vao mbek, pak-pakean.

pekes Crescent tusker. Eromanga nöm-pekasị; Lenakel pakasi; Aneit pigaŋ, all meaning 'pig'; tamauw pekes 'gelding crescent tusker'; Maki-pekes 'crescent tusker Maki'; no-on mere-pekes 'face of the crescent tusker'.

peke-were A bracer, a stay. S.11. Peke-were si ta-Ba 'Oba man's bracer, bracelet'. Also used for the corona or rim of the glans penis. Wala ditto.

pelasi To remove? Nam pelasi ni-at 'the process of removing fronds of thatch palms'. Wala peratsi.

pelok The human thigh bone. cf. pulok.

pel-pol Big black bird that catches fish; also name of a Maki house.

Pelufal Name of a mythical stone woman.

penow A kind of sea-weed used in incision.

pepe¹ To bear a child.

pepe² A child. Pepe ñere-ñere 'babies crying'. This seems to be an archaic word imported from Wala.

pereñe sis The side wall of a lodge. K.110.

pere-pwere In mümän pere-pwere 'sow's tongue', obviously for pwere-pwere.
A bird, the rail, and name of a dance cycle. Wala pil'a and Vao pilay. Tavu sin pil'a "the rail's conch", trumpet of cassis shell; ram hore pil'a "chasing rails", a game, played by men after the Maki. Mta pilaye; perhaps SR bwila.

pil-pile To beckon.

pin(i) A particle indicating completion of an act. Ko pin 'in truth, indeed', A.28,33; B.23 (= 'just'),32. MidN pi; Mta vun 'be last, at the end', vuvun 'finally'.

pinalum A thin kind of bamboo, probably from the promontory of that name, and used for holding thatch. Vao banalum.

pipi The sexual organs, male in P.18,20, but apparently also female, since pip'el 'that vagina' is used = 'that woman to copulate with' in JJ; also as a pun on the word, the name of a fish. IN (m)bi(m)biy 'a lip', cf. Fiji mbembe 'vulva'.

pirauwe Species of fish, prohibited to uncircumcised boys.

pili-piri A species of nut.

piser A species of fish, prohibited before incision; also ceremony of applying stinging leaf.

pitew(i) To or for; apparently a future form of tewi, with which cf. Uripiv tevi, and Eromanga tovu-ni 'for'. A.12, etc.

pito-n The navel (pitak, pitom, piton, etc.). Mta putoi; IN (m)pusar.

pitse To cover, to fill in. Ar pitse wobat 'to cover the ridge-pole with loose thatch'; ar pitse ne-hi:m 'they fill in the ridge'.

po1 A song. See also mbo. BB.1. Tul-tulo po 'to render a song'.

po2 To place leaves over the hot stones of an oven; used transitively as poi, and reduplicated as po-po 'to cover'.

pohoa Dialectic form of buha 'pig'. Pohoa wulu 'the pig which is tied to a tree-fern image'. Bugotu boibo, etc.

pol-pol Species of fish prohibited to uncircumcised boys.

pog To be dark; darkness, night. See also boŋ, mboŋ. No-ut poŋ 'night, tonight', often with a verbal particle between the two words; rür-poŋ 'in the morning'; mi-terik no-ut p'uʃ w eraŋ no-ut pu poŋ? 'Do you think it will rain all day (until night)?'; no-ut mu rür-poŋ 'about 9a.m.'

por1 Verbal particle, 3du. future.

por2 In por mèleqe 'a wooden strut supporting a wooden purlin'. Poro-tundas 'a tree used for lateral struts of lodge'.

poras Species of fish, after which a Maki house is named.

por-por To dream. Matur por-por 'lie dreaming'; matur por-por e-ros 'to dream true'. Mta qore(qore) 'to dream'.

pulo Species of bamboo, a bamboo receptacle. Pulo nats 'a pule full of ants'; lok pulo 'pudding baked inside a pule'. IN buluh, and cf. Atchin mbu.

pulok Thigh bone, femur. Pulok ini weren 'humerus'. cf. pelok.

pupu howan Cleaning the dancing ground.

puri To break off. D.10; K.60; N.6. See also ul pur-pur. Pur = 'bruised', also voiced and nasalised with the condition prefix ma into ma-mbur (q.v.). Pur ro:ro 'break off twigs (to attract a person)'.

puruk The gizzard of a fowl (tsin-tsín puruk na-tó).
put In ne-lü put 'thatching battens out flush with the thatch'. See lup.

püI hotsin Nape of the neck.

pütün In mal pütün 'footprint'.

püwat Species of bamboo. Nembu püwat 'bamboos used for lodge rafters'. cf. büwat, biwat.

pwäräŋ A cave or hole in a rock, overhanging rock. B.1; F.10; G.1. Pwäräŋ may refer to a woman's vulva. Pwäräŋ tamats 'cave of the dead'; pwäräŋ masiŋ 'worn on head by the men'. Vao ditto; Wala baraŋ.

pwe Exclamation, K.19. SR bwe 'come now!' (French, tiens!).

pwela-k Term of reference to wife's father or mother, daughter's husband. Pwelûn natun 'son's wife's father and mother'. Vocative ma:ku? Wala pwelûk; Vao peleyak; Lg gwelegana; Kuanua (New Britain) pelika-na, term used by relations-in-law amongst themselves; Lalep pwelegak.

pwepwe Rope of a kind used in hauling gongs. cf. na-mbwe.

ra1 Verbal particle, ldu.incl. indefinite.

ra2 Blood (ni-ra, n-dra). Tiara 'dysentery'. Mta na-ra; MidN rä; BN (n-)di; IN dayah.

ra3 Curved-tusker-plus, lit. "it bleeds". Merer-pekes komi ra kele 'circle-plus-re-entrant-tusker'.

ra A kind of young leaf used in incision. Ni-ra wunewun 'a kind of tree whose bark is used to make bull-roarers'.

ra Possessive indicating raw foods. Also no-rä-n, etc. cf. MidN norän 'food'. See also ri-n.

rahapol Species of tree, used for centre posts of lodge and for the side wall struts. cf. rapol.

rahe To summon? E rahe ne-lu "call the people", a gong signal. Vao raye.

rahin A track through the bush (ne-rahin). Layard suggests a connection with rahe.

rale To live, pass one's life, behave, walk away. K.15,108; L.1,5,40,44; N.7. cf. na-rel, räl-dral.

ral Spine shell placed above the ground as a trap; a pitfall with bamboo sticks.

ral-(d)ral To walk about, nonchalantly or for pleasure. Me ral-dral har jopon ko me ar 'I walked about and here I am, i.e. I came early'. Wala ral-dral 'to zig-zag' (Atchin bure-burine), and bwe ral-dralan 'a gong rhythm'. Mta tatale 'walk', Sa'a tale 'walk on beach', Bwaidoga (Papua) tali-a 'a bay'. The -d- is of course purely euphonic, to separate l and r. See next word.

ral To run or sail around, to "round" a cape. B.7; K.100; Q.33.

ral Tortoise-shell bracelet.

ram1 Verbal particle, lpl.incl. past.

ram A yam (ni-ram, n-dram); also used for 'year'. I-se ni-ram sâm? 'Who is your yam? i.e. for whom do you work'; Ni-ram pwi sa wu-na pwi e-ru 'a year or two'; n-dram bweteges 'a single yam for presentation'; bàt-ram 'eldest
child (male or female)', lit. "head of the yam", takes na:n possessive, also bats-ram "head of the yam", and liwe-ram "body of the yam" are names of constellations. cf. Vao bati-ram 'eldest son', Wala bat-ru:m.

ran To dawn, break (of day). no-ut mwi ran 'day broke'; e ran 'it dawned'; e to mori pu ran 'it is about to dawn'; e ran e-res 'it is full dawn'; bag-e-ran 'a cloud'; ar wel e ran 'they dance till dawn'. MidN ran 'to burn'; Hog Harbour ne-ran 'day broke'; e ran 'it dawns'; e to mori pu ran 'it is about to dawn'; e ran e-res 'it is full dawn'; MidN ran 'to burn'; Hog Harbour ne-ran 'day'; and ultimately IN lajit 'sky'.

rañ(e) To pull out a plant or any object, extract. E rañe ne-liw 'he pulls out the arrow'; rañ utôñi batun n'ai 'we pull out the stump of the tree'; na-mbût ar rañ re n'amal 'they send round messages to each dancing ground on the island'; e-rañ e-rañ n'amal 'yams planted in alignment for the twelve amal'; ra roni pwi rañ-ranom 'they work on a separate day'. cf. Vao rañon 'a branch'.

rañot A canoe, special word used on the Oba Pilgrimage.

rapol Species of tree. See rahapol. Vao rambol.

rap-rap In wiñ rap-rap 'auricles of the heart'.

rar-tol Verbal particle, 3tr.

ra-ru¹ Personal pronoun, 3du. 'they two'. A.32.

ra-ru² A kidney.

raši In na-mben raši 'fish-tail club'. Perhaps na-mban 'wing', IN (mp)anlr 'wing', and cf. SR rasi 'sharpen'.

rat In boñ rat 'a tree-fern image representing a human face, attached to under-side of ridge-pole'.

ratse Embers (ratse na-amp). The word ratse is now used for 'matches'.

ratsi To open.

ratsin Hermaphrodite pig, and tusk of same used for bracelet.

rav¹ Species of tree commonly used for canoes, a deciduous tree, bare in October, but flowers later (see Tale AA).

rav² Lower wash strakes of canoe. See rav¹, and Uripiv n-drav, Wala n-rav 'canoe'.

rawi To take off, remove. C.4, 5,9. Rawi tani 'take off'. In magic, erawi 'curing a swelling at the base of the intestines, and the man who performs this cure'. Reduplicates as râv-râv 'dig up'. Mta râv-râv 'draw out', râv 'pull'; Lg râ:kwê. See also lawi, of which it seems to be a doublet.

rawik In rowow rawik 'brain'.

rawits Violent. Ni-lan e rawits 'hurricane', "the wind blew a hurricane", DD.

râl-dral Coronet of solarium formosum shell. cf. ril-dral.

râv The lower wash strakes of canoe. Vao ditto. See rav.

râv-râv Evening. No-ut pwi râv-râv 'about 5p.m.'; e mat râv 'about 7.30p.m.'. Mta râv-râv; MidN ro:paru:p 'evening'; IN yabî.

râv-râv Pull out. See rawi.

râwa-k Husband's sister or brother's wife (w.s.). Wala râwak 'husband's brother's wife'; Vao rava-k 'husband's sister, brother's wife'.

re¹ To want, wish; often compounded with roge = 'feel', as re-roge, C.3; E.5; F.13, etc.; also 'to think', as G.3; N.15; 'to say' (German meinen) M.2.

re² As an element of the conjunctural phrase mwî-re, pwi-re 'if', probably a functional passive use of re¹, "it being wished that".
re³ At, in, on, to, from. Compounds with qa as reña, and with e as e-re.

re⁴ The second element of the negative se ... re, sere. See se and sere.

re⁵ To pull. Transitive re-i, reduplicated re-rei, B.2. SR rei 'to drag, launch a canoe'.

re Song and dance (na-rel), dance at sacrifice of a tusker. Takes na:n as possessive. Vao na-rel; Wala na-rel. A.61. cf. ral, rali, räl-dral, ril-dral, which suggest that the spelling should really be na-räl 'a "round" dance'.

relü An egg. Relü na-tò 'fowl's egg'. See rülü. MidN rilin; IN teluy.

reni To seek, look for. Perhaps a transitive form of re³.

req Species of plant. Ne-req e-res 'pterocera bryonia, Chemn.'; ne-req lihwon boa 'pterocera ciragra, Linn.' (Australian Museum information).

reqa In, at. Compounded of re³ and qa². Re-nään is used adverbially: 'within, thereat', etc.

reğ-n The "within", the belly. Makes reŋak, reŋam, reği. See reña.

reğen A branch of a tree. Reğen malo 'name given to two pigs sent as message'; reğen belk 'a species of shell'. Vao rağon 'branch', suggests ränän as a more exact spelling.

rep In merer-rep 'circle-tusker-re-entrant-tusker-plus'.

reré Species of tree (n-drere). N-drere pwi lüp 'let the ne-rere grow', the name of a Maki ceremony; ni-rere sakel 'name of a month', lit. "the nerere settles down to it"; rere tsar 'name of a month', lit. "the leaves of the erythrina are falling"; rere wo-woj 'the time of the erythrina'; ne-rere weawen 'the erythrina is in colour (blossom)'. Vao na-rar; Mta rara 'the erythrina'.

reré² E reré liwet 'midnight'; e ne-rere "it reddens?", when the clouds are tinged with the approaching dawn. The cock is now said to crow for the fourth time; also called e to mori pu ran. E reré is also applied as a name to the planet Mercury.

reré³ To work loose, lever up a yam with a stick; part of name-giving ceremony is called ar rere mămän 'they lever up the tongue'.

reré² Shallow.

reré To place the hand in a hole. Apparently a transitive form of reré³.

res Good. The accent is thrown on the preceding particle: é-res 'it is good'. Na-mbws e-res 'a kind of penis-sheath'; ne-lüp re-res 'thatching battens projecting beyond the thatch'; ne-lüp e-res batun maiwet 'similar battens, but retaining their roots to make a fringe'; pekes e-res 'crescent-tusker'; na-ru e-res 'curved tusker'; ni-as e-res "good luck". Reduplicates as re-res.

ret¹ Young coconut (na-ret). Also a mortuary rite. Wala na-ret.

ret² The heart. Does not seem to be Wala in this sense.

rets¹ To talk, speak; of birds, to sing. Noun retsän 'speech'. Reduplicates as rets-rets.

Vao res. Rets is a proper name in N.1, 0.21, etc.

rets² Bamboo rafters. Ar tāi ne-rets 'they cut the rafters'; Ar to (?te) ro we ne-rets 'they essay the rafters'; ne-rets Maki 'Maki rafters'.

rets-rets Platform of a canoe. Rets².
rev Rope. Special word of the Oba Pilgrimage. Really ropes attached to fore and aft of a canoe.

rewtsi Ti kill or be killed; to strike; to swear at. A.68; E.11; F.16; H.1; T.22; U.78, etc. E rewtsi ni-mal sän 'they strike (or kill) his kite', used in reference to the Oba Pilgrimage. Rewtsi pin "kill finish", in DD said of a pig that is really killed. Reduplicates as rew-rewtsi. cf. Vao song language rumbe; the -tsi is clearly a transitive ending, for -si, and the root is rewe.

-ri Suffixed pronoun, lpl.incl., with verbs, e.g. e wurei-ri ni 'he says it to us'. See ikir.

rian To burn (intr.). Na-amp mi rian 'the fire burned'.

reni In front of. Po wala reni natuk 'you will sail in front of my son'.

reni To hold up one's torch. B.7. Probably derived meaning of reni.

rik Yes, indeed, truly. Mar tsemwe ni-mbat ko rik 'they actually gnawed roots', DD; mar we Tawal e, Tawal rik 'they went to Tawal, actually as far as Tawal', DD. Reduplicates as ri-rik 'even, finally, in the end'; tia-ra mu kete ri-rik 'finally they got discontent', DD.

ril-(d)ral Circle of shells painted red. See ral. Ar ril-dral is the name of a game played when the novices have returned from the Oba Pilgrimage; while it is played the gong signal na-mbwe ril-dralän (Wala ditto) is sounded ceaselessly. cf. also na-räl, räl-dral. Vao has na-mbe ril-dralän.

ri-n Possessive particle for foods eaten uncooked. See ra. In S.L. raom is 'food', BB. rige-ni To take on board, carry on canoe. B.35; S.20.

rir To have a look. Rir mare 'look up'; e riri hal-hale 'to dance with arms bent'.

Ririn-pale Name of a lodge of Senhar, now extinct.

ritse-ni To grind on a stone. S.10.

riv A rat (na-riv). Ar te-te riv 'a method of catching rats'; Lebori-we-riv 'Rat's Ears', name of an ogre. M.4; N.15, etc. Perhaps here also belongs e ba-ba ha riv 'to jump about (in a dance)'. MidN arif 'rat'.

riv-riven The shoulder-blade.

ro Short form of roha 'a leaf', used before the name of a plant, e.g. ro-kalat 'nettle leaf'. Vao ditto; Mta no, from nau 'plant', which is IN dawàn, but the change of consonant, as well as the longer form in Athin, make the identification more than doubtful.

ro To want, desire, wish. A.1, 34; H.32, etc. "Backed" form of re. No ro pwi-tsats pe wul 'I don't want to buy it'; no ro e-tsats 'I feel tired'.

ro = roñ, only, just, simply, shortly, soon. E w'ok nā-in, pwi ar ma nā-tan ko ro 'he went there and will come back here soon'.

rob Leaves in which puddings are wrapped for cooking, after which they are thrown to the pigs as offal. Na-rob wowon 'only offal'.

robon nanas Kind of seaweed used in incision. Robon tsats 'species of croton'; robon silala 'species of tree, used in magic'.

roha Leaf of a tree or bush. Enters into compounds as ro or ro:n. Roa ko e-tsiga re-nān 'there were no leaves on them',

ri-n
DD. Toto e uroï roha 'the
toto-caterpillar eating holes
in a leaf', name for pattern on
woman's grass skirt; earth used
after removing upper tuskers of
pig; medicine, leaf used after
the castration of pigs; rohâ
ni-lak, rohâ n'tawô 'a spray
of leaves'. Vao roya. See
also ro'; ro:n.

roli The north-east wind, blow-
ing from Oba.

romon Term used in counting
units over ten: mowil e-ru
romon sa '21'. A typical
Malekula form, said by Pere
Doucéré to be the yet undevel-
oped shoot of a plant, used as
a tally.

ro:n Used in some compounds for
roha: ro:n operô, ro:n wuw,
ro:n na-mbots 'leaves used
medicinally in initiation';
ro:n na-uru 'leaves used in
making an S-shaped bow'; ro:n
batun 'hair', lit. 'leaf of
the head'.

ron To sink, get drowned. B.12;
H.43; P.14; HH.

roni Away from, out of. N.2,4.

ron1 Only, just, merely. Po
womu, pe mak ko roŋ 'you lead
and I'll just follow'.

ron(e)2 To hear, to feel, to
perceive by one of the senses,
to know how to. Ko roŋe ar
wurei swelling 'When did you
hear them talking?'; no se roŋ
ufôn te wor 'I don't know how
to ...'; in a further derived
meaning and short phase, roŋ
'to divine', and ne-roŋ 'a
method of divining'. Mta roŋo;
MidN roŋi; EN rîni; CR roŋo;
SR râgo; IN dâgay. Redupli-
cates as ro-roŋe 'to bethink
oneself of, to remember': e ro-
roŋe ini mumun 'he remembered
that he was a spirit'.

ron3 Mangrove (na-roŋ). Ne-wis
na-roŋ 'ceremonial bows'; ne-
liw na-roŋ or wulu are cer-e-
monial arrows; ne-kar na-roŋ
'mangrove wood comb'. The

native name for Port Stanley
is Lol-na-roŋ, meaning "In the
mangroves".

roŋwe To try, essay? e koke
roŋwe; bät-mew e habwe roŋwe;
ar to (?te) roŋwe ne-rets
'they essay the rafters'.

ropun A strip of umbrella palm
used as symbol of home-bred
tusker when attached to taro
branch; a sweet scented herb
used in segur bouquet. Ropun
tsats 'a species of umbrella
palm'. Wala ropun; Vao rombun.
Probably compound ro-pun.

ro:r1 An island (na-ro:r). See
also no-ur.

ro:r2 Clouds, represented by
four series of concentric
circles on the sap-sap; also
the sky.

rorak To sweep (a court). N.4.

rori To turn. Mi-al e rori
'the sun turns (circa 1.30-
2p.m.)'; na-vû e rori 'the
moon turns'; lil rori 'to turn
one's back', B.20; M.8; pur
ror 'to break off twigs to
attract a person's attention',
G.3; ror-ror 'to twinkle'; e
ror-ror 'he keeps appearing'.

rorin Forehead, frontal bone,
mind (rorak, rorâm, rorin).
Rorin e-tsa "his mind is bad",
he has a fearful temper, L.1.

roro In na-ha ti roro 'liana
used in making fish-traps'.

ro-romi To think, remember,
sorrow for. H.44; 0.24; Q.18.
Ko ro-romi na-na sa? 'Are you
thinking about something?'
MidN ru:m; Maewo ndondomi; Mta
nonom 'think'.

rorora Species of tree used for
Wühül bark.

rorowaen Play. Wänu rorowaën
'playground'.

roför Torch. Bät-roför "stump
of a torch", 17th day of the
month; rofer to-nats "a whole torch", 18th day of the month. Possibly the original meaning of rofer is "midrib of a coconut leaf", or "a young coconut leaf". Rofer na-ni 'coconut leaf pattern on woman's dress'; tsin rofer na:n 'backbone, spinal column', lit. 'his torch bone'. Wala rofer; Vao rehere. Note that this is, so to speak, a "secular" word; there is a ritual word ne-ful, of IN origin, q.v.

rojimbwerets To be ruined (S.L.).

rotsi To cut, fashion (a tobon bark belt). GG.

row¹ Heavy.

row(e)² To fly, to jump. B.5, 22; K.101; L.24; N.4; T.17. Row tsubul 'to jump down'; row tsaiil 'to fly out' (figurative in T.17); row-row 'flying', in no-ujur row-row, q.v.

rowe All. B.34; L.4; N.48; U.55. E łōv rowe 'he removes them all'.

rowow Brain (rowow rawik).

röw A wooden bowl shaped like a turtle (na-röw). Vao röv; Wala ne-row; BN na-röv.

ru¹ Two (e-ru).

ru² South-west wind, blowing from the mainland towards Oba. Na-ru tawunaw 'south by west wind', U.7.

ru³ A pig of which the tusk has curved half way back to the jaw (na-ru). A.45,55; K.29. Tamauw ru 'gelded pig', A.45; N.46. Sometimes pronounced ruh, cf. Wala ruk-wa-ru 'grade name of tusker', and Vao ruy.

rualo High wind, wind in general. cf. rolî, ruwoli.

rubatsi To open, let loose, let go; open the door panel of a house. IN lopas 'set free'.

ruer A branch of sorcery (e rue). ruhu To pull. E ruhu marur 'curved-tusker-plus-plus-plus'.

ruh-wa-ru Maki title used after Na-mer mōw-sañawůl. See ru³.

ru¹ A ceremonial bundle shot at in initiation (na-ru).

ru² In na-ru roni 'lopping tree'. Par rul pur-pur no-wof 'they would break their padderles', K.55.

rumb Wild, to be wild. Tô rum lamôf 'wild fowl of the bush'; ne-rum bas 'principal solo dancer'.

rumu-n Breast, chest (rumak, rumām, rumun); lower portion of canoe figurehead.

rumuj Species of fish; prohibited before incision.

run The back (ruk, rum, run); ridge between wings of canoe figurehead.

rumjì To look for fish with torches. See also wa-rumjì. Ar tigei wiser sär ar mā ar ruq-rumjì 'they lead in their wives and come bearing torches'.

rur¹ To turn. See rori; ni-al e rur = ni-al e rori 'the sun turns'; and with modified vowel, rūr.

rur² To thatch. Rur hore 'to thatch the gable end of a house'; ni-el e rur hore "thatch out the sun", extension of thatch on gable end of lodge. (Ru)-rurăn 'roofing, thatching'; ru-rur 'put on clothes'.

ruro Half full.

rurü¹ In ro-ruru 'a material used for making white garter', part of insignia of having undertaken the Oba Pilgrimage.

rurü² To creep (S.L.).

ruuru Upright gong beaten with a single thick stick. Vao rururyen 'the smallest of the four upright gongs'; Wala ne-wät
si rurere 'uprights on women's side of dancing ground'.

rur(u)si To heave up. Rurufi 'to shoulder', Q.15; U.33. Transitive of rurur?

