A GENERAL DESCRIPTION OF THE UNIVERSITY

The city of Canberra, which has since 1927 been the capital of the Commonwealth of Australia, is situated in the Australian Capital Territory. The Territory is about 200 miles by road south-west of Sydney, and 400 miles north-east of Melbourne, and is connected to those cities by good air and road services and by rail. Canberra, which is now developing rapidly as the national capital, is the headquarters of most of the Departments of the Commonwealth Government, and has a population of some 80,000 and is estimated to reach 100,000 by 1967. The city stands at the altitude of 1,800-2,000 feet, and has a pleasant and healthy climate. It has been laid out in accordance with a comprehensive plan, and an imaginative programme of tree-planting has made the city and growing suburbs very attractive. When the plan of the city of Canberra was decided upon in 1916, a site close by the main city area was set aside 'for university purposes'.

An authoritative statement on the history and development of Canberra and the Capital Territory is included in each issue of the Official Year Book of the Commonwealth of Australia, which may be consulted in most libraries and in the offices of Australian diplomatic and consular representatives abroad. Reference may also be made to Canberra—A Nation's Capital, edited by H. L. White, Canberra, 1954.

Canberra University College

In 1927 the Commonwealth Government, recognizing the great public importance of providing facilities for higher education at the seat of government, appointed a Committee to report on the provision of university facilities for residents of Canberra, with particular reference to the needs of officers of the Federal Public Service and their families. This Committee recommended the establishment of a university with certain facilities.

In January 1929 the University Association of Canberra was formed with the main object of promoting the establishment of a University in Canberra. Proposals put forward by the Council of the University Association were accepted by the Commonwealth Government and in December 1929 the Canberra University College Ordinance was passed, providing for the creation of a University College pending the establishment of a teaching University in Canberra. Arrangements were made with the University of Melbourne which amounted to recognition of the College by that University on terms permitting of its full development in the faculties.

*The Commonwealth Government had taken over the Australian Capital Territory in 1911.
of Arts, Science, Commerce and Law. Lectures were arranged in fourteen subjects of the Arts, Science and Commerce courses and the first lectures were given on 31 March 1930. There were thirty-two students enrolled.

Early development of the College was slow, being hampered by the depression of the early thirties and the war, but enrolments rose sharply in the immediate post-war years. The first professors were appointed in 1948, and by 1960 the full-time teaching staff had increased to 90, with a student enrolment of more than 800, of whom 240 were full-time students.

The Decision to Establish the University

While the College was still some way from its full establishment, at the end of the 1939-45 war, a group of people with academic interests who were concerned in other connections with shaping the post-war development of Australia, came together to consider future university development in Canberra. It was from these deliberations that there emerged the Bill which, on its enactment by the Commonwealth Parliament in August 1946, became the Australian National University Act.

The University envisaged in the Act was to differ in two main ways from the universities already established by the Australian States. In the first place, although the Act stated that ‘the University may provide for the incorporation in the University of the Canberra University College’, the University was to be primarily concerned with research and research training. In the second place it was envisaged that the University would select certain defined fields in which to begin its work, those first contemplated being the medical sciences, the physical sciences, the social sciences and Pacific studies.

Early Activities of the University

The University Act placed complete power of management in the hands of a Council and, to provide for the development of the University before the Council could be formed, the Act established an Interim Council. The Interim Council included substantial representation of the professorial staffs of the other Australian universities, and conducted the University’s affairs from its appointment in August 1946 until the permanent Council took office in July 1951.

Very early in its operations the Interim Council established an Academic Advisory Committee of four members, all of whom held senior academic appointments in the United Kingdom and were either themselves Australian or were well acquainted with academic matters in Australia. The Committee took a leading part from 1947-51 in advising the Interim Council on the basic plans and early development of the University.
The Interim Council, as soon as it had decided to establish the four original research schools, set about recruiting senior staff members for them.

The first appointments were made in 1948 and, until premises were available in Canberra, the Librarian and Heads of Departments concerned worked in other centres. By the end of 1952 all but two Departments had been moved to Canberra, though even then most were housed in temporary quarters. Simultaneously, the Interim Council sought to advance the interests of other Australian universities by means of the award of scholarships and Research Fellowships for study abroad and the arranging of seminars in Canberra to which leading overseas scholars were invited.

Association with Canberra University College

Development of the University continued steadily, both in regard to the building up of staff and in the provision of permanent buildings, but the Government was obliged to come to a decision on the future of Canberra University College which was rapidly approaching the stage when it could either become an independent university, which meant the development of postgraduate studies as well as undergraduate teaching, or when, as envisaged in the Australian National University Act of 1946, it should be incorporated in the University.

The Government decided that the College's future lay with the University and asked the two Councils to submit proposals for a desirable form of association. In March 1960 an Act was passed giving effect to this decision and on 30 September 1960 the Canberra University College became associated with the Australian National University as its School of General Studies, while the four Research Schools continued their work in the Institute of Advanced Studies.

Government of the University and the Act of 1960

The Act of 1960 provided for the dissolution of the governing body of the College and for an enlarged Council of the University. The Council includes members of Parliament, of the University staff, of the student body and of Convocation, and persons appointed by the Governor-General. The Chancellor, or in his absence the Pro-Chancellor, presides at meetings of the Council. The present holders of these offices are Lord Florey of Adelaide and Dr H. C. Coombs respectively.

Convocation will eventually be a body composed primarily of graduates of the University, but in order to bring Convocation into existence at an early stage, and to foster the interest of Australian academic leaders in the University, special steps were taken. The University invited to membership of Convocation its academic and certain non-academic officers, the members of the Academic Advisory Committee, the Chancellors and Vice-Chancellors (or equivalent officers) of the other Australian university institutions.
and other research organizations and five other members nominated by each of those bodies. Association with the College has enlarged Convocation to include members and past members of the former Council of the College, members of the College staff, and graduates of the University of Melbourne who took their degrees through the College: in addition two hundred other persons were invited, together with those members of Parliament who were graduates. Though at present the only function of Convocation is to elect members of the Council, it is hoped that, as the University develops, ways will be found to give Convocation opportunities to exercise an influence in university affairs commensurate with the wisdom and experience of its members. Occasional meetings of local members are now held in centres such as Melbourne and Sydney.

The University's senior academic bodies are the Boards of the Institute and of the School. The Vice-Chancellor is the Chairman of both Boards, which comprise, in the Institute, the Heads of Research Schools, the Heads of Departments within those Schools, the Deputy Vice-Chancellor and three members of the Board of the School; in the School the Board consists of all professors of the School, the Deputy Vice-Chancellor and three members of the Board of the Institute. A Deputy Chairman of each Board is appointed by the Council. There is also a Professorial Board, comprising all professors of the University, but its role is purely advisory. While the Council is the governing body of the University, it looks mainly to the Boards of the Institute and of the School for guidance and advice in all matters of academic policy and practice. The Institute is responsible for matters concerning doctoral degrees and the School for other degrees, though students reading for masters' or doctoral degrees may be supervised in either the Institute or the School.

Present Structure of the University

The administrative staff is led by the Vice-Chancellor, who is the principal executive officer of the University, and the Registrar, who is in charge of the work of all other officers of the central administration and of the administrative officers of the Institute and of the School. The Bursar deals with property and finance. The nature of much of the University's work is such as to call for abundant technical, clerical and secretarial support.

The University has established a superannuation scheme similar to the F.S.S.U. in the United Kingdom, with provision for supplementary benefits in the event of early death or invalidity, or of hardship on retirement.

The Institute of Advanced Studies

The Institute comprises five Research Schools, which are led by Directors or Deans: the John Curtin School of Medical Research
(Dean: Professor Sir Hugh Ennor, C.B.E.), the Research School of Physical Sciences (Dean: Professor E. W. Titterton, C.M.G.), the Research School of Social Sciences (Director: Professor P. H. Partridge), the Research School of Pacific Studies (Director: Professor Sir John Crawford, C.B.E.) and the Research School of Chemistry (Dean-Elect: Professor A. J. Birch, F.R.S.). Besides the Directors, the permanent academic staff of the Institute comprises Professors, Readers, Professorial Fellows, Senior Fellows and Fellows. Each Professor is responsible for the research conducted and the research training given in his department. In addition to the permanent staff, Senior Research Fellows and Research Fellows are appointed for periods of from one to five years. At the end of 1965 there were 244 members of the academic staff and 277 full-time research students.

From the beginning it was recognized that if the best standards in research were to be maintained, the relative academic isolation of Australia must be overcome by generous provision for study leave. Professors are entitled to one year’s leave in four with a maximum allowance for expenses of $3,200; other permanent members of staff also benefit from liberal provisions. Shorter leave can be taken before the full leave is due.

The conditions on which all members of the academic staff of the Institute are appointed lay down that the member’s principal responsibility is to devote himself to research and the advancement of knowledge in his subject, and the University’s policy is to make every effort to ensure that the member’s time will be unencumbered by other duties. There is, however, a responsibility on members of the staff to assist in the training of graduate students and to make such contributions as they can to the work being done by the other Australian universities.

The School of General Studies

The School consists of five Faculties, each of which is responsible under the general oversight of the Board of the School of General Studies for academic matters falling within its special field. There are Faculties of Arts, Economics, Oriental Studies and Science, each comprising groups of kindred departments, and a Faculty of Law.

The academic staff of the School comprises Professors, Associate Professors, Readers, Senior Lecturers and Lecturers. There are also Demonstrators and Tutors, and a number of part-time Lecturers, Demonstrators and Tutors. Study leave provisions are comparable with those in other Australian universities. At the end of 1965 there were 212* members of the academic staff and approximately 2,550 students.

* Including Demonstrators and Tutors.
Members of the academic staff of the School, while being responsible in the first instance for undergraduate teaching and for courses leading to masters' degrees, have the opportunity to supervise students for postgraduate work leading to the degree of Doctor of Philosophy. The research requirements of the staff are that they will devote a reasonable proportion of their time to research or other original work in their subjects.

The Library

The University Library comprises three main sections attached to the Institute of Advanced Studies, the School of General Studies and the Centre of Oriental Studies.

The Advanced Studies collection of some 200,000 volumes is closely related to the special interests of the four Research Schools in the Institute. It has a wide range of periodical literature and is strong in the fields of anthropology and linguistics, mathematics, mathematical statistics, physics, chemistry and the non-clinical medical sciences, and has sought to acquire a good working collection of secondary material of high standard in the social sciences.

The General Studies collection (approximately 110,000 volumes) is designed to further teaching at all levels in the Faculties of Arts, Economics, Law and Science, and to provide research facilities in the humanities.

The Oriental collection (mainly Chinese, Japanese and Indonesian) is primarily a research collection and at present contains approximately 70,000 volumes.

The resources of the National Library of Australia are available to members of the University, who also have the advantage of access to many specialized collections of material held by government instrumentalities in Canberra.

Site and Buildings

The main University site occupies about 320 acres of land in the Canberra districts of Acton and Turner and a further 200 acres at Mount Stromlo, ten miles from Canberra.

With the completion of the Canberra Lakes Scheme the University is developing Sullivans Creek, which runs through the site, and two bridges have been built over the creek.

A sports oval and pavilion have been completed on the site and plans are in hand for additional sporting areas and facilities.

The first stage of the Chancery, a permanent building to house the University's administrative staff was completed in 1964, and a further stage was completed in 1965.

University House, the University's first collegiate building, was completed in 1954 and provides accommodation for single research students reading for the degree of Doctor of Philosophy and for
staff members and, for the time being, for some married research students and staff without children. The house also serves as a faculty club for non-resident members of the University.

A University Staff Centre will open early in 1966 in Old Canberra House formerly leased to the Commonwealth Club.

The University Union building was occupied in 1965 and provides service and amenities primarily for students but also for other members of the University community.

The Institute of Advanced Studies

The John Curtin School of Medical Research building was occupied in March 1957. An isotope laboratory is now being built.

The main building of the Research School of Physical Sciences was opened in September 1952. In 1963 the Department of Mathematics moved into a permanent building and the Geophysics building and extensions to the Cockcroft Building were completed in 1965.

The Department of Astronomy, situated at Mount Stromlo Observatory, operates a field station at Siding Spring Observatory, where two telescopes, three houses and a residential lodge have been built.

The H. C. Coombs Building which was opened in 1964 houses the Research Schools of Social Sciences and Pacific Studies. A lecture theatre is being planned as an addition to this building.

A building is under construction for the newly established Research School of Chemistry.

The School of General Studies

The first permanent building, the Hayden-Allen Building, was occupied in July 1960 and an extension was completed in 1962. The Physics Building was occupied in 1961, the Chemistry Building in 1962, the Geology Building in 1963 and the Zoology Building in 1964. A laboratory and animal house are now being constructed for the Department of Zoology.

The Department of Botany is at present housed in the Physics Building but a controlled environment house is being built in the Department's experimental area on the site.

The Faculty of Oriental Studies occupied in 1965 a new building which it shares with the Department of Far Eastern History in the Institute of Advanced Studies. A building for the Faculty of Economics will be completed this year.

There are now three Halls of Residence on the site each of which provides for both men and women students. Bruce Hall, named after the first Chancellor, Lord Bruce of Melbourne, was occupied early in 1961. With the 1963 extension it provides 210 study-bedrooms. Two new halls provide for an additional 500 students. Burton Hall was completed in 1965 and Garran Hall
will be finished in 1966. In addition Lennox House provides accommodation for 112 male students in a group of old hostel buildings.

**Housing**

Houses and flats have been built, or their tenancies otherwise acquired in numbers sufficient to make it possible to house staff with families coming to Canberra, at least for an initial period. Research students with children are also eligible for housing assistance. In addition fifty flats have been provided for married research students without children.

**Finance**

The University’s expenditure in 1964 was $9,872,112 for running expenses and $6,283,926 for capital and other non-recurrent expenditure. Apart from relatively small amounts received from gifts, rents and fees, income was provided by the Commonwealth Parliament.
DESCRIPTIONS OF THE WORK OF THE DEPARTMENTS

The research being carried out in the various departments and the equipment and other facilities available are as follows:

THE INSTITUTE OF ADVANCED STUDIES

THE JOHN CURTIN SCHOOL OF MEDICAL RESEARCH

Biochemistry

Several different problems are being studied in the Department. One research group is investigating enzyme reactions involving some of the relatively large coenzymes such as those of the Vitamin B_{12} and folic acid series. Particular attention is being directed to the enzymic reduction of ribotides to deoxyribotides, a reaction involving coenzyme B_{12}, and to the enzymic reduction of folic acid. Kinetic investigations are being made, by a second group, of the reactions catalysed by ATP: guanidino phosphotransferases with the object of elucidating the reaction mechanisms and the function of divalent metal ions in the activation of these enzymes. A kinetic approach is also being used to determine the basic mechanisms of the reactions catalysed by IDP-ase and aspartate transcarbamylase which enzymes are subject to allosteric activation and inhibition. Another research group is concerned with the distribution and biosynthesis in protozoa of compounds containing carbon-phosphorus bonds and with catabolism of such compounds by micro-organisms; a number of permease systems in micro-organisms are also under investigation. Studies are also being carried out on the biosynthesis and metabolism of certain D-amino acids and related compounds.

The Department is well equipped with facilities enabling work to be carried out on almost any aspect of the subject.

Biological Inorganic Chemistry Unit

The Unit is concerned with the nature of metal complexes, their fundamental chemistry and their application to biology. In particular, at this time, the effect of some complex ions on the rate of hydrolysis of amino acid esters is being examined by o^{18} tracer studies; this is part of a general programme to show what effect the metals have on the position of bond rupture of the reacting co-ordinated molecules. Concomitant with this investigation, is the related study of the nature of the substitution processes which take place at the metal centre. Both aspects demand considerable preparative work and a detailed understanding of the stereochemistry of co-ordination compounds, and a significant part of the Unit's programme is also devoted to these pursuits.

64
Clinical Science
The Department of Clinical Science, a newly established department of the John Curtin School of Medical Research, will be housed in a new wing of the Canberra Community Hospital. The Department will have laboratory and clinical facilities ready for occupation in August 1966 and its activities will be directed towards metabolic problems relating to obesity and other disorders which have a bearing on ischaemic heart disease.