ruf-ruf Coral pebble; bones of the foot (collectively).

rut Mask worn in connection with planting new yams; wooden face figuring in initiation rite (na-rut).

ruts Relaxed? In K.19, 'to be cured (of sores)'. N'embak e ruts 'I am lazy (my body is relaxed?)'.

ruwi To plant. E ruwi no-ut 'he plants a garden'; ruwān "clearing", the name of a month; ar ruwi ni-wat 'they erect a stone, monolith'.

ruwoli The north-east wind. See roli, rualo.

rüü Egg. See relü. Bät rüü-rüöm na:n 'his Adam's apple or thyroid cartilege'.

rür Modified form of rur, rori, in rü-rü 'morning, forenoon'.

sa^1 One, a, an, each one; one ... another. Hog Harbour te, t-, and ultimately IN (a)sa 'one'.

sa^2 To climb. Reduplicates as sa-sa 'keep climbing'; sa-sa 'to bear fruit (of coconut)' may be the same word. cf. hasa 'to climb'. Also to climb out of a canoe, i.e. to land. With this, however, cf. sal. Hog Harbour sa 'up'; Vao hay 'up'; IN sakay 'up'.

sa^3 Possessive root, of general possession. Vao ditto; Hog Harbour ha; Ambrym ha.

sag-i-n The thigh. See also tsakin.

sakel To sit; of bird, to perch. cf. sek. Na-vüü sakel 'the month of settling down to it'; le-tër sakel "the women settle down to it", name of a month; ni-rere sakel, alternative name, "the rere settles down to it".

sal^1 To float, E.7,8; to spread out the arms in imitation of a hawk. Ar sal 'flight of hawks'.

sal^2 A dog. The word is used in the double village of Ruruar and in Rel on the mainland. See tamai, wüü.

sala-n The neck; curved slit part of figurehead on canoe; part below circular joints of a club. To pwe-pwere salan 'a pattern called "man of the race of the sows"'.

sale^1 A landing place. Sale ma-wof 'smooth water, creek entrance'. Wala sale ni-mbel 'name of a beach'; sale na-tò 'a place name'. Mta sale 'flow'; masale 'a channel'.

tewe To pay for the use of an object. E tewe wārō 'he pays for their hands'; pe tewe na-ak sām 'I will pay you for the use of your canoe'.

tewen Husband, sister's husband; initiator. Tewen sān lāmōj "bush husband", i.e. illicit lover. Wala, Uripiv ditto.

tewere In liwō tewere na:n 'his molar teeth'.

ti A form of ta 'man of a place'. Ti e-Ra 'men of Raga'. cf. Florida ti-noni 'man, "real person"'.

tia Excrement of man or animals. Ti-a-ra 'dysentery'. IN tiyan 'belly'.

tial Table rapping method of divining. See tehel. Probably this is also Wala tīāi.

tigei To bring or lead in, to marry a wife, be married to a wife. A.24,34; H.1; K.7,23, etc. Also to uncover. Ar tigei wif'en sār ar mā ar ruŋ-rulej 'they lead in their "wives" and come bearing torches'. cf. tigeisi.

tigeisi To undo, remove (the door panel of a house). N.38; R.14.

tilehi To step over. A.75.

til Shell adze made from clam shells. See tala, telepur-pur.

timū-n Father, father's brother, father's sister's husband, mother's sister's husband. Term of reference; for address, see te.

tini To sound or beat a drum. D.10; R.34. cf. taŋ, tāŋ, tsiŋ-tsiŋ. It is a graded form from IN taŋis 'cry, weep', with transitive ending.

tipan Coconut with milk ready for drinking. Tipaŋ tür-tür "hard coconut", when the kernel is quite formed and hard.

tipwis A child, of either sex. G.26; K.37; N.25; P.3.

titit To come forward in dancing, with a serpentine step.

tiv Young leaves (na-tiv).

tiwel To cut, scarpify. H.9; N.46; GG.1. To cut up. PN root commonly teve.

tō A fowl (na-tō). Tsia-tnsin
puruk na-tò 'the gizzard'; na-tò e tūwat, na-tò tamar 'second cock-crow', see tamar; na-lāŋ na-tò 'square dance of the fowls'; tò rum lamō 'wild fowls of the bush', na-tò ne-hi:m 'house fowls'; tò batì 'dappled fowls'. MidN tò; BN tu; Mta toa; PN moa.

to1 Person of an island: to Vao, to Rano, to Wala, to Tsan, etc. To pwere-pwere salan "man of the race of the sows", name of a pattern. Vao to; IN taw(u) 'man', becoming to as an agentic prefix in many languages of Central Celebes and S.E. Papua.

tobo:n A ceremonial belt of soft bark; a new string belt. GG.10.

toha Sticks used for waterproofing a canoe.

tokaratsin mew Necklet worn when candidate issues from initiation.

tol Three (e-tol, etc.). Wa-tol 'three times'; e ma e-tolin 'third'; mōwil e-tol 'thirty'. Vao yā-tol; IN tulu.

tola North-west wind. PN tokelau, compounded of IN teka 'to arrive', and lawed 'the open sea'. Clearly a PN loanword.

tol-tol Ashes, a special word used on the Oba Pilgrimage.

tomla Bush turkey?

tonats In rofer tonats 'a whole torch'. cf. nats 'other'.

toni To catch hold of, seize. A.3; L.24; Q.18. Ar toni ni-mbwen 'they arrive bringing mats'. Probably a transitive form, to-ni. ?SR toŋ 'understand, 'grasp', mentally'.

toŋsa To go up from the beach, inland. With sa, cf. ha 'up', and IN sakay 'up'.

toŋ-wōni To plait, begin plaiting, first side of penis-wraper.

to-purpur The Pleiades. cf. tele-purpur 'clamshell'.

topwān In bur-topwān 'a mortuary rite'. May be tāpwoman 'hallowing'. cf. tab, tabu. Vao bur-tambean.

tor Species of tree, used to make canoes for the Oba Pilgrimage, and for centre posts of lodge. Vao ditto; Mta tora.

tori To hold in the hand, take, catch. E tori no-wof 'steersman'; e tore e we natun 'adopt a child'; mor tori hanān sār 'they-two threw them their food'; tor tsōwi 'let fall, drop'. Mta tore 'to hand over with a speech (pigs, money, etc.)', but could also be Mta taur 'grasp, hold, have'.

torowa Oven. See teruw.

toto1 To leave behind.

toto2 Stone, special word of the Oba Pilgrimage.

tsan The Island of Atchin. To-Tsan 'man of Atchin'.

tsar The erythrina. Re-re tsar 'name of a month' (lit. 'the erythrina leaves are falling').

tsarawi See tepwinan.

tsats1 Bad; also holy, taboo. Ni-as e tsats 'bad luck'; ra hetsats 'let us partake'. MidN sat; Eromangan zat; BN stu; Hog Harbour hō; Mta tatas; IN jahat.

tsats2 Croton. See also sas. Robon-tsats 'species of croton'; ro-pun tsats 'variety of umbrella palm'. (ne-tsats). cf. na-tsāts.

tsatsawūl To wash the hands after cooking.

tsatsiel Yellow.

tsawiri A mixture. Wala tsōw.

tsām The outrigger float of a canoe. G.24; 0.26 (ni-tsām).
Tsäm-e 'to tack'. Lg, Mta sama; IN sayaman.

Tsäts Croton. See tsats, sas (na-tsäts). Mta sas.

Tsel(e) To be lost. R.17; S.39. Tsele-wis "end of a crayfish", name of a month. cf. tsileni. NR hala 'stray, drift'; IN sala 'err'. Therefore strictly tsölä.

tsem-tsem Veil used in pantomime.

tsemwe To gnaw, suck. DD.

tser(a) Yam scraper (ne-tsera). Tser-tser 'scrape yams for cooking'.

tsere Scrape out, remove, pick out (of birds with the beak). E tsere ni ni-man 'cure for swollen limb', "he scrapes out the magic"; e tsere na-woni 'secular massage without magic', "he just scrapes"; ar tsere owon das 'they remove the salt water from the gong' (after floating the log from the mainland). cf. tsiri, tsuri.

tserik To think, intend, consider. See terik. Mi tserik, e-tsiga 'no, I don't think so'; me tserik e-res wü-na e-tsats 'I wonder whether it is good or bad'.

tsi¹ Preposition of movement towards. Also tshi (q.v.), takes noun suffixes.

tsi²-a Bone. Tsin-tsin puruk na-tò 'fowl's gizzard'; tsin ta-mats 'human bone'; tsin also 'backbone of leaf'; ne-liw tsi 'arrow with human bone tip'; tsi balan 'ankle bone'; tsi rofer na:n 'his backbone' (lit. 'torch bone'); tsi barin 'bone of calf of leg'. Wala tsi-n; IN düyi.

tsi³ In tsi təni 'let go'.

tsi⁴ Bamboo knife. cf. na-sip.

tsiän To conceive a child. Hog Harbour and Panayati (Papua) rian 'pregnant'.

tsib To touch. See also tsibari. Liw-tsib 'curved tusker (tusk touching)', also na-ru tsib. Reduplicates as tsib-tsib 'to return, give one to touch again': no tsib-tsib pitewin 'I return to him' (e.g. a borrowed pig). The root appears to have been tsiba, of which tsiba-ri and tsibwe are transitive forms.

tsiba-ri To touch a thing, to reach a place. Uripiw cubaari.

tsibi To sneeze.

tsibbo Another form of tsib(a): e tsibo buha na-mbwe. Although not fully explained this seems to be a "backing", thus, tsibä.

tsibon¹ Oneself. Takes suffixed pronouns: tsibok 'I myself', etc. Ne-hi:m tsibon 'the very house'. Vao timbon. Root found also in S.E. Papua.

tsibon² Stone platform. Wala and Vao ditto.

tsibwe To push, poke. Possibly tsib 'touch' and wä 'movement away'.

tsiga No. E-tsiga wor 'not yet'. NR siyai; Mta tañai; Futuna šikai; Fijí señai, dialect sikai, tikai.

tsigarini In wolo tsgarini 'slits in middle of newtuw'. cf. tsiga.

tsihi- Older form of tsì¹ 'towards'. Pangkumù ciçi-.

tstile Complete, all finished. E lawi tsile 'he removes them all'; tšùnö tstile 'everybody'. Serves as a definite plural sign. Tsil-eni 'to lose'. cf. tsel.

tsiléwere To narrate, relate, recapitulate. M.l. Reduplicates as tsil-tsiléwere 'have a talk', Q.18; S.35. Vao sisìlakuar.
tsim-tsim Fresh water. Special word for Oba Pilgrimage use. IN timuy 'the rain wind'.

tsinen Bones in general, skeleton; also groove on bow. See tsi-n².

tsiön Tongue. See also tsüön. Tsiön Tahrar 'Tahrar's Promontory', G.24; 0.25, name of village on Vap; Tsiön Bones-na-un 'promontory facing Ambrym, jumping-off place of ghosts'. Contrast with this root Uripiv ne-mān 'tongue', with IN maya, which is Atchin mān.

tsi-tsi In ni-wāt tsi-tsi 'small uprights or dolmens'.

tsip Blunt arrow (ne-etsip). Ne-tsip ni-wat 'of stone'. cf. ne-sip 'a knife'. Uripiv liwū-etsip 'super-circle-tusker sacrificed at tā-māo miel'. Mīn tsi-'knife'; Mta tive 'shell used as chisel'.

tsipal To burst forth, appear. cf. tsubul.

tsip-tsip A kind of leaf used in incision medicine, carried in the mouth.

tsiere To follow, next. A.69; K.72,120; 0.21; Q.70. Reduplicates as tsir-tesire, K.82,92. In K.121, 'collect'. cf. suri, juri.

tsiri To blow, of wind, on something. D.1,14; N.4. Tsiri wā 'pour on', K.122. cf. ser, tsuri. Tsiri hini 'remove the bark', B.33.

tsi-tsi The glans penis. cf. hitsi- 'to copulate'.

tsiwi To sneeze. cf. tsibi.

tsök Red banana.

tsom Name given to those who have undertaken the Oba Pilgrimage (n-tsom).

tsor Little things (ne-tsor). Tsoromon, term for loose end in plaiting; tassel on shoulder strap of club; tsoron na-mbwe 'small portable gong'.

tsoruta Outside end of outrigger boom (special word used on the Oba Pilgrimage).

tsōtsin Sister (m.s.); brother (w.s.), father's brother's daughter; mother's sister's daughter. Uripiv ditto. Possibly a variant for tasin, q.v. in a special usage. Takes suffixed pronouns.

tsōvi(i) To fall. H.3; 0.3; overtake, U.39. Tor tsōvi 'let fall'. cf. tsōva.

tsōva Pass by. K.5,17; N.43. The 'ha 'up', is used much as 'up' in English 'catch up'.

tsōwile To wash sores, shape, smooth, undercut the ends of a dugout.

tsu To remove. T.5. See tsi³.

tsualeni To cheer, hail. Tsualii is used for the grunt of pigs.

tsubul To descend. A.10; C.3; Q.65. Vao symbol. cf. tsupul, tsipal. Mta taqel?

tsule To poke a hole in. G.31; U.40. cf. tsere.

tsum To make sucking noises with the mouth (e wur-wur tsum). Mta sum; Hog Harbour sum 'drink', sumyi 'thirst'; Eromangan sōni 'kiss'.

tsupul To go down from the shore. cf. tsubul, the general term.

tsur To seize. U.33. cf. tsere, tsiri.

tsu-tsuin To pierce. IN sukit.

tsünōb Man, human being, as opposed to ghost; carved figure of a man. Tsünōb tsi le 'everybody'; tsünōb ni-man 'man exercising magic'.

tsüön Tongue. Tsüñ batiram "tongue of the eldest son", term
for triangles on women's skirts; tsūngon na-riv "rat's tongue", pattern on mourning cap; tsūngon also 'back of figurehead on canoe, beak'. Takes suffixes -ak, -am, -on. MidN tsōnoŋ. Looks like a noun from tsūm, q.v.

tu In ar we tu 'they make a knot at either end of the bowstring'.

tua A long time. Tua ok 'this long time', L.22. Mta tua1, and so commonly in MN. IN tuha 'old'.

tua-k Elder brother, usually used in reduplicated and compound form, tutuʃan 'friend'; tuaŋ wek 'dear friend'; tuaŋ weleŋa 'my dear friends'. Mta tua; IN tuha 'old'.

tuə-n1 Wife's sister's husband (tuak, tuaŋ-m, tua-n). Mta tua1.

tuən2 Another, one of two. E wure i a tuən 'he told it to another'; tas in tuən nen 'the other brother', KK.3. Mta tuaniu 'other'.

tuha To receive or present gifts (with ma or wā). Q.53. Ar tuha ni 'small pigs given to Makimen'.

tuhu To sound. E tuhu na-mbwe wenen 'he sounds the wenen gong signal'. Tuhunen 'song, dance' in Vao, as verb, tuhuŋ 'to perform it'; and see tutuhenen.

tuhu-ni To send off as a gift or covenant. N.2.

tui To scoop up or draw water.

tula Companion. cf. tulā-ni, and Vao talay = Rel tulaka, Lalep tulay 'mortuary official'. Florida kula, Kuanua (New Britain) turan, Toba Battaa (Sumatra) turan 'companion'.

tulā-ni To bring, lead. A.35, 36; K.20,28; Q.32, only used of persons. E tultūl Oba "it accompanies them on their way from Oba", name for the singing bamboo erected on the return of the initiates from Oba. E tu-tulā ni e wiel "it accompanies him as he goes", name of a gong signal; hence to sound the gong signal as for a dead man, N.42. Vao tula-ni; Mta tul 'beckon, mark time'; ?Bugotu talaŋi 'meet'.

tulōsmis Process of cutting down bushes to ensure tenure of garden plot.

tul-tulo To render a song (tul-tulo po), chant. K.98; BB.1 = tulā-ni?

tun Hot, of water, sun, etc. Usually tu-tun. SR tug-bunune 'burn rubbish'; Mta tun, tin, tunu 'burn'; IN tunu 'burn'.

tug Mirror (na-tug). Na-tug is the name of a pool in the ground sprinkled with ashes to make a mirror; as proper noun, name of a gap in the coast at Olep where two such pools exist. Also bilge water, Q.35.

Tuğu-wat The lodge of Emil Parav; also name of an extinct lodge.

tur1 To stand, stop, be, live. B.5; G.16; 0.1; P.19; R.49, etc. Po tur po Jopon 'just wait a little'; tur raŋi 'arrange in rows'? GG. Vao and Wala ditto. IN tanząy.

Tur2 In ne-tur tawo, name given to patterns of blue triangles towards the apex of the sap-sap.

turaŋ To make fast. Turan ne-liw 'fasten the head on an arrow', H.2; P.3.

tureput In bahō tureput, the older use in incision.

Tur-hapen In Ni-wät Tur-hapen, name of a stone on the Emil Parav beach called Popon.

turu1 Re-entrant tusker (e turu). Merer-pekes e wā e turu kele 'sub-grade of circle-tusker'.

turu-n2 Body; trunk of tree. Mta tur3.
tururanen A song.

tutau See tahu.

tutu Elder brother, term of address only, see tutužān. Also for father's brother's child, mother's sister's child, husband's brother, father's father's father, father's father's mother, brother's wife (m.s.). See tua.

tutuhunān A type of story. See tuhunen. Vao tuyunuan 'songs'.

tutuo ?To know. Na-mwere mu tutuo 'the parrot knows' (Tahar myth).

tutur Name of a certain dance. Ar tutur 'they perform the dance'.

tutužā-n Elder brother. See tutu for extensions. Clearly tutu, with sak, etc., possessive.

tuw1 A plant used for poisoning fish. Na-ha tuw 'creepers cut into strips and used as switches. Mta ya-tuwa; IN tube, extensively used also in S.E. Papua and the Solomons.

tuw2 Plaited belt (ne-tuw); also ne-tuw ne-tsal. Ne-tuw weraŋ 'belt worn by middle-aged men'; ne-tuw topon 'red girdle used by old men'; ne-tuw weaweŋ 'girdle with check design'; ne-tuw ni-tal 'red plaited girdle, and variety of palolo'. Vao ne-tuwe; Mta tuwur 'to bind on thatch'.

tuwe To build or pile up (tuwu). Q.52,53. Ar tuwe ni-wat 'they erect the stone platform'. Reduplicates as tu-tuwe, Q.64.

tuwō To distribute. Reduplicates as tu-tuwō.

tuwāt In na-tō e tuwat 'first cock-crow'.

tūwe To catch fish from a canoe.

u1 The rising tide (no-u). K.66, 81; U.60. As a verb, to rise, of the tide.

u2 In the cry u ... u ... ih, denoting that something is finished.

ul1 The palolo. Ul wele 'little palolo', the name of a month; another is ul lāp 'great palolo'; palu-ulān "offering of palolo", also a month; ul-mew "feather palolo", a variety long, with white belly. ?Mta un.

ul2 Paint; to paint (no-ul). D.10. No-ul wereŋ 'red lines painted on the face'; no-ul sin Tahar "Tahar's paint", used to describe embellishments round the eyes; no-ul sin bengenum 'curved design on the cheeks'; no-ul kon "holy paint". The transitive form of the verb, ul-i, is now used to mean 'write'. Vao na-ul 'paint'; Mta ill, ul 'smear paint on face, draw figures on Tamate hat'. If it connects with IN tulis 'write', then it must have lost t- before reaching Atchin.

ul3 To return. IN ulih.

ulon To swim. K.81. cf. hulon, loŋ. Mta olo.

ulu nu-amp Driftwood. Apparently "the head of fire", but not a native Atchin form.

un1 To awaken a person. Po unla 'wake me up!'

un2 To dive. C.6; K.47,69; LL. ?Mta unu 'sink in, of fluid'.

un3 Plaited string of coconut fibre, used chiefly in the construction of canoes (no-un). B.27; D.1. Na-ten no-un 'sine-net for attaching the parts of a house'. Lg wu:nu; Mta ya-un.

una Spirits who walk about as human beings (nu-una).

ur1 To cough, a cough. Mta vur.

ur2 Species of lobster (no-ur). MidN ura; BN ur; Mta ura; IN uŋaŋ 'prawn'.
ur Island. NR urā; IN hut' 'forest', and so a doublet ut, q.v.

urā To eat, secularly, as against hāni 'eat ceremonially or ritually'. A.2; G.12; K.13; 0.16. MidN or.

urep Gardens where first soft yams are planted.

Ur-tseren The name of a month.

usur Cane planted on yam heap (?for yam to grow on) (no-usur). Usur row-row 'cane planted on yam heap, with all the leaves stripped from it except two, one on either side, resembling a bird flying (whence the name)'; also no-usur 'a stake with leaves tied to it, and the name of a ceremony'. Mta usur 'following'.

uf Rain (noun and verb) (no-uf). F.4; K.84; P.24, etc. MidN us; BN u; CR and SR us; NR uhā, common MN, IN hujan.

uferi To enter. Ta-mats e-uferi 'the ghost enters in', name of the rite of divination.

ufōni In lās ufōni 'to know, recognise'; roq ufōni 'understand'. Perhaps = woje ni 'rightly, perfectly', with transitive ending.

ufu To ask a question. H.28; JJ.19, etc. SR usu; Mta usu.

ut The mainland, a place in general, also used to express points of time (no-ut). No-ut baho 'incision garden'; e ruwi no-ut 'he is planting his garden'; no-ut pu puq 'tonight, in the evening' (lit. 'the land will be dark'); times of day: no-ut mwī ran 'the day broke'; no-ut puq 'night-time'; no-ut e rāv-rāv 'evening, about 5p.m.'; no-ut e liwet 'midnight'; no-ut e puq 'today, now'. BN ut (Ā); MidN ot; SR ur; NR utā; ut; IN hut' 'mainland, forest', also existing in Atchin as hūt, and ur, the latter apparently through an Ambrym-South Raga medium.

utōf Small bamboo knife used to split cane. As verb 'to split cane' (no-utōf).

utui To draw water. cf. tuwi. SR uti; NR utu.

utun-würi A flea (dog-louse). See würi; IN kutu 'louse'.

ututuren A song cycle, used at the feast of jur hambān "fire lighting(?)".

uwe Interjection, alas. MN commonly auwe.

uwis Young breadfruit leaves, used ceremonially (ne-uwis).

uwōr Scarifications on the arm, raised lines on club, ridge from which teeth or comb spring.