Electron Microscope Unit
Two Siemens Elmiskop I electron microscopes and one Philips EM 200 electron microscope and their accessory apparatus are in operation. The Unit is equipped for all types of structural analysis using these instruments. Work in progress, partly in collaboration with other departments and organizations, includes: the structure of a number of viruses and their development in host cells, the fine histology of several insect tissues, of some lower metazoa and of mammalian skin, the cytology of bacterial cells secreting enzymes and the structure of blood vessels.

Experimental Pathology
Research in the Department of Experimental Pathology is concerned with the pathology, physiology and biochemistry of lipid transport and metabolism with special reference to cardiovascular disease, the structure and functioning of the blood-vascular and lymphatic systems in various diseased states and the reactions of the tissues to foreign matter and the nature of immune responses.

Genetics
The work of the Department is concerned particularly with molecular and biochemical genetics. The fungus *Neurospora crassa* is the main experimental organism, but others including man will be used when research demands. The problems under particular study include the mechanisms of recombination and of mutation, the fine structures of genes and their relation to function, the primary structure and properties of histidinol dehydrogenase and its variants, and the genetic control of metabolism. In the last, attention is being directed towards the genetics of feedback inhibition and of permeability.

Medical Chemistry
The correlation of chemical structure with physical properties in biologically-active substances is an important activity of the Department. Such correlations supply biologists with fundamental data for understanding the physico-chemical basis of drug action. These aims are implemented by:

Organic chemical studies, e.g., synthesis of the relevant hetero-
cyclic substances, e.g., pteridines, pyrimidines, purines, triazoles, quinazolines, indolizines and azalogues of these families of substances. Studies of acridine chemistry have been resumed because of the renewed interest of biologists in this nucleus. Many substances are forwarded to biological workers in various parts of the world for inclusion in pharmacological testing programmes.

Physical chemical studies, e.g., quantitative aspects of the binding of metals by substances of biological interest with special reference to factors governing the oxidation-reduction potentials of metal complexes. The kinetics of nucleophilic displacements. Special apparatus has been built for investigating rapid reactions by optical and potentiometric methods: the kinetics of covalent hydration and the Dimroth Rearrangement are studied in this way. By ultraviolet, infra-red and Raman spectroscopic techniques, the preferred structures of tautomeric substances of biological interest are being determined.

Research is conducted in analysis, and visitors can be received for instruction in both ‘empty tube’ and ‘oxidative catalyst’ types of combustion methods currently used for organic elemental micro-analysis. Ionization constants are determined as a service to other scientists in Australia.

**Microbiology**

The activities of the Department are centred upon the study of animal viruses. These are being studied at all levels of complexity: myxomatosis and virus encephalitis as problems in epidemiology, the spread of viruses through the body as one aspect of experimental pathology, and the nature of the cell-virus interaction. At the cellular level the fundamental problems of viral multiplication are being examined by genetic, physical and chemical methods, as well as the more usual biological techniques.

A major interest of the Department is the genetics of animal viruses, and use is being made of conditional lethal mutants for the analysis of various aspects of the genetic structure and physiological behaviour of poxviruses, polio virus, influenza virus and an arbovirus. Investigations into the behaviour of insect viruses in cultured insect cells are being extended.

**Physical Biochemistry**

The Department is interested in the investigation of physico-chemical aspects of biochemistry, particularly the physical chemistry of macro-molecular substances and systems. Work is at present being carried out on proteins, including enzymes, and on the properties of components of connective tissue and of systems formed from them. The Department is equipped with the more important instruments required for this type of work.
Physiology
The equipment comprises seven experimental rooms very fully equipped for all types of electrophysiological investigation and in particular for work with intracellular microelectrodes. There are also two rooms fitted for physiological chemistry and good facilities are provided for pharmacological investigations of the physiological processes in the nervous system and for fine mechanical investigations on muscular contraction. There is also equipment for isotope measurements. Staff and equipment are available for aseptic surgery. Research work is in progress in the following fields:

(i) Biophysical properties of nerve cells and the nature of the synaptic excitatory and inhibitory action thereon.
(ii) The pathways and organization of nerve cells in the spinal cord and brain, particularly the cerebellar pathways.
(iii) Pharmacological investigations on the central nervous system and on sympathetic ganglia using electrophysiological techniques.
(iv) The transmission mechanism at the neuromuscular junction.
(v) Synaptic excitatory and inhibitory transmitters in the central nervous system.
(vi) Cellular electrophysiology of skeletal muscle.

THE RESEARCH SCHOOL OF PHYSICAL SCIENCES

Astronomy
The Observatory on Mount Stromlo (ten miles from the centre of Canberra) is one of the major observatories in the southern hemisphere. It is equipped with a wide range of telescopes, the largest being the 74-inch reflector, together with the necessary auxiliary equipment. The programme of observations is extensive, with special emphasis upon stellar spectroscopy, the precise measurement of time and latitude variation, the study of the Milky Way system and other galaxies, notably the Star Clouds of Magellan. While the Observatory employs optical techniques exclusively, it works in close collaboration with the radio-astronomy section of the Radio-physics Laboratory of the Commonwealth Scientific and Industrial Research Organization in Sydney.

Mount Stromlo Observatory maintains a Field Station on Siding Spring Mountain near Coonabarabran, New South Wales. The principal instrument at the Field Station is a 40-inch reflector of modern design.

Computer Centre
The Centre's responsibilities are to provide an efficient computing service to the University, and to undertake teaching and research in the appropriate fields of Computing Science. From time to time it will provide formal instruction for undergraduate students. The
Centre is equipped with an IBM 360 Model 50 computer with 128K bytes of storage, three 2311 disc drives, card input and output and a line printer.

**Diffusion Research Unit**
The broad aim of studies within the Unit is to gain information about the liquid state. Several methods for measuring liquid transport properties are used and in particular the radio-tracer diffusion method and precise counting techniques have been developed extensively. Diffusion studies are in progress in organic liquids, electrolyte solutions and molten salts, the last-named system being of interest in fuel cell work. The adaptation of solid-state detectors for radiochemical work is being investigated and if successful, it is hoped that diffusion measurements can be made in the liquified rare gases which is an area of great theoretical interest.

**Electron and Ion Diffusion Unit**
The Unit is investigating collision processes of both low energy electrons and positive ions in monatomic and polyatomic gases. The basis of the work is the precise determination of a number of transport coefficients for electron or ion swarms drifting and diffusing through the gas under investigation. In some instances electron attachment and ionization are significant processes. The data obtained from these measurements are analysed to determine the energy dependence of the cross-sections for the relevant collision processes.

**Engineering Physics**
The main research interest is the development of a large homopolar generator as a source of pulse power for the production of large currents and magnetic fields. Research in plasma physics and in high magnetic fields related to applications of the generator is being pursued.

**Geophysics and Geochemistry**
The main lines of work of the Department are:

(i) Experimental deformation of rocks, minerals and metals. Equipment for deforming specimens of various sizes at confining pressures of up to 10,000 atmospheres and temperatures of up to 1000°C is available, together with strain-gauge, X-ray and optical facilities for deformation studies.

(ii) Palaeomagnetism. Two astatic magnetometers are in operation for measuring the susceptibility and remanent magnetization of rocks. One of these is extremely sensitive for measurements on weakly magnetized sediments. A survey of directions of magnetization of Australian rocks is in progress. Equipment is available for studying the magnetic properties of rocks and
minerals at elevated temperatures and also for A.C. and thermal demagnetizing of rocks.

(iii) Seismology. A seismological observatory equipped with long and short period Benioff instruments has been established. A study of local seismicity is being made using the results of this and fourteen other closely spaced stations. Measurements of crustal thickness have been made using portable equipment with quarry blasts or atomic explosions as sources.

(iv) Geothermal measurements. Apparatus for measuring temperatures and thermal conductivities of rocks is available.

(v) Igneous and metamorphic petrology and geochemistry. A full range of microscope, X-ray, spectrographic and chemical facilities is available. An electron probe X-ray microanalyser has been installed. An A.E.I. spark source mass spectrograph (MS7) is in use for studying trace elements.

(vi) Phase equilibria at high temperatures and pressures. Apparatus capable of attaining pressures up to 100,000 atmospheres and temperatures up to 1800°C for sustained periods is in operation. The apparatus is currently used for studying phase equilibria in the mantle and the origin of magmas.

(vii) Isotope geology and age determinations. The Department possesses Metropolitan-Vickers, Nuclide and Reynolds type mass spectrometers. These are being used for age determination by potassium-argon and rubidium-strontium methods, and in the study of isotope ratios in ore leads. Facilities for mineral separation are available.

**Mathematics**

Research in pure mathematics is currently in group theory, abstract algebra, number theory, functional analysis, classical analysis and non-linear differential equations. There is at present no research in applied mathematics.

**Nuclear Physics**

Three accelerating machines are in use in the Department—a Cockcroft-Walton generator capable of 1-25 MeV with beam currents up to 1 ma.; a 12 MeV tandem electrostatic generator, which was brought into operation in 1961, and a 2 MeV electrostatic accelerator installed in 1962.

These machines allow a wide coverage of research problems in low energy nuclear physics to be made, and are equipped with the most modern ancillary devices. High resolution and large solid angle particle spectrometers are available and detection methods include scintillation counter, solid state counter, gas counter, nuclear emulsion and activation techniques. Four pulse height analysers are in use with presentation by fast print-out, punched tape or on an X-Y
plot. An IBM 1800 data acquisition and processing unit is to be installed in 1966 and will go on-line to an IBM 360 computer. Current facilities include an IBM 1620 computer.

Among the main lines of research are:

(i) The determination of the locations and properties of the energy levels of nuclei with A < 20.
(ii) The study of the interaction of fast neutrons with matter including some aspects of the fission process.
(iii) $^{3}\text{He}$ and $^{4}\text{He}$ induced reaction studies.
(iv) Pick-up (inverse stripping) and double stripping processes.
(v) Nuclear reactions initiated by heavy ion bombardments.

The tandem generator is one of the first of its type in the world and is the most precise and flexible accelerating machine yet designed for this energy range. With the installation of inclined-field accelerating tubes early in 1965 the maximum energy of the machine was raised to 14 MeV. It is hoped in the future to accelerate polarized ions.

The 2 MeV electrostatic accelerator was installed in August 1962. It operates for part of the time in its own right to accelerate $^{1}\text{H}$, $^{2}\text{H}$ and $^{3}\text{He}$ ions. For the remainder of the time it acts as an injector to the tandem accelerator to yield $^{4}\text{He}$ and $^{3}\text{He}$ ions up to full machine energy.

Physics of Ionized Gases Unit
This Unit is making observations of the charge exchange interaction between protons and atomic hydrogen, molecular hydrogen and other gases and vapours, with particular reference to the possibility that resonances may occur at comparatively low proton energies. It is also investigating the interactions of ions, excited, and metastable atoms, with metal surfaces, in an endeavour to unravel the detailed processes of neutralization and de-excitation.

Theoretical Physics
Research is being carried out in theoretical problems of nuclear physics, on the physics of elementary particles and on many body problems and plasmas. About half the work is in fields related to the experimental activities of the School and the remainder on questions of a more general nature. An electronic computer is available.

THE RESEARCH SCHOOL OF SOCIAL SCIENCES

Demography
In subject-matter, the research interests of this Department are concerned with historical and social studies of population movements as well as with the more formal statistical aspects. The main focus has been upon Australia, New Zealand and the
Pacific Islands, but recently the Department has also turned its attention to problems associated with high growth rates in low income areas, with particular reference to southern and eastern Asia, and to comparative studies of growth in high income areas with controlled fertility. Current work includes historical and contemporary studies of marriage, divorce and fertility, population projections, the history and present structure of ethnic minorities and studies of recent immigration to Australia, the growth and structure of the populations of the Pacific Islands, studies relating to internal migration and fertility in selected areas of India and West Pakistan, the economic demography of Malaysia, and the population of West Africa with special reference to Ghana.

Economic History
The main research interests of the Department are in the analysis of empirical experience of long-run economic development, through the definition of rates and character of growth; the analysis of conditions of development; and the structural and institutional changes and forms accompanying this development. Work is being carried on in the general context of the comparative development of a number of advanced countries. Current research provides for specific studies of major business institutions and market structure, and the activity of public authorities; and work is being undertaken to complete a number of major statistical series, to attempt the measurement of several basic economic relationships and generally to analyse and interpret economic behaviour in terms of rates and stability of growth, structural trends and investment and in institutional policy.

Economics
The work of the Department has three main branches—economic statistics, applied economics and economic theory. The central interest is in processes and problems of economic growth and fluctuation. Research fields include the effects of changing economic conditions on the farm sector; the capital market and monetary institutions; the principles and practice of social accounting; capital accumulation and technical progress; theoretical and statistical analyses of international trade, productivity and investment in relation to the Australian work force; national and international policies for development and stability.

History
Initially, emphasis was laid on Australian problems, particularly on the growth of a distinctive Australian society during the last hundred years. This perhaps is still the major emphasis, particularly as the Department is now the headquarters of the Australian Dictionary of Biography. However, in 1959 steps were taken to broaden
the work of the Department by making regular provision for the study of the history of India and this work has grown rapidly. In 1963 a beginning was made with mediaeval European history. Close collaboration exists with other Departments in the Institute of Advanced Studies and with the Department of History in the School of General Studies.

There is in Canberra, in the Australian section of the National Library of Australia, in the Commonwealth Official Archives, in the University Library, and in the collection of Business Records in the Research School of Social Sciences, a great amount of material for the study of Australian history. The National Library of Australia also contains much material, especially of an official character, on the British Commonwealth and on the history, especially the diplomatic history, of modern Europe. Steps are now being taken to build up strength in mediaeval European history.

In the fields of Australian and Indian history regular provision has been made for field-work.

Law
The Department exists to carry out research in depth into the operation of legal systems, generally, and in relation to particular branches of law. It is at present concentrating on five main topics: public law (especially the constitutional and administrative law of Australia); international law; common law (in particular, the law of contracts and of agency, and aspects of wrongs); and the general theory of law (in particular, techniques of judicial reasoning). The Department does not train persons for the active practice of law. A good working law library is available at the University, and free use is also made of the law libraries at Parliament House and in the Attorney-General's Department.

Philosophy
The work of the Department covers a very wide field. Work is now being carried out by members of the Department and research students on social and political theory; logic and methodology, with special reference to the social sciences; the history of ideas; the philosophy of education; the philosophy of history as well as the more general problems of philosophy.

Political Science
The Department is working in selected areas of four fields: Australian politics, bureaucracy and public policy, comparative politics and world politics.

Structural studies of the Australian party system are supported by: regional and national election surveys; the compilation and analysis of comprehensive election statistics; case studies of party
organization and strategy and of 'pressure' groups; and research on Australian political history since 1890.

The work on bureaucracy includes: history and organization of Australian and New Guinea public services and public service associations; case studies in the administration of selected government policies; studies of ministerial responsibility and public service neutrality; and organization theory.

In comparative politics, the Department's main present interests are in power structures and personal leadership in the U.S.S.R. All-Union Government and selected Republics. Comparative research is also done on political parties and élites in South-East Asian countries and on political development in New Guinea.

In world politics the Department's work is complementary to that of the Department of International Relations in the Research School of Pacific Studies. It is concerned with the structural development of the world system as illustrated by European economic and political integration and its implications for Britain and Australia; by the United Nations, particularly in its peace-keeping operations; and by 'Cold War' strategy and its impact on Australian foreign policy and defence. Where appropriate this work is related to formal theories of international relations.

Sociology
This Department was formally established in 1961 and the Council has not yet appointed a Professor and Head of the Department. In the meantime the Department is supervised by Professor Borrie, the Head of the Department of Demography. Four sub-professorial posts have now been filled. An Australia-wide survey of social stratification was conducted by members of the Department in association with a leading overseas scholar who was a visitor to the Department in 1964-65. The survey has been followed by analyses of changes of Australia's occupation structure since 1901. Other research interests include the sociology of religion, urbanization and sociological aspects of education.

While this Department has naturally major interests in the study of social institutions and organization of Australian society, it is not intended that this focus should be at the expense of either social theory or comparative studies. Both of these areas are emphasized in seminars and in other aspects of the students' courses of study.

Statistics
The Department is engaged in developing the theory of probability and the mathematical theory of statistics in order (a) to devise methods of analysing statistical data in the biological, physical and economic sciences and (b) to study processes and phenomena in those subjects in which some random element enters in an essential
way. Most of the work of the Department is being devoted to developing new theoretical tools for this purpose and applying them in economics, geophysics, genetics and other sciences.

Archives
The archives section collects records of business firms, trade unions and similar organizations in Australia and its territories; thus preserving essential raw material to be used in academic research work.

At present it holds the records of 74 businesses, 126 employee organizations (trade unions, 'white-collar' associations, etc.), 29 collections of microfilm, and some printed material. Collection of business records is largely governed by individual research projects being carried out or anticipated. On the other hand, collection of union and similar records, which began officially in 1959, is intended to cover the non-current records of all of these organizations.

THE RESEARCH SCHOOL OF PACIFIC STUDIES

Anthropology and Sociology
Since 1950 the Department has undertaken an extensive programme of field research in New Guinea, Australia, Indonesia, India and the islands of the Pacific. At present, work is concentrated in New Guinea, Australia and South-East Asia. At the end of 1965 approximately one hundred research inquiries were in progress or had been made by scholars, Research Fellows, permanent members of the staff and visitors using the facilities of the Department. Each inquiry usually requires from twelve to twenty-one months of field research, sometimes divided into two periods, together with a similar length of time spent at the University in preparation, library research and the writing of reports. The subjects of inquiry have varied widely but may be described broadly as the traditional social organization and culture of non-European peoples within the Pacific region, their contemporary state and the changes taking place under modern conditions. Inquiries have also been made into matters of colonial administration and into sociological problems within European Australia. Linguistic research has been undertaken within the same region and studies in prehistory have been carried out in Australia, New Guinea and Oceania. The Department is well equipped with library, seminar and other research facilities. A small collection of specimens of material culture, films and sound recordings is being added to as research proceeds.

Economics
The Department is concerned with theoretical and applied problems of economic growth and trade. Its primary interest is in the economic development of the countries of South-East Asia
and the Pacific region, especially the territories of Papua and New Guinea, Malaysia and Indonesia, and in Australia's economic relations with these countries.

**Far Eastern History**

The Department is engaged in research into the ancient and modern history of China and Japan. In the Chinese section present emphasis is on Chinese influences on neighbouring countries; contact between China and the West, particularly the spread of ideas and technical inventions; pre-Han history and the study of bronze vessels; modern Chinese history, including a joint project with the Mitchell Library to publish the Morrison papers. The Japanese section concentrates on modern and mediaeval economic development.

Facilities for research depend on the Oriental collection of the University Library which exceeds 55,000 volumes in the Chinese and Japanese languages, the Mitchell Library in Sydney, and a small collection of reference books in the Department itself. There is also a representative collection in the R. G. Menzies Building of the University Library of works in European languages about the Far East.

**Geography**

The interests of the Department are about equally divided between the human and physical sides of the subject. On the human side, there has been emphasis on historical and economic geography within Australia, the latter particularly with reference to urban and industrial studies, while in an extensive tropical region north of Australia, from Polynesia to Malaya, the Department is increasingly active in work in cultural geography, and a number of intensive inquiries have now been carried out in both rural and urban areas. So far, the bulk of this work has been done in New Guinea and Melanesia, but interests in South-East Asia are developing.

On the physical side, work has concentrated in the fields of geomorphology and biogeography. In geomorphology a long-standing emphasis on coastal, cold climate and karst morphology is now being supplemented by fluvial studies; the use of sedimentological techniques is being emphasized. In biogeography work has concentrated on plant geography, plant ecology, production ecology, and especially palynology; a particularly significant development is palynological research in New Guinea, so far mainly at high altitudes.

The Department has a regional map collection, cartographic facilities, ecological, palynological and geomorphological laboratories; nearly all research tasks undertaken involve extensive fieldwork. The cartographic facilities and map collection are used by the Research Schools of Pacific Studies and Social Sciences, and
by the University Publications Committee. The Department is building up a comprehensive type collection of pollen.

**International Relations**

The Department is concerned with the general study of international politics, especially as this concerns Australia. Its empirical work emphasizes the international politics of the Asian and Pacific regions with special reference, at present, to the foreign policies of Malaysia, Indonesia, Japan, India, and the Chinese Peoples' Republic, and the international behaviour of the smaller states of South-East Asia, and to Australia's relations with them. Work is being carried out on aspects of Australian defence policy and there is interest in the background of Australian foreign policy and in Australia's past diplomatic experience. Members of the Department also pursue theoretical studies of basic questions in international relations. Interests centre on the development of models for the analysis of the political process and the comparative study of international systems and on new methods of processing data. Theories of world politics, past and present, are studied critically. Research facilities include a Press Library containing a collection of the main Asian English-language newspapers, together with newspaper clippings arranged in accordance with the Department's general and regional interests.

**New Guinea Research Unit**

The Unit assists personnel from the departments of the Research School of Pacific Studies working in Australian Papua-New Guinea as well as conducting research through an inter-disciplinary approach to applied problems on its own initiative. It began active work in January 1961, and has established permanent housing and other facilities for research personnel resident in Papua-New Guinea. The Unit's principal research projects include the process of urbanization in Port Moresby. The relation of land tenure to particular aspects of productivity and changes in the political organization of New Guinea. New research on the potential for industrial development, and on motivation among New Guinean people, is now being undertaken. In addition the Unit has co-operated with the Territory Administration in the analysis of an unofficial census of the indigenous population of Port Moresby and environs; and is making a study of the relation of school teachers to the community in which they reside and the attitude of indigenous parents to schools and schooling. Through the generosity of the Rural Credits Development Fund of the Reserve Bank of Australia, the Unit has been able to develop work into subsistence agriculture and cash cropping in the Territory. This work is co-ordinated with grants from the same fund made to the Department of Economics in the Research School of Pacific Studies covering land settlement and
particular aspects of cash cropping. Co-operation with the departments of the School is maintained through daily contact and formally by a committee controlling the Unit's activities under the chairmanship of the Director. (Address of Port Moresby Office: Box 419, G.P.O., Port Moresby. Cables: Natuniv Port Moresby. Telephone: Port Moresby 5756. Contact may also be made through the Unit's office in Canberra.)

Pacific History
The Department is concerned with the study of problems relating to sustained contact between western and indigenous cultures in the Pacific Islands and in South Asia, principally Indonesia and Malaysia. The general focus of this study is that of the colonial society: its origins, its functions, and its development towards self-rule and national independence. Fields of enquiry include political development and the formulation of administrative policy; the establishment and operation of commercial, industrial, and plantation enterprises, labour traffic, and land policies; and missionary activity. Much of the Department's research requires the use of unpublished records held by government archives, mission societies, commercial firms, research libraries, and private persons. Field trips are frequently undertaken to engage in documentary research and to collect data from informants associated with the areas being studied. The Department also offers a programme of seminars based upon its current research.

THE RESEARCH SCHOOL OF CHEMISTRY
This School, which is now being established, will span the fields of inorganic, organic, physical and theoretical chemistry. The School's laboratories are expected to be ready for occupation in the first half of 1967. In the meantime a number of postdoctoral fellows and research students are working in laboratories at the Universities of London and Manchester. Initially, work is being carried out or will shortly be started in the following fields: development of new organic synthetic methods; biosynthesis of mould metabolites and antibiotics; use of modern physical methods, including mass-spectroscopy, in the examination of natural products; some aspects of organo-metallic chemistry; solid-state physics and physical chemistry of molecular crystals; ultraviolet and spin-resonance spectroscopy, particularly of solids; electronic theory of polyatomic molecules and crystals.

THE SCHOOL OF GENERAL STUDIES

Classics
The Department offers full pass and honours courses in both Latin and Greek, a one year course in each of Greek Civilization and
Roman Civilization (art, history and literature in translation), and supervision for the master's degree in Classics. The courses are designed to allow the fullest scope to the special abilities of the staff and the special interests of the individual student by offering in the second and third years optional topics of study rather than set books.

Greek
The first-year course assumes no knowledge of Greek and is devoted to mastering the elements of the language, a special course being available for those with adequate previous knowledge. Greek II and III comprise two courses in Greek history, two set texts and a series of options covering aspects of the history, literature, thought, art and language of Greece, together with exercise in translation into Greek and extensive reading of Greek literature. Greek Studies A and B are primarily for honours students: the first studies the transmission of classical Greek civilization to the Roman, Byzantine and later European world; the second, the origins of Greek civilization between the Homeric world and the Persian wars. The fourth year concentrates on some particular period of Greek civilization and studies in detail its history, literature, art, thought and language.

Latin
There is a course available for students with no previous knowledge of Latin, and students may under certain conditions pass from this into the second and third years. The normal first year provides an extensive study of Virgil or Cicero coupled with intensive grammatical training and an introduction to Roman history. Latin II and III comprise a series of options covering aspects of the history, literature, thought, art and language of Rome together with exercise in translation into Latin and extensive reading of Latin literature. Latin Studies A and B are primarily for honours students: the first studies the debt of mediaeval and Renaissance Europe to the Roman world; the second, the early Imperial period. The fourth year concentrates on some particular period of Roman civilization and studies in detail its history, literature, art, thought and language.

English
The Department of English offers courses in English Literature (including Australian and American Literature) and in Early English Literature and Language. Students proceeding to a pass degree may take majors, sub-majors or single units in either or both of these fields. Students proceeding to an honours degree in English must take majors in both. In English Literature (which deals with major poets, novelists and dramatists since the fourteenth century), Australian Literature and American Literature, an historical
approach serves as the basis for training in the discipline of literary criticism, which is the main purpose. In Early English Literature and Language the aim is to promote a critical understanding of mediaeval literature through a precise knowledge of its language and an acquaintance with its cultural background. For the honours degree a comprehensive study of English Literature (both mediaeval and modern) is required in the first three years, while in the fourth a special period is chosen for detailed investigation. Supervision is also offered to candidates for the degrees of Master of Arts and Doctor of Philosophy, who are provided with courses in critical theory and methods of scholarship.

French
For the Pass Degree of Bachelor of Arts the Department offers a three-year course in French Language and Literature, and a two-year course in French Studies. The former is designed to ensure proficiency in spoken and written French, an acquaintance with various aspects of French civilization, a knowledge of literary history, a training in the methods of literary criticism, and an appreciation of works by major writers from the seventeenth century onwards. French Studies consist of the early history of the language together with literature of the Middle Ages and of the sixteenth century. Candidates for the degree with honours take all five of these units in their first three years. The fourth-year syllabus consists of literature of the twentieth century, further studies in the literature of previous centuries, and advanced language work.

The research interests of the present staff lie in the following fields: the mediaeval chroniclers, the theatre in the Middle Ages and the sixteenth century, the nineteenth- and twentieth-century novel, the twentieth-century theatre, and comparative literature.

General Linguistics
The first two years' work in General Linguistics provide a self-contained introduction to synchronic or descriptive linguistics. The first year is spent on a survey of phonology (phonetics and phonemics) while the second year curriculum includes more advanced work on phonemics and an introduction to modern grammar. It is assumed that, by the end of their second year, students will have a general understanding of the main problems and achievements in this field.

In the third year, students divide their time between the study of instrumental phonetics and a series of introductory lectures on historical and comparative linguistics.

A fourth (honours) year will be offered in 1967.

Geography
The Department is being developed to offer a balanced coverage of teaching and research in physical and human geography. General
surveys are complemented by detailed consideration of research problems and methods. It is hoped that, in due course, the subject will become available to students in Science as well as in Arts and Economics. Pass and honours students pursue a common course, but after first year, honours students read more deeply in all their courses and in their fourth year devote their attention exclusively to geographical studies. Research work is at present being carried on by staff and by candidates for the Master of Arts degree in the fields of coastal geomorphology and conservation, climatology and hydrology, political geography, social (including medical) geography, economic (especially agricultural) and historical geography (especially of settlement). Close relations are maintained with the Department of Geography in the Research School of Pacific Studies in the Institute of Advanced Studies.

**German**

For the Pass Degree of Bachelor of Arts the Department offers a three-year course in German Language and Literature, and a two-year course in German Studies. The former is designed to give students a good command of spoken and written German, an acquaintance with German civilization, a knowledge of literary history, a training in the methods of literary criticism, and an appreciation of works by major writers from the eighteenth century onwards. German Studies consist of the history of the language together with literature of the Middle Ages and of the sixteenth and seventeenth centuries. Candidates for the degree with honours take all five of these units with some extra work added, in their second and third years. The fourth-year syllabus consists of a deepened study of selected aspects of German or Germanic language and literature. A course in Elementary German is specially designed to provide, in one year, a practical knowledge of German for those who have not previously studied the language.

The research work of the staff has extended to both linguistics (present-day German usage, bilingualism, translation) and literature (Romantics, mediaeval textual criticism, modern radio plays). Research work currently undertaken by postgraduate students concerns Lessing and Przybyszewski.

**History**

The three courses available in history for first year students proceeding to a pass degree in Arts, Economics, or Law, are British History from the eighteenth to the twentieth centuries, Ancient History concentrating on the Hellenistic world, and a study of the making of the main social forces and ideas at work in the contemporary world (Modern History A). In later years the choice is from American History, Australian History, more recent European History (since 1815), and Indian History. Thehonours courses con-
sist in more extensive explorations of phases or aspects of the periods listed above, together with an introduction to the masters of historical writing, for the light they throw both on these topics, and on the fundamental questions of method and understanding in the study of the human past. Successful honours students at present proceed direct to a Master of Arts degree by writing a thesis; pass students who wish to take out the master's degree first study three of the honours degree subjects, and pass a qualifying examination in them.

Mathematics
The Departments of Pure Mathematics and Applied Mathematics each offer full courses for the pass degree and for the honours degree. These courses may be taken concurrently by a student specializing in mathematics as part of a bachelor's degree in Arts or Science, while sections of these courses may also be taken by students specializing in other subjects.

The courses for the pass degree extend over three years giving an introduction to the basic mathematical disciplines and their applications. The honours degree requires additional work in Mathematics including a fourth year of study. It may be taken either as an honours degree in Pure and Applied Mathematics, or as a degree in either of these combined with some other subject, such as Statistics or Theoretical Physics. A combined honours course in Pure Mathematics and Philosophy is also provided. Beyond this the Departments offer postgraduate courses leading to the master's degree and the degree of Doctor of Philosophy. The major research interests of the Departments are at present in group theory, abstract analysis, numerical analysis, theoretical astronomy and hydrodynamics.

Philosophy
The Department engages in teaching and research work in all the main fields of philosophical inquiry. Its teaching programme comprises six unit courses for Arts students, designed also, in some cases, to be of value to students in other faculties, and a series of special honours courses to which students reading for the pure honours degree in Philosophy devote their whole time in their third and fourth years. Research work, at the present time, is concerned mainly with problems in ethics, philosophy of mind, philosophy of science (natural and social), epistemology and metaphysics, and Greek philosophy. Facilities are available for students doing postgraduate work in Arts on these and other philosophical problems.

Political Science
The Department offers courses at both pass and honours levels in political theory and institutions, public administration and inter-
national relations for the bachelor's degree in either Arts or Economics. For the Arts degree, political science units may be combined with a wide range of units offered by other departments in the Faculty of Arts; for the Economics degree, a margin of choice is available but there is a core of prescribed units in economics and statistics. An honours degree course in political science requires, besides the special (fourth) honours year, additional work at the higher standard in five of the ten units undertaken in the first three years of the course. The Department offers postgraduate courses in the fields already indicated for the degree of Master of Arts or Master of Economics.