Note: there is a sound of bilabial v, which is difficult to distinguish from w; here in most cases w has been standardised, except in a few words where v seems definite, but these latter have still been entered below in the place they would occupy if spelled with w.

wa Particle used to form multiplicative numerals: wa-ru 'twice', wa-tol 'three times', etc.; there is occasional vowel harmony: wā-, wō-. Mta wa- shows that this is really the IN causative prefix pā-.

wa The stingray. IN páyi.

wa To say (immediately preceding the quoted words). cf. Mta wa, NR and Hog Harbour ve, Mta vawa 'to speak', ultimately IN ba-qa 'an opening', hence, 'the mouth'.

wa A crowd. L.7 (ni-wa).

wa To come or go. Mta wa; IN (m)panaw.

wa In tan wa 'a kind of earth (tan) used medicinally'.

wahal To fight. L.4; EE.2. Tawutsen wahal "sides" in war,
GG; as noun, na-wahal 'a battle', EE; ni-se, wahal ko? 'What, is it war?'; segur wahal 'a pouch filled with scented herbs, used in pig magic; war herbs worn during dances', also segur e wahal 'smoke blackened pouch worn during dances'. Vao vayal; Mta vayalo 'war'.

wahawun A novice, undertaking the Oba Pilgrimage for the first time.

wahe To search for lice in a person's hair. L.23. E wahi batun 'he deloused him', LL.

wahel Crooked.

wa-i-e Interjection, hello! BB.4.

wal¹ Eight (o-wal). IN walu.

wal² A pitfalls, used in war (nu-wal).

wala¹ To run away. 0.28; T.14. In dance, to run with torch or for pig, A.61; R.26; to depart, N.40, to "circle". Vao val, walau; Mta wal 'to leap'.

wala² To sail. Na-ak wala 'a big sailing canoe, for long-distance travel'. To run before the wind. Mta walau-a 'collect things for a voyage'; walwalau 'paddle altogether'. Apparently a loanword from PN folau 'an ocean voyage', which Dempwolff connects with IN parahu 'a ship', Malay prau.

wal-sal Booth, half-house. Uripiv wal-sal '?'type of roofing over stone platform'.

wal-tani To court a person. Wala¹, apparently, "run away from"!

waluf A paddle, special word used on the Oba Pilgrimage. Waluf kaw-kaw 'steering paddle'. cf. Bugotu valuha 'to paddle'.

wan¹ To go. E wan .... 'it happened that ...'; pl wan 'by and bye'; reduplicated, wa-wan and wan-wan 'go on, continue'; used prepositionally of motion away from speaker and into something; liwi wan nu-a 'pour water into (a vessel)'; wa-wan 'it happened', i.e. after a long time; mwi han mi wa-wan mwi lap 'he ate, and continued eating much'. MidN van; BN va; Efate bano; Mta van(o); IN (m)panaw 'go'.

wan² A ceremonial hat, used in Maki ceremony, also called wan-pek-pek (nō-wan). 

wan(a) To steal. Reduplicates as wana-wana. Ser wan 'special horseplay in baho nosōs'; ser wan baho 'ritual stealing'; sekol wana 'worn by one who has killed a man and hidden him'. Transitive wanaï: ta-mats e tō wanaï 'there is a ghost unlawfully sounding them'; as a noun also wanaï 'harmful magic', whose practitioners are called wana-wana. IN pa-n(t)akaw 'steal'. Possibly a PN loan.

wani To sharpen. Reduplicates as wa-wani.

wanu A place; sometimes with umlaut as wānu. Ar tamwe wana 'they dance in rotation' (see tamwe); batun wana 'place of origin'. IN banua 'land'; Mta vanua; BN vanu.

waña-ni To feed, to give to eat. Reduplicates as wa-añañi. Mta vanjan; IN pañañan 'food'.

wañe To pant (S.L.). Reduplicates as wañe-wañe, wañe-wañe.

war(a) A pig, the tusk of which has re-entered the jaw (ni-wara). Tamauw wara 'gelded re-entrant tusker', A.44; B.34. Vao bo-ware; Wala no-wāri, waarin; Mta war 'turn back'.

warasi To step over, cross a threshold; to leap; a dancing movement, beating the ground violently with one foot. No warasi ne-hi:m 'I enter the house', especially used of husband returning to his wife's parents' house on the tenth day after marriage; ni-mbel e warasi
'dance movement representing a hawk pouncing on its prey'; ni-mbel wàre-waras "jumping" hawk'; e waras! 'a cure for toothache'.

ware Leaves used in cooking, leaf worn before initiation, and used after incision, and for wrapping bananas (ro-ware). Pweren ro-ware 'young leaves not yet unfolded', to represent eels in hor-hor mara game; ro-ware pwape; na-mbwas ro-ware 'sheath of ro-ware leaf'; ro-ware bwili 'red leaves used in initiation'.

warin See wara. Na-ni warin 'decorated coconut used in sacrifice of tusker' = 'coconut of the re-entrant tusker'? But Mta wara 'a coconut shoot'.

wa-runji To look for fish with torches. Wa-waron, intransitive (-ji being a transitive ending), 'to search for fish', A.15,18. See run-ji

waruf To shout, call out; used of a parrot in HH.

was Species of bird that feeds in the creeks (ni-was). Mta wasia 'a merula'.

wasu-n The cheek.

waf Mean, stingy. Tö-mëts ni-waf 'stingy man, miser'.

wat Stone (ni-wat). Ni-wat pwere-pwere "sov's stones", used in pig magic; ne-tsip ni-wat 'arrow with stone point'; ni-tale-hatsi ni-wat 'tethering to the stones'; ni-wat e weawan 'red-hot stones'; ar wihe ni-wat 'they drag the stones to the dancing ground'; ar uwu ni-wat 'they erect the stones'; ar sui ni-wat 'they erect a monolith'; no-on ni-wat 'forestone' (lit. 'face of the stone'); lihwen ni-wat 'middle stones'; tauwtsen ni-wat 'social sides, halves of stone'. IN batu 'stone'. See also wàt.

wati Second stage in plaiting penis-wrapper; to plait, fasten shoulder strap for club.

wats Four. Wa-wats 'four times'; e ma e-watsin 'fourth'; liw-wats-wats 'four tusks'; e rûr wa-wats 'about 4p.m.'. IN pat.

watsa The middle part of a bow (watsa liwen).

watse-ni To fall down, K.126; P.15 (watsenim 'fall down by yourself'); to fell trees, clear ground. Really a transitive form. So, to unfold, of a coconut leaf or shoot; ar wats-wats ni balav 'rhythm of dance'.

watsi(n) Now, this time. Used to indicate a complete tense after a verb.

wa-wa1 To run away. See wala, wà, wa1.

wawa2 Species of tree, used for lateral struts of lodge. Wulu wala 'its bark', B.32; na-hases wulu wawa 'plaited string'; n-tël wulu wawa 'string belt'.

wa-walân A rite at which a boy makes his first sacrifice.

wa-wula Charcoal. cf. na-ul 'paint'.

wà To go; also directive of motion away from speaker. BN wà. See wan.

wànu Place. See also wanu. Wànu rorowaen 'play-ground'; wànu si Tahar 'Place of Tahar', i.e. the islands of Oba, Pentecost and Maewo.

wàr See wàrân.

wàrâ-n The arm and wrist, biceps, hand. Ar wire ni wàrân 'they wave the hand, name of a song'; wàrân 'handle of bamboo knife, front legs of animal'; wàrân 'finger', "wife of hand"; bwen-bwen wàrân 'forearm'; lôlôl wàrân 'palm of hand'; pulok ini wàrân 'humerus'; n-lepin wàrân 'finger joints'; tewe wàrân 'he pays for their hands'; wàrân na-mban 'wings of the sail'; ar tak-tak wàr 'dance movements of young girls holding hands'; e wots-wots wàr
clap hands'; ar wotsi wärän 'they clap hands'.

wäre-wäre To speak, address, pray to; the speaker at ceremonies. Vao war-war; Sa'a wala 'word'.

wät Stone (ni-wät); see also wat. Ni-wät si Tahar 'stones of Tahar', coral used in magic; wät-wowu 'hard stone used for breaking up crab holes'; ni-wät wen-wen 'whistling stone'; ni-wät tsig-tsig 'small up-rights or dolmens'; ni-wät láng-láng 'stone found on shore after storms'.

we1 To be, to exist; also to become. Pi we sâm 'it shall be yours'. Ambrym, NR ve.

we2 Interjection of excited impatience, annoyance, surprise, anger, or to attract attention. A.66; H.41; K.41.

weaween Strong; painted; red-coloured. N'äi weaween 'Maki image representing the complete human figure'; Male-weaween 'Achin name for the island of Tolamp'; ni-wät e weaween 'red-hot stones'; mutso si Lemätaweaween 'Red-Eyes' star, Altair'; ni-rere weaween "the erithrina is red", name of a month; sekol mä-t-weiweaween 'worn in the hair by a man who has had sexual intercourse with tsötsin'; na-mbu weaween 'bamboo that cannot be broken by the wind, used as a symbol of defiance'.

weaweep A small fish species.

wehi To drag, pull, launch a canoe. C.7; M.9; U.13. Wehi tā-tāni 'to lead away'.

wei Interjection, alas!

wel(e) To sing, to dance. Ar wel-wel tarav 'they dance in welcome'. Vao wel; MidN na-wil; BN na-wel; SR wel 'a dance'; Atchin welän 'a song or dance'; CR welan.

welän A dance. See wel(e). Ar julu welän 'they dance in a different direction'; welän n-ndram 'name of dance performed by those only from lodge or bachelors' houses that possess eaves strengthened with pins', 'yam dance'; welän ni-mbäk "banyan dance", a song and dance cycle. Vao weluan; Nogugu welu 'to dance'.

wele A little, only, just, often used to form terms of endearment: inik wele 'you dear', often used for 'goodnight', 'goodbye'; tuak wele qa 'hello, my dear friend!'. Reduplicates as wele-wele 'smallest', or as noun, 'a small stone'. It may also be applied to oneself: po lai ma na-qa, ina wele 'bring the thing for me, myself'; ina wele, pe wiel 'I myself am going'. And so used demonstratively: kab wan ni-ram wel wu-qa wieta 'are you going this year or next?'. Mta wa le 'only'; NR welewele 'a few, short, little'.

welela Species of small bird.

wel(d)ra To spring back. cf. wel(e) 'to dance'.

wena Pattern with geometrical representation of human face.

wenen1 Flower, fruit, or seed. Wenen nöi "flower of the club", pointed projections; wenen na-mwel "cycas flower", lesser projections on club; wenen tabakor "flower of the tabakor"; wenen marwiri "cane flower", women's bracelets of twisted grass.

wenen2 Cycle of dances and songs. Wenen = 'flower, verse'. Rel ditto.

wene wa saŋawün A thousand.

wenini A herb, inserted into the armbadge and used in the Maki. Wood is said to be poisonous. Used in man-traps.

wentapawiri The sound of the wind. D.8.
wentomala-o In Vao, the song of the return from Oba.

wen-wen In ni-wat wen-wen "whistling stones".

wenqeras Ankles rattles, made from the fruit of a tree of the same name.

wep Butterfly (ni-wep).

wer Small white variety of palolo.

weral Today. Sagawül weral 'ten days from today'.

were In tapa were 'coconut mats'.

were-n Kinship term for fourth generation ascending, and beyond. Wala dito; Vao veri-n.

werek Term of endearment. cf. wele. Tuak werek 'dear friend'; kam werek 'goodbye'; kiam werek, nami wiel 'as for us, we are going'. Wala weirılan.

wereğ In no-ul wereğ 'red lines painted on the face'.

weree A kind of grass. Wala ditto.

wes In magic, madman (na-wes).

wesa Hard yam.

wet Store-house for yams; yam table; large yam table erected in dancing ground (ni-wet).

weta Behind, last. Also wita.

wet-si To scrape away earth from the oven. H.26,36; to marry, a word used by women (cf. hitsi); to exhume a body. AA.

wetsiwets Bark-boardbelt.

wetu To fasten. cf. wati, wet-wat.

wet-wat To plait. F.6.

wew Pandanus tree; strips of white material used for making garter bwäng-bwaäng (na-wew).

Tokoratsin wew 'necklet worn by initiation candidates'. Wala ni-wew. ?Mta vau, vav.

wew² Large round block of coral (ni-wew). cf. Wala ne-wew 'grave-stones'.

we-we To count. A.35; B.32; H.30; K.9.

wie To walk to a place, in contrast to wiel 'walk about'.

wiel To walk about, to depart, return from, go or come, set out. B.15; D.12,14; E.4; F.9, 10; H.32,39, etc. Reduplicates as wi-wiel, DD.

wile To tie up. cf. wiwsi, wűe, wuju, and Vao wiwihean 'attachment of outrigger boom to float'.

wil Lightning (na-wil). MidN vilak; BN vili; IN bilak.

wile To select, gather. Mta vile; IN pilih 'to choose'.

wili-n The shoulder.

win² Woman. The word is never used alone, like wiwew, but always supported, e.g. win a, win el, etc., used referring to a woman already introduced by the other term. cf. Rel, Lalep wine-lak 'son's wife' (m.s.) (oblique); younger brother's wife (m.s.). Vao wäne; IN bila,'woman'.

win² The lip. Win daŋ 'the crying lip', and win bu 'dumb lip', of gong. Vao vivi, and thus doublet with Atchin pipi from IN (m)bi(m)biy 'lip'.

wir² Midrib of coconut leaf; men's nose ornament (na-wiri). Läng na-wiri 'dance in which midribs of coconut fronds are worn'. cf. marwiri.

wir² Name of the highest rank on Oba.

wire-ni To wave about.
wire-wire Small flying fox. Ni-man wire-wire 'charm for catching them'.

wiri To twist, twine, plait. Mta vil, vir, viro, etc.; IN bilit.

wiri To dash out the brains against a stone.

wiri To sting. K.126, etc.

wis To whistle.

wis Edible crafish; name of a month. Na-wis pal "killing the crayfish", name of a month; tsele-wis "end of a crayfish", name of a month. cf. na-wüsi 'crab'.

wis Bow or arrow. A.10; G.2; H.2. Ne-wis na-ron 'ceremonial bow'; ne-wis ma-mbur "broken bow", the pancreas. SR üs; Mta us; IN busuh.

wis How many? MidN vi; BN va; IN pira.

wis In e-wis-wis 'young tusker with tusk occasionally visible; circle tusker minus'; ar wis pwere mätän "pig for shutting the old man's eye".

wis White. MidN vüs; IN putih.

wis In wis rap-rap 'auricles of the heart'.

wisen (i) without sän, F.8, and (ii) with sän, F.10; G.11: 'wife, wife's sister'. Wisen tipwis 'girl child, little girl', Q.25; wisen-la 'sister's wife, younger brother's wife' (Rel wine-lan); wisen 'woman', is used in initiation for "candidate"; wisen sän lamöf 'illicit lover'. cf. wisewin, of which wisen is a contraction.

wise-ni To show, teach, examine, foretell. F.28.

wisewin Female, woman, wife. Uttariv ne-seven; Eromangan nisiven, with metathesis.

wisin In wisin wärän 'finger'; wisin balan 'toe'. See büj.

wisöwin Meat, flesh. Mta visoyoi.

witi In witi na-len 'main body of dancers'.

wits Banana (na-wits). Also leaves worn before plaited penis-wraper. Wala wits; Vao vete; MidN wits; BN was; IN punti.

witsa To cook fish.

wits To throw, cast.

witsine-ni To send, present. JJ.

witsire-ni To spread out, wrap up in? H.37.

wi-tsöv To make fall. cf. tsöv, and wi- = IN pa-, causative.

wun To flower.

wiwa To pour. cf. luwe.

wiw-si To tie together; to tie the wash-strakes on the canoe; used of Tahar's building the human body. cf. wiwe.

wó- Multiplicative numeral prefix before a following o or w. See wa.

wobat Ridge pole.

wobun Species of parrot. cf. wopun.

wol A piece of liana, torn from the midrib of thatch palm and used as lashing to tie panels of thatch to rafters (na-wol); also an armlet, worn as part of insignia of having undertaken the Oba Pilgrimage.

wolo To stick out (of branches). Wolo tsiqarini 'slits in middle of tuw'. cf. Mta yai wolowolo 'cross'.

wolohin The tail. cf. Vao wòhin 'glans penis'.

(w)olol Sweet.
Wolfu Name of a district on Wala.

womak Species of bird.

womere Species of bird, forbidden to people of Lowuwui on Rano.

womu First, before. Root common about Malekula-Ambrym region.

won1 In na-won, q.v.

won2 In ne-him won mwi-läp 'large men's house'. cf. hon, kon, etc.

wop Sprouting coconut (na-wop); used in connection with flag-staff which is erected while initiates are on Oba Pilgrimage; a young coconut club; plain club splaying out to a square cut. Vao womp.

wopun Species of bird; a bunch of grey, green and blue feathers worn in front of head. cf. wobun.

wor1 To be born. K.1; 0.21; P.9. Wifan won 'all women born in a given village (in a restricted sense, of a given lodge) of whatever generation'; the term won is never used of men. Vao ditto. IN bu'ak 'a blossom, offshoot'.

wor2 Yet, chiefly in negative, sere ... wor 'not yet'; yet (future), K.124. Le wor 'all the same', K.23; ko wor 'simply, just', K.72; L.42; nu-a e tutun wor 'there is still some hot water'; also po mul wor 'you come home too'; ko tur na-el paraq le won? 'Have you been standing here a long time?'

wor3 Stone wall (na-wor). Long stone platform, high stone tower; a constellation goes under the same name.

wori-n The forehead. cf. bonon and bu'orin.

worun Pupil of eye, worun mütan.

wosawos Wooden studs supporting side wall of house.

wof1 A canoe paddle (no-wof). E tori no-wof 'steersman'. BN vas; Lg bõ-äsi; Mta wose; IN bâ(y)say.

wof2 Coconut shoot (na-ha wo) Mta vusa 'green coconut'.

wof3 To land at. Sale ma-wof 'landing place'; e ma-wof ne-mbe ko 'where is it steering for?'

wof4 To be sore, have sores, a sore.

wof(e Straight, right, correct. Mwi liw wo 'he shot straight'. Mta weswes 'correctly, exactly'.

wof(j To carry (on the shoulder?). A.48,52; U.47,53. E wo' buha 'carry off the pig'.

wot(u)1 To be in sight. Na-ak ta-8a e wot 'the canoe from Oba is in sight'; also e wot e-res 'it is making good course'. IN batu.

wot2 Dolmen, Q.22; pile of stones; stone platform. Vao, Wala, Uripiv, ditto. ?IN batu 'appear, place of re-birth'. Malo vota 'ceremonial stone heap'.

wotsan Gather together. M.5,6.

Wo-tesere-tsere The lodge of Senhar village.

wots-wots To clap the hands. Wots-wotsahän 'ceremonial part of Maki Rokari'; ne-mbar wots-wots 'bamboo breadfruit beater'. See also lok. Mta wosa.

wow Species of seaweed (ro-wow). Wala no-wo 'species of leaf'.

wowe To clear ground. Ra wowe tano ne-him 'we clear ground for a house'.

wowo1 Pebbles; part of the Milky Way between the Southern Cross and Sirius.

wowo-n2 The mouth. Wowon'wat 'cliff'. cf. Ponape po 'top,
surface', which has been the original meaning also in Atchin.

wör Dry coconut meat (na-wör), from which the juice has been squeezed.

wu¹ Bamboo (ne-wu). Mumun ne-wu "reflection of outrigger boom", a dress pattern, a zig-zag design on belt; ne-wu 'a clump of yams or a yam tied to bamboo for carrying', dialectic variation of na-mbu. Wala wu 'attached yams'. Wu is also used for the outrigger boom of canoe; part re wu 'attachment of boom to canoe' (preliminary placing prior to attachment). IN buluh.

wu² In na-mbu wu 'open pipes, set of musical pipes', cf. wuwu 'to blow'. IN put 'blow'.

wu³ Medicine (secular, as against ni-man).

wu¹¹ Black ash or charcoal (na-wul), adhering to burnt stick, i.e. before use for smearing face during mourning; when put on the face it is called ni-asas, q.v.

wu¹(i)² To buy, pay. Reduplicates as wul-wul. MidN wul; BN uli; Mta 'wol; IN balu.

wu¹(i)³ To paint. cf. ul.

wu² Creeper used in thatching (na-wul).

Wuli Name given to image of stone pig, translated as "ruffian" or "larrikin" in Pidgin.

wulu¹ Tool for piercing thatch, made of sharpened coconut shell. Wulu wawa 'inner bark of wawa tree', used for string for bull-roarer; na-hases wulu wawa 'plaited string'; wulu = ne-wis na-roq. The uses apart from the first one seem to be different, and point to IN kulit 'skin'.

wulu² In wulu nu-amp 'mushroom club'.

wulu³ Image made of tree-fern (ne-wulu). Wala ditto.

wulu₄ To bring. Ar wulu₄: na-wot 'they bring the stones to the dancing ground'.

wu:n Enough (e ma wu:n). cf. wuwun 'full up'. IN pānuih 'full'.

wun To rail against. R.3.

wunewun A kind of wood. cf. wuno.

wuno A wood used for making bull-roarers.

wure To reef sail.

wure-i To speak to. If followed by quoted words, they must be introduced by wa. There is an exception in C.4. Reduplicates as wu-wurei, Q.21. SR war; Hog Harbour wor.

wuretun To tell the truth. See preceding, and IN tuhui 'true, real'.

wurewiri In Ṇaŋa wurewiri 'centre posts'.

wur-wur Sucking noises with the mouth. See tsum.

wuʃści To place a pudding in the oven, to poultice a sore.

wuʃoni Formerly.

wut To rise (of the moon). See wot(u).

wutu Mushroom type club (wuṭu n-das).

wuwu¹ To blow the pipes. H.13. SR wu 'blow a conch'; IN put 'blow'.

wuwu² The bladder. cf. wuwun. Ro:n wwu 'leaf used medicinally in bahoi tureput.

wuwu Low tide.

wuwu To knot and loop (wwu tani). cf. wihe.
wuwu-n⁴ To fill up. K.117. IN panuh 'full'.

wuwun² Main upper wash-strakes of canoe. Wuwun sor-sor 'fore and aft upper wash-strakes'.

wü¹ Or. Generally with ŋa as wü-ŋa.

wü² Turtle (ne-wü). IN panuh; Mta uwa.

wühe To unwrap (leaves from a pudding) (wühe tāni). cf. wihe.

wül The moon; a month (na-wul). Wüliel 'month of the hurricanes'. Wala wul; Vao vul(a); MidN vil; SR ul; Mta vula; IN bulan.

wül-wülü-n Skin, bark, rind. Vao wul; IN kulit.

wün A smell (na-wün). Mta puna(i); IN baw.

wün-tdi To join (ends together?); to weave the ni-mbwen, to add new strips when plaiting.

wṟa-n Term of reference for husband's father, husband's mother, son's wife (m. and w. s.). PN vugona.

wür Ringworm (na-wür).

wür-si To squeeze (e.g. coconut cream on yam pudding). Mta woros.

wüs A crab (na-wüs). cf. wis.

w useRef In ar wüs-w useRef, form of horseplay in wa-walen. (wüs) w useRef To stir (a pudding).
PART III

TEXTS
INTRODUCTION

The accuracy of vernacular texts depends on two factors (a) the care with which they are transcribed, that is to say, whether the transcriber has a good ear and a sound phonetic script; and (b) on how much the transcriber actually knows of the structure and syntax of the language he is recording.

With regard to (a), the language of Atchin is an easy one in that it has no sounds that are beyond the power of the average Englishman to reproduce at least accurately enough to be readily understood. The first tales recorded were those here referred to with double letters AA to LL. These were taken down mainly for the purely practical purpose of obtaining material the analysis of which would enable me to talk to the natives in their own language, and to understand what they said. They were transcribed very shortly after my arrival on the island, at a time when I had acquired only an elementary knowledge of the general structure of the language by means of wordlists and short phrases translated into pidgin English, and when my vocabulary was limited to a few words in everyday use. In this way I would transcribe a tale from one informant, often without understanding more than a quarter of what I wrote, but was gratified to find that, on reading it over to another, he could not only understand my rendering, but would then supply translations. Thus, though I had had no training in non-European languages, it was evident that my method of transcription was accurate enough at least for ordinary use. In spite of this, however, some passages in these early tales remained obscure, and for this reason they are here placed after the main body of texts, lettered A to U, which were obtained after I had already obtained a fair conversational knowledge of the language.