**Psychology**

Pass courses in psychology within the Faculty of Arts are planned to contribute to the general educational background of students proposing to follow occupations other than psychology. The emphasis here is upon understanding behaviour, personality and the interaction of persons in groups. Both the honours programme in Arts and pass courses in the Faculty of Science are designed to provide the necessary basis in psychological method and findings for advanced research in psychology or for the practice of psychology as a profession. Applied psychology, as such, is not taught.

The Department pursues no co-ordinated research programme though it leans towards an emphasis upon aspects of social psychology. Currently research is in progress in the areas of group behaviour, socialization, the counselling relationship, personality theory, the development of thought processes and perception, and general experimental psychology.

**Russian**

For the Pass Degree of Bachelor of Arts a three-year course in Russian is offered. This is designed to provide facility in reading, writing and speaking Russian, and a critical appreciation of representative works of Russian literature. No previous knowledge of the language is assumed. Candidates for the degree with honours take additional courses in Russian literature, language, society and thought in their first three years. In their final year they undertake specialized studies in history of literature, history of language and history of literary criticism, together with advanced practical language work. They are also required to write a short thesis on a literary topic.

The chief areas of research interest of the present staff are nineteenth and twentieth-century literature and Russian social thought. Supervision is available for candidates for the degree of Master of Arts.
THE FACULTY OF ECONOMICS

Accounting and Public Finance

The Department undertakes research and offers courses in accounting and public finance in the Faculty of Economics. Accounting is studied, not as a professional subject, but as a basic academic discipline among the social sciences. Emphasis is therefore placed on theoretical aspects of accounting and on its role in relation to business management, public administration and the formulation of national economic policy.

Accounting I is a self-contained course in the elements of accounting. Accounting II is a course in management accounting and business finance, which is especially concerned with the contribution that accounting can make to the managerial tasks of decision-making, planning and control. Accounting III is a course in public authority accounting and national economic (or social) accounting. Special emphasis is placed on the role of accounting in providing governments and other public authorities with the information they need to manage their own affairs effectively and to formulate national economic policy.

A fourth honours year is available to students wishing to specialize in accounting.

The course in Public Finance is an optional one-year unit which is most conveniently taken in the third year of the pass degree. It is concerned chiefly with taxation theory and policy, public expenditure theory and policy, government financial institutions and the national debt. A fourth-year honours course is also available in Public Finance.

A graduate who has obtained a bachelor's degree in economics or commerce at a recognized university may enrol for the degree of Master of Economics in accounting or public finance.

The Department's research activity is concerned mainly with problems of financial accounting theory, managerial accounting, public authority accounting (including the accounts of public enterprises), national economic accounting and public finance in Australia.

Economic History

The Department conducts teaching and research in economic history and history of economic thought, its courses being available both in the Faculty of Economics and the Faculty of Arts. Four units are offered, all of which deal chiefly with modern periods. Economic History I is intended as an introductory survey and is concerned primarily with British and American development since the late eighteenth century. It also includes a discussion of international economic conditions from 1919. Economic History II offers an intensive course on the economic development of Australia, together with a comparative study of the historical experience
of growth in Australia and some other countries. The syllabus in Economic History III includes the economic development of Japan since c. 1867 and the U.S.S.R. since 1917. History of Economic Thought discusses the development of economic theory in relation to economic problems and policies since the seventeenth century.

A fourth honours year is available to students wishing to specialize in Economic History.

The Department's research interests lie mainly in Australian economic history and the history of economic thought. For the latter, materials are available in the Kashnor Collection at the National Library of Australia, as well as the University Library.

**Economics**

Degree courses in economics can be taken either in the Faculty of Economics or in the Faculty of Arts. In the Economics Faculty the emphasis is on professional training; economics is studied in combination with related disciplines such as statistics, mathematics, economic history, political science or accounting. In the Arts Faculty, the economics major can be combined with a variety of Arts subjects. The economics major consists of three one-year courses, in which the student studies the main branches of economic theory, the organization of business enterprise and the main problems of economic policy. Throughout, the course is closely related to Australian conditions, but much attention is given to international economics and the economic affairs of nations with whom Australia has important trade relations. In addition to the three central courses, there are one-year courses in public finance, mathematical economics, labour economics, agricultural economics, history of economic thought and economic geography.

Honours students are required to take the pass course with some additional honours work in the first three years and a fourth honours year in which they do advanced work in economics. The Department offers postgraduate courses in economics for the degrees of Master of Arts and Master of Economics.

**Political Science**

See under the Faculty of Arts.

**Statistics**

Statistics is concerned with the process of drawing inferences from data which have been generated by some mechanism in which chance elements play a part. As such its study is closely associated with that of the Theory of Probability. The Department provides a (non-mathematical) course in statistical methods for economists and for other social scientists. In addition a series of courses is given dealing with the theory of the statistical methods as well as their practice. These courses, which are mathematical in content, also
deal with various applications of the Theory of Probability so that a considerable part of that range of subjects which is often called ‘Operations Research’ is covered.

Research in the Department at present consists of work in mathematical statistics and applied probability, and in the applications of statistical methods. Fields of special interest are time series analysis, multivariate analysis, econometrics, queuing and renewal theory, population genetics and theories of traffic flow.

THE FACULTY OF LAW

The Faculty of Law offers courses for the Pass Degree of Bachelor of Laws, the Degree of Bachelor of Laws with Honours and the Degree of Master of Laws. A full-time student can complete the undergraduate course for the degree of Bachelor of Laws in four years. The course may also be taken part-time. It is possible to complete a combined Arts/Law course leading to qualification for the two degrees in five years of complete full-time study.

A student taking the Bachelor of Laws degree course receives basic training in New South Wales, Victorian and Commonwealth law. In addition to the inclusion of legal subjects of direct practical value, the course includes subjects which have a more general perspective making possible an appreciation of the totality and function of law in modern society.

The Bachelor of Laws degree is now recognized in Victoria and New South Wales as a professional qualification. Australian National University graduates may, subject to completing certain postgraduate requirements prescribed in the two States, practise in Victoria as a barrister and solicitor or in New South Wales as a barrister or solicitor. State requirements refer principally to the service of articles under a qualified solicitor. In Victoria one year’s articles are served after graduation and in New South Wales if a graduate wishes to practise as a solicitor he must undertake two years’ articles. There is no requirement as to articles in New South Wales for a graduate who intends to practise at the Bar.

After admission in either State a graduate may have his name entered on the High Court Register which entitles him to practise in all federal jurisdictions, including the Australian Capital Territory.

THE FACULTY OF ORIENTAL STUDIES

Asian Civilization

In order to acquaint the student with Asian culture, five special courses are presented. The introductory course in Oriental Civilization gives a general survey of the social forces which moulded the states of the Orient. It integrates the civilization of these various countries into the wider picture of Asian history and world history itself. In the more advanced second and third year courses the
student is offered a choice between a Far Eastern, a South-East Asian and a South Asian specialization. The Far Eastern courses deal in some detail with the history, institutions and thought of China and Japan. The South-East Asian course, while not neglecting the continental countries of the area, is mainly concerned with Indonesia. The South Asian course covers the area of the present-day India, Pakistan and Ceylon. In all three regions, apart from political history, emphasis is also given to archaeology, literature, philosophy, art, religion and anthropology.

**Chinese**

The full three-year course includes both modern and classical Chinese. The course in modern Mandarin aims to develop a practical skill and an active command of the Chinese language as spoken and written today. The first year is wholly devoted to basic language study. The more advanced second and third-year courses include readings of a representative selection of contemporary literature, newspaper texts and documentary prose.

Classical Chinese is introduced in the second year. In the third year the students read an extensive selection of classical and mediaeval texts composed by China's great philosophers, historians, essayists and poets.

A fourth-year honours programme provides intensive courses in classical, mediaeval and modern literature.

**Indonesian Languages and Literatures**

The courses offered are Bahasa Indonesia and Malay* I, II and III, and Javanese I and II. Instruction in certain other Indonesian languages (Minangkabau, Sundanese, Balinese) can be arranged as required.

Bahasa Indonesia and Malay I is devoted to Bahasa Indonesia, the national language of Indonesia, as a modern language, and is designed to give the student competence in the basic skills of speech, reading and composition.

Bahasa Indonesia and Malay II is likewise modern in orientation, and aims to develop a more active command of the language. During this year, emphasis is laid on the cultural and documentary aspects of the texts studied.

Bahasa Indonesia and Malay III includes the study of texts in so-called classical Malay, and other older forms of the language. However, an important proportion of this course is given to the continued development of practical skills and modern literary studies.

Javanese I is a course in the literary language, accepted as standard since the seventeenth century. Prescribed texts include

*For convenience, modern Malay and Bahasa Indonesia are grouped together. During the first two years, however, the major emphasis is laid on Bahasa Indonesia.
selections from local chronicles and Javanese religious and ethical works. Javanese II is a course devoted to the forms of the language extant between the tenth and the sixteenth centuries. Prescribed texts include selections from Old Javanese historical works, court poems and renderings of the great Indian epics.

Since many of the standard works for studies in the Indonesian field (dictionaries and grammars for linguistic work, monographs and articles for historical studies) are in Dutch, a two-hour per week tutorial class in Dutch is provided within the Faculty. This class is recommended for pass students, compulsory for honours students, and is normally to be followed in the second year. Separate enrolment is not necessary.

Japanese

The course in Japanese is designed to attain three objectives: (i) to develop a practical competence in speaking, reading and writing the current standard language (hёjоjо); (ii) to acquaint the student with written styles more or less removed from the standard language, including earlier stages in the evolution of written Japanese; and (iii) to introduce him to the important forms of modern and early Japanese literature as well as to certain prominent features of modern Japanese society.

The first two years are spent in acquiring a working control of the standard language. This part of the course is organized on the assumption that any student who has applied himself conscientiously will, by the end of the second year, have reached a level of competence sufficient to proceed further in the standard language without formal instruction. Although language instruction and drill make up the major portion of the work, some time is given to acquainting the student with aspects of Japanese society as a background to the language.

The third-year work introduces the student to written styles which are more or less removed from the current standard language but have had an important influence on its development. Of these the student may choose either to spend most of his time on historical and early literary texts or to concentrate on more recent styles of writing. Oral drill in the standard language is continued, but to a lesser degree than in the first two years.

The honours course is intended to provide the linguistic equipment for further specialized research as well as an understanding of the literature and history of Japan. From the second year honours students are required to do additional work consisting of bibliographical methods, composition, and translation from Sino-Japanese. The fourth honours year is essentially an intensification of the work begun in the third year, with the addition of lectures on Japanese literature and seminars on historiography and research methods.
South Asian and Buddhist Studies
The course offered in 1966 is Sanskrit I. In following years Sanskrit II and III will be added and also an honours programme. The first year of the course is devoted to the study of the Sanskrit grammar and to the reading of simple texts in classical Sanskrit.

The study of Sanskrit is a necessary prerequisite for the study of ancient Indian culture in all its various aspects, and it also provides a basis for the study of modern Indian languages, such as Hindi and Bengali.

THE FACULTY OF SCIENCE

Botany
Instruction is given in Botany leading to the pass and honours degree of Bachelor of Science. Facilities are available for research as part of the preparation for the higher degrees of Master of Science and Doctor of Philosophy. The main research interests of the Department at present are studies in inheritance and breeding systems, experimental taxonomy, plant physiology particularly relating to growth substances and photosynthesis and also studies in mycorrhizae.

The Department is temporarily housed in a wing of the permanent Physics Building and preliminary planning of a permanent building to house the Department of Botany has been undertaken. It is hoped that this will be constructed during 1967. A group of eight glasshouses for raising plants for experimental use has been provided on the campus on a site immediately adjoining that intended for the permanent departmental building. Several phytotron cabinets are available for controlled environment studies, both in the Department and in the phytotron itself. Facilities are available too for work in the field.

Chemistry
The Department was founded in 1959, when 26 first-year students were enrolled. Since the beginning of 1961 a full undergraduate course and a postgraduate research programme have been carried on. The Department is located in a new, well equipped building which has permitted the improvement of the teaching and research programmes.

Research is in progress in the following fields: atomic and molecular spectroscopy, heterocyclic systems, macromolecular structures (including proteins), organic-natural products, co-ordination chemistry, X-ray crystallography, electrochemistry, photochemistry, reaction kinetics.

Forestry
The Department was established in 1965 as a centre for higher forestry education. The first two years of the forestry course lead-
ing to the degree of Bachelor of Science (Forestry) are taken in other science departments of this University or in science departments of other universities by arrangement. The last two years of the course for the bachelor's degree are taken wholly within the Department and lead to pass or honours degrees.

Research facilities are available for students taking the degrees of Master of Science and Doctor of Philosophy. The major research interests of the Department are silviculture and tree physiology as well as forest mensuration, management, biology, pathology, pedology, economics and utilization.

Geology

The Department offers the normal courses of instruction in Geology for the pass and honours degree. In addition, facilities are provided for research towards the higher degrees of Master of Science and Doctor of Philosophy. The principal research interests in the Department are in the fields of invertebrate palaeontology and micropalaeontology, igneous, metamorphic and sedimentary petrology, stratigraphy, structural geology, economic geology and petroleum geology.

Mathematics

See under the Faculty of Arts.

Physics

In addition to the regular pass and honours courses of instruction in Physics towards the Bachelor of Science degree, facilities are provided for research towards the higher degrees of Master of Science and Doctor of Philosophy. The major research interests in the Department are in the fields of low energy atomic and nuclear collision processes, solid state physics and high temperature gas dynamics.

The Department is located in a well equipped building which provides the customary workshop and service facilities for both teaching and research.

Theoretical Physics

The Department, which is housed in the Physics Building, gives instruction in Theoretical Physics at third and fourth year levels for the pass and honours degree. In addition facilities are provided for research leading to the higher degrees of Master of Science and Doctor of Philosophy. At present the principal research interests in the Department are in the fields of quantum mechanics, general relativity theory and optical aberration theory.

Psychology

See under the Faculty of Arts.
Zoology

Zoology may be broadly defined as the study of the animal kingdom in all its aspects. The Department offers undergraduate courses extending over three years for a pass degree and four years for an honours degree. Facilities for the postgraduate work leading to the degrees of Master of Science and Doctor of Philosophy are available. The research interests of the Department are chiefly centred around invertebrate physiology, parasitology, freshwater biology, histochemistry and ecology.

The Department occupies a new well-equipped building.

THE DEPARTMENT OF ADULT EDUCATION

The function of the Department is to provide courses for adults who are concerned to develop and to extend their knowledge in some field of the humanities, social and physical sciences, and who do not wish to undertake a degree course or who are already graduates.

The courses provided range in length from one term to three years. They are designed to stimulate the active engagement of the students in the study of a subject. This may be in a new field peripheral to or remote from a student's earlier studies, or to refresh knowledge that advances in learning are beginning to render obsolescent. Lectures are complemented by the participation of students in discussion, reading and written work, field excursions or other forms of active learning. In many courses provision is made by the Canberra Public Library Service of specially selected reading matter to supplement texts purchased by the student.

Short intensive refresher and other types of schools and seminars are conducted, ranging in duration from two to three days to a fortnight. Discussion and kit courses, and the requisite books and other materials, designed and produced by the University of Sydney, are available through the Department to residents of the Australian Capital Territory.
GENERAL INFORMATION

ADMISSION AND TRAINING OF RESEARCH STUDENTS IN THE INSTITUTE OF ADVANCED STUDIES

The University confers, on the recommendation of the Institute of Advanced Studies, the degree of Doctor of Philosophy, to which most of its research students proceed, and higher doctorates in Letters, Law and Science. Honorary degrees of Doctor of Letters, Doctor of Laws and Doctor of Science may also be conferred. Research students admitted by the School may, in certain circumstances, study in the Institute for masters' degrees.

Before being admitted as a research student a candidate will normally be required to show that he has graduated from this or another university of senior standing and that he has since had an initial training in research.

In general, students for the degree of Doctor of Philosophy will be required to spend three years of full-time work in the University and will during that time be required to live in Canberra. Those whose fields of study make field-work important are given opportunities to undertake such work and may receive contributions towards their expenses. Periods of field-work are counted as part of the study required for a degree.