With regard to (b), the question is not so simple. It is a paradox, well known to those who study unwritten languages, that there comes a time when "a little knowledge is a dangerous thing". The same difficulty arises even among those who learn to speak a foreign European language, when the interlocutor ceases to correct one's mistakes, partly because one's speech, though incorrect, is just intelligible enough to be understood and it is too much trouble to correct it, and partly from politeness, which possibly includes a touch of flattery. For the first reason, the white man in the Pacific, when talking to a native, speaks pidgin English, though most natives are quite capable of speaking proper English, and are often annoyed at not being allowed to do so. For both reasons, when a white man tries to learn a native language, the natives after the learner has reached a certain stage of
being able to express himself, talk back at him his own mistakes. There thus comes about a kind of deadlock that it is extremely difficult to overcome. Most Mission texts are an example of this stage of half-knowledge, and, to avoid it, the French Catholic Mission in the New Hebrides, who know what they are about, refuse to allow their priests to settle down in any one island till they have already tried their hand at several related languages, so that they shall already have passed this stage by the time they come to take up a permanent station. My own position, when I left the island, was halfway between the first stage and the second. While I could understand, and make myself understood, in ordinary conversation, I was still unable to catch much of what went on in the extraordinarily rapid conversation which the natives held among themselves. It was thus clear that a good deal of my speech was in an idiom half my own. Being aware of this, however, I did my best to guard against it in transcribing tales by taking most of these down, not from my own regular informants, but from the lips of old men with whom I was not in daily contact. At the same time, a regular informant would generally be present to translate when necessary. Such translations were sometimes given during the transcription, but generally the narrator was too interested in what he was telling to suffer such interruptions, and I would have to wait till the transcription was over to consult my informant over difficult passages in private. Every precaution was thus taken to counteract the effects of my own half-knowledge. Rather than pose however, as certain ethnologists have done where none can contradict them, that it is possible to learn a native language perfectly in three, or even six months, and also in fairness to the natives, I deem it but just to warn the reader that what he has before him cannot under any possible circumstance represent the full flavour of Atchin language as it is spoken at its best, and that, in spite of every care, it is probable that in many cases undue simplification in grammar has taken place.

All the tales here given were transcribed in the Atchin double-village of Ruruar. In the single-letter series A to U, only three tales, C, D and E were transcribed direct from regular informants, the first from a young man named Buremin, and the two others from Melteg-tsung-wurei. The rest were all taken down from old men not in my immediate circle of close friends, whose names are given at the head of each tale. Of these, Melteg-waru and Melteg-wuomu were not very outstanding men who, nevertheless, were of high rank in the graded society, as witnessed by the title Melteg which they bear. Ta-maewo, on the contrary, was a very distinguished old man, in fact the oldest
on that side of the island, who had risen so high in the society as to dispense with titles and had adopted the name "Man of Maewo", Maewo being the revered island where the deity Ta-har is said to have lived. The reason why he was not among my close friends was that he had quarrelled with Melteg-tō, the chief man in that half of the village where I lived, and it was not till towards the end of my stay on the island that I was able to meet him without being regarded as a potential foe.

Apart from the fact that the double-lettered tales AA to LL are placed at the end, on account of the fact that they were transcribed while I was as yet unfamiliar with the language, the tales are here given in the order in which they were transcribed, irrespective of subject matter.

J. LAYARD

*General Note:* In the Texts, Tales I, J, and II are missing from the series. Subsequent tales have not been renumbered, so as to avoid confusion in cross-referencing.
SUMMARY

A man had two sons, one of whom he threw into a river because he had sores. This man held the half of a coconut which his father had given him. The water carried him away, till finally he came ashore, found a fowl and a pig and built a house, rearing 10 boars and 10 gelded-pigs.

Shot fish at Tiwil. A girl comes to Noris here. He gives her a fish and woos her, and is finally forced to marry her. Her parents bring her to marriage rite but he is afraid and hides. Finally returns and pays large bride-price. Is again afraid to take her for ceremonial visit to her father's house on 10th day, but goes, taking large pig instead of small one.

She bears him two sons. Then he hears that his father is making Maki in his own village. Persuades Pinalum folk to go and dance na-rel. He himself 'circles' for presentation-tuskers, carrying the half-coconut which his father had given him when he threw him into the water.

Father recognises him and follows him, and finds that he is rich in pigs. Father and mothers all go to live with him. Father grows old and dies. He is not buried, but turns into a sea-snake, the track of which must not be crossed, though the sea-snake must be touched if seen. (Continued in Tale B.)

TRANSLATION

There was a man who had two sons. But the younger had sores. His father did not like him (because) he smelt, so he threw him into a river, and the river swept him away. And he was holding in his hand the half of a coconut (which his father had given to him), of which he had eaten the other half. And the water swept him away, until at last
he caught hold of a wawa tree and went ashore. And he stayed there, and went on staying, and built himself a house. And after a time he saw a fowl (which he took) for himself, a hen. He fed and fed her till she laid an egg, which hatched. Then he found for himself a sow, which he fed till she became big and bore (a litter of) five pigs, which he fed up and tied (to stakes). The sow bore again. (This time) she bore (a litter of) ten pigs, which he castrated, so that he now had ten gelded pigs, from all of which he removed the testicles. She bore again, (this time again a litter of) five pigs, which he also tied to stakes, so that he now had ten boars and ten gelded pigs.

And he took his bow and arrows and went down to the shore at Tiwil to shoot fish. He shot a fish. And (it happened that) a woman came down to the shore at Norishere. And he saw her, and gave her that fish, (saying) "Here is a fish for you to eat." The girl took it, and went home to her father. Her father said "Where did you get that fish?" (She said) "I got it on the shore". Her father said "Indeed?" and she said "Yes".

Next day the man again took his bow and arrows and went down to the shore at Tiwil. The woman (also) went down at Norishere, looking for shell-fish. That man again shot a fish. He came and saw that girl at Norishere, and said "Hi! here is a fish for you to eat." She took it, and went home to her father, (who said) "Where did you get that fish?" She said "I got it at Norishere". "Ok" (said he) "When are you going to look for shell-fish again?" She said "The day after tomorrow". He said "Good".

That man went home and stayed till the second day. Then he came down to the shore again at Tiwil, and again shot fish. She came to Norishere; that girl came down again to Norishere (this time) with her younger sister. And the mother and father (of the two girls) concealed themselves and hid in the bush, and watched. The man appeared and came and again shot a fish. Then he came (up to the girl) and said "Hi! You have brought your sister this time". The girl said "Yes". He said "Here is fish for both of you", and he gave her that fish. The younger sister stayed (on the shore), and he took that girl and together they went into the bush (and made love). Then she came back to her younger sister and the man went home. Then the two sisters went home, and when they arrived the younger said "Father, we two have got this fish". He said "Who gave it to you?" She said "A man was shooting fish at Norishere, and gave it to us". He said "Really?", and she said "Yes, and he took that girl (her elder sister) and they went together into the bush". He said "Really?", and she said "Yes". He said "Good".
Then he said "When is that man coming again?" She said "In two days (the day after tomorrow)". He said "Good. It will be all right if in the end he marries her". (The younger sister said) "The day after tomorrow he will come back to Norishere and see us again".

And on the second day that same man came down to Tiwil, and the girl and her sister went down to Norishere. That man came shooting fish, and again shot one. The (girls') mother and father hid in the bush again. And the man gave the fish to those two (girls). Then the father and the mother came and said to him "Hi! Now you must marry her". The man said "Very well". They said "Do you wish to take this woman as your wife?" and he said "Yes, I wish to". Then (the father) said "In five days from today (you may) come (to my house) and take her". The man said "I will". Time passed until the day arrived. Then (the father) said "We will go today (to the man's place) and give away this girl". Ten men and ten women accompanied her and came to his (the suitor's) house. Then was that man afraid. He saw that they were very many, and he ran away, and climbed into a mwerek tree, climbing higher and higher till he sat on the very top. They could not find him in his house, and spoke to that girl, saying "You look for him (and see if you can find) where (he has gone)". She searched for him and called to that man, saying "Where (are you)?", and "Why have you hidden?" He answered "I am so afraid". But she replied "Do not be afraid, these are my fathers" (in the kinship sense), and again she said "You come". So that man climbed down, saying "You lead the way, let us go". The girl went first and he followed. And they came to his house, and he said "Make fire in the oven, and cook". When they had finished cooking he took his pigs (for the bride-price). He took a re-entrant-tusker boar as chief (item of payment), and a gelded re-entrant-tusker as companion for eating. He took a curved-tusker boar and a gelded curved-tusker, and a crescent-tusker boar and a gelded crescent-tusker, a liw-sheren and a gelded liw-sheren, a buho pal-pale and a castrated pal-pale, a buho liv-töv and a castrated liv-töv. (These together) completed (the bride-price). (The girl's father) said "Son-in-law, you have brought too many of these pigs. (When the time) comes round (for you to) pay your ceremonial visit to my house [i.e. the tenth day after marriage, when it is the custom for the son-in-law to take his wife to her father's house and to present him with a tusker of grade liw-sheren or thereabouts], bring (carry) with you only a single suckling pig."

On the tenth day, that man said (to his wife) "You go to your father (alone)". She said "Hi! You come too, we will both go." He said "I
am afraid". (She asked) "What are you afraid of? There will be no one but my father (and his brothers). Come on, let's go". (But he said) "I don't want to. You go (alone)". (She said) "Come on, we will go together", (so at last he said) "Very well, you drag that high-grade tusk, (and) we will go (with that)". She said "Eh! Not that pig, it is much too big, we need only take a single small suckling-pig". "No", (he said), "You drag that high-grade tusk, (and) we will go (with that)". The girl dragged the tusk boar (and) they came to her father's, and the father said "Son-in-law, so you have come at last". He answered "Yes". (And his father-in-law who it is clear by now, is his own father too, who had thrown him away because of his sores = incest) looked round and saw the girl dragging the high-grade tusk (as) it came (round the corner of the house enclosure), and said "But I wanted you to bring only a single suckling-pig, and (now) you have brought this large pig." (Then) he said "Let us examine it. It is a good one". Then the father dug up yams (and gave them to them), and they two took them back home, and lived in their own house. They stayed there, and (after a time) she bore a child, a boy. And she conceived again, and again bore a boy. The two boys grew up. (And) that man's father performed (the rite of) Maki at his village, and when the time approached for the great sacrifice, he said "(It shall be performed) five days from today". (Thus) he appointed the day. (And) that man [i.e. his son, with whose throwing into the water this story opened] heard of it. He said to the men of Pinalum: "Come (to the Maki) and dance your na-rel (dance). Let us go (together), (and) I will 'circle' (for a presentation-tusk)." (And again) he said "Let us, indeed". They went, and then he danced at his father's Maki. (First) they danced the preparatory movement of the na-rel. (In the course of the dance) he left. His father asked "Where do these men come from?" (but his companions answered) "We do not know. These men come from somewhere, (but) we do not know from where". Then the main na-rel dance approached, (and) he (the son) 'circled', and gave his torch to his father. And he was holding in his hand the half of the coconut which he had been eating (when his father threw him into the water). (Then) he (the father) said "Oh! (It is) my son (who) has brought me this pig. I recognise the half-coconut which I gave to him." (Then) he (the son) presented a circle-tusk to his father, and a re-entrant-tusk to his mother.

When all the tuskers had been sacrificed, (the father) said "Oh, I will wait and follow after my son". He followed his son. (And all the man's) mothers came to Tiwil. They all came, and saw that he had
many boars, many fowls, many gelded pigs, and many sows. His father said "It would be good that we should all stay here now". (And) they all stayed there. And his father grew old, became an old man, and died. But they did not bury him. (His son) said "What shall we do?", (and) he said "Let us take him to the shore (and put him) in the sea". Then the (old man's spirit) became a sea-snake. (Therefore) if a man happens to see the track (of such a sea-snake) in the bush, he should draw back, (but) should he see that sea-snake, he should touch it. If he happens to see the track, he should draw back. He should not step over the track. If he step over it, then he will die. If he should see that sea-snake, he should touch it, (and) it will be well (with him). Should he not touch it, he will die.
TALE B: THE MAN OF TIWIL GOES TO PENTECOST

(Continuation of Tale A.)

SUMMARY

The two sons of the man of Tiwil and girl of Norishere went to look for shell-fish at night with torches. The elder lept on a rock which carried him to Raga, where he supported himself by eating the food fed by a Raga girl to her sow. She discovers him and cooks for him. He asks her whether she has adzes and sinnet and strips for making a sail, and makes a long-distance canoe. They wait till the Raga men are away attending a Maki in the interior, then drag the canoe down. The rock rises up beneath it, so that the canoe rests on the rock. They place tuskers in the canoe and sacrifice one by dashing its head against the rock. The rock with the canoe on it sailed back to Tiwil, where the rock returns to its own place on the reef, and the man and girl marry.

TRANSLATION

The two sons (of the man whose father had thrown him into the river and who had gone to live at Tiwil and married the girl of Norishere) went to the shore to look for shell-fish, and saw a shell-fish of the kind called ne-lil in a hole in a rock. And they pulled and pulled at it (to get it out), but without success, for it was stuck in the hole.

1The rock that had brought him from Tiwil.
2The rock which had sunk, rose up beneath it.
So one of them said "We will come back this evening when it is dark, with lights. It will come out then and we shall be able to take it easily". The other said "All right", and they returned to the shore after dark bearing torches in order to attract the shell-fish with their light.

One of the two (the younger) stayed on the reef, while the other (elder) jumped across on to a (separated) rock and by means of his light attracted the shell-fish out of its hole (in the reef) and caught it. Then he decided to come back, but when he turned and looked down (in the darkness) he saw nothing but deep water all round him. Holding high his torch he ran round (on) the stone and it sailed (floated) away with him. His younger brother stayed on the reef, weeping (at the loss of his elder brother). Then he ran home to his father and mother, saying "That man, the rock has sailed away with him". His mother and father ran down to the shore at Tiwil, and saw the light (of his torch) twinkling (as the rock bore him away).

It went right into the open sea, and sailed before the wind till it reached the island of Raga, where it made landfall. It sailed straight into (the mouth of) a river on Raga, and went right up the river. (Now it so happened that) a wawa tree spread its roots into the river, and the man caught hold of the (root of the) wawa tree, and the rock sank. Then he climbed out on the wawa tree, and stayed up there, sitting on a stone on a cliff.

And there was a sow belonging to a native of Raga (which had strayed), and a woman came looking for it, for it had had a litter, and she was bringing food for it. And having fed the sow she went away. And the man chased the sow away and took its food and ate it. Next day the girl again prepared food for the sow and came and fed her, and again went away, and again the man came running and chased the sow away and took her food and ate it. (After some time) the girl said to herself "I keep on feeding that sow, but what is the matter with her? Her belly is empty". Again she said to herself "Very well, I will stay and watch". Next day she came again with food for that sow, saying "I will stay and watch". And when she had emptied her basket for the sow she turned aside and hid, so as to watch the sow. (And, as before) the man jumped out (from where he lay concealed) and ran and came and chased the sow away. (This time) she (also) jumped out, saying "indeed, so it is you who keep on eating my sow's food. Never mind. I will scrape out my oven for you. You just stay here, and I will cook for you." And the girl went home, and made a pudding, and took it out of the oven, and came and gave it to the man. And he ate it and threw the leaves that it was wrapped in to the sow.
And the man said to her "Have you adzes at home?" She said "Yes, many of them". And he said "Have you coconut sinnet (ropes) at home?" and she said "Yes, plenty". He said "Go and bring them". (With them) he fashioned a large canoe, a long-distance canoe. And when he had finished cutting out (the hull, planks, rails and figure-heads) and lacing them together, he said "And have you (plaited strips for) a sail at home, or not?" She answered "There is a sail at home", and he said, "Go and fetch it". And she brought (the strips), and he sewed them together (to make the sail).

When he had finished sewing them (and the sail was ready) she told him "There is a Maki (about to be performed) by the natives of the interior of Raga five days hence" (implying that when all the coastal natives had gone into the interior to view the Maki, she and the man would then be able to launch their canoe and make off without being seen). He said "Good! then all we have to do is to count the days (and wait)". So they went and cut aerial roots of the wawa tree from which they removed the inner bark with which to make tethers for their pigs and rope for the sail. These they had ready twined by the fifth day, on which the Raga (coastal) natives went into the interior to witness the Maki. Then those two tied tethers to all their pigs, and dragged them (to the shore), (including) a circle-tusker boar, and a re-entrant-tusker boar, together with a gelded re-entrant-tusker. He placed them on his shoulder and carried them to the shore, where the two of them lifted the pigs into the canoe.

Then he placed (yet another) pig upon his shoulder and sacrificed it by dashing its brains out on the rock (which had brought them from Tiwil).

And the canoe rested on the rock (which had sunk when it arrived, but now rose up and floated beneath the canoe).

Then they hoisted the sail, and the canoe (together with the rock on which it rested) sailed before the wind till it came to Tiwil. The man landed and went up to (the village of) Tiwil, but the woman stayed on the shore to guard the pigs. The rock sailed back (of itself) till it came to rest in its original position (on the reef) but they carried the canoe to shelter on dry land. The woman stayed on the shore, (while) her husband ran and came to his father. And his father said "Hi! So it is you come back! Are you a mor or ghost?" The son said "I am a man. Come, all of you, let us go to the shore and drag up the pigs". His fathers and his mothers all ran and saw the pigs. (And there was) his wife (who) had stayed on the shore. At last now they were married, at last he had come home. That is the end.
TALE C: THE MAN OF MESHUWARE, WHOSE ELEPHANTIASIS WAS CURED BY GHOSTS

(From Buremin.)

SUMMARY

A man of the mainland village of Meshuware, inland from Woremet, and married to an Atchin woman, is working late in his garden, and he sweats and has elephantiasis. As he comes down to the river at Woremet, when it is already dark, he sees ghosts bathing. He bathes with them, and they remove the cause of his elephantiasis.

He goes home to his wife on Atchin.

The ghosts meanwhile quarrel over which of them shall have the thing which caused the elephantiasis, and finally share it.

He vows never to land at that place again, but at the men's sacred cooking-place at Oremal.

He dies, and is buried in his lodge at Meshuware.
There was a man of (the mainland village of) Meshuware (inland from Woremet), who one day was working in his garden so late that it was already dusk before he stopped. And he was sweating violently, and had elephantiasis of the leg. And when it was almost dark he put the provisions that he had been digging on his shoulder in order to come down to the shore. And he went down to the shore, and when he arrived there he saw a number of ghosts bathing in the river. And they said "(See) our dear friend, let us remove the foreign body (which is causing his elephantiasis). Let him come, and we will all bathe together."

And the ghosts ran and came, in their desire to remove the foreign body from him. And he came, and they all bathed. And when they had bathed, he felt that he was well. And he dived, and dived again, and came to the surface. Then he dived again, and again, and yet again. And again he dived, and (this time) reached the shore. Then he dragged his canoe down to the sea, and he paddled and came (to Atchin), and his wife looked at him and said "Is this indeed you, or not?" And he spoke, saying "(Yes,) it is I. They have taken that thing out of my leg". She said "Indeed? That is good".

And (when he had gone) the ghosts bathed again. And they saw that thing which had belonged to that man. And one of them said he wanted it for himself, and said "I want the foreign body that caused our friend's elephantiasis for myself. He did not want it (only for himself), he ran". And another wanted it for himself only.  

And (after that) the man did not want to go to the mainland that way any more, saying "I do not want to go to Woremet again, but will (in future) go ashore at the cooking place sacred to men, at Oremal. That will now be my landing-place. I shall always land there in future. I shall continue to use that as a landing-place henceforth until I die."

And (when he died) they buried him at Meshuware, in his lodge. That is the end.

---

1Evidently a refugee from the mainland married to an Atchin woman.

2As explained afterwards by the narrator, the ghosts in the end all shared it.
TALE D: LEBON SA RETURNS FROM OBA

(From Melteg-tsung-wurei, May 8th, 1915.)

   "waŋewaŋe, waŋewaŋe, waŋewaŋa mule mule.
   Ina e no mule, no wane tamba e,
   Sale-sale, mule mule."

SUMMARY

While bathing on Atchin, Lebon the First was caught by the South-West wind and driven to Oba, where he made a canoe and stole some pigs, and with them returned to Atchin.

On his way he sang a song. As he approached the island, Lebon the Tenth heard him singing, and called Lebon's attention to the sound. They all sounded the gongs, and danced down to the shore to welcome him. He lands, bringing with him a small taro plant.

TRANSLATION

One day, while Lebon the First was bathing, the South-West wind caught him and drove him to Oba, where he stayed awhile. Then he plaited sinnet, cut down a tree for a canoe and hollowed it out, and, when he had hollowed it out, lashed on the planks. Then he sewed strips together into a sail and trimmed a paddle. Then he cut aerial roots of the wawa tree to make ropes which he then attached to the sail. Then, by
pretending to feed them, he caught a boar and a gelded pig and tethered them. Finally, he cooked provisions for the journey and, having carried his canoe down to the sea, waited till nightfall, and then set sail. And as he sailed he sang this song:

"wænewæ, wænewæ, wænewæ mulemule.
Ina e no mule, no wane tamba e,
Sale-sale, mule mule."

(As he approached Atchin), Lebon the Tenth heard the sound of his voice, and said to Lebon the Ninth "Listen, is that a song or the sound of the wind?" And Lebon the First continued singing, and again sang the song. Then Lebon the Tenth said "Listen again. Can it be that it is the voice of our dear Lebon the First?" And at last he reached the shore, and landed, and they all ran and sounded the gong. Then they painted their faces and donned scented herbs in the back of their belts, and broke off branches of croton, and, singing, danced down to the shore to welcome him, saying "It is our dear younger brother who has arrived." And he landed, bearing a small taro plant in his hand. And they all helped to carry out his pigs, one by one, from his canoe. Then they dragged the canoe ashore, saying "Our dear younger brother has come back at last". And they asked him "Where have you come from?", and he replied "I have come from Oba. The South-West wind caught me and drove me there". That is the end.
TALE E: THE PARROT AND THE TURTLE

(From Melteg-tsung-wurei, May 8th, 1915.)

6. Mwi sale wa e-hüt. Mwi se ko watsin nu-mbo:
"Womaga womaga o tserë wã n'aip-aipe.
7. Re şub re şumbwere, or läs na-ṃbema, 0 sala, 0 sal-sal wã hütu."

SUMMARY

A man was hungry and planted seeds of the wild yam, but a parrot pecked them out. So he hid himself, and wounded it with a stick, and threw it into a river.

The parrot floated down to the sea, and asked first a shart and then a box-fish to take it to land, but they refused. Finally a turtle carries it ashore on its back. The parrot rewards it with food and kills a pig for it.

TRANSLATION

A man was hungry, and sought out and collected the seed of the wild yam, and went and found a place in which he planted it. But a parrot pecked it out. He planted it again, but when he returned he found that the parrot had again pecked it out. So he planted it again, but this time he watched. He cut a stick, and hid himself nearby. And the parrot came flying, and alighted nearby, wishing to hop and peck it out again. So he hit it, and wounded it, and threw it into the river. And it floated down to the sea, and towards the shore, singing "The parrot,
the parrot, pecks the wild yam. The old man, the old man, he breaks your wing, oh float, oh float to the shore". It floated, and saw a shark, and said "Shark, bring me to land", but the shark would not. Then he saw a box-fish, and said "Bring me to land", but the box-fish would not. Then it saw a turtle, and said, "Turtle, bring me to land. I will reward you". And the turtle took it on its back, and brought it to land. And the parrot went, and brought food for the turtle, and killed a pig for it. Thus he rewarded it for having brought it on its back to land, and said "Dear turtle, it was good of you to bring me ashore". The turtle said "Goodbye", and the parrot answered "So (also to you)". That is the end.
TALE F: THE RAIN STONE

(From Melteg-womu through Lawak, May 5th, 1915.)

SUMMARY

A woman and her husband were digging a hole for yams when they pulled out a stone and threw it away. Next day the woman pissed on it, and found that this act made it rain.

She took the stone home and played a trick on her husband, making it rain whenever he went to the mainland alone, but not doing so when she went with him.

Suspecting her, he one day remained at home, and saw her take the stone and put it into the sea, whereon it rained. He took the stone from her, and himself made rain, so much so that all the people wanted to kill him.

How he is dead, and the men of Senhar have the stone and make rain with it.
There was a woman, and her husband, whom, when they were one day
digging a hole in which to plant yams, pulled out a stone, and threw
it away. Next day they again went to dig holes for their yams, and
the woman went and pissed on the stone which they had pulled out of the
hole, and the rain poured down. Next day they came again, and again
she pissed on the stone, and again the rain poured down. Then she
took the stone home with her. And she played a trick on her husband,
telling him to go to the mainland while she would stay at home plaiting
mats. And he went, and the rain poured down. Whenever she and her
husband went to the mainland together it did not rain, but whenever
the husband went to the mainland alone, the rain poured down. After a
time, the husband played a trick on his wife, saying "You stay at home,
and I will go to the mainland". However, he did not go to the mainland,
but came back. He did not go home to his wife, but made his way straight
to a cliff, and stayed there, watching for his wife. And the woman went
to Melünbek, and, taking the stone to the shore, went and put it into
the sea, and (forthwith) the rain poured down. And her husband ran and
came and took the stone. He took it, saying "So it is you who keep on
making the rain pour down. We have been wondering who it was, and it
is just you". And the husband went, and took the stone away from the
woman, and kept it for himself. And that man took it, and stayed at
Melünbek, and continued (without ceasing) to make magic with it, so that
the rain continued ceaselessly to pour. And the people wanted to kill
him because he kept on making it rain. Now he is dead. And the men of
Senhar have taken the stone,¹ and continue to make rain with it. Now
it is theirs. That is the end.

¹It descended to his sister's son [informant's comment].
TALE G: THE OCTOPUS, THE RAIL AND THE SHELL-FISH

TRANSLATION

There was a woman, and a man, her husband. They two went down to the shore and walked among the rocks at Le-berong-marur and Wor-nats. They lingered there together for a time, then the husband cooked his bow and shot fish, while she went and plaited on a rock. And while she was plaiting, she heard an octopus, a rail and a shell-fish of the kind called tekau breaking twigs behind her in the bush, as lovers do, wishing to attract a girl's attention. Thinking it was indeed a lover, she said "Hi! Do you not see my husband shooting fish down there? Do you want him to see you? Go away." She then kept on telling them to keep quiet, but they would not, so at last she threw down the pandanus strips with which she was plaiting, and went to see, and saw the octopus, the shell-fish and the rail embracing one another. Then she called out to her husband, crying "Hi! Eh! Come here! Look at some things here embracing one another". Her husband came, and spoke, saying "Touch them, and speak to them. If one of them wants to tell you something, tell it to come after dark tonight, and tell you then." She put out her hand and touched to octopus, the shell-fish and the rail. And she spoke, saying "If you want to say anything, come after dark tonight, and tell me." And it came to pass that night, when the man was asleep, he and his wife, the octopus, the rail and the shell-fish came, and one of them spoke to the man, saying "Do not eat me. Then I shall be as one of you". Then it said "You shall have ten male children."

The woman conceived, and brought forth a child. Then she conceived again, and again bore a child, and she brought forth, and brought forth, and brought forth, she brought forth ten sons. And she was old, and was not such as should have been able to bear children.

When they were all grown up, they fashioned a canoe, a great sea-going canoe, and the ten brothers all went in it to Malo. And before they went their father and mother said "When you have been at Malo, and when the tide has been high, you have been used to seeing fish, and when the tide has gone out you have been used to taking the shell-fish called tekau, the octopus and the rail. But do not do it". But while they were away they took them, but the youngest brother said "Our father told us we should not eat them". But the eldest said "Eh! This place is different." He said "We would not eat them on Atchin. But here we can eat them. It is a different place". On the way home the youngest brother said "My father and mother told me that if, when we went to Malo, my elder brothers should have eaten these things, then, when we came to the promontory at Tsingon Ta-har, I should run out on to the outrigger-float." And it came to pass that he ran out
on to the outrigger float. And the father and mother were standing on the beach at Onema. And when they saw their son running out on to the outrigger float, they said "Children, we kept on telling them, but it was in vain. They have eaten those things. And the father and mother turned their backs on the shore and went to their house-enclosure. And when they got there, the father died. The octopus, the shell-fish and the rail crawled over and embraced him. The father died. And his sons landed at Onema, and came into the village, and went to their house-enclosure. And their mother said "Come, look at your father. He lies dead". They dug a hole for him. They did not touch him, but when they should have carried him into the hole they just poked him in with sticks. Their father, who died, was called Win-bwerie. That is the end.
TALE II: THE TRAGEDY OF A MAN, HIS WIFE AND HER LOVER

(Probably from Melteg-wuomu, through Lawak.)

1 Statements corrected afterwards by my informants, who said that the design with which he scarified the woman was the same as he had already on his pipes.
TALE H

SUMMARY

A man had two wives, and had just made Maki when his younger brother, when shooting at birds, accidentally let one of his arrows fall within one of the wives' enclosure. She took and hid it, and when he looked for it, asked him inside, and they lay together. She asked him to scarify a design on her, and he scarified the design which he had on his pan-pipes.

Her husband returned and saw the design, and went to his younger brother's lodge, where he saw the prototype on his pipes. Then he called him to dig a yam, and while his younger brother was digging he slew him, pushed him into the yam-pit and buried bananas with him.

On the 5th day, he brought his wife to the spot, and she uncovered the pit and found him, and wrapped him as for burial in her shawl.

Then she committed suicide by jumping off the reef. Her husband grieved and hanged himself.

TRANSLATION

There was a man who had just made the Maki sacrifice, and his wife. This man had married two wives. And one of his younger brothers fashioned a bow and bound heads on to his arrows, and went shooting birds. And as he was shooting it happened that one of his arrows curved
over in its flight and descended into the house-enclosure of one of his elder brother's wives. And this woman took the arrow, and hid it. That man looked for his arrow, saying to himself, "It curved over this way, I think it dropped just here". And the woman watched that man looking for his arrow, and said "Hi! What are you looking for?" He said "Oh, nothing! I am only looking for an arrow. Have you seen it or not?" She said "It is here, come and get it". So the man went and fetched it, and entered into her house-enclosure, and did wrong with the woman. And she asked him "Will you please scarify a design on me (as a love token)?" So he scarified on her the same design that he had on his pan pipes. Then he went to his lodge.

And after a time his elder brother noticed the scarification on his wife. But he said nothing, but he too went to the lodge, and went up to one of the sleeping mats and asked "Whose sleeping mat is this?" There were several men in the lodge, and they replied "That sleeping mat belongs to so-and-so". And he took up the pan pipes (from the sleeping mat) and blew on them, and examined them carefully, but did not see the design (he was looking for). Then he went to another sleeping mat, saying "Whose sleeping mat is this?" and they replied "So-and-so's". And he examined the design on the pipes on that sleeping mat, but did not find the one he wanted. In this way he examined nine sleeping mats, but still failed to find it. At last he came to his younger brother's sleeping mat, and there he saw it, on his younger brother's pipes. And he asked "Whose sleeping mat is this?" And they said "Your younger brother's". So he said to himself "Indeed! So it was he who made that which I saw at home on my wife".

Next day he spoke to his younger brother, saying "Come, let us go into the bush". The younger brother replied "Very well". And the elder said "Make a digging stick", and when he had finished making it they went to his garden. And the elder brother said "Dig up that yam, and wrap it in leaves and go and take it to our mother's brother". Then the younger brother began digging the yam. (It was one of those very long yams used for ceremonial purposes which are several feet long, and grow straight down into the earth and must at all costs be taken out whole and without blemish.) And he dug and dug, and went on digging, but still could not get to the bottom of it. So (as is usual in such circumstances) he ended by digging a pit for himself alongside the yam, into which he got, and went on digging till at last he managed to lever the yam out from the pit. But a small piece was broken off, and he spoke to his brother, saying "A small piece is broken off, and is still in the ground". His elder brother came and said "Where then?",
(when he had seen it) he said "Scrape it out". And the man scraped it out, and as he was bending down in the pit his elder brother struck him, and belaboured him so that he died. And he pushed him into the hole, and went and fetched five bunches of bananas, and buried them with him.

Then he went home. And some people asked "Where is your younger brother?", and he replied "He is going to my mother's brother. He is wrapping up a yam, to take to him".

And he counted the days, and on the fifth day [the day on which, in the mortuary rites, official mourning begins] he said to his wife, "Come, let us go into the bush". And his wife said "Why do you want us to go? It is but a few days since the Maki sacrifice [i.e. a time when they should properly be staying at home]". But he said "Come. If you both stay at home, who is going to fetch your food?" Then he said (to that one of his two wives who had lain with his younger brother) "Very well, one of you may stay behind, but you must come". And that woman (suspecting the worst) wept. And they departed and went into the bush, to his garden. And he said "Now look for your dear lover". And she wept bitterly, and scraped the earth away from the pig, weeping. And she scraped away the earth and took out the bananas, and took off her shawl, and spread it out on the ground, and lifted that dear man on to it. And she wrapped him up (as for burial), and wept copiously. And, still weeping, she turned away. And her husband said "Come back", but she said "No. I am going away". Again he said "Come, let us go back", but she said "I do not want to". And she went, and came down to the shore, and again her husband said "Come". But she said "You can go back alone". And she went, and came to the edge of the reef, and said to her husband "Look around. Do you see the smoke of someone's fire?" And as her husband looked round, she jumped down off the reef and was drowned. She drowned, and her husband wept, and went back, and wept. And he grieved greatly, and took a rope and hanged himself.
TALE K: THE TEN LEBON BROTHERS

(From Ta-maewo through Melteg-lek.)

68. Ewa, "rar-tol ok ar karasi a."
E se nu-mbo ko Lebon Sa e wala e rali batun bahuru. 101. E wala, e wala mu ṣu. Lebon Sa e row wan e jewei bahuru ña-ok. Bahur a e mow kare. 102. Ar tsalil. Win a buän e wa, "Ham! Ka m'ok karasi tser ni Lebon
"Ruele, kami ka mul wä-ta, Kia womu, ruel, kru-u-u, ruel kru-u-u."
E ğu.

TRANSLATION

Their mother was a stone. She had ten sons. The one that was born first was called Le-bon the Tenth, then came Le-bon the Ninth, then Le-bon the Eighth, Le-bon the Seventh, Le-bon the Sixth, Le-bon the Fifth, Le-bon the Fourth, Le-bon the Third, Le-bon the Second, and finally the youngest, Le-bon the First.

One day they were chasing fish by surrounding them and driving them into a spot where they could spear them from all sides at once. This they repeated at intervals all round the coast of Atchin, and thus caught ten fish. And as they were coming back they met with an old woman and her granddaughter. The granddaughter was covered with sores and was scraping (and washing) them by the sea. But they all passed her by, with the exception of Le-bon the First, who came last and was carrying the fish. When he came up with them, he gave one of the fish to the old woman and her granddaughter. And the old woman said to him "Do you recognise us? When my granddaughter grows old enough, you shall marry her. You have stayed behind (and taken notice of us), but the others have gone on without caring." The brothers all went home and grated bananas for a pudding. And they counted up the fish, but could find only nine. One of them said "Hi! There should have been one fish here for each of us". Then Le-bon the Tenth said "What has happened to these fish? Has one been dropped? Let us count them again. Where is the one that is missing?" Then Le-bon the First said "I gave it to that old woman and her granddaughter." Le-bon the Tenth said "So you want to copulate with her? Then there will be no food for you". Le-bon the First replied, "Yes. That is all right. I will just do without". They cooked the fish, and when they had finished eating, Le-bon the Tenth said "There is still daylight [?there are still plenty of days?], let us go chasing fish again." And they chased
fish again at intervals round the coast of Atchin. And again they
cought ten fish. And when they again came back to the point whence
they had started, there were the old woman and her granddaughter, still
there. And again they all passed them by, excepting for Le-bon the
First, who came last, and the old woman said to him "Hi! (Look at)
this girl to whom you gave the fish!" He (looked and) said "You
(wonder-maker, can it be true?)" She said "Indeed". He said "But she
has suddenly become a young woman", and the old woman said "Ah! Because
I poulticed her body where it was sore, and the sores are all gone.
You go ahead, and I will bring her to you (in marriage)". He said
"Good. Let me first go and tell my elder brothers. And he went and
said to them "Elder brothers, you saw that old woman?" They said "Yes,
younger brother". Then Le-bon the Tenth said "My word, younger
brother, there was a young woman with her too. One of us should marry
her". Le-bon the First said "Elder brothers, let me tell you some-
thing". They said "Very well, you tell us." And he said "Elder
brothers, the old woman wants me to marry her". Then Le-bon the Tenth
said "Oh! You think you are a fine fellow then! But how about us?
We are fine too! Have you been arrogating yourself above us?" Le-bon
the First answered "Indeed, the old woman said that I should marry the
girl. She told me so." Le-bon the Tenth said (schemingly) "All right,
go and appoint the day when you shall marry her." So Le-bon the First
went and said to the old woman "I will marry the girl ten days from
today. You bring her then". When the time came, she brought her. And
Le-bon the Tenth brought a re-entrant-tusker, Le-bon the Ninth a curved-
tusker, Le-bon the Eighth a crescent-tusker, Le-bon the Seventh a tusker
of the grade called e wish-wish, Le-bon the Sixth a tusker of grade
liw-sheren, Le-bon the Fifth one of the grade called buho pal-pale, Le-
bon the Fourth a buho liv-tov, of which the tusk had only just
erupted, Le-bon the Third a buho lep-lep, Le-bon the Second a teething
pig, and Le-bon the First a newly-weaned pig. That made ten pigs in
all (the pigs being graded in size from the largest, supplied by the
eldest brother, Le-bon the Tenth, to the smallest supplied by Le-bon
the First). Then Le-bon the Tenth (who had thus arranged matters)
said "It would appear seemly that I only should marry her, since it is
I who have brought the largest pig. We have paid the full price, and
I will marry her". But the girl did not want to marry Le-bon the Tenth.
She wanted to go with Le-bon the First. And indeed she went with
Le-bon the First, to his house, and the rest retired to their own
houses. And they said among themselves "But he is only a child. Why
should he marry her? We who are grown men, let one of us have her".
And they said to Le-bon the Tenth "Elder brother, let us play some trick on him, so that he die, then one of us shall marry her." Le-bon the Tenth said "Yes, very good". So they went to the shore, and went afloat in their canoe and sailed till they saw a clam-shell with its valves gaping. And they said "That is good". Then they paddled back home and came and saw Le-bon the First, and said "Hello! Le-bon the First!" And they said "Come with us". He said "Where to?", and they replied "Let us go down to the shore and go afloat in our canoe. But that girl had better stay behind". Le-bon the First said "Go on, I will follow you". So they went, and he spoke to the girl, saying "You stay here. And when you see that they have tricked me, and when you see a parrot fly past, then hang yourself, hang yourself so that you die. But I will come back and see you and it will be all right.

And they went, and paddled, and paddled till they arrived at the place where they had seen the clam-shell with its valves gaping. And they said "Let one of us dive down". Le-bon the Tenth said "I will", and he dived, but played a trick (while feigning to dive down to the clam-shell he in fact) swam under water in a different direction. When he came up, he said "Younger brothers, one of you dive too". So Le-bon the Ninth dived, and swam under water in a different direction. Then Le-bon the Eighth did the same, and so on, each of the nine elder brothers diving in turn, but all avoiding the clam-shell, till it came to the turn of Le-bon the First, who asked "Elder brother, when I dive, what shall I do?" Le-bon the Tenth answered "Dive down (to the clam-shell), but do not touch it, but just stick your tongue into it". And he dived, and stuck his tongue into the clam-shell, and the clam-shell snapped it off, so that he died. And he died, and lay inside the clam-shell. Then his elder brothers, in their haste to get back to land, wielded their paddles with such force that they almost broke. Each one said "I will marry her", and, having landed, they ran. Le-bon the Tenth was first, but when they arrived at Le-bon the First's house they found the girl had hanged herself. Then Le-bon the Tenth said "Go home now, all of you. She has hanged herself. She whom we all wanted to marry is dead". So they all went to their respective houses. Then Le-bon the Tenth and his eight brothers went and saw the girl's grandmother, and he said "That girl is dead". She said to herself "Indeed? I will go down and see how she died". (So she went down alone to see the girl.) And she broke off four canes and heated them by waving them over a fire. And she struck her with one of the canes, but she did not move. Then she took the second cane and struck her with it, but again she did not move. Then she took the third cane and struck her
with it, and as she struck, the girl stirred. Finally she took the fourth cane and struck her with that, and as she struck the girl rose, and stood upright. And the grandmother said "Why have you done this?", and the girl said "I hanged myself because they tricked Le-bon the First into going with them to the shore. They came and saw him here, and he told me to hang myself so that I died. But he means all the same to come back and see me."

And they two remained together. And Le-bon the First came in with the rising tide, for the clam-shell gaped again and let him out, so that he swam ashore. And he came and found the girl and her grandmother sitting together. And she said "Hi! Where have you come from?" And he said "They all played a trick on me". She said "How did they trick you?" and he replied "By means of a clam-shell. They proposed we should all dive in turn. They all swam under water in another direction, but when it was my turn to dive, they all wanted me to stick my tongue into it. And it bit off my tongue. And they all paddled ashore here, wishing to marry the girl". She said "Indeed?" Then the grandmother said "Don't follow them lest they try to trick you again. They wanted to marry this girl, but that time they met us on the shore they refused to give her any fish. But you gave my granddaughter a fish, and I made up my mind that when she grew up you should marry her".

Now the nine elder brothers were all gathered together, and they heard two people talking in Le-bon the First's house. And Le-bon the Tenth said "Le-bon the Second, peep in and see who those two are who are talking in Le-bon the First's house. The girl is dead, so what two people can be talking there?" Le-bon the Second peeped in, and ran back, saying "Eh! Elder brother, eh!", and he said "It is even Le-bon the First and that girl sitting and talking together". Then Le-bon the Tenth said "Let us trick them again, how can we manage so that one of us may marry her?", and one of the others said "Yes, let us trick him again somehow". And they all went to Le-bon the First's house, and Le-bon the Tenth said "Hello! Who are you two who are talking?" Le-bon the First answered "Just we two." His elder brother said "But where have you come from?", and he replied "The tide came in and the valves of the clam-shell gaped and I just swam back here". Le-bon the Tenth exclaimed "Indeed?"

When they were gone again, the girl's grandmother warned Le-bon the First, saying "Do not follow them, for alas! they will always want to trick you, for they want to marry the girl". Next day Le-bon the Tenth said "Le-bon the First, hello! Come to the shore with us!" He objected "It is raining heavily", but Le-bon the Tenth said "There are plenty of
holes in the trees by the shore. We can take shelter in them". And the grandmother again warned him, saying "If it should happen that you all go inside anything, you take care to go last".

They all went to the shore although the rain was pouring, and they went, and ran, and entered into a hole in the trunk of a bahuru tree. They all climbed in one after the other, but just as Le-bon the First was about to climb in the bahuru tree closed round them, leaving Le-bon the First outside. And they all wept. They wept greatly, inside the bahuru tree. And Le-bon the First came back home, and said "We all went to the shore, and the bahuru tree closed round them (ate them all up) on the shore. But I remained outside, and came back here".

And the old woman said "Don't keep on following them. They always want to trick you, alas! When they went, I told you not to follow them". And he said "I feel sad for my dear brothers, whom I have always gone about with". So she said "If you want to, we will go and see them." And so they went, he and the grandmother and the girl, they three went, and heard how the nine brothers all wept, how they wept inside the bahuru tree. And Le-bon the Tenth called out "Younger brother, dear, we are all dying. The bahuru tree has closed around us". Then the girl's grandmother spoke to Le-bon the First, saying "Do you want them to come out?", and he said "Yes, I want them to come out safely". So the old woman chanted an incantation. And when she had finished singing the song, Le-bon the First ran circling round the base of the bahuru tree, and having circled round and round it he stamped on the tree, and the bahuru tree opened up and the nine brothers jumped out. And the girl's grandmother said "Ha! You keep on playing tricks on Le-bon the First. Now you have found what you deserved. You have seen how the bahuru tree closed round you. Were it not for him, you would have died there. It was a good thing for you that he stayed outside and acted so that you are still alive." So that episode ended. And the old woman departed, saying "Don't play any more tricks on Le-bon the First, but go about your business decently".

And one day, when they were walking about they met Le-bor-i-we-riv, who had big ears. He said "Younger brothers, where are you coming from?" They said "Oh, we are just walking about", and he said "Come with me, and let us cook a meal together". So they all went and came to Le-bor-i-we-riv's house, and he said "You cook. You light a fire and cook". They lit the oven inside his house. And Le-bon the First stayed by the side-wall, and as he was about to pick up some firewood to help light the fire he caught sight of Le-bor-i-we-riv's club which he had hidden there. But he held his peace, saying "I will go and
fetch some yams", and with this excuse said to Le-bon the Tenth, "Elder brother, if we don't look out he will club us to death and will eat us all up, even today". Le-bon the Tenth said "Indeed?" Then again he said "Younger brother, are you speaking the truth?" He said "Yes, I am speaking the truth". The elder brother said "Younger brother, what shall we do? Let's run away". So they all ran away, and, (taking their cue from Le-bon the First) cut bamboos of a kind called puloh, ten of them, and each brother carried one section. Then they asked "Younger brother, what shall we do with them?" And he again told them, and they collected black stinging ants of a kind called nats, and put them into the bamboos, and went on collecting them till all the bamboos were full. Then Le-bor-i-we-riv, seeing they were gone, said "They were in here just now, where have they gone?", and he heaved up his club, cursing and saying "Let them lie with their mothers". And as they ran he chased them. He chased them hotly till, to escape, they all climbed up a niar tree. Le-bon the Tenth climbed first, then Le-bon the Ninth, then Le-bon the Eighth, and so on, Le-bon the First coming last. And as Le-bor-i-we-riv was about to strike him down Le-bon the First cried out "Oh! Elder brothers, he will kill me. Pour out one of your bamboo-fulls of ants". So one of them poured out his bamboo-full of ants, saying "Ants, sting him, sting him, sting him, sting him, sting him ...." Le-bor-i-we-riv fell down, and Le-bon the First climbed higher. But Le-bor-i-we-riv said "I will club you yet. Where have you got to, that I may club you?" And he was again about to strike at Le-bon the First when Le-bon the Tenth cried out "One of you pour out his bamboo-full of ants on him", and again one of the brothers poured out his bamboo-full of ants, saying "Ants, sting him, sting him ...." Le-bor-i-we-riv fell down again, and the brothers all climbed higher. But again he climbed up after them, and was again about to strike Le-bon the First, when he cried out "Oh, Elder brothers, he would strike me again. Pour out another bamboo-full of ants", and yet another brother poured out his quota of ants, saying "Ants, sting him, sting him ....", and he fell down again. But again he climbed, higher and ever higher, till he was again about to strike Le-bon the First, and he cried out "Elder brothers, alas! he is about to strike me. Pour out another bamboo-full of ants". And yet another brother poured out his bamboo-full, saying "Ants, sting him, sting him ....", and Le-bor-i-we-riv again fell down right down to the ground. But he said "I will kill him yet", and again climbed up. And he climbed, and climbed, and climbed till he was again about to strike him, when Le-bon the First again cried out "Oh, elder brothers, he would kill me, alas!
Pour out another bamboo-full of ants”. And yet another brother poured out his bamboo-full, saying “Ants, sting him, sting him ....” Le-bor-i-we-riv again climbed down to the ground so that he might shake off the ants, but again said “I will kill all of you yet”. And again he climbed up and up and up, and kept on climbing, meaning to kill Le-bon the First. And Le-bon the First again cried out “Elder brothers, he would kill me. Pour out another bamboo-full of ants” .... And so it continued, till Le-bor-i-we-riv had fallen down ten times.

Then Le-bon the First said to the tree “Nie tree, a-a-a-, spring back!” (from which it is evident that the tree had previously been caused to bend). And it sprang back, and Le-bor-i-we-riv fell down and broke his legs. There he remained, while they ran away, and escaped, singing. That is the end.
TALE L: THE SLAYING OF IAS

(From Ta-maewo, through Melteg-lek.)

Ias used to live and go about his business here on Atchin, and he spent his time killing people, for his mind was bad. He went to Sen-har, and killed people there, he went to Emil Parav, and killed people there, he went to Emil Marur and killed people there. He lived even here, at La-maray. He made war on them all, against all these places, and he killed them all.