The principal work of the research student is the pursuit of an approved piece of research under supervision, and the submission of a thesis based upon that research. There is an oral examination on the thesis. The student is also given training in the research techniques required for the pursuit of his subject, and opportunities for considering the relationship of this specialized work with a more general background of theory. In most cases research students are required to attend some seminar classes and to prepare interim papers.

Research students who do not hold awards which provide exemption from fees are required to pay an inclusive fee of $105 per annum.

A number of scholarships is awarded each year to enable students from Australia and elsewhere to come to the University and study for the degree of Doctor of Philosophy. Medical Scholarships may be awarded to those legally qualified to practice medicine. Applications for enrolment as research students or for the award of scholarships may be made at any time. The main selection of scholars is made in February, May and November each year.

STUDENT RESIDENCE

Students can be assisted to find suitable residential accommodation in Canberra but the University cannot guarantee a place for each applicant.
Accommodation is available in:

(i) University controlled halls of residence — Bruce Hall, Burton Hall, Garran Hall and Lennox House;
(ii) University approved private lodgings.

Bruce Hall
Bruce Hall is situated at the western end of University Avenue. It has single study-bedrooms for 110 men and 100 women students. The Hall also accommodates a number of the teaching staff of the University.

Burton Hall
Situated at the western perimeter of the University site, Burton Hall has single study-bedrooms for 120 men and 120 women students, and also provides accommodation for a number of senior students and members of the teaching staff of the University.

Garran Hall
Garran Hall is also situated at the western perimeter of the University site and when completed will accommodate 120 men and 120 women in single study-bedrooms. In 1966 accommodation will be available for 60 men and 60 women students. It will also provide accommodation for some senior students and members of the teaching staff.

Lennox House
The University has 120 single study-bedrooms for male students in Lennox House, a group of old hostel buildings on the University site. Some members of the teaching staff also live in Lennox House.

Organization
Each hall of residence has a governing body consisting of the Warden and Deputy Warden and a number of elected and appointed Fellows. The Warden is the head of the hall and is assisted by a Deputy Warden and Sub-Wardens.

Admission
Applications for admission to a University hall of residence should be made to the Registrar, School of General Studies, on the prescribed form which is available from the student Administration Office. Written inquiries for forms should be addressed to the Registrar, School of General Studies. Applications should be lodged by 31 October each year.

Residence fees become due and payable on the first day of each residence term and must be paid within two weeks of the com-
mencement of each residence term. The Registrar, School of General Studies, may approve payment of fees by the half term, or by instalments in case of hardship.

In addition, on first accepting a place, a registration fee of $10, and a deposit of $20 (which is returnable on finally leaving the residence) are required. Students readmitted will be required to pay an advance of $30 on their residence fees for the First Term, the payment to be made not later than 15 January 1966. The advance will be forfeited should a student not come into residence.

Students in residence are required to become members of the appropriate resident students' organization.

Residents of halls of residence are required to possess an undergraduate gown which can be hired from the Warden of their hall.

UNIVERSITY UNION
A University Union has been established. It is a society of university students and staff which aims to provide in the University a common meeting place for its members and to promote their intellectual and social interests, and general welfare.

The Union is an integral part of the University. Its constitution, granted by the Council, gives it a substantial degree of freedom in the management of its affairs. It is managed by a Board of Management, the membership of which includes representatives of the University Council, the students (undergraduate and postgraduate) and the staff.

Located in Ellery Circuit near the General Studies Building of the University Library, the Union occupies University premises specially designed for its purposes. The premises provide dining,
common and recreation rooms, rooms for student clubs and societies, and for student welfare services.

Membership is open to students, staff, members of the Council and Convocation, and graduates of the University. Undergraduates and students proceeding to masters' degrees are required to be members. Each ordinary member, other than members of Council, pays an entrance fee of $8 and an annual fee of $17. This fee is reduced by $11 for part-time members, viz., part-time students, staff and members of Convocation. The fee for Life Membership is $50 plus the entrance fee.

The Secretary of the Union is E. C. de Totth, B.A. (W. Aust.).

SCANDINAVIAN—AUSTRALIAN CULTURAL FUNDS

In 1952, to mark Australia's Jubilee Year, the Danish, Norwegian and Swedish communities in Australia each raised a fund for the encouragement of close and friendly scientific, educational and cultural relations between their countries and Australia, particularly by assistance towards meeting the expenses of visits in either direction. The administration of the funds was vested in the Australian National University.

Applications for grants from the income of the funds are invited in September or October each year from persons who wish, for reasons connected with their work, to visit one of the Scandinavian countries. Grants, which are usually of the order of $100-$200, are awarded for visits to one of the three Scandinavian countries in rotation over a three-year period. For example, awards for 1965 were for visits to Denmark; in 1966 awards will be for visits to Sweden and in 1967 to Norway — this cycle to be repeated in subsequent years. Grants are payable on 1 July each year.

The University retains the right to make grants at other times in suitable cases, if funds allow. The availability of the funds is also made known in the Scandinavian countries for the benefit of persons intending to visit Australia.

MEMBERSHIP OF INTER-UNIVERSITY BODIES

The University is a member of the Association of Commonwealth Universities, whose headquarters are at 36 Gordon Square, London, W.C.1. The Secretary-General of the Association, Dr J. F. Foster, will gladly answer inquiries about the University, with whose development he has been closely concerned. Details of appointments and awards offered by the University are available from the Association.

The University is also a member of the International Association of Universities, whose offices are at 19 Avenue Kléber, Paris 16, and of the Australian Institute of Nuclear Science and Engineering.
GENERAL INFORMATION

VICE-CHANCELLOR’S DISCRETIONARY FUND

The Vice-Chancellor has at his disposal a Discretionary Fund from which he can make grants, or more usually loans, to staff and students of the University who are suffering particular financial hardship.

Applications may be made to the Vice-Chancellor; inquiries may be made to him or to a senior administrative officer.

THE MORRISON LECTURE*

The George Ernest Morrison Lecture was founded by Chinese residents in Australia and others in honour of the late Dr G. E. Morrison, a native of Geelong, Victoria. The lecture was established with the object of improving cultural relations between China and Australia, the intention of the founders being that it should be delivered each year on a subject broadly covered by the title Ethnology. From the time of its inception until 1948 the lecture was associated with the Australian Institute of Anatomy, but in that year the responsibility for the management of the lectureship was accepted by the University. Since 1948 the following lectures have been delivered:

Professor J. K. Rideout (Department of Oriental Languages, University of Sydney), ‘Politics in Medieval China’, 28 October 1949.
Lord Lindsay of Birker (Senior Research Fellow in International Relations, The Australian National University), ‘China and the West’, 20 October 1953.
Professor H. Bielenstein (Department of Oriental Languages, Canberra University College), ‘Emperor Kwang-wu and the Northern Barbarians’, 2 November 1955.
Dr L. B. Cox (President of the National Gallery Society of Melbourne), ‘The Cave-Temples of Yun-kang and Lung-mên’, 17 October 1956.
O. van der Sprenkel (Senior Lecturer in Oriental Civilization, Canberra University College), ‘The Chinese Civil Service’, 4 November 1957.
Professor A. R. Davis (Department of Oriental Studies, University of Sydney), ‘The Narrow Lane (Some observations on the recluse in traditional Chinese Society)’, 19 November 1958.

* These lectures have been printed and are available on application to the Registrar.

L. Carrington Goodrich (Dean Lung Professor Emeritus of Chinese, Columbia University), ‘China’s Contacts with Other Parts of Asia in Ancient Times’, 1 August 1961.

Dr Wang Ling (Professorial Fellow in Far Eastern History, The Australian National University), ‘Calendar, Cannon and Clock in the Cultural Relations between Europe and China’, 18 November 1964.

OTHER UNIVERSITY LECTURES

The University arranges a programme of public lectures each year. It is also the University’s practice to invite newly appointed professors to give Inaugural Lectures.

OTHER OFFICIAL PUBLICATIONS

The University furnishes an annual report of its academic, financial and other transactions to the Governor-General and the report is tabled in Parliament. Copies of these reports are available on request to the Registrar. The introductory section of the report for the year 1964 will be found on pages 331-55.

The Australian National University News, which gives information about University developments, including staff appointments, is available on request to the Registrar.

The University also publishes a Faculty Handbook which contains details of the courses available in the School of General Studies. The Handbook can be obtained from the Registrar, School of General Studies, price 75c (post free).

Several other publications containing general information about the University are available on request to the Registrar.

STAFF ASSOCIATION

Membership is open to all those on the staff of the University possessing university degrees or equivalent professional qualifications, including senior administrative, library and technical officers.

A committee of seven, consisting of a President, two Vice-Presidents, a Secretary, a Treasurer and two other members, is elected annually to conduct the affairs of the Association between general meetings.
GENERAL STAFF ASSOCIATION INCORPORATED

The Association was formed in 1953 to promote the interests of members, to maintain and improve the conditions of their employment and the relations between them and their employer and to advance the well-being of the University. To further these ends, the Association, which includes in its membership all categories of non-academic staff, has negotiated improved conditions of employment, has served as an effective channel of communication between the University administration and staff, and is actively engaged in promoting educational opportunities for its members in Canberra.

A Conciliation/Welfare Officer works in close co-operation with an Executive Council which is elected annually and represents members in all sections of the University.

STUDENTS' ASSOCIATIONS

There are two students' associations in the University—the Australian National University Research Students' Association and the Australian National University Students' Association. Through these Associations the views of students on matters affecting their welfare and the welfare of the University are made known to the academic and administrative staff. The members of each association elect two representatives to the University Council.

Membership of the Australian National University Students' Association, and of the Sports Union, is compulsory for all students enrolled in the School of General Studies. At the beginning of each academic year the Students' Representative Council, which is the executive committee of the Australian National University Students' Association, organizes an Orientation Week programme to introduce new students to the University.

The Students' Representative Council controls student clubs, societies and social functions. It operates a student loan fund which grants loans to students in need of assistance.

The executive committee of the Sports Union, called the Sports Council, is the controlling body for all student sport in the University.

All students enrolled for the degree of Doctor of Philosophy, and for courses of research not leading to a degree, are members of the Australian National University Research Students' Association. Through their membership of the Australian National University Students' Association all students enrolled for the degree of master automatically become members of the Australian National University Research Students' Association. This Association has at its disposal a small welfare fund, loans or grants from which may be made to research students at the discretion of the trustees of the fund, who are themselves research students. It also operates thesis typing and group insurance schemes, both in conjunction with the University.
GENERAL INFORMATION

STUDENT COUNSELLING

A student counselling service is available. Students who feel the need of advice on study methods, adjustment to academic life and research, or personal difficulties which may affect their progress, are strongly advised to consult the Student Counsellor. There will be no charge for this service and professional confidence will be observed.

Appointments to see the Student Counsellor may be made through the Student Counsellor's secretary.

PUBLICATIONS COMMITTEE

The Publications Committee administers a fund to publish the works embodying the results of research undertaken in the University or of work cognate with that research. There is a small publishing section, which prepares manuscripts for publication and sees them through the press. While primarily concerned with the works for which it accepts responsibility, the Committee and its staff are available to staff and students for advice on publication matters generally.

POSTGRADUATE SCHOLARSHIPS

COMMONWEALTH POSTGRADUATE AWARDS

The Commonwealth Government provides a number of awards each year for postgraduate students in Australian universities. Applicants must be permanently resident in Australia but this does not exclude Australians temporarily resident abroad.

Students may enrol for the degree of Doctor of Philosophy (the course for which extends over three years) or for the degrees of Master of Arts, Master of Arts (Oriental Studies), Master of Economics, Master of Laws or Master of Science (a one or possibly two-year course). Countries which have from time to time invited applications from Australian graduates for these scholarships are Britain, Canada, New Zealand, India, Pakistan, Malaya, Hong Kong, Nigeria, Rhodesia and Nyasaland, East Africa, Malta and Jamaica. They do not all invite applications every year.

The scholarships are tenable for a programme of postgraduate study or research normally extending over two academic years and leading to a university degree or similar qualification. Awards are sometimes made, however, for one academic year, or the two-year term may be extended for a third year.

Candidates must be Commonwealth citizens or British pro-

Protected persons, normally resident in the country nominating them and prepared to return to that country at the end of the scholarship period.

Candidates should be under the age of 35 years and graduates of a university or college, or holders of an equivalent qualification by the time of taking up the award. Preference is given to candidates who are between 22 and 28 years of age.

The value of the scholarships varies from one country to another but usually provides return fares, tuition fees, a grant for books and equipment, approved medical expenses and a personal maintenance allowance. In addition, in some countries a marriage allowance may be provided if the scholar is accompanied by his wife and the wife is not in employment or in receipt of a scholarship herself.

Details of the awards offered by each country and information concerning the procedure for applying are available from the Registrar. Inquiries should be made well in advance, as applications frequently close some 10 to 12 months before the beginning of the academic year in which the awards are tenable.

GENERAL MOTORS-HOLDEN'S LIMITED POSTGRADUATE RESEARCH FELLOWSHIPS

General Motors-Holden's Limited, under its Postgraduate Research Fellowship Plan, provides 25 Postgraduate Fellowships, tenable at Australian universities.

Applicants must be university graduates with some research experience and preference in selection is given to students who intend to follow careers in industry, or academic careers (including teaching), in Australia and who have graduated in disciplines related to the sciences, engineering, commerce or economics. Successful applicants may enrol for the degrees of Doctor of Philosophy, Master of Arts, Master of Science or Master of Economics, though preference may be given to applicants who have already qualified for a master's degree.

Applications close on 31 October. Further details are available from the Registrar.

COMMONWEALTH UNIVERSITY SCHOLARSHIPS

The Commonwealth Government provides a number of scholarships each year for open competition among students who wish to undertake tertiary courses at universities and other approved institutions.

The administration of the Commonwealth University Scholarship Scheme in New South Wales and the Australian Capital Territory is in the hands of the New South Wales Department of Education, which operates through its Branch Office at the University of Sydney.

The following types of award are available:

(a) Open Entrance Scholarships: These are awarded in order of merit to applicants who sit for a matriculation qualifying examination in their own state. (Candidates in New South Wales and the Australian Capital Territory are usually considered on the basis of results obtained at the New South Wales Leaving Certificate Examination.) Candidates must be under 25 years of age on 1 January in the year in which they will commence their studies.

(b) Second and Later Years Scholarships:
   (i) Second or Third Years. To be eligible students must have passed the full first year of the approved tertiary course at first attempt and they must have made
satisfactory progress. Part-time applicants must have completed two part-time years equivalent to one full year of the full-time course.

Applicants in both these categories must be under the age of 25 years on 1 January of the year in which they desire to use the Scholarship.

(c) Mature Age Scholarships: These are designed to cater for candidates who did not undertake university or tertiary studies when leaving school but who have decided to do this at a more advanced age.

Age limits are as follows:

(i) Applicants who desire to commence a course must be over the age of 25 years and under the age of 30 years on the 1 January of the year in which the Scholarship is desired;

Mature age applicants may compete on the basis of matriculation results but preference is given to those who have already completed part of their course.

A Commonwealth University Scholarship covers all compulsory tuition fees but does not cover the cost of instruments, books or accommodation. Subject to a means test, a living allowance may be paid to a full-time student.

Applications must reach the University Branch Office by 30 September each year. Further information may be obtained from the Registrar, School of General Studies, or the Officer-in-Charge, University Branch Office, New South Wales Department of Education, University Grounds, Sydney.

**Part IV—Assurance Policy Benefits**

9.—(1) When a person becomes a member he shall effect with an approved life office an endowment assurance policy on his life, or, if he is not less than fifty years of age or has an unassurable life, a pure endowment policy, for such amount as, having regard to his age, is obtainable at an annual premium equal to the contributions payable by the University and himself as provided in this Statute in respect of his salary at the time when he becomes a member.

(2) The policy shall be expressed to mature at the member's
prescribed age, and the member has a discretion to determine whether the policy shall or shall not provide for participation in any surplus that may be distributed by the life office from time to time by way of reversionary additions to the sums assured under participating policies.