One day the mother of Mal-mal-mari and Mal-mal-oba said "My sons, we live and go about our business here, but Ias's mind is bad. Why does he want to keep on killing people? We know there are only so many of us on this island, but we do nothing about it. His mind is bad. You two catch him once and for all." Mal-mal-mari and Mal-mal-oba said "Very well, do you make clubs for us, and spears for us, for each one of us two spears and one club, for Mal-mal-mari two spears and a club, and for Mal-mal-oba two spears and a club". She did so, and their mother also twined a rope for them, and gave it to them. Mal-mal-oba said "I, I am brave", and Mal-mal-mari said "I, too, am brave", and he said "Mother, you stay here, and we will go and seek out Ias". They set out and came, bearing their spears and clubs. And they departed and came and found Ias's mother where she lived. And he said "Hi! We two want to see the old man of this place". She asked "Why?",
and he answered "Nothing, we just want to see him". She said "You two go back. I have seen enough of you. Go back. Ias's mind is bad". He answered "Yes, but we want to see him", but she said "I have seen enough of you. Go back". But they did not go back. They stayed there. And again he said "We want to see Ias". So she said "All right. Stay here. I will go and find him". She ran, and came and found Ias cooling himself under the trees at Onema, and said "Ias, come, run quickly". He said "Why?", and she said "Hi! Come and see two things that can be made into food for us". He said "Where are they?", and she replied "They are at home. Run quickly, quickly." So Ias ran and came and saw those two at La-mare, and said "Dear little younger brothers, dear little things. Where have you come from? I have not seen you for so long. Come, let us sit down together here, indoors". And he enticed them close to him, saying "Younger brothers, will you please take the lice out of my hair?" So one of them sat down to de-louse him, and, as he did so, Ias turned to grab hold of him, but he jumped clear of him. Then the other sat down to de-louse him, and Ias turned to grab him too, but he too jumped clear of him, saying "Ias, do not do that. Your head is full of lice. Do let us get them out", for the two brothers for their own purposes also wanted to get close to him. But they did not want to do it inside his house, so they said "Elder brother, let us go to the dancing-ground. Let us go to the dancing-ground at La-mare, and cool ourselves in the shade of the banyan tree there." He agreed, saying "Very well, you lead the way, and we will go". So they all went, and Mal-mal-mari said "Let us sit down here, and stay in the shade of this banyan tree." Then Mal-mal-mari again looked for lice in Ias's hair, and (under cover of this operation) tied the rope which his mother had made for him to Ias's head, and jerked it tight and threw the other end of it to Mal-mal-oba. Mal-mal-mari tied it to his head and Mal-mal-oba made it fast to the banyan tree. Thus it was that Mal-mal-mari tied the rope to Ias's head and threw the other end of it to Mal-mal-oba, and that Mal-mal-oba made it fast to the banyan tree so that it would not move. While Mal-mal-mari was tying the rope to his head, Ias was trying to lull their fears by shutting his eyes, pretending to doze. And the two brothers tied the two ends of the rope tighter and tighter, till they were ready. At last Mal-mal-mari had finished tying. Then Mal-mal-oba whispered "Are you ready?" Mal-mal-mari whispered "Yes. Now is our time". Then he said to Ias "Now let us go". And they two rose to their feet and stood upright. Ias, too, wanted to rise and catch them, but the rope was fast to his head so that he could not move. And
Mal-mal-mari speared him, pierced him in many places, like this [the narrator demonstrates]. And Mal-mal-oba speared him. And when they had finished spearing him they clubbed him with clubs, so that he died. And there he lay. Then they beat the gongs, and the men of Sen-har came, and the men of Emil Parav and the men of Emil Marur and the men of Emil Lep. The mother of Mal-mal-mari and of Mal-mal-oba came too, and spoke to Ias's mother, saying "Your son's mind was mad. We all lived peaceably, but his mind was bad, and he was always seeking to kill people. But we also are human beings. We should be a numerous people on this island, but he was the whole time wanting to harm us. So it is good that my sons have at last slain him." And Ias's mother spoke to Mal-mal-mari and Mal-mal-oba, saying "Since you two have slain him, now wrap him up and go and bury him. I am grown old. You two then wrap him up and go and bury him. It is all over now. Now we can live in peace. Whatever now you want to do, you will be able to do it without interference." That is the end. He died just so, here on this island. That is the end. They two buried him, and placed ten gravestones round his grave. The end.
TALE M: THE END OF LA-MARE AND THE FOUNDATION OF THE EXISTING VILLAGES

TRANSLATION

The men of the mainland talked among themselves, and one said "Every month you want to go and see a Maki sacrificed on Atchin. Then another month comes, and again you say 'Let us go to Atchin to witness a Maki'. After a little while you want to go and see another. After another month has passed it is the same again. I am always having to go there. The men of Atchin are like a rat staying always in one place, gathering its family together under the roots of a single pandanus tree, and you are always going to the same place to see them." The men of Atchin heard what he said, and answered "It is true. We all gather together in one place, and Maki is continually being sacrificed there. He is not speaking disrespectfully of us. He is only saying what he has observed." So the men of Sen-har dragged away their stones and set them up in Sen-har, and the men of Emil Parav dragged theirs to Emil Parav, and the men of Emil Marur dragged away theirs also, so did the men of Emil Lèp. The men of Ruruar dragged theirs from La-mare here to Buok. That is the end.
TALE N: RETS EXPULSED FROM PWEETER-TSÜTS

Ram kete mātsān." Timān e wa "Natuk, ko wuretun? Ini ni-ok pu-roŋ?"

SUMMARY

Rets makes a kite and sends it, with a fowl on it, to Le-rets, who is married at Showul, as a love-gage. She, seeing it, comes down to Urari, whither Rets goes to join her. They spend the night at their mother's brother's village of Bwotnarer, but return at night to Rets's house on Atchin, where she remains shut up for a year.

Rets's younger brothers one day go shooting rats, and, an arrow falling into her enclosure, she is discovered. His father, Win-bweris, is furious. He does not, however, kill him, since it is the feast of Palu-ulen, but advises him to escape. They sound the gong-signal for the departing dead.

As Rets is passing through Olep he is accosted by Bel-were, who offers both him and Le-rets asylum. He consents, and Bel-were gives him a gelded curved-tusker for atonement. Rets cuts it up and offers the head to the men of Pweter-tsūts, but they refuse it. He then gives it to his younger brother, Lav, to eat, promising him all his land. Lav eats it and Rets gives him his land. Rets then goes to live at Olep, where he spends the rest of his life, and makes a dancing-ground.
Ret8 courted his sister by means of a fowl, a dappled fowl. One day at daybreak he constructed a kite. Then he climbed up into a ni-nar tree till he reached the top. And the fowl was sitting on the kite. And he tied the string to the kite and sent it to her for a covenant. And the wind carried it away. Now his sister Le-rete was married to a man of the mainland village of Showul, and that day she rose up early in the morning to sweep the ground before her house. And Ret8 sent off the kite, and the wind blew it so that it flew, with the fowl on it, till it came to Showul. And Le-rete heard the fowl crowing on the kite, and looked upwards and saw that fowl. Then Ret8 pulled back the kite till it came to Pweter-tsüts. And he broke up the kite and let go the fowl, and the fowl strutted away. Then he went down to the shore in order to cross over to the mainland, and paddled till he came and landed at Urari. And when he got there he found the girl waiting for him. Le-rete was waiting by the spring at Urari. He said "Hello! So you have come". She said "Yes, I have come, I saw that thing you sent, and ran down here to meet you". He asked "What was it you saw?", and she answered "I even saw that fowl, and ran and came here". And she helped him carry his canoe ashore. They carried it high up out of reach of the tide, and then went to the place called Bwot-narer, where their mother's brother lived. And they stayed there, and cooked themselves a meal. And they remained there till it was dark. And at midnight went down to the shore and launched his canoe and paddled over the strait to Atchin, and entered his house unseen, and shut the door.

There she remained for a whole year. And her kinsmen waited, and waited, and waited, and searched and searched for her, but in vain. They said "Where can she be? She must have died somewhere". And they performed the death rites called metsen for her. And after the death rites were over, and they all thought that she was dead, Ret8's younger brothers one day went shooting rats. And it happened that as one of the younger brothers was shooting, his arrow fell inside Ret8's house-enclosure. And Le-rete took it inside her house, and kept it. And the younger brother said "Elder brothers, shall I go inside our elder brother's house?" But they said "No, you must not. You must not go in, for our elder brother has shut up his house." He said "I know, but all the same I will go in and fetch my arrow, and shut up the door again just as he shut it so that he will not know". And he undid the door, and went inside the house, and found the girl sitting inside, and said "So it is you! You have been here all the time!" She said "Yes",

TRANSLATION

Ret8 courted his sister by means of a fowl, a dappled fowl. One day at daybreak he constructed a kite. Then he climbed up into a ni-nar tree till he reached the top. And the fowl was sitting on the kite. And he tied the string to the kite and sent it to her for a covenant. And the wind carried it away. Now his sister Le-rete was married to a man of the mainland village of Showul, and that day she rose up early in the morning to sweep the ground before her house. And Ret8 sent off the kite, and the wind blew it so that it flew, with the fowl on it, till it came to Showul. And Le-rete heard the fowl crowing on the kite, and looked upwards and saw that fowl. Then Ret8 pulled back the kite till it came to Pweter-tsüts. And he broke up the kite and let go the fowl, and the fowl strutted away. Then he went down to the shore in order to cross over to the mainland, and paddled till he came and landed at Urari. And when he got there he found the girl waiting for him. Le-rete was waiting by the spring at Urari. He said "Hello! So you have come". She said "Yes, I have come, I saw that thing you sent, and ran down here to meet you". He asked "What was it you saw?", and she answered "I even saw that fowl, and ran and came here". And she helped him carry his canoe ashore. They carried it high up out of reach of the tide, and then went to the place called Bwot-narer, where their mother's brother lived. And they stayed there, and cooked themselves a meal. And they remained there till it was dark. And at midnight went down to the shore and launched his canoe and paddled over the strait to Atchin, and entered his house unseen, and shut the door.

There she remained for a whole year. And her kinsmen waited, and waited, and waited, and searched and searched for her, but in vain. They said "Where can she be? She must have died somewhere". And they performed the death rites called metsen for her. And after the death rites were over, and they all thought that she was dead, Ret8's younger brothers one day went shooting rats. And it happened that as one of the younger brothers was shooting, his arrow fell inside Ret8's house-enclosure. And Le-rete took it inside her house, and kept it. And the younger brother said "Elder brothers, shall I go inside our elder brother's house?" But they said "No, you must not. You must not go in, for our elder brother has shut up his house." He said "I know, but all the same I will go in and fetch my arrow, and shut up the door again just as he shut it so that he will not know". And he undid the door, and went inside the house, and found the girl sitting inside, and said "So it is you! You have been here all the time!" She said "Yes",

TALE N
He said "But we have performed the death feast for you!" "Yes", she said, "I heard you doing it". He left her, and came outside, and closed up the house as he had found it, and went to his brothers and said "Elder brothers, let me tell you something". They all said "What?", and he said "I found Le-rets, even she, sitting inside the house". And they all said "Don't talk nonsense", and continued "Have you been seeing a ghost, or what?" But he replied "No. It was she herself. I am no child that I should be fooling you. I am telling the truth". They all waited till the evening, when their father came back from his garden on the mainland. Win-bueris came back from the mainland, and when they had finished the evening meal the younger brother said "Elder brother, shall I tell him that thing?" But his brother bit his lip, meaning to say "Don't tell him". But their father saw him doing it, and said "Hi! What does that fellow want to say?" He answered "Nothing", but their father said "Inded he wants to tell me something. Why else did you bite your lip at him? You don't want him to tell. Has anyone sworn you to silence?" The eldest brother replied "No", so the father said "Well, speak, both of you. What does he want to say?" Then the elder brother replied "Only about that girl. He only wants to tell about Le-rets." The father said "What?" and he answered "Simply that she is there. We have performed her death feast in vain. We have been saying all the time that she was dead, and have performed the death feast for her, and she was here all the time." The father said "My son, do you speak the truth? Is she indeed here?" He answered "Yes". Then he asked "Where is she?", and he said "In Rets's house". Their father exclaimed "Eh!" and then said "That fellow is demented. And we thought he was an ordinary man". Then he went out into the outer (women's) court, and swore at Rets's mother, saying "What have you born me here? You have born me a demented son whose mind was wrong". Then Rets's mother said "Has Rets come home from the mainland yet?" He answered "No, he has not yet come back". Then he said to his sons "You lead the way. Let us go and see her". He went, and removed the door-panel, and found Le-rets sitting there, and said "Alas! my wife has born you two in vain. You are demented. You have done a terrible thing".

Now the feast of Palu-ulen\textsuperscript{1} was at hand, and he said to them "You two escape (before worse befall you).\textsuperscript{2} Depart. Do not stay here. Your

\textsuperscript{1}New Year feast of first-fruits, palolo and the return of the dead.

\textsuperscript{2}Rets should normally have suffered the death penalty. The fact of his being let go appears to indicate a period of asylum, or at least unwillingness to kill, during this feast.
minds are wrong, and you must go". And the men of Pweter-tsüts sounded the gongs with the signal indicating the departure of the dead. And the men of Olep heard it, and said "Rets is departing". And he left Pweter-tsüts and came to Olep. But the men of Olep would not speak to him. So he passed them in silence. But, as he was proceeding to the shore in order to get to the mainland, a man named Bel-were-were said "Hi! Stay here!" But Rets said "Younger brother, I have been minded wrong, and must depart. They have sent me away, and want me to go". Bel-were-were answered, saying "That is all right. Let it be as though I were your elder brother. Let the girl stay in this village, even in my house". And he gave Rets a gilded curved-tusker for atonement, and Rets cut it up, and carried the head to Pweter-tsüts, but the men of Pweter-tsüts refused it. Then he spoke to his younger brother, he who came last, the youngest, who was called Lav, saying "If you will eat the head of this gilded curved tusker, all my ground shall be yours". They went together, and he marked out the ground for him, saying "All this, then, shall be yours. I wanted them to eat the head of the gilded curved-tusker, but they would not. But you, you eat it, and all my land shall be yours".

That is the end of the story of Rets. The rest of his life he lived at Olep, and he made a dancing-ground for himself at Olep.
TALE 0: THE OCTOPUS, THE RAIL AND THE SHELL-FISH

(Second version; for other version, see Tale G.)

TRANSLATION

Their mother remained barren till she was nearly an old woman. Then, one day, she took her pandanus strips and went to do her plaiting on the shore at Le-berong-marur. And while she was plaiting she heard an octopus, a shell-fish of the kind called teku and a rail. These three were behind her in the bush, embracing one another. And they caused a stone to fall. This being one of the usual methods used by clandestine lovers to attract a girl's attention, she said "Who threw that stone? Go away, alas! Win-bweris is gone to the mainland, but, will soon be coming back, alas!" After a time a stone fell again close by, and she again said "Who threw that? Go away, alas! Win-bweris will soon be here". She went on plaiting, and again heard a stone fall close by. Then she said to herself "Who can it be that keeps on throwing stones? I had better go and see". So she went, and came and saw the octopus embracing the rail and the shell-fish. They were all embracing one another. She said "Hi! So it's only you who keep on throwing the stones!" Then she touched them, and said "If you have been wanting to say something to me, come after dark, tonight, and tell me then." Having said that, she went home. And when Win-bweris came home from the mainland she said "I want to tell you something". He asked "What do you want to tell me?", then he said "Has some man been speaking to you?" She said "No", and then she said "I saw a shell-fish, an octopus and a rail embracing one another on the shore". He asked "Did you touch them or not?" She replied "I touched them", and he said "It is good". She said "I thought it were better tonight, after it was dark; if they were wanting to tell me something, they should come tonight". That night, when husband and wife had lain down to sleep, he in his house, and she in here, they came to her, and said "For you shall have ten children. But you must not eat us. If you do not eat us you will bear ten children". She said "But I am already old". They replied "We know, but you will bear ten children all the same". When it was morning she said to Win-bweris "They came and told me something. Those things I saw, they came and told me something". He asked "What did they tell you?", and she said "They prophesied that I should have ten children". He said "But you are too old already". She answered back "I know. It must be Tahar's doing". He said "You saw them then? Did he come back and tell you that? Let's wait and see."

That woman bore, and bore again. First she bore Rets, then Le-rets, ten of them altogether, Lav, Awe, Ngosh, and many more. And when her children were all grown up they went on a voyage to Malo. And before
they went, Win-bwerie said to them "You are going to Malo. Now, Malo is a place where there are many fish. But remember that thing which your mother told you. If you shall have eaten those things which your mother told you of ..." and he addressed the youngest, saying "If you shall have eaten those things, when you come back, and when you round the promontory called Tsingon Ta-har, which brings you in view of Atchin, then run out on to the outrigger float".

When they were due back, their father waited for them on the beach at Onema. And when he saw the youngest running out on to the outrigger he said "Alas! My children are demented". Then he ran quickly home, and came to his house, and lay down on his bed, and the octopus, the shell-fish and the rail crawled over him and embraced him, so that he died. They ate him up. And the mother waited for her children to come. And when they rounded the corner of the fence leading to his enclosure, she cried "Come, see your father in the inner court. We told you not to eat those things, but you would not obey us". They went round into the inner court, and she cried "Look, look, where and how he is". Then they dug a hole, and cut bamboos, and with them poked him into the hole. And so they buried him. That is the end.
TALE P: ON THE NATURE AND OMNIPOTENCE OF TAHAR

(From Ta-maewo through Buremin.)

4. Tahar mwi tei watsî w e wan tsunob. E wurei ko e te na-mboŋ sâr.

5. E wurei, " Ko inik, ko na-mboŋ sâm e p'ok, po mats ni. Ko inik ngo, ko po pal ko. "

Pwi-re pwi sa pwi tara. 7. Ko e wa, "Io, ko inik, po torna, po ar mats. "

E wurei pwi sa, ko e te na-mboŋ sân, 8. ko ko e wurei "Na-vûl sâm, ko mats. "

Pwi-re pwi sa, pi we ma-lakel pu-roŋ ko pi mats. 11. Pwi-re pwi sa, e wa, "Inik, po torna pu welo-welo ko po mats. "

17. Tahar mwi tei ikir.

28. Mi wįfėni rowe na-na tsîle, nà-nà'k ko po lâs-lâsî, pu ɲu.

1The word for lashing together the parts of a canoe.
TRANSLATION

The moon is our mother, and the sun our father. They two made us. [Moon and sun together are Ta-har]. One day he made a thousand men, and another day he made another thousand, and another day he made another thousand.

And it came to pass that he made woman, and [his?] blood [sexual fluid, see below] was in her. And she conceived then, and her belly became big, and a child took shape [mu turang = 'strong', 'fast', i.e. the child is taking shape, and about to be born, is no longer mere fluid]. Then Ta-har made all men. He speaks, and appoints their days, saying "And you, your days will be so many, and then you will die. And you there, you will be killed [pal = 'be sacrificed']." If a man is going to be shot, he takes a cane and pierces him beforehand. If a man is going to grow old, he says "Yes, and you will grow old, then you will die". He speaks to another, and appoints his day, saying "In such a month you will die". To another he says "You will be born out of the womb, and straightaway you shall come back to me", and to another "You will live on a little, and your months shall be but few, and you shall die", to another, that he shall grow to be a young man only, and shall die. To another he says "You will be only just beginning to grow old, and you will die". And he says "You shall be born only one day and you shall die", and to another that his days shall be five, and he will die. To one he says "A shark will eat you", and to another "You will be drowned. The sea will devour you". To another he says "You will climb a tree, and will fall down all by yourself, and you will die", and to yet another, that he will get sores and die, to still another that he will hang himself and die.

He alone made us. Ta-har made us. He lashes (the parts of) us together (as a man lashes together the parts of a canoe). First he made the buttocks. Then he went on and made the sexual organs. Then he worked on and on till he finished us off here, on our heads. [Here my informant indicated the whorl of hair on the head, called na-vül e shu-shu woni = 'the moon finishes it off', also used of the moon setting]. And he made woman and that thing which is within her; and man, his sexual organ that it might rest in it.

And the man went to the woman, and his blood [sexual fluid?] remained in the woman. And his blood [sexual fluid?] remained in the womb of the woman, and made a child. And the child was born, and Ta-har appointed his day, saying "And you, such are your days, such will be your work". He says whether the wind shall blow so hard that you will die, or whether the rain shall fall so much that you will die.
And if you are to be shot, you will be shot; if you are to be drowned, you will be drowned. If a man is to be eaten by a shark, a shark will eat him. If he is to hang himself, then he will hang himself. If he is simply to sicken and die, it will be so. If he says you are to become an old man, when your day comes you will die also. He fore-tells all things for all men, everything that you will ever see.
TALE Q: MALAIN AND MERE-TSANG  

(Evidently recorded at Sen-har.)

1 Lit. 'Senhar, it gathers its stones'.

2 Dancing and presenting pigs apparently form a combined action.

SUMMARY

Malain and Mere-tsang were brothers in the mainland village of Tutu. Malain was the younger. They make two mounds, one each, and Mere-tsang insists that his brother's shall be smaller than his. Both mounds are piled higher and higher, and Malain refuses to make his smaller than his brother's. So they fight.

Malain runs down to the shore, where he boards the canoe of his mother's brother who is returning from Wala. His mother's brother takes him back to his own village of Emil Marur, and builds a dolmen for him to cook on, since he may not cook on the ground.

The men of Emil Marur chase fish round Atchin, and when they come to Sen-har they see a girl, to whom he gives a fish, wanting to marry
her. When she is grown up, her father takes her in his canoe intending to take her to be married to a Showul man. But he beckons to her, and they turn the canoe round and return. But he runs away and hides in one of his mother's brother's yam-trellises. But his mother's brother sends his wife to find him. She finds him, and he marries the girl and they settle down and live at Emil Marur.

Then the men of Emil Parav make a canoe, and each village on Atchin builds a stone platform, and pays him for this right. Finally they build one for him. He tells them to build it high like the mound he made on the mainland. They build it higher and higher till from the top they can see Mal-weaweng, Showul and Wala. He lays out yams for workers and guests, and kills a pig and eats with them (i.e. breaks taboo). Mere-tsang is jealous and comes over from the mainland. He has two sons, of whom Malain has adopted the younger. Mere-tsang sends his eldest son to Malain for a brand from his fire. Malain lets him take it, and invites Mere-tsang to share his meal. Mere-tsang does so. Later, however, Malain sends his adopted son to get a brand from Mere-tsang. Mere-tsang lets him take it, but does not ask Malain to a meal. When Malain asks the son why, he says Malain may not eat with Mere-tsang because he has broken the food taboo, by eating with the men of Emil Parav. Malain is furious, and goes off and makes himself a dancing ground at Emil Wanggala. Mere-tsang makes himself a dancing-ground at Emil Tara.

TRANSLATION

[There were two brothers, belonging to the mainland village of Tutu], Malain and Mere-tsang. [Mere-tsang was the elder]. They two were planting their gardens, they were planting decorated canes of the kind called nousur row-row, "flying canes" which are placed in the middle of a yam-mound for the vines to grow on. They heaped up two mounds, there on the mainland. Each, with the help of his kinsmen, heaped up his own mound. And they heaped them higher, and ever higher. Then the elder brother came, and saw that the two mounds were of equal height, and he spoke, saying "All of you put the cap on that fellow's mound [the cap is the small protuberance constructed on the top of the mound at the base of the flying cane which rises from its summit]." He meant his younger brother's. But the younger brother spoke, saying "Not yet. Heap it up yet higher". After a time, the elder brother strolled back again, and came and saw that the mounds were still equal, and again said "All of you, put the cap on that fellow's mound". But the younger
brother again said "Not yet". Again the elder brother tried to get them to put an end to his younger brother's mound, but the younger brother said "Not yet". So the elder brother went away, but came back again, saying this time "All of you, put the cap on that fellow's mound immediately". But again the younger brother spoke, and said "Not yet". Then the elder brother became angry, and said "Oh! You are only a child. We tell you something but you do not understand. We tell you your mound should be lower, and that mine should be somewhat higher". This time the younger brother said "All right! You make yours as high as mine!"