(3) In the case of a person who, when he becomes a member, is not less than fifty years of age or has an unassurable life, he may elect that, in lieu of the effecting of a policy on his life, the contributions under section eleven of this Statute in respect of him shall be held and accumulated by the Council with power to invest them in securities authorized by law for the investment of trust funds.

(4) Where a member has made an election under the last preceding sub-section, the moneys held by the Council and any securities representing any such moneys, together with the income from those moneys or securities, shall, for the purpose of this Statute, be treated as nearly as possible as if they were a life assurance policy effected on the life of the member for the purposes of this Statute.

10.—(1) The Council may agree to accept for the purposes of the Scheme an existing policy of assurance on the life of a member in lieu of the policy required to be effected under the last preceding section, if the policy is transferred in statutory form to the University and at the date of the transfer is not encumbered.

(2) This section does not apply to an existing policy unless—

(a) the conditions of the policy are in accordance with the requirements of this Statute as to policies for the purposes of the Scheme; or

(b) the policy has been accepted for the purposes of the Federated Superannuation System for Universities (Great Britain).

11.—(1) Subject to the next succeeding section, a member shall contribute five per centum of his salary and the University shall contribute annually a sum equal to ten per centum of the member's salary.

(2) Contributions under this section shall continue until the maturity date of the policy or the date on which the member ceases to be in the full-time service of the University (whichever is the earlier) but if the member continues in the service of the University after his pension date, contributions under this section shall continue until the member reaches the age of sixty-five years or ceases to be in the service of the University, whichever first happens.

(3) The contributions under this section shall, except as
otherwise provided in this Statute, be applied by the Council in payment of the yearly premium on the policy.

(4) The University may deduct from payments of salary to the member the amounts necessary to meet the member's contributions under this section until the maturity date of the policy.

(5) The Council may pay a premium upon the policy in anticipation of contributions by the member or the University, or in default of contributions by the member.

12.—(1) If, after the policy has been effected, the salary of a member is increased or reduced, the contributions under the last preceding section shall not be increased or reduced unless and until the rate of the increased salary is greater or less, by more than Fifty pounds per annum, than the rate of salary upon which those contributions are being made for the time being.

(2) Where, by reason of a change in salary, the contributions in respect of a member are increased or reduced, the sum assured under the policy shall be appropriately adjusted.

(3) If a member is absent from the service of the University, with or without remuneration from the University—

(a) he shall pay his contributions for the period of his absence unless the Council, in its discretion, agrees to pay those contributions; and

14.—(1) A policy effected for the purposes of the Scheme shall be either in the name of the University or in the name of the member and in the latter case it shall be assigned in statutory form by the member to the University.

(2) The member shall arrange for the policy to be delivered by the life office to the University.

(3) The University shall retain possession of the policy, but will make it available for inspection by the member at any reasonable time.
15.—(1) A member shall not, without the consent in writing of the Council, assign, either absolutely or as security, or charge his interest or any part of his interest in the policy.

(2) If a member—

(a) becomes bankrupt or, without the consent in writing of the Council, assigns or charges or attempts to assign or charge his interest or any part of his interest in the policy or does or suffers anything by which his interest in the policy, or any part of that interest, would or might, through his act or default or by operation or process of law, become vested in or payable to any other person; or

(b) becomes a lunatic or is in the opinion of the Council incapable of managing his own affairs,

the rights and interests of the member in the policy forthwith determine and the Council may surrender the policy, or continue the policy for the time being and surrender it later, or continue it until maturity or the prior death of the member.

(3) Any moneys representing the member's rights and interests so determined which are received by the Council, whether upon surrender or at maturity of the policy or on the death of the member, shall, at the option of the Council, be—

17.—(i) If a member dies while in the full-time service of the University before the policy matures, the University shall receive payment of the moneys payable under the policy from the life office and, subject to sections fifteen and sixteen of this Statute and to the next succeeding sub-section, shall pay those moneys, or the balance of those moneys, as the case may be—

(a) to the designated beneficiary or, if there is more than one designated beneficiary, to the designated beneficiaries in such proportions as the member specifies;

(b) if there is no designated beneficiary—to a dependant
or dependants of the member as determined by the Council in its absolute discretion; or

   (i) to the executor or administrator to whom probate of the will or letters of administration of the estate of the member has or have been granted; or
   (ii) where, after a period considered by the Council to be reasonable, there is no such executor or administrator—to the next of kin of the member or as the Council, in its absolute discretion, determines.

(2) Where a member who is an eligible member for the purposes of Part V dies leaving—
   (a) a widow who is, or is deemed to be, the designated beneficiary in relation to the member; or
   (b) a widower who is, or is deemed to be, the designated beneficiary in relation to the member and was dependent on the eligible member at the date of her death, the University shall pay the moneys, or the balance of the moneys, referred to in the last preceding sub-section to the Supplementary Superannuation Benefits Fund established under Part V of this Statute.

18.—(1) If the policy matures while the member is in the full-time service of the University, the University shall receive payment of the moneys payable under the policy from the life office and, subject to sections fifteen and sixteen of this Statute and to this section, the University shall pay those moneys to the member on the pension date applicable to him.

(2) If the member dies before the pension date, the Council shall pay the moneys in the manner provided in the last preceding section.

(3) If the Council thinks fit, the University may, in lieu of paying to the member moneys referred to in this section, use those moneys in the purchase of an annuity payable to the member during his life-time.

(4) If the member continues in the full-time service of the University after his pension date, the moneys payable under the policy which would otherwise be payable to the member, together with contributions by and in respect of the member under section eleven of this Statute made after the maturity of the policy, shall be invested by the Council in securities authorized by law for the investment of trust moneys, and the securities shall be held until the member ceases, by death or retirement, to be in the service of the University, whereupon the securities shall be realized and the proceeds, together with any income received from the investments, shall—
(a) in the case of death—be paid in the manner specified in the last preceding section; or
(b) in the case of retirement—be paid to the member or used in the purchase of an annuity payable to the member during his life-time.

(5) A payment of moneys under this section shall not be made—
(a) to, or for the purchase of an annuity payable to, a member who is an eligible member for the purposes of Part V; or
(b) where a member who is an eligible member for the purposes of Part V dies leaving a widow or widower who is, or is deemed to be, the designated beneficiary in relation to the member—to the widow or widower, but those moneys shall be paid to the Supplementary Superannuation Benefits Fund established under Part V of this Statute.

19.—(1) If a member resigns from the full-time service of the University before attaining his prescribed age and his resignation is accepted by the Council, the Council shall, subject to sections fifteen and sixteen of this Statute, transfer the policy to the member or according to his discretion, and the transfer shall be in full settlement of all claims of the member under this Scheme.

(2) The provisions of this section extend to the case of a member whose appointment expires by effluxion of time before he attains his prescribed age and who is not forthwith appointed or re-appointed to an office by virtue of holding which he is eligible to continue to be a member of the Scheme.

(4) For the purposes of this Part, the appropriate pension in respect of an office other than an office referred to in sub-section (1) of this section is, subject to the next succeeding sub-section, a pension at such rate per annum as is prescribed by the Rules to be the appropriate pension in respect of that office and the appropriate pension in relation to an eligible member who on retirement holds that office is, subject to this section, the appropriate pension in respect of that office.

(5) The Rules may provide that there shall be two or more appropriate pensions, at such rates as are specified, in respect of an office other than an office referred to in sub-section (1) of this section and, in that case, the Rules shall make provision for or in relation to the ascertainment of the appropriate pension in relation to each eligible member who holds such an office.

(5A) The appropriate pension in relation to an eligible member who on retirement holds an office in respect of which there are two or more appropriate pensions is the appropriate pension ascertained in accordance with the provisions referred to in the last preceding sub-section.

(5B) The Rules may provide for the reduction of the rate per annum of the appropriate pension in relation to an eligible member who holds an office other than an office referred to in sub-section (1) of this section if his university service is, on his retirement, less than a specified number of years.

(6) Where an eligible member makes, or is deemed to have made, under sub-section (1) of section twenty-five of this Statute, after a promotion referred to in that sub-section, an
election to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted, the eligible member shall, for the purposes of this section, be deemed to hold the office that the member held immediately before he was promoted.

(7) If—

(a) a member has received, in respect of any of his university service a payment or benefit that is similar to, or of the same type as, a benefit payable under this Statute; or

(b) a member who, having taken the transfer of his policy or received an amount under sub-section (2) of section thirty-two of this Statute, is restored to health, is again employed by the University and again becomes an eligible member,

the rate per annum of the appropriate pension in relation to the member is reduced by an amount equal to the rate per annum, or, in the case of a married member, the initial rate per annum, of the annuity that could, in the opinion of the actuary, be purchased in respect of the member with an amount equal to the value that the benefit so received would, in the opinion of the actuary, have had on the retirement of the member if it had been invested at the time of receipt.

(8) Without in any way affecting the generality of paragraph (a) of the last preceding sub-section, a member shall be deemed to have received, in respect of any of his university service, a payment or benefit that is similar to a benefit payable under this Statute if, in relation to any part of that service—

(a) there has been paid to or in respect of the member a payment or benefit from a superannuation or retirement benefit scheme or arrangement;

(b) there has been paid to, or in respect of, the member a refund of the contributions (including interest on those contributions, if payable) paid by the member to such a scheme or arrangement; or

(c) the member or any other person has a deferred entitlement to a benefit under such a scheme or arrangement.

(9) Where the Council has approved, as university service of a member for the purposes of this Part, a part only of the full-time service by the member as a teacher or other officer of another university or any other full-time service of a similar nature by the member, the whole of any payment or benefit
received or deemed to have been received by the member in respect of the whole or a part of that full-time service shall be deemed, for the purposes of the last two preceding sub-sections, to have been received in respect of the part of the full-time service that has been approved by the Council.

24.—(1) Each of the following persons is an eligible member for the purposes of this Part:

(a) a member who is a member on the date of commencement of the Amendment Statute;

(b) a member who has not, on the day on which he is enrolled as a member, attained the age of forty years; and

(c) a member who has elected to remain, or to become, an eligible member under sub-section (4) of this section.

(2) If the Council is satisfied that the health or physical condition of a member who was a member on the date of commencement of the Amendment Statute or a member who had not, on the day on which he enrolled as a member, attained the age of forty years, is not such as to justify his remaining an eligible member without payment by him of contributions to the Fund, the Council may, within two months after the commencement of the Amendment Statute or the enrolment of the member, as the case requires, direct that the member shall not remain an eligible member unless the member pays contributions to the Fund in accordance with such conditions as the Council determines, and the member ceases to be an eligible member unless he elects to pay contributions in accordance with those conditions.

(3) If a person has become a member by reason of a direction of the Council under sub-section (3) of section six of this Statute, the provisions of the last preceding sub-section apply, mutatis mutandis, to and in relation to the member.

(4) A member who is enrolled as a member after the commencement of the Amendment Statute and has, on the date on which he is so enrolled, attained the age of forty years may, if he has obtained the approval of the Council, make, within twenty-six weeks after the Council has granted the approval, an election in writing to become an eligible member.

(5) A member ceases to be an eligible member if he becomes a contributor under the Superannuation Act 1922-1957.

25.—(1) An eligible member who, having attained the age of forty years, is promoted after the date of commencement of the Amendment Statute to an office the appropriate pension in respect of which is greater than the appropriate pension in respect of the office that he held immediately before his pro-
motion may, within twenty-six weeks after he is promoted, make an election in writing—

(a) to contribute for increased supplementary benefits or

(b) to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted.

(2) An eligible member who, in respect of one promotion to which the last preceding sub-section applies, does not elect to contribute for increased supplementary benefits does not have the right to make an election under that sub-section in respect of any subsequent promotion.

(3) An eligible member, being an eligible member entitled to elect in pursuance of sub-section (1) of this section, who does not, within the period referred to in that sub-section, elect to contribute for increased supplementary benefits shall be deemed to have elected to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted.

(4) Where—

(a) in pursuance of sub-section (5) of section twenty-three of this Statute, the Rules make provision for or in relation to the ascertainment of the appropriate pension in relation to each eligible member who holds a particular office; and

(b) by reason of the application of those provisions in relation to an eligible member after he has attained the age of forty years, a greater appropriate pension would become the appropriate pension in relation to the eligible member on his retirement,

the eligible member shall be deemed to have been, for the purposes of this Part, promoted to an office in respect of which there is a greater appropriate pension, and the preceding provisions of this section and sub-section (6) of section twenty-three of this Statute apply, mutatis mutandis, to and in relation to the member.

26. Except as provided by section twenty-nine A of this Statute, a member who is an eligible member by virtue of paragraph (a) or (b) of sub-section (1) of section twenty-four of this Statute is not, unless the Council has otherwise determined in accordance with sub-section (2) or (3) of that section, required to contribute to the Fund.
27. (1) A member who remains an eligible member by virtue of electing to pay contributions in accordance with conditions determined by the Council under sub-section (2) or (3) of section twenty-four of this Statute shall contribute to the Fund in accordance with those conditions.

(2) Where an eligible member who has contributed to the Fund in accordance with the last preceding sub-section resigns from the full-time service of the University and his resignation is accepted by the Council, the Council shall pay to him from the Fund such portion of the sum of the amounts so contributed by him to the Fund as is determined by the Actuary having regard to all the relevant circumstances and to actuarial principles and practice.

28.—(1) A member—
(a) who is an eligible member by virtue of paragraph (c) of sub-section (1) of section twenty-four of this Statute;
or
(b) who is an eligible member who elects to contribute for increased supplementary benefits in pursuance of paragraph (a) of sub-section (1) of section twenty-five of this Statute,

shall contribute to the Fund in accordance with the succeeding provisions of this section.

(2) There shall be deducted from each fortnightly payment of salary of the member falling due after the date on which the member makes the election, or if, on that date, the member is absent from the service of the University, after the member ceases to be so absent, an amount calculated in accordance with the following formula:

\[
\frac{1}{13} \times R \times \frac{4}{26}
\]

(3) For the purpose of the formula in the last preceding sub-section, R means the amount per annum that, in the opinion of the actuary, is required to be paid into the Fund after the date of the election to enable supplementary benefits or increased supplementary benefits for and in respect of the member to be provided from the Fund.

29. In determining the value per annum of R referred to in sub-section (3) of section twenty-eight of this Statute—

(a) the actuary shall assume—
(i) that there will be no change in the office held by the member;
(ii) in the case of a member who, when he became a member, effected for the purposes of the Scheme,
or had accepted for those purposes, an assurance policy on his life that does not provide for payment of the whole of the sum assured on the maturity of the policy or on the death of the member occurring before the maturity date—that that policy does so provide; and

(iii) in the case of a member who, when he became a member, elected, under sub-section (3) of section nine of this Statute, that the contributions under section eleven of this Statute in respect of him should be held and accumulated by the Council—that there had been effected on the life of the member, for the purposes of the Scheme, when he became a member, an assurance policy providing for the payment of the whole of the sum assured on the member attaining his prescribed age or on the death of the member before attaining that age for such amount as would, in the opinion of the actuary, have been obtainable at an annual premium equal to those contributions;

(b) the actuary shall take into account any payments which are already required to be made by the Council in respect of the member in pursuance of paragraphs (a), (b) and (c) of sub-section (3) of section forty-one of this Statute.

Election for increased supplementary benefits

29A.—(1) In this section, unless the contrary intention appears—

‘the commencing date’, in relation to an eligible member, means the first day of July, One thousand nine hundred and sixty, or the date on which he is enrolled as a member, whichever is the later date;

‘the election date’, in relation to an eligible member, means the date on which he makes an election under this section.

Amended by Statute No. 63

(2) An eligible member may, before the first day of November, One thousand nine hundred and sixty-three or the expiration of the period of six months after the date on which the eligible member is enrolled as a member, whichever is the later, elect to contribute to the Fund in accordance with this section.