The elder brother was furious, and they struck one another, and the two groups of kinmen fought.

Now, their mother's brother belonged to the village of Emil Marur, on Atchin. And he and his wife had gone to Wala. And the younger brother was angry, and departed in a rage. He departed in a rage, and shouldered his bow and ran down to the shore, and began shooting fish there, at Mat-bangor. And their mother's brother and his wife left Wala in their canoe, and as they were paddling towards Atchin they saw him shooting fish. And he beckoned to them. So the mother's brother paddled and came to where he was. And his sister's son caught hold of the bow of his canoe. The mother's brother thought he just wanted to have a talk, but when the other put his bow into the canoe, meaning to jump in, the mother's brother said "Ho! ho! ho! ho! My sister's son, go back". But his sister's son said "Eh! Mother's brother, let me come with you to Atchin!" But he answered "If you come, where will you eat?" [For Malain had attained to such high grade through sacrifice of pigs that he could not eat from the same fire as any man on Atchin, nor yet even on the ground]. But however much his mother's brother talked, it was of no avail, and his sister's son climbed into the canoe. So together they came and landed at Emil Marur. And his mother's brother made a dolmen [stone platform] for him, for he might not cook on the ground. He built up the stones, and his sister's son cooked on them.

And the men of Emil Marur were chasing fish by driving and surrounding them at intervals round the coast of Atchin. They chased fish till they came here, to Ramason [a spot on the coast belonging to the village of Sen-har, to which the narrator belonged, and where we were sitting when he recited this tale]. They went on till they came to Ramason, and, having caught their fish, they wanted to go home and cook them. But he [Malain] espied a little girl, whose father's name was Shu-shu. And he took a fish, and threw it to her. Another day, when they were again chasing fish, and gradually came round to Ramason, he
again saw the girl, and again threw her a fish. And they came back to Emil Marur, in order to cook. But when they came to cook, they all said to him "But where is your fish?" He said "That dear little girl begged me for mine, so I gave it to her". But he was just deceiving them [for she had not asked him for it, but he had given it to her because] he desired her, and wanted to marry her.

And it came to pass that when she was grown to be of marriageable age, and her breasts had become full, that her father dug yams for the marriage feast and set off with her in his canoe to take her to be married at Showul. And as they were paddling round that way to take her to be married on the mainland at Showul, it happened that he [Malain] was shooting fish on the shore at Emil Marur. And he saw that woman, how her father was intending to give her away in marriage. It happened also that her mother was sitting in the stern of the canoe, and her father in the bow, looking towards the mainland, but that she was sitting in the middle, looking backwards while she bailed out the bilge. And she saw him shooting fish, and how he beckoned her to come back. And the girl spoke to her father and her mother, saying "Father, you want to take me to be married there, but there is a man there who is beckoning me back". Then her father said to her mother "Old woman, turn the canoe round and go back to him". They turned the canoe round, and paddled to the shore. But he ran away. He ran and turned his back to the shore, and, going inland, went to the village. It so happened that his mother's brother was making a garden, and he ran and came and entered inside the trellis that he had erected for his yams. And his mother's brother came and saw the woman with her father and mother, waiting on the shore, and the father said to him "Your sister's son beckoned to this girl and we paddled back, but where has he run to?" Then the mother's brother sent his wife, saying "Please look for him, and find out why he ran away?" So she looked for him, and came and found him in the yam-trellis, and said "Hi! You, why have you hidden?" Then she said "Your mother's brother wants you to come home to take the pigs which he has ready for your marriage". So they went home together, and the mother's brother brought a re-entrant-tusker, a curved-tusker, a crescent-tusker, a pig of grade liw-sheren, and yet more pigs, till there were ten, and gave them for his marriage portion. And they two lived together in Emil Marur.

And the men of Emil Parav set about making a great canoe. And they all collected stones for a stone-platform. The men of Emil Parav collected stones, the men of Emil Marur collected stones, the men of Emil Lep collected stones, the men of Ruruar collected stones. Then
the men of Senhar collected stones for him. And it came to pass that
the first stone-platform to be built was that for the men of Emil Parav,
and when they had finished building it they took a pig and gave it to
him as payment. Then they danced for the men of Emil Marur, and when
they had finished building the men of Emil Marur took a pig and gave
it to him as payment. Then they danced for the men of Emil Lep, and
when they had presented pigs to the workers, they took a pig and gave
it to him as payment. Then they danced for Ruruar, and when they had
presented pigs to the workers, they also paid him a pig. Then it came
to be the turn for his, and he dug up yams and tied them to poles and
announced the day when they should build his stone-platform. The men
of Emil Parav, of Emil Marur, of Emil Lep and Ruruar all danced for
his stone-platform in the dancing-ground, and said "How shall we build
his?" Then he spoke, and said "Let us build mine like I build my mound.
Let it be tall and high". They piled up the stones, and pile them,
higher, and higher, and higher. And they said "Is it finished yet, or
not?" He said "Not yet". So they building it ever higher. And they
spoke again, saying "Is it finished yet, or not? Can you at the top
see Mal-weaweng and Showul, or not?" They said "Not yet". So he again
said "Build higher yet". And they went on piling up the stones till
from the top they could see Showul, and Mal-weaweng, and even Wala.
Then he said "Now it is finished". Then they climbed down, and he laid
out the yams. He laid out all the yams, and then he killed a pig. And
they took their yams, and went away; the men of Emil Parav and Emil
Marur, Emil Lep and Ruruar all went.

And it came to pass that the elder brother [Mere-tsang] stayed on
the mainland. And he was very angry, for he heard how they had all been
paying Malain for the right of erecting the stone-platforms. But he
stayed all the time on the mainland, saying "He is only a child, but
they keep on buying the right of their stone-platforms from him. And
I, how is it that I remain here doing nothing?" So he followed his
younger brother, and came to Atochin. And his younger brother and the
men of Emil Parav were making a great canoe out of a nator tree, and
they lashed on the planks, and lashed them, he helping them, he and
the men of Emil Parav lashed the parts of the canoe together. And they
lit their ovens, and made puddings for themselves. And for him they
brought a fowl and yams for him to eat. And one day when they were
lashing up the parts of their canoe they said "Now you, it is your turn
to cook". And he took the fowl and wrapped it up and put in in the
oven [thereby breaking the taboo against eating with others].
Now, the elder brother [Mere-tsang] had two sons. The one about to be spoken of was the eldest, he that was born first, for the other, called "ghost born behind", that is to say he that was born last, had been adopted by the younger brother [Malain]. Now the elder brother [Mere-tsang] departed from the mainland, and came to Atchin. And he sent his son, he sent his eldest son, saying "Go, please, and bring a brand from your father's [i.e. his paternal uncle's, Malain's] fire". So he went, and found his father [i.e. paternal uncle] making a pudding, and said "Father [i.e. paternal uncle], may I please take a brand from your fire?" And his father [i.e. paternal uncle] answered "Take a brand, and go and tell your mother that she and your father need only prepare food for the pigs, and let your father come back here and eat this pudding with me". They all [i.e. Malain, Mere-tsang and his eldest son - possibly also the youngest son] ate the pudding together. And it came to pass that another day was appointed, another day was appointed on which the men of Emil Parav should continue lashing their canoe. Then the younger brother spoke to the elder brother, saying "You all stay here and lash the canoe. I am going to the mainland". [It is not clear from the story why he went there, unless simply to get food from his garden.] After a time, the younger brother came back from the mainland. And he sent his son, the son called "ghost born last" [whom he had adopted from Mere-tsang], and spoke to him, saying "Go, please, and fetch a brand from your father's [i.e. own father Mere-tsang's] fire". So he went, and fetched the brand. But the elder brother did not say "I have a pudding here, come and eat it with me". He only schemed what he should do. So the younger brother went, and cooked alone. And they [the elder brother and his son] grated coconuts to squeeze over the pudding, and ate. And when they had finished eating, he [the elder brother] cut a slice from the pudding, cut a slice from the pudding, and said "Go and take this to your father [paternal uncle, Malain] for him to eat". And he [the son] took it. And the younger brother was furious, and refused to eat the pudding, saying "Take back the pudding to your father". Then he asked "Have you finished eating?" And he [his brother's son] said "Yes. But you cannot eat with us, because you went and ate of their pudding [i.e. with the men of Emil Parav]. Then he was indeed furious, he was furious, and ran to Amal Wanggala, and went and cleared bush to make a dancing-ground for himself. Then the elder brother cleared bush to make a dancing-ground for himself at Amal Tara.

SUMMARY

Nötsi-na-mbur has no pig with which to make Maki, so steals one
from another village. During the subsequent Maki he forces his wife
to lie and copulate with him in the dancing-ground, but his elder
brother invites him to eat the head of a fowl which he has cooked, and
so forces him to give up his pig (which was a double-circle-tusker) in
exchange for his less noble pig.
[The men of La-wor] were all making Maki, but he had no pig. All the other men had their pigs ready, but he only had none. So they all spoke to him, saying "Go and get a pig for yourself, quickly. We are all waiting to make Maki, but you have no pig, and the Maki is delayed". They all railed against him greatly. But he said nothing. He heard what they said, and went, and sat down in his house, and eat, and thought, and thought, and at last said "Very well, I will go away. I will go somewhere and look for a pig, and if it shall go well with me I shall bring one away, and if they kill me, it will be the end of me; no matter". So he departed. He gathered up his bow and arrows, and departed. And it came to pass that he slept one night in the bush. And when it dawned next day he got up and went on again, and as the sun was about to set came to a village. There he saw two children, and asked them, saying "Where is your father?" They answered "He is gone into the bush, to build a garden fence". Then he deceived them, and spoke, saying "I was wandering about, chasing something, there in the bush, and saw your father, and he spoke to me and told me there was a pig here in his house. He told me that we should take it and lead it away". So the two children entered into the house. They removed the door-panel and entered the house and dragged out the pig. And he spoke to them, saying "That is the pig", and again said "When your father comes in this evening, tell him 'Your friend Nötsi-na-mbur has led the pig away'". [So he took it away.] [But when the owner of the pig] came home, he said "But I have no friend with such a name. Alas! the pig is lost!" And he took his bow, and searched [for the thief], but it was in vain. And when he came back he swore at his sons, at those two children. That is the end. That man dragged off the pig, and went away with it.

And on his way back he again slept one night in the bush. And when he got home he hid from the people, who were already making Maki. And he dragged the pig and hid it away in his house. And it came to pass that they said "Today we will dance [the dance called Seluen]". And it came to pass that he bound reeds into a torch. And they were all binding reeds into torches, and when they saw him, how he carried a torch of his own they all spoke; they did not speak to him, but among themselves, saying "See! He is binding reeds for a torch. Whence is his pig?" And they all went, and beat the gong [for the dance]. And he spoke to his wife, saying "When you see me dancing on this side while you are dancing on the other, when the time comes let us lie down together and copulate". And it came to pass that they danced on to the
dancing-ground, but his wife did not dance, and they did not lie down together. And the man was furious, and put out his light. And they all spoke, saying "Why has he put out his light?" They asked him, saying "You, why have you put out your light?" He answered and said "You ask that woman. She knows". The woman spoke, and said "He wants us to lie down on the ground together and copulate, but I don't want to". Then they all said "Oh! But he speaks well. You go [and do it]. All of you, go and strike up again on the gongs". The man again bore his torch aloft, and they all danced again, the woman on one side, and he on the other. Then they two went, and lay down together on the ground, and copulated. That is the end.

The morrow dawned to be another day. Then his elder brother played a trick on them, pretending to go into the bush, and taking with him a small child [NÖtσi-na-mbur's son]. They two [in fact] stayed in the village [while] the others went into the bush. And [when the rest had gone] they two went [to NÖtσi-na-mbur's house], and he questioned the child, and the child told him of the pig, saying "My father's pig is in the house. Its tusk curves round twice". He said "Let us go in, and see it", and they went in, and saw it. That is the end.

Next day at dawn but while it was yet dark he went to fetch yams, while it was yet dark, from the bush, and came back to the village as the cook crowed, and made a pudding [and cooked a fowl in it]. And when it was full dawn he asked the child, saying "Go and speak to your father, and tell him to come and eat this pudding with me". But his father did not want to. He would not. But the child went back again, and spoke to him again, saying "Father, come, my father [paternal uncle] wants us to eat the pudding with him." But his father said "Eh! I don't want to". But the child again said "Eh! My father [paternal uncle] wants us to eat the pudding with him." Then his father replied "You go, you eat, it say to him 'Father [paternal uncle], let us [others] eat it together, my father wants me to take his portion to him [at home]". But his father [paternal uncle] would not [accept this], and again spoke, saying "Tell him to come and eat with me". But his father exclaimed "Eh! I don't want to". So it went on, till the elder father [paternal uncle] himself went, and stood before him, and spoke, saying "Come, let us eat together". Then [at last] he said "Very well, we will go, and eat". Then he went, and they all worked at the coconuts, and grated them [to squeeze over the pudding when it was cooked]. Then they took the pudding out of the oven, and unwrapped the leaves [in which it had been cooked], and the younger father [NÖtσi-na-mbur] saw the fowl in it. Then the elder father said "You
eat the fowl's head". But he [Nötsi-na-mbur] spoke, saying "If I eat it, what must I give you?" But the elder just said "You eat it". Then said the younger "But I have nothing [to give]". The elder just said "You eat it". Then at last he ate it, and dined off it. And when they had finished dining, the elder spoke, saying "Younger brother, you are but the littlest. You are the "Ghost born last". You shall not kill the pig which has been standing in your house. I, even I, will kill that pig which has been standing in your house. If you were to kill it, you would be putting yourself before me, and I should come last". Thus for the Maki he was forced to give the circle-tusker he had stolen to his elder brother, and he himself killed, afterwards, that belonging to his elder brother.

SUMMARY

Nötsi-na-mbur tricks some Vao men by taking ne-se leaves from them, promising to bring a sow down to the shore in exchange, but disguises himself so that they do not recognise him, and gets away with it.

TRANSLATION

Once Nötsi-na-mbur tricked some Vao men. He went down to the shore at Sanaliw, and saw the Vao men paddle and come to shore. They had their canoe loaded with turmeric leaves for trade. And he asked "Where are you going?" And the Vao men spoke, saying "We are going to Lol-narong." And he spoke, saying "What are you going to do at Lol-narong?" The Vao men answered and said "We are going to buy sows". Then Nötsi-na-mbur spoke, saying "Give me two parcels of turmeric leaves, and later on I will tie up a sow for you, to wait for you. When you have been to Lol-narong and are on your way back you can take her aboard." So the Vao men gave him two parcels of turmeric leaves. And he took them, and went home with them, and waited till he thought it was time for the Vao men to be returning from Lol-narong. Then he went and ground some charcoal with which to make black paint and blackened his face as if in mourning. Then he untied his bracer from his left wrist and laced it on again on to his right, in the manner of a left-handed man, and stuck ferns of a kind called robot nahur in his hair. Then he went back to the shore at Sanaliw, and shot at fish. After a time the Vao men came paddling back, and saw him standing there. But he deceived them by carrying his bow in his right hand and by pretending to shoot fish. And some of the Vao men recognised him, saying "That is the fellow", but some spoke saying "The man who is shooting fish there is left-handed, but the fellow who took the turmeric leaves was not". But those who recognised him said "It is he. It is he, who is shooting fish there. He has played a trick on us by pretending that he wears his bracer on his right wrist". Then one of the Vao men
answered, saying "Eh! He is deceiving us! It is he, that man." Then they paddled ashore and came up to him. And Nōtsi-na-mbur said "What is this that you are saying?" And the Vao men said "We want to take aboard the sow you said you would tie up." But Nōtsi-na-mbur, he spoke, saying "Eh! Who was it you saw who took your turmeric leaves?" One of the Vao men spoke, saying "But you. You took them". Then Nōtsi-na-mbur said "Eh! Not I. Did Nōtsi-na-mbur wear his bracer on his right wrist?" Then he went on speaking, and said "That man you saw this morning, what was he like?" And the Vao men answered and said "But it was you!" Then Nōtsi-na-mbur tricked them, saying "Oh! I lace my bracer on to my right wrist, but he laces his on to his left". But they again answered, saying "Eh! But it was you". He said "It was not I", and added "That fellow this morning, was he blackened?" and the Vao men said "No." Then Nōtsi-na-mbur spoke, saying "But I was already blackened here this morning. If it had been I, you would have noticed that I was black. It must have been some other man to whom you gave your turmeric leaves. It was not I. If it were I, I should have been left-handed. Did you perhaps notice that I was wearing robot nahur ferns in my hair?, and that I was blackened, and that I was braced on my right wrist?" Then some of the Vao men spoke, saying "Indeed, it is not he". But some recognised him, and said "It is he all right. He is trying to deceive us, but it is he all right". But others among them said "Eh! It is not he". And the Vao men quarrelled among themselves. Some recognised him, but others did not. And while they were discussing among themselves, he spoke, Nōtsi-na-mbur spoke, saying "But it was not I. If it had been I, then I should have brought that sow and it would have been waiting here, on the shore. But it was not I. You had better look out for some other man. It was not I. For the man you gave them to has thought better of it and has decided not to come. That is all. You go away. Your turmeric leaves are lost. We shall never see that man again. Your turmeric leaves are lost. Go away now, paddle away". So they went away. Nōtsi-na-mbur has just been deceiving them. It was indeed he who had taken the turmeric leaves.
TALE T: NÖTSINAMBUR COPULATES WITH HIS SISTER AND MOTHER

TRANSLATION

Nötsi-na-mbur made a stone, he hewed out a stone and put it to stand by the roadside, in such a place that those going to their gardens in the bush must keep on passing it. And he watched the women carrying their loads home from the gardens, how their baskets were very heavy, and how, seeing that stone, they rested the bottom of their baskets on it. When they rested the bottom of their baskets on it they did not
remove the straps from their necks, but simply rested the bottom of their baskets on the stone. And he kept on passing, and every day they went into the bush, and every day returned carrying their loads. And each time they came and rested at the stone. And he watched them, and spoke, saying "Do not rest on that stone. I have placed a taboo on it, to the effect that whether it be my mother, or my sister, or my grandmother, or whoever it may be that takes a rest there, I will copulate with her. I have placed a taboo on that stone, so do you not rest on it". Then he went and hid by that stone. And he saw how his sister came up, and approached it, and turned her back to it, and rested the bottom of her basket on it, on that stone. And Nötsi-na-mbur, he was hiding in the bush, and saw his sister, how she turned her back to it, and placed the bottom of her basket on it. Then he ran out, and came up to her. Nötsi-na-mbur ran out, and came, and copulated with that sister. And that sister was simply standing straight up, and he copulated with her. Then that sister went on her way, and Nötsi-na-mbur, he went and hid again. And he saw that mother of his. She, too, came and turned her back to it and placed the bottom of her basket on it, on that stone. Then Nötsi-na-mbur leapt out again, and ran, and came up to her, and spoke, saying "Mother, I am going to copulate with you too". But his mother did not want to. But Nötsi-na-mbur spoke, saying "But I have placed a taboo on that stone, that women should not rest on it. So it is right that I should copulate with you". But his mother did not want to, so he caught hold of her, and copulated with her. Then he ran away. And when they came home, they all stormed at him. His father stormed at him, and spoke to Nötsi-na-mbur, saying "Why did you copulate with your mother?" Then Nötsi-na-mbur replied, saying "I placed a taboo on the stone, and told them, and they heard it. But they thought I was joking. But I went and, and watched, and saw my mother and my sister, how they both came and rested on it, so I copulated with them. I copulated with them both". That is the end.

SUMMARY

Bat-pila's son and the Oba man's son each make a canoe. Trial trip. Oba man's canoe sails badly. They plan to sail to Raga. Oba man's son takes one pig, Bat-pila's son takes two. Oba man's son sails first, but is overtaken by Bat-pila's son. They exchange their tuskers for hermaphrodites. Bat-pila's son steals a hermaphrodite tusker on Raga. Return to Oba. Bat-pila's son arrives first, and Oba man's mother swears at him. Bat-pila's son deceives them, and sails away. Arrives at Small Islands, gives them male pigs, but will not stay. Goes to Malo, stays there, and sacrifices the stolen hermaphrodite at right called 'Cycas'.

TRANSLATION

Bat-pila was a stone, and bore a human son. An Oba man also had a son. These two [were friends and] used to go about together. Each looked for a tree from which to manufacture a canoe, and, having found it, took his adze (tala) and felled it. Now, the Oba man's son chose a tree of the kind called ma-mbur, but Bat-pila's son felled a tree of the kind called ray. Each man hollowed out his log, dragged it down to the beach, made fast the gunwales, thwart and outrigger, and then made a sail.¹

When the strips of sail have been sewn together, and the sails rigged, they set out for a trial trip. And the canoe made by Bat-pila's son sailed well, but that of the Opa man's son sailed badly.² Then they returned, and beached their canoes, and came ashore [to wait for a fair wind].

¹According to my fieldnote account, the sails were made of tobon na-ni, the material used for making the best kind of bark-board belt.

²According to my fieldnote account, it sank.
At last the wind called na-ru blew from the south-west. Now it happened that the father of the Oba man was rearing a re-entrant-tusker (ni-wara). And the Oba man's son spoke to Bat-pila's son and said: "The south-west wind is blowing on the shore. It is meant that we should sail for Raga". But Bat-pila's son said: "What shall we take aboard to trade with?" And the Oba man's son said: "Let us take our [sic] father's pig". Bat-pila's son said: "Only one?", and the Oba man's son replied: "That will be all right. We will take that one aboard and trade with it on Raga". So the Oba man's son and Bat-pila's son, they two, went down to the shore, the Oba man's son leading his father's re-entrant-tusker. So they went down to the shore, and dragged their canoes down to the sea. Then Bat-pila's son said: "Stop here, while I run up to the village". And he ran, and came, and saw his mother Bat-pila, the stone. And he requested her, saying: "Mother, let me take a pig". His mother, that stone, went and fetched two re-entrant-tuskers, and he led the two pigs down to the shore. And when he came to the Oba man's son, [the latter] asked "Where did you get those pigs?" And he replied: "I got those two pigs at home, from my mother". And they carried the pigs into the canoe.

And Bat-pila's son: "You sail first, [since] your canoe sails badly". So the Oba man's son sailed first, and went on till he came to San-wara [the Oba beach from which canoes set sail direct to Raga]. Then he let out his sail, and steered for Raga. And he sailed, and sailed till he had almost disappeared over the horizon. Then Bat-pila's son launched his canoe, and sailed till he came to San-wara. Then he too let out his sail, and made for Raga, and overtook the Oba man's canoe, so that the Oba man's son came last and Bat-pila's son's canoe came first. And he came and landed at [a place called] La-tan Wol-wol. 2 And the Oba man's canoe followed and landed last.

And they dragged their pigs ashore, and carried their canoes out of reach of the tide. Then they went to the village. And the men of Raga exchanged pigs with them, with both of them. And in exchange for the Oba man's son's pigs they gave [in addition to ordinary pigs] several hermaphrodite pigs. For Bat-pila's son's pigs they gave hermaphrodites, and also for the Oba man's son's pig. And so the bargain was concluded. Then they waited till the wind called ruoli blew from the north-east. And [when it blew from the north-east] they bore down their

1Tom's passage.

2The place to which, according to my fieldnote account, the Oba man's son belonged.
TALE U

exchange pigs to the shore. Then they dragged their canoes down to the water, and lifted the pigs into the canoes. And Bat-pila's son spoke to the Oba man's son, and said: "Stay here, while I go to cut [a creeper to make] a rope for my sail". The Oba man's son replied: "Very well, go on". And he ran, and when he came [to the place], he did not pull out a [underground] creeper for his sail-rope, but [instead] put out his hand, caught hold of the base of a [creeper of the tree called] tawe, and heaved it out. Now [it happened that] a hermaphrodite re-entrant-tusker was biting off the young shoots of the tawe. And he broke it off and ran off, with the hermaphrodite re-entrant-tusker holding on with its teeth to the shoots of the tawe creeper [which] it was biting off. And he went right on till he came to the shore, and lifted the hermaphrodite into the canoe.