(3) Where an eligible member makes an election under this section, the Council shall deduct from each fortnightly payment of his salary falling due after the election date such amount as the actuary determines from time to time having regard to all the relevant circumstances and to actuarial principles and practice.
(4) Where, in relation to an eligible member who has made an election under this section, one or more fortnightly pay days have occurred during the period from and including the commencing date to and including the election date, the eligible member shall, upon making the election, forthwith pay to the Council an amount equal to the amount determined by the actuary under the last preceding sub-section multiplied by the number of those fortnightly pay days.

(5) The Council shall pay to the Fund any amounts received by it in pursuance of this section.

(6) Where an eligible member who has made an election under this section—

(a) resigns from the full-time service of the University and his resignation is accepted by the University; or

(b) is dismissed from the full-time service of the University,

the Council shall pay to him from the Fund an amount equal to the sum of the amounts contributed by him to the Fund under this section.

30. Subject to any arrangement made under section thirty-seven of this Statute, a deduction under this Part shall not be made from a payment of salary falling due—

(a) in any case—while the member is absent from the service of the University;

(b) where the member ceases to be an eligible member—after the member so ceases to be an eligible member; or

(c) where the member continues in office after the supplementary entitlement date—after that date.

31.—(1) Subject to this Part, in the event of the retirement of an eligible member at or after the supplementary entitlement date, he is entitled at his election—

(a) to be paid a pension for his life at a rate per annum equal to the rate per annum of the appropriate pension in relation to the member; or

(b) to take, in lieu of that pension—

(i) an amount equal to the moneys that would, under section eighteen of this Statute, be paid to, or used in purchasing an annuity payable to, the member, if he were not an eligible member; and

(ii) where the rate per annum of that pension exceeds the rate per annum, or, in the case of a married member, the initial rate per annum, of the annuity that could, in the opinion of the actuary, be pur-
chased in respect of the member with the amount referred to in the last preceding sub-paragraph—
a pension for his life at a rate per annum equal
to the excess.

(2) A member is not entitled to benefits under this section unless he transfers to the University all his rights and interests in the moneys referred to in sub-paragraph (i) of paragraph (b) of the last preceding sub-section.

(3) Subject to this Part, the widow of a former member who dies while in receipt of or entitled to a pension under this section is entitled to be paid a pension for her life, or until her remarriage, at a rate per annum that—

(a) in the case of the widow of a former member who made an election under section twenty-nine A of this Statute—is equal to five-eighths; or

(b) in any other case—is equal to one-half,
of the rate per annum of the pension of the deceased person.

(4) The widow of a former member who dies while in receipt of, or entitled to, the pension referred to in paragraph (a) of sub-section (1) of this section is entitled, in addition to the pension referred to in the last preceding sub-section, to a pension at the rate of Fifty-two pounds per annum in respect of each child in her custody who is under the age of sixteen years, or if the child is attending a school, college or university as a full-time student, twenty-one years.

32.—(1) Subject to this Part, an eligible member who is compulsorily retired because of invalidity or incapacity is entitled to be paid a pension for his life at a rate per annum equal to—

(a) one half of the rate per annum of his salary on retirement; or

(b) the rate per annum of the pension that would be the appropriate pension in relation to the member on his retirement if his university service were increased by the additional service that he would have if he continued in the service of the University without promotion or increase in salary until he reached the supplementary entitlement date,

whichever is the less.

(2) An eligible member may elect to take in lieu of the pension referred to in the last preceding sub-section—

(a) a transfer of his policy or, if the member so desires, an amount equal to the value, in the opinion of the actuary, of that policy, at the member’s retirement; or

(b) where the policy has matured before the retirement of the member—an amount equal to the moneys that
would, under section eighteen of this Statute, be paid to, or used for purchasing an annuity payable to, the member if he were not an eligible member, together with, in an appropriate case, a pension for his life at a rate per annum ascertained in accordance with the next succeeding sub-section.

(3) Where the rate per annum of the pension to which a member would be entitled under sub-section (1) of this section exceeds the rate per annum (or, in the case of a married member, the initial rate per annum) of the annuity that could, in the opinion of the actuary, be purchased in respect of a member—

(a) with an amount equal to the value, in the opinion of the actuary, of the policy of the member at his retirement; or

(b) with the moneys referred to in paragraph (b) of the last preceding sub-section,

the rate of the pension referred to in the last preceding sub-section is a rate per annum equal to the excess.

(4) A member, other than a member who takes a transfer of his policy in accordance with paragraph (a) of sub-section (2) of this section, is not entitled to benefits under this section unless he transfers to the University all his rights and interests in that policy or the moneys referred to in paragraph (b) of sub-section (2) of this section, as the case may be.

(5) Where the University has a lien or charge on the policy of the member by virtue of section sixteen of this Statute, the member is not entitled to benefits under this section unless he satisfies, or enters into an agreement with the Council to satisfy, that lien or charge.

(6) Subject to this Part, the widow of a former member who dies while in receipt of or entitled to a pension under this section is entitled to be paid a pension for her life, or until her remarriage, at a rate per annum that—

(a) in the case of the widow of a former member who made an election under section twenty-nine A of this Statute—is equal to five-eighths; or

(b) in any other case—is equal to one-half,

of the rate per annum of the pension of the deceased person.

(7) The widow of a former member who dies while in receipt of or entitled to the pension referred to in sub-section (1) of this section is entitled, in addition to the pension referred to in the last preceding sub-section, to a pension at the rate of Fifty-two pounds per annum in respect of each child in her custody who is under the age of sixteen years, or if the child is attending a school, college or university as a full-time student, twenty-one years.
(8) This section does not apply to a member who is compulsorily retired because of invalidity or incapacity that, in the opinion of the Council, is due to wilful action on the part of the member for the purpose of obtaining a pension under this section.

(9) The Council may, from time to time, suspend the payment, or vary the amount, of pension payable to a former member under this section if it is satisfied, after due enquiry, that—

(a) the invalidity or incapacity of the former member has ceased or substantially altered; and

(b) the suspension or variation, as the case may be, will not cause hardship to the former member.

33.—(1) Subject to this Part, where an eligible member dies leaving a widow who is, or is deemed by virtue of sub-section (4) of this section to be, the designated beneficiary of the member, the widow is entitled, at her election—

(a) to be paid a pension for her life, or until her remarriage, at a rate per annum that—

   (i) in the case of the widow of a member who made an election under section twenty-nine A of this Statute—is equal to five-eighths; or

   (ii) in any other case—is equal to one-half, of the rate per annum of the pension to which the member would have been entitled under sub-section (1) of the last preceding section if he had, on the day of his death, been compulsorily retired because of invalidity or incapacity and had satisfied the requirements of sub-sections (4) and (5) of that section; or

(b) to take, in lieu of that pension—

   (i) an amount equal to the moneys that would, under section seventeen or eighteen of this Statute, have been paid to the widow, if the member had not been an eligible member; and

   (ii) where the rate per annum of that pension exceeds the rate per annum of the annuity that could, in the opinion of the actuary, be purchased for the widow for her life, with the amount referred to in the last preceding sub-paragraph—a pension for her life, or until her remarriage, at a rate per annum equal to the excess.

(2) A widow who is entitled to be paid the pension referred to in paragraph (a) of the last preceding sub-section is entitled, in addition to that pension, to a pension at the rate of Fifty-two pounds per annum in respect of each child in her custody who is under the age of sixteen years or, if the child is attend-
ing a school, college or university as a full-time student, twenty-one years.

(3) The widow of an eligible member is not entitled to benefits under this section unless, in any case where the University has a lien or charge on the policy of the member by virtue of section sixteen of this Statute, she satisfies, or enters into an arrangement with the Council to satisfy, that lien or charge.

(4) If there is no designated beneficiary of an eligible member who dies leaving a widow, the widow shall, for the purposes of this section, be deemed to be the designated beneficiary of the member.

34.—(1) Subject to this Part, where a widow who is in receipt of a pension in respect of a child under sub-section (4) of section thirty-one, sub-section (7) of section thirty-two, or sub-section (2) of section thirty-three of this Statute dies, the child is entitled to be paid a pension at the rate of One hundred and fifty-six pounds per annum until he attains the age of sixteen years or, if the child is attending a school, college or university as a full-time student, twenty-one years.

(2) Subject to this Part, where—

(a) a former member dies while in receipt of or entitled to the pension referred to in paragraph (a) of sub-section (1) of section thirty-one, or sub-section (1) of section thirty-two, of this Statute;

(b) at the date of the death of the former member, the wife of the member is dead but, if she had survived the former member, would have been, or would have been deemed to have been, the designated beneficiary of the former member; and

(c) the former member leaves a child, the child is entitled to be paid a pension at the rate of One hundred and fifty-six pounds per annum until he attains the age of sixteen years or, if the child is attending a school, college or university as a full-time student, twenty-one years.

(3) A pension under this section is payable, on behalf of the child, to a person approved by the Council.

35. Where—

(a) a female eligible member dies leaving a widower who was dependent on her at the date of her death; or

(b) a female person who was, at the date of her retirement, an eligible member dies leaving a widower to whom she was married at the date of her retirement and who was dependent on her at the date of her death,
the provisions of sections thirty-one, thirty-two, thirty-three and thirty-four of this Statute apply as if the word 'widower' were substituted for the word 'widow' and with such other modifications as are necessary.

36. The Council may, if it thinks fit, determine, either before or after the making by a person of the election referred to in section thirty-one, thirty-two or thirty-three of this Statute, that the person shall be paid a pension in accordance with paragraph (a) of sub-section (1) of section thirty-one, sub-section (1) of section thirty-two or paragraph (a) of sub-section (1) of section thirty-three, as the case may be, and, upon the making of the determination—

(a) a pension shall be payable to that person accordingly; and

(b) that person ceases to have the right to make the election or an election made by that person shall not have any effect, as the case may be.

37. If an eligible member is absent from the service of the University, with or without remuneration from the University, he shall pay, either in advance or by fortnightly payments, to the University, in respect of his period of absence, an amount determined by the Council, not being an amount greater than the aggregate of—

(a) One and one-quarter pounds per centum of the salary of the member for that period; and

(b) three and one-quarter times the amount of the contributions, if any, that would have been payable by the member during that period under this Part, if he had not been so absent.

38.—(1) Subject to this section, where—

(a) an eligible member who, when he became a member, had a policy other than an endowment assurance policy dies or retires before that policy matures; or

(b) an eligible member who, when he became a member, elected, under sub-section (3) of section nine of this Statute, that the contributions under section eleven of this Statute in respect of him should be held and accumulated by the Council dies or retires,

a pension payable under this Part to or in respect of the member ceases to be payable to or in respect of the member from a date when, in the opinion of the actuary, that part of the Fund that is attributable to payments into the Fund made in respect of the member would, if the payments out of the Fund to or in respect of the member (including payments of premiums, if any, falling due for payment under an assurance policy on the life of the member) had been made from that part, be exhausted.
(2) In forming an opinion, for the purposes of the last preceding sub-section, in the case of a retired member, the actuary shall assume that there has been paid into the Fund in respect of the member an amount that is, in the opinion of the actuary, the value, at the time of forming the opinion, of the unmatured policies, if any, of the member.

(3) This section does not affect the rate of pension payable to or in respect of a member whose policy has matured.

39. — (1) When a pension ceases to be payable to or in respect of a person by virtue of the last preceding section, the Council may, in its absolute discretion, authorize the payment to the person who was in receipt of the pension of an allowance at a rate per annum not exceeding the rate per annum of the pension at the time of cessation.

(2) When a person to whom an allowance is being paid under the last preceding sub-section dies leaving a widow, widower or child who would, if the person had died while in receipt of a pension under this Part, have been entitled to be paid a pension under this Part, the Council may, in its absolute discretion, authorize the payment to the widow or widower, or to a person on behalf of the child, as the case may be, of an allowance at a rate per annum not exceeding the rate per annum of the pension that the widow, widower or child, as the case may be, would have been so entitled to be paid.

(3) The Council may cancel an allowance under this section at any time:

40. —(1) If a person in receipt of a pension under this Part—
(a) becomes bankrupt or, without the consent in writing of the Council, assigns or charges or attempts to assign or charge his interest or any part of his interest in the pension or does or suffers anything by which his interest in the pension, or any part of that interest, would or might, through his act or default or by operation or process of law, become vested in or payable to any other person; or
(b) becomes a lunatic or is, in the opinion of the Council, incapable of managing his own affairs, the pension ceases to be payable to the person.

(2) When a pension ceases to be payable to or in respect of a person by virtue of the last preceding sub-section, the Council may, in its absolute discretion, authorize the payment to the person who was in receipt of the pension, or any other person on his behalf, of an allowance at a rate per annum not exceeding the rate per annum of the pension at the time of cessation.

(3) When a person to whom or on whose behalf an allow-

ance is being paid under the last preceding sub-section dies leaving a widow, widower or child who would, if the person had died while in receipt of a pension under this Part, have been entitled to be paid a pension under this Part, the Council may, in its absolute discretion, authorize the payment to the widow, widower or to a person on behalf of the child, as the case may be, of an allowance at a rate per annum not exceeding the rate per annum of the pension which the widow, widower or child, as the case may be, would have been so entitled to be paid.

(4) The Council may cancel an allowance under this section at any time.

41.—(1) There shall be a Supplementary Superannuation Benefits Fund from which shall be paid the benefits provided for in this Part, other than an allowance under section thirty-nine of this Statute.

(2) The Council may, if, at any time, there are surplus moneys in the Fund, direct that the whole or part of an allowance under section thirty-nine of this Statute be paid out of the surplus moneys and, in that event, the whole or part, as the case may be, shall be paid from the Fund accordingly.

(3) The Council shall pay into the Fund—

(a) an amount equal to one and one-quarter pounds per centum of the salary of each member;

(3) The Board may in special cases and after recommenda-
tion from the Faculty Board, Director or Dean of the ap-

the Faculty Board, Director or Dean in the field shall be

from spending at least four terms in actual attendance at
the University.

16. (1) Except as provided in sub-rule (2) of this Rule, a
candidate and a research student who is not a candidate shall
spend his full time in the pursuit of his approved course.

(2) *The Board may admit as a candidate for the degree of
Master of Arts or Master of Science a person engaged in
employment other than the full-time pursuit of his course,
if in the Board's opinion that employment is of a nature
likely to assist the candidate in the pursuit of his course of
study and research. The Board shall not prescribe for the
approved course of such a candidate a period of less than
three or more than five years.

(3) Notwithstanding anything contained in sub-rule (2) of
this rule, the Board may antedate the commencement of the
course of any person employed by the University who is
admitted as a candidate for a degree under that sub-rule if

(i) in the English language; or
(ii) in some other language, if the Board had deter-

mitted as a candidate for the degree that he should
be permitted to submit a thesis, and should be ex-
amined, in that other language.

(b) (i) Save as provided in sub-rule (5) of this rule, a
written examination shall be held only on a direc-
tion of the Board made on the recommendation

University.
(iv) Subject to sub-rule (6) of this rule, the Registrar and the examiners shall arrange for the holding of a written examination so directed.

(1) The candidate shall not less than three months before the time at which he wishes to be examined give notice to the Registrar in such form as the Board requires. The Faculty Board, Director or Dean may dispense with this requirement in special cases.

(2) (a) The Degree Committee shall after recommendation from the Faculty Board, Director or Dean of the appropriate Research School appoint not fewer than two examiners in such a manner that except by special leave of the Board one is not a member of the staff of this University and one, other than the candidate's supervisor should he be an examiner, is likely to be able to take part in the oral examination.

(b) The Degree Committee may at any stage of the examination appoint an additional examiner and shall do so in the event of disagreement between two original examiners unless the Degree Committee is of the opinion that there are special circumstances which render the appointment of an additional examiner unnecessary.

(c) If none of the examiners appointed under paragraphs (a) and (b) above is available for the oral examination an additional examiner shall be appointed by the Degree Committee. The examiner or examiners present at the oral examination shall act for absent examiners and shall submit a report on the oral examination to them.