And he spoke. He said again to the Oba man's son, saying: "You sail first again, [since] your canoe sails badly". And [the Oba man's son] sailed away till he again came first into the shallow waters off the Oba coast at San-wara. Then Bat-pila's son in turn spread out his sail and followed him, and again overtook the Oba man's son. Now the mother of the Oba man's son was waiting for them [on the shore] at Lolo-gar. She had poked in the eyes of two coconuts [to give them to drink]. And when she saw how Bat-pila's son came ashore first [she was angry, and withheld the coconut from him. And] she spoke and said: "You are only the son of a stone. How is it that you think you can sail in front of my son?" And Bat-pila's son replied, saying: "But his canoe sails badly. Indeed, I stayed behind at La-tan Wol-wol and spoke [to him] saying: 'You sail first', and he sailed first, and came first into the shallow waters off the coast of San-wara, and [even then] I sailed after him and overtook him". So Bat-pila's son landed first, and waited on the beach. And he was very angry. And at last the Oba man's son arrived, and landed too. And the Oba man's son spoke, saying: "Why haven't you carried your pigs ashore?" And Bat-pila's son replied, saying: "[On account of] our [sic] mother. I landed first, and she swore at me". Then the Oba man swore at his mother, and said: "You, why did you speak [like that] to this man? [As for] me, my canoe sails badly. He stayed behind at Raga, and I sailed first, and he sailed after me, and came and overtook me, and came and landed first". And Bat-pila's son spoke, saying "Don't swear at her".

[Then] the Oba man's son spoke, saying: "Let us lift out our pigs". But Bat-pila's son said: "Eh! Let us lift yours out [first]". They went and lifted out those of the Oba man's son. And when they had lifted them out, they carried them out of reach of the tide. Then the
Oba man's son said: 'Now let us lift yours out'. But Bat-pila's son said: 'No. Let them remain here till the sun has sunk behind the trees, and become less fierce, then we will lift them out'. He was deceiving [him]. And Bat-pila's son spoke, saying: 'Let us drag your pigs into the village'. The Oba man's son replied: 'All right'. They dragged them to the village. And they went on till they came to his house, and Bat-pila's son deceived him, saying: 'Let me go and have a look at my canoe, and if the tide has come in I will pull it up'. He was deceiving, and he went and dragged his canoe into the sea, and he sailed, and sailed right back here [to the Small Islands].

First he reached Rano, and the men of Rano spoke, saying: 'Come and land here'. But he said: 'No, I must go down [i.e. north-eastwards, down the coast]'. And he took one of the small pigs which he had received in exchange at Raga, and said: 'This is for you. I must go down [the coast]'. And he came next to Wala. The men of Wala spoke, saying: 'Come ashore', but he spoke, saying 'No, I must go down [the coast]'. And he came next to Atchin, and the men of Atchin spoke, saying: 'Come ashore here'. But he replied, saying: 'I must go down [the coast]'. And he gave one of the small pigs to the men of Atchin also, saying: 'I must go further down [the coast]'. And he came next to Vao, and when the men of Vao, too, saw him, they also said: 'Come ashore here', but he spoke, saying: 'I must go down [the coast]'. And he gave one of the small pigs to the men of Vao.

And he set sail again. He sailed, and came and landed at Malo. Now the hermaphrodite re-entrant-tusker which had been at Raga clinging on to that tawe creeper which he had intended to make into a sail-ropes, that hermaphrodite re-entrant-tusker which had clung to the shoot of the tawe creeper, and which he had taken down to the shore and into the canoe, this one [pig] only remained. That hermaphrodite re-entrant-tusker alone now remained of all that had been in the canoe. And he landed with it now at Malo, and stayed there. And all the male pigs he had given away to all these people, to the people of Rano, of Wala, to us people of Atchin and to those of Vao. But the hermaphrodite which he had taken aboard at Raga, he went and landed with this at Malo. He fed it and with it performed [the rite called] Cyoas. He performed [the right called] Cyoas. And [there] he killed [his hermaphrodite]. And all the male pigs he gave to the people [of Rano, Wala, Atchin, Vao] for them to kill, but the hermaphrodite(s) which he had taken aboard he went and killed at Malo. This is the end.
TALE AA: THE SLAYING OF IAS

TRANSLATION

Ias used to chase all the people of Atchin. He ate them all. Now there was a woman [named Um-but-ram, though the name is not given in the text]. She dug a hole. She entered into a hole in a rav tree. She dug into it. She conceived and bore two sons. They grew (?) and became big, they became very big [i.e. full grown]. She fashioned clubs for her two sons, [and] two spears. These two boys married [took?] their mother. 2 They buried her at Tsügen Onema [but she remained alive].

They walked about. One went round the south-east side of Atchin, the other went round the north-west side, till they met at Ra-mason, on the north-eastern point of the Island. Here they heard the song of Ias, 3 that he was going to exhume her. One of them ran back one side of the island, the other ran back to the other side. They came, and saw Ias exhuming their mother. Ias wanted to eat Mal-mal-oba, but Mal-mal-mari speared him. He wanted to eat Mal-mal-mari, but Mal-mal-mari slew him. He wanted to eat Mal-mal-mari, but Mal-mal-oba speared him. They dragged him, they carried him here to Amal Botmau. They cut him into little pieces, and [all the people of Atchin] ate him. All those people ate him. [Before this] they were all wild; now they returned home to their houses.

1But the story shows that she still remained alive, although buried.

2The word tigei is ambiguous.

3The song was sung by their mother, telling her two sons that he was going to exhume her.
TALE BB: THE MAN AND THE RAT

(Note: this type of tale is called tu-tuhunen.)

1. Tsünōb sa mwi tei na-ak, mu wiwsi, ko mu ū tu tō. Mu tūl-tulo po:
2. "Sue, tar-tari, be sue be-lāv ni-se?
3. Be lāv raom (a - o) tambol Sirimits."
4. Mu ū ma Tsünōn Onema, mu läsi na-riv: "Wa-i-e! Pu ū we be ko?"
5. ".. pe ū ok pe lai tapol Sirimits." E wa mu ū ma. 6. "Iki le rik?" Mu ū wan mu riğen. 7. Pi so kele nu-mbo:
   "Sue tar-tara, sue rarae,

9. (a - o) be lāv tambol Sirimits."
12. "O po ū ma ikiri welek." 13. Mor ū wan; mor riğen; mor se kele nu-mbo.
14. "Be sue tar-tara rarae,
    Be sue pe lāv ni-se?
15. Be sue me lāv raom (a - o),
    Be lāv tambol Sirimits."

TRANSLATION

A man hollowed out a canoe, and built it up, and went paddling.¹

He sang a song: "Paddle hard, I paddle, what do I take? I take food, sweet tapol fruit". He paddled and came to Tsünōn Onema. He saw a rat, who said, "Hello! Whither are you paddling?" - "Oh I'm paddling here to get a tapol fruit at Sirimits". He paddled towards it and said, "You dear thing". He paddled up to it and took it into his canoe. Again he sang the song: "Paddle hard, paddle ..."² I paddle to get

¹The word ū at the end of the sentence here marks continuity. It is the verb of 'permanent being', and is used in Atchin in much the same way as tu in Fijian, after a main verb.
²The meaning of the word rarae was not found out.
what? I paddle to get some food, to get tapol fruit at Sirimits". A parrot paddled and came to Lopuri. It saw him. The parrot was just alighting at Lopuri, and it said: "Hello! Where are you paddling to?" He answered: "We two are paddling here, we are getting sweet tapol fruit." - "Oh! Paddle and come here, my dears." They two paddled and came, and took the parrot on board. They again sang the song, "Paddle hard (rare), what do I get? I get food, I get tapol fruit at Sirimits." A night-hawk had settled, and it said, "Hello! All of you, paddle to me, dear rat." They all hid it in a coconut shell, inside a coconut shell.¹ They all paddled and came. The night-hawk walked about and they beached the canoe. He smelled the smell of the rat [saying], "Sniff! I smell something to eat here." [But] the rat ran away. It nibbled through the canoe and ran away. The night-hawk searched in vain. The birds flew away [saying] "Why have you deceived [us]?

¹i.e. they hid the rat in a coconut shell (used as a bailer), because it was afraid of the night-hawk. The parrot was also afraid of the night-hawk.

\(^1\)The word is uncertain and its meaning not ascertained.
TRANSLATION

A man and his wife went to build a fence. They hung up their food [in a basket on a tree]. They went and built the fence. After a time they became hungry. After a time they wished to dine. They inserted their hands into the basket. They [? missed the food that was] in the basket. "Who is eating our food here?" [the man said to his wife]. "You go first; let us go home. Tomorrow we will both come back again and we shall continue to build the fence." They cooked [their evening meal] again. [Next day] they came and hung up their [basket full] of food again. They continued [working till] the sun was overhead. They wished to dine. [Again] they missed their food. A mamela spirit had come and eaten up their meal. [The man said,] "Who is eating our food? Let that fence stay here now. Let us go. Tomorrow we shall return and continue to build the fence." [Next day] they put their food [in the same place]. He says to his wife: "You stay and keep an eye on our food here; you watch about [?] the spirit that takes our food." [She says], "All right, you go and build the fence." She hid; his wife hid. The spirit of the mamela burst [through the bush]. It ran and came for it wished to take their dinner. [She cried,] "Ho there!". She caught it and said, "Oh! You dear, are you the spirit that eats our food?" [The spirit child said], "Yes." [She said] "You take your food and go. Your father will soon be coming". The father came. She says, "You look, it is only this fellow who has been eating our food." [?He said] "Can it be our dear child?" They all went [?home]. They made a pudding. He [the spirit child] ate on and on. The father wanted to go back and build the fence. [She said] "You go and prepare puddings for our food". He made two puddings [i.e. one for himself and one for the spirit-child]. The latter ate all his .... He ate all his, and wanted to eat his father's [saying] "Let me eat a little of this my father's." He [she?] said, "Very well". He ate all his and wanted to eat some of his father's also, [saying] "Mother, let me eat that pudding of my father's." [She says] "Ho, there! Hi! You spirit of the mamela, who may you be? You have eaten what you have not dug from the ground". He says "Yes". He took his bow and his club, he went away. His mother said, "My child,

1 This is a suggestion ad sensum. The text of the tale is not satisfactory as a whole.
2 i.e. Let us leave off building the fence.
3 From the sense of what follows it is clear that when she succeeded in catching the spirit, she found it was that of her own, probably dead, child.
come home, alas!" He bethought himself he was a mamela spirit. [He said], "You go home; [as for] me, I [must] depart." He went. She almost ... wept. His mother said, "My child, come home, dear one, alas!" He [she] said, "Look at my father ...". That mother saw him go and disappear into the bush. That fellow wanted to .... The mother wept. She went back [home]. The father says, "Why did I go away?" She says, "Nothing, only I wanted some pudding [for the spirit child] and he ate all yours [as well]. But it is all over. He wanted to eat yours also. And you, mamela spirit, who were you? Come, let us pull up yams here. And she went away. And I [?] went away, I only wished it thus. We did not rightly know him. He did not want to stay with us, he went away, alas!"
TALE DD: A FAMINE AND DROUGHT IN OLDEN DAYS

TRANSLATION

In the olden days our fathers and our mothers experienced a famine, a great famine. They often tell us of it. We often listen as they
They heard the wind blowing up for a hurricane. [First] it blew up [the coast, i.e. towards Ambrym]. That finished, and then it came from the north-west. The rain poured down and the wind blew hard into .... That finished, then it blew west-by-north. That finished, then it came again from the south-west. They did not [i.e. could not] go to the mainland perhaps for a whole month. They did nothing but stay at home. [They had] no food. What should they eat? Then it cleared up and the sun shone. One man stayed at home. He looked again and again. He saw leaves everywhere. One man [did] thus. There were no leaves on [the trees] there. Then he made the sun to shine [by magic]. Then it cleared up. Let them keep on looking, where shall they see food-stuffs growing? Food indeed, food to eat indeed? They died, they wanted to eat coconut shoots, they even gnawed [?sucked at] a root as it lay, many of them then. One might keep looking [hoping that] he might find something to eat. He might be lost altogether. This one went wild [and ran] about. That one stayed in his house. They went to Tawal, even as far as Tawal [to look for food]. Women and men stayed at home. He went to a place. They stayed for a long time. They wanted to come back, those who kept on staying here [?there]. They became very sick. In the end they got dysentery and even died. One man died that. Another wandered about [and] died on the road. This one stole. They discovered him among their food-stuffs and they killed him. People [were] in this condition even in every place, the people of Vao, of Wala and of Rano. Now they simply wandered about. At last the place became good. They came back. They were away perhaps one year, perhaps two. And the place became good, then it became good. The rain poured down. Bananas and wild yams grew. The rain poured down, and they looked into that the place became good. They came back then thither. They returned to their [houses], to their villages, even to Atchin. They came back, the returned thither. [They went] to Malo, [where] they bought yams and brought them home. Those who had starved became fat in [all] those places. They said: "Perchance it may again be as it was of old". [But we] think that nowadays it will not be so. The white man's food in great quantities may prevent it [the famine] from coming. The food of the white man is plentiful now. It is finished the great famine. We saw how by degrees the place is becoming good.\(^1\)

\(^1\)A magician, who made the sun shine.

\(^2\)A satisfactory translation of the rest of the tale was not reached at the time of transcription and is not attempted here.
TALE EE: TAILE OF AN EXPEDITION TO RAGA

1. Bon ne-wis nor Puruar mar tei na-ak sa, na-ak sa mwi-läp, a mwi-läp.
4. Mar ma ña-el Tsan mul ma, mar ma ña-el ña-Tsan.
5. Mar wurei mar wa, "Kiam na-wahal mwi-läp, mwi-läp a mwi-läp."

TRANSLATION

A long time ago, the men of Ruruar fashioned a canoe, a very great canoe. Its name was Man-wowa. They took it and went to Raga. The men of Raga were hostile. They made war on the men of Atchin. They shot a couple. They swam. The others chased the men of Raga. They came back, they came here to Atchin. They said, "We [have had] a great battle, a very great battle."

TALE FF

The very brief tale that was numbered thus appears to be a Scripture paraphrase, and accordingly is not entered here, as not being a purely native text.
TALE GG: PRODUCING MAN BY MAGIC

TRANSLATION

There was a man. [He and other] they-two were brothers. He cut up his brother. They all shot at one another. That ended and they two [were alone] now. The brothers remained. He said, "Shall I cut [you] up?" He kept on asking. He says, "Shall I cut you up?" The other said, "Yes". They went to Iamus, to their gardens, and he cut up his younger brother. He dug a pit. He plucked ro-kalat leaves [nettle leaves]. He cut up a hundred nettle-leaves. He wrapped up [his younger brother] in the leaves. He put [them] into the pit. He put them all into the pit. And he took banaka leaves. He covered them in. He counted the days, [till] the seventh day. And when he had covered [them?] in, he went and trimmed a bow, he cut materials for a hundred smart belts for them. He laid out in a row a hundred feathers for them. He uncovered them. They had all become men. They went home. They took their belts, they took ... bows. They went from place to place. They fought and shot one another. They shot one another. The nettle leaves all shot one another. The side of the battle returned to Atchin. They went to their homes. They remained on Atchin peacefully.
TALE HH: THE RAT AND THE NIGHT-HAWK

(Against version of Tale BB.)

TRANSLATION

A rat cut [down] a tree to make a canoe. He hollowed it out. He went to the shore, he fashioned booms; he fashioned an outrigger-float for it. He carried it [to the shore], he carved a figure-head, he lashed [them] together, he fashioned a paddle for it. He rose in the morning and said, "I will go to Sirimits so that I may eat the fruit of the tapol." He carried his canoe down to the sea and paddled away. Then he came to Tsûng Onema, [where] he saw a parrot perched [on a tree]. The parrot called to him, saying: "Rat, where are you going?" The rat answered and said, "I am going to Sirimits to eat tapol fruit."
It [the parrot] said, "Paddle over here, let us go together." The rat paddled over and took [the parrot] on board, saying, "Let us paddle [till we] come to Ni-ar." A mirolo-bird was standing [on the beach] and it said, "Rat, where are you going?" [The rat replied], "We-two are going to Sirimits." [The mirolo said], "What for?" [and the rat replied] "In order to eat tapol fruit". [The mirolo said], "Paddle over here, let us all go together." They paddled over, and the mirolo climbed on board. They paddled and came to Na-wup. A dear little pwe-pwere bird was standing there at Lopuri, and said, "Rat, where are you all going?" The rat said, "To Sirimits. [The pwe-pwere said] "What for?" [The rat said] "To eat tapol fruit". [The pwe-pwere said], "Paddle over here and let us all go together." It [the rat] paddled over and it [the pwe-pwere] climbed on board. Then they came to Pota-wora. A dear little na-mwere bird was perching there, at Pota-wora. It said, "Rat, where are you all going to?" "We are all going to Sirimits, to eat tapol fruit." "Paddle over here, let all of us dear friends go together". They all paddled over, and the na-mwere climbed on board. Then they paddled to Pūneme. A wopun bird was perched there [and said], "Rat where are you all going?" "We are all going to Sirimits, to eat tapol fruit." "Paddle over here, and let all of us dear friends go together." They paddled over and it climbed on board. Then they paddled over to Pan-mala. It [the rat] saw a night-hawk, which said, "You three,¹ where are you all going to?" "We are all going to Sirimits to eat tapol fruit." As they paddled over [towards the night-hawk] they took half a coconut shell and put the rat inside it. They paddled over and the night-hawk climbed on board. They all continued paddling. It [the night-hawk] said, "I smell something for me to eat there." They said, "What?" They went on paddling, and he said again, "I smell something for me to eat there". But the rat gnawed at the canoe, and it gnawed right through the canoe, so that the sea-water came into the canoe and they all sank. The birds all flew away, but the night-hawk was drowned. The rat swam to shore. Then it ran back to its own home.

¹There have actually been five birds mentioned; the trial is used, as in other Melanesian languages, as a limited plural.
TALE JJ: TAHAR INTRODUCES THE COCONUT TO THE TEN LEBON BROTHERS

TRANSLATION

Tahar was paddling in his canoe and saw the Ten Lebon [Brothers] standing in the sea. He paddled towards them and landed by the side of Lebon the First. Lebon the First spoke, saying, "Where do you come from?" Tahar replied, "I saw you standing [here] and came paddling [to you]." And he gave him a sprouting coconut. And he spoke saying, "Are you alone here?" Lebon the First spoke saying, "We [are all here together]. My elder brothers stand over there". [Tahar] said, "You lead the way, let us go and see them". They went, and came to Lebon the Second. Lebon the First spoke, saying, "A man came and saw me". [Lebon the Second said,] "What is his name?" Lebon the First said, "His name is Tahar." Lebon the First spoke and said, "Brother, he gave me something here". Then he paddled and gave two coconuts to Lebon the Second. He said to Lebon the Second, "Are you two here alone?" He [Lebon the Second] said, "Our elder brothers are standing there". He [Tahar] paddled and said, "Then let us go and see them". They went, and saw Lebon the Third .... [and so on, up to Lebon the Ninth].

He [Tahar] paddled and went and saw Lebon the Tenth. He [Lebon the Tenth] said, "Hi!" He said, "Where do you come from?" Lebon the Ninth said, "Brother, this man came here". He [Lebon the Tenth] said, "And what is his name?" Lebon the Ninth said "Tahar". He [Lebon the Ninth] said, "He gave this thing to us". He [Tahar] came now and gave ten coconuts to Lebon the Tenth. Lebon the Tenth spoke, saying, "What is this?" And Tahar said, "Just something I have given you". After that, Lebon the Ninth said, "Brother, he has given something to all of us. We do not know its name. We want to ask, but we are afraid. [You are] even our eldest brother. You ask, that you may learn the name of that thing". He [Lebon the Tenth] spoke to Tahar and said, "What is it that you have given, that you have presented to us?" He [Tahar] spoke and said, "That thing, its name is Coconut. Just go and plant it and tend it well, and it will come to pass that one day you will find good food in it. Before it is [grown] high, while it is yet quite low, it bears fruit." The younger brother said, "So, brother, Tahar has presented us with it. So not you [all] say anything. Let us wait awhile, and after a time we shall present him with something." They remained, and they heard a twig snap. They looked around, and saw a woman standing there. Lebon the Ninth said, "Brother". He said, "A woman is standing

1Deferrntial dual.

2The usual sign made by a woman wishing to attract the attention of a man.
there." He said to her, "Paddle over here." She came. Lebon the Tenth said, "Paddle over to Tahar's canoe". The woman said, "Where must I go?" He said, "You will go away with Tahar." Tahar said, "Do you mean to make me a present of this vagina?" Tahar said, "Let us appoint a day, let us say tomorrow." Lebon the First said, "No, that is too soon." Tahar said, "Never mind, then the day after tomorrow". Lebon the Second said "That is too soon". .... Finally Tahar said, "Let us appoint the day belonging to the eldest brother, the tenth day. Come back again ten days from today". They went to the village, to the house of Tahar. Tahar tied up a hundred pigs [??for the bride-price] to stakes. He gave them to the eldest brother, Lebon the Tenth. He counted them off. A circle-tusker went to Lebon the First, a liw-feren tusker to Lebon the Ninth .... [etc., to the end].
TALE KK: SHOOTING THE BANANA

TRANSLATION

They finished bathing, and came and saw a banana that had ripened on an old tree in the bush. One of the younger brothers shot at it but missed. A fellow younger brother shot and missed. The very eldest brother shot, and hit the mark. They ran and saw the banana that it was ripe. The very youngest brother went with the elder brother and the former wanted to pluck the fruit and eat it. But the eldest brother said "No, please". He cursed the banana with the arrow in it. They ran to the sea, they bathed, and came back home. They [all] wanted to eat the banana, but they could not find [it]. The arrow was still in it.
TALE LL: MEN TURNED INTO EELS

TRANSLATION

He builds a fence, he plants his garden. Sows eat [the yams]. He took an arrow belonging to his elder brother. He shot the sow. The sow ran into the fresh water. It dived into the fresh water and climbed up into a cave. The elder brother came home and swore at [his younger brother] about [having taken] the arrow, [saying], "Go and look for my arrow". The younger brother looked for the arrow in the water. He dived and climbed up into the cave. He saw the sow [which] had become an old man with the arrow still sticking into him. [The old man said], "You come here and let us stay together". But the younger man went back into the water, and went back to the village and sounded the gongs. Many people came, and said, "Why are you sounding the gongs?" He said, "I have shot a ghost". They cut a rope.¹ All those people went and caught hold of one end of the rope. He caught hold of [the other] end

¹Of the kind used for hauling the logs from which gongs are made.
and dived with it to where he had met the old man. He looked for lice in [the old man's] hair, and fastened the rope round his head and jerked it tight. He drew out the arrow. They pulled the rope and [as they dragged the pig-man into the water it] became an eel. They dragged the rope [till the eel came] out. They all went into the bush and took [cooking-] leaves, dug up yams, collected bananas, coconuts and fire-wood. [They left] the boys, the two boys, to stay and guard [the eel]. They shot at the flies [which collected on the eel]. The eel said, "You two, shoot at my eyes". Their fathers came back. [The children said] "Father, this thing is bad." They [the fathers] said, "What are the children saying? We want to eat our food [i.e. the eel]." They all wrapped up the eel [in cooking leaves] and placed it in the oven. It stopped there. It stopped till dawn. In the morning they took it out and ate it. They ate it all. And the rain poured down and they all became eels. They wriggled about in that water now. They had all become eels, their fathers and their mothers. They two [the two boys] threw their food to them. They two went. They [the others] all went into the water.