(3) (a) Subject to the provisions of paragraph (b) of this sub-rule, a candidate enrolled on or after 1 January 1959 shall within the last six months of his course present to the Registrar three copies of a thesis in such form as the Board prescribes, embodying the results of his approved research. The thesis shall be a complete study incorporating an account of the result of the candidate's work during his approved course.

(aa) The thesis must be a connected piece of writing which may comprise a series of papers on related topics, provided that these are accompanied by an adequate explanation of their relationship to each other and to the wider context of the subject. The thesis or component parts thereof may, if already published, be submitted in the published form.
(b) In special circumstances the Board, on the recommendation of the Degree Committee, may grant an extension of time of not more than one year for the submission of the thesis. In very exceptional circumstances the Board may grant a further extension of time but in no circumstances may the total extension of time exceed two years.

(4) A candidate enrolled before 1 January 1959 shall present his thesis in accordance with the rules in force at the time of his enrolment.

(5) (a) The candidate shall be examined orally on the substance of his thesis and on his knowledge of the subject unless the Degree Committee on the recommendation of the examiners exempts the candidate from oral examination. The Degree Committee shall not, except in very exceptional circumstances, exempt from oral examination a candidate who has submitted for examination work done jointly with another person. The oral examination shall, except with the permission of the Degree Committee, be held in Canberra.

(b) If in the opinion of the Degree Committee satisfactory arrangements for the holding of an oral examination cannot be made and the candidate should not be exempted from an oral examination, the Committee shall require the candidate to take a written examination covering the field ordinarily covered by an oral examination, and the Registrar shall make arrangements with the examiners accordingly.

(c) If the examiners are not fully satisfied by the oral examination they may recommend to the Degree Committee that the candidate shall take a written examination, the Degree Committee may require the candidate to take such examination, and the Registrar shall make arrangements with the examiners accordingly.

(6) The Board may give directions as to the procedure to be followed in the conduct of examinations; subject to these directions and to these Rules, the Degree Committee may act as it thinks fit in any particular examination.

(7) Each examiner, though at liberty to consult or correspond with the other examiner or examiners, is asked to submit an independent report after the whole examination has been completed. This report shall include a reference to any written examination directed
under sub-rule (tA) (b) of this rule, to any oral examination, and to any written examination held in lieu of or in addition to an oral examination, and a recommendation that the candidate be admitted or be not admitted to the degree.

(8) (a) When the Degree Committee has concluded its consideration of the examiners’ reports it shall make a recommendation to the Board that the candidate be admitted or be not admitted to the degree.

(b) If the Degree Committee recommends that a candidate be not admitted it shall further recommend to the Board whether the candidate should be permitted to revise and resubmit his thesis or, if the revision necessary is sufficiently substantial, to rewrite the thesis for a new examination.

(c) The Degree Committee shall recommend a period not exceeding twelve months from the date of the Board’s decision in which a thesis which is to be revised or rewritten shall be submitted.

(9) (a) If the Board, having considered the recommendations of the Degree Committee, is of opinion that the candidate is fit to be admitted to the degree it shall recommend to the Council that he be admitted and on his fulfilling the prescribed conditions he shall be so admitted.

(b) The Board may, on the recommendation of the Degree Committee, decide that the candidate be not admitted to the degree but be re-examined. The Board shall decide whether the re-examination shall be carried out by the examiners appointed in the first place or by new examiners, and in the latter case the new examiners shall be appointed by the Degree Committee. The re-examination may take the form of a revision or re-writing of the thesis, or of a written examination in such subjects as the Board on the recommendation of the Degree Committee shall direct. So far as applicable the preceding sub-rules of this rule shall apply to a re-examination under this sub-rule, but a revised or rewritten thesis shall be submitted and a written examination held not later than twelve months from the date of the Board’s decision.

(c) The Board may refer a recommendation back to the Degree Committee for further consideration.
21. The Faculty Board, Director or Dean of any Research School may make such additional regulations not inconsistent with these rules concerning the examination of candidates in that School as it thinks fit, and compliance with such regulations shall for a candidate in that School be a condition of taking an examination.

The Board shall appoint not fewer than two examiners, one of whom shall be an external examiner. The Board may at any stage of the examination appoint an additional examiner. Each examiner shall submit an independent report on the examination.

(2) Each examiner shall recommend to the Board that the candidate be admitted, or be not admitted, to the degree.

(3) If the Board is of opinion that the candidate has made an original and substantial contribution to knowledge and scholarship, it shall recommend to the Council that he be admitted to the degree and on his fulfilling the prescribed conditions he shall be so admitted.

24. A candidate for any degree shall not submit for examination work in respect of which a degree has been awarded in any University.

25. (1) Subject to sub-rule (2) of this rule each candidate for a degree shall before the degree is conferred deposit in the Library a copy of every thesis or published work successfully submitted for examination for the degree.

(2) The Degree Committee may, on the recommendation of the Librarian, exempt a candidate for the degree of Doctor of Letters or Doctor of Science or Doctor of Laws from the provisions of this rule or specify which of the works submitted shall be deposited.

2. (1) A Faculty may, by resolution, delegate all or any of its powers or functions under these Rules with respect to an examination in a subject to the head of the department responsible for that subject.

(2) A delegation under this rule is revocable by resolution
of the Faculty and does not prevent the exercise of a power or function by the Faculty.

Part II—Examinations in Subjects for Bachelors' Degrees or for Diplomas

3. This Part applies to examinations in subjects for the degree of Bachelor or for Diplomas.

4. An examination in a subject to which this Part applies shall, subject to any directions of the Board of the School of General Studies, be held at such time and place, and in such manner, as the Faculty responsible for the teaching of that subject directs.

(a) he makes the application, accompanied by the prescribed fee, before the examination is held;
(b) he pays any additional prescribed fee; and
(c) the Faculty is satisfied that the granting of permission to the student to sit for the examination will not interfere with the arrangements for holding the examination.
6. (1) There shall be not less than two examiners for an examination in a subject, who shall be appointed by the Faculty concerned on the recommendation of the head of the department concerned.

(2) The head of the department concerned or, if he is not one of the examiners, one of the examiners appointed by him, shall be the chairman of the examiners.

(2) Where a student so informs the supervisor during the course of an examination, the supervisor shall notify the Registrar accordingly.

(3) Upon receiving such a notification the Registrar shall furnish a report to the Dean of the Faculty concerned, who shall inform the examiners and the Faculty of the details of the report.
(4) The examiners may take the report into account in examining the student in the subject.

(5) The Faculty may permit the student to sit for a special examination in the subject.

9. (1) A candidate at an examination shall not communicate with the examiners concerning the examination.

(3) The head of the department shall forward the examiners' reports to the Faculty and, if the examiners' reports differ as to the result of the examination, shall inform the Faculty of that fact.

(4) Where the examiners' reports differ, the Faculty may invite the examiners to consult, or consult further, with the object of resolving their differences or submitting a joint report, or may take such other action as it thinks fit.

12. (1) Unless the Faculty concerned otherwise determines, a thesis or other work submitted for the degree of Master shall be in the English language.

The voter is not required to write a number against the name of every candidate.

7. Each voter other than a voter at an election held in accordance with Rule 20 of these Rules shall—
    (a) Place his voting paper in the envelope marked 'Voting Paper';
    (b) seal the envelope and place it in the envelope addressed to the Returning Officer; and

9. At the close of the poll at an election held in accordance with Rule 20 of these Rules, the Returning Officer or his deputy shall open the ballot box containing the voting papers and ascertain the result of the election.

10. Each candidate shall be entitled to nominate a scrutineer to represent him at the scrutiny.

11. Neither the Returning Officer nor anyone acting as his deputy nor any scrutineer shall in any way disclose or aid in disclosing in what manner any voter has voted.

12. No voting paper shall be accepted unless it is received by the Returning Officer before the close of the poll.
13. The Returning Officer shall decide whether any voting paper shall be accepted or rejected.

14. In an election at which only one candidate is to be elected the result of the election shall be determined in the manner following:

(i) the Returning Officer shall count the first preference votes given for each candidate on all unrejected voting papers;

(ii) the candidate who has received the largest number of first preference votes shall, if that number constitutes an absolute majority of votes, be elected;

(iii) if no candidate has received an absolute majority of first preference votes, the counting of votes shall proceed as follows:

(a) the candidate who has received the fewest first preference votes shall be excluded, and each voting paper counted to him shall be counted to the candidate next in the order of the voter's preference;

(b) if a candidate then has an absolute majority of votes he shall be elected, but if no candidate then has an absolute majority of votes, the process of excluding the candidate who has the fewest votes, and counting each of his voting papers to the unexcluded candidate next in the order of the voter's preference, shall be repeated until one candidate has received an absolute majority of votes; and

(c) the candidate who has received an absolute majority of votes shall be elected.

15. In an election other than an election under Part III of these Rules, at which more than one candidate is to be elected the result of the election shall be determined in the manner following:

(1) the first preference votes given for each candidate on all unrejected voting papers shall be counted;

(2) the aggregate number of such first preference votes shall be divided by one more than the number of candidates required to be elected, and the quotient increased by one, disregarding any remainder, shall be the quota, and (except as hereinafter provided in sub-section 10) no candidate shall be elected until he obtains a number of votes equal to or greater than the quota;

(3) any candidate who has, upon the first preference votes being counted, a number of such votes equal
to or greater than the quota shall be declared elected;

(4) where the number of such votes obtained by any candidate is equal to the quota, the whole of the voting papers on which a first preference vote is recorded for such elected candidate shall be set aside as finally dealt with;

(5) where the number of such votes obtained by any candidate is in excess of the quota, the proportion of votes in excess of the quota shall be transferred to the other candidates not yet declared elected, next in the order of the voter’s preferences, in the following manner:

(a) all the voting papers on which a first preference vote is recorded for the elected candidate shall be re-examined, and the number of second preference votes, or (in the case provided for in section 18) third or next consecutive preferences, recorded for each unelected candidate thereon shall be counted;

(b) the surplus of the elected candidate shall be divided by the total number of votes obtained by him on the counting of the first preference votes, and the resulting fraction shall be the transfer value;

(c) the number of second or other preferences ascertained in paragraph (a) to be recorded for each unelected candidate, shall be multiplied by the transfer value;

(d) the resulting number shall be credited to each unelected candidate, and added to the number of votes obtained by him on the counting of the first preference votes;

(6) (a) where, on the counting of the first preference votes or on any transfer, more than one candidate has a surplus, the largest surplus shall be first dealt with. If then more than one candidate has a surplus, the then largest surplus shall be dealt with, and so on; Provided that, if one candidate has obtained a surplus at a count or transfer previous to that at which another candidate obtains a surplus the surplus of the former shall be first dealt with;

(b) where two or more surpluses are equal, the surplus of the candidate who was the highest on the poll at the count or transfer at which they last
had an unequal number of votes shall be first dealt with, and if they had an equal number of votes at all preceding counts or transfers, the Registrar shall decide which candidate’s surplus shall be first dealt with.

(7) (a) Where the number of votes obtained by a candidate is raised up to or above the quota by a transfer as aforesaid, he shall thereupon be declared elected. And in such case, notwithstanding the fact that he may have reached the quota, such transfer shall be completed, and all the votes to which he is entitled therefrom shall be transferred to him, but no votes of any other candidate shall be transferred to him;

(b) where the number of votes obtained by a candidate is raised up to, but not above, the quota by a transfer as aforesaid, the whole of the voting papers on which such votes are recorded shall be set aside as finally dealt with:

(c) where the number of votes obtained by a candidate is raised above the quota by a transfer as aforesaid, his surplus shall be transferred to the candidates next in the order of the voters’ respective preferences, in the following manner:

(i) The voting papers on which are recorded the votes obtained by the elected candidate in the last transfer shall be re-examined, and the number of third, or (in the case provided for in section 18) next consecutive preferences recorded for each unelected candidate thereon counted;

(ii) the surplus of the elected candidate shall be divided by the total number of voting papers mentioned in paragraph (i), and the resulting fractions shall be the transfer value;

(iii) the number of second (or other) preferences, ascertained in paragraph (i), to be recorded for each unelected candidate, shall be multiplied by the lastmentioned transfer value;

(iv) the resulting number shall be credited to each unelected candidate, and added to the number of votes previously obtained by him.

(8) (a) where, after the first preference votes have been counted and all surpluses (if any) have been transferred as hereinbefore directed, no candidate, or less than the number of candidates required to be elected, has or have obtained the quota, the can-
didate who is lowest on the poll shall be excluded, and all the votes obtained by him shall be transferred to the candidates next in the order of the voter's respective preferences, in the same manner as is directed in sub-section (5);

(b) the votes obtained by such excluded candidate as first preference votes shall first be transferred, the transfer value of each vote in this case being one;

(c) the other votes of such excluded candidate shall then be dealt with in order of the transfers in which, and at the transfer value at which, he obtained them;

(d) each of the transfers which takes place under the two previous clauses of this sub-section shall be deemed for all purposes to be a separate transfer.

(9) (a) Where a number of votes obtained by a candidate is raised up to or above the quota by any such transfer as aforesaid, he shall thereupon be declared elected. And in such case, notwithstanding the fact that he may have reached the quota, such transfer shall be completed, and all the votes to which he is entitled therefrom shall be transferred to him, but no other votes shall be transferred to him;

(b) where the number of votes obtained by a candidate is raised up to, but not above, the quota, by any such transfer as aforesaid, the whole of the voting papers on which such votes are recorded shall be set aside as finally dealt with;

(c) where the number of votes obtained by a candidate is raised above the quota by any such transfer as aforesaid, the surplus shall be transferred to the candidates next in the order of the voters' respective preferences in the same manner as is directed in sub-section (7), paragraph (c); Provided that such surplus shall not be dealt with until all the votes of the excluded candidate have been transferred;

(d) where any surplus exists it shall be dealt with before any other candidate is excluded.

(10) The same process of excluding the candidate lowest on the poll and transferring his votes to other candidates shall be repeated until all the candidates, except the number required to be elected, have been excluded, and the unexcluded candidates who have
not already been so declared, shall then be declared elected.

16. In an election under Part III of these Rules at which two candidates are to be elected the result of the election shall be determined in the following manner:

(i) The Returning Officer shall prepare a list of the candidates, shall count the first and second preference votes given for each candidate on all unrejected voting papers and shall credit the aggregate of those votes to the candidates.

(ii) The candidate who has received the greatest aggregate number of first and second preference votes shall, if that number constitutes an absolute majority of the votes, be elected.

(iii) If no candidate has received an absolute majority of the votes, the counting of votes shall proceed as follows:

(a) the candidate who has received the lowest aggregate number of first and second preference votes shall be excluded and each voting paper on which a first or second preference vote has been counted to him shall be counted to the candidate next in the order of the voter's preference;

(b) if a candidate then has received an absolute majority of votes, he shall be elected;

(c) if no candidate has received an absolute majority of votes, the procedure of excluding the candidate who has received the lowest number of votes and counting each of the voting papers counted to him to the unexcluded candidate next in the order of the voter's preference shall be repeated until one candidate has received an absolute majority of votes; and

(d) the candidate who has received an absolute majority of votes shall be elected.

(iv) Where a candidate is elected—

(a) the Returning Officer shall again prepare a list of the candidates (including any candidates excluded in the course of counting of votes under sub-section (3) of this section) and credit each candidate with the first and second preference votes counted to him in accordance with sub-section (i) of this section; and

(b) the elected candidate shall be excluded and each voting paper on which a first or second preference vote has been counted to him shall be re-
examined and counted to the candidate next in the order of the voter's preference.

(5) If none of the remaining candidates has then received an absolute majority of votes, the counting of votes shall proceed in the manner provided by sub-section (3) of this section.

(6) Where all except two of the candidates have been excluded and each of the remaining candidates has received the same number of votes—

(a) if no candidate has previously been elected, each of the candidates shall be elected;

(b) if a candidate has previously been elected—

(i) the candidate who received the largest number of first preference votes shall be elected;

(ii) in the event of each candidate receiving the same number of first preference votes—the candidate who received the largest aggregate number of first and second preference votes shall be elected; and

(iii) in the event of each candidate receiving the same aggregate number of first and second preference votes—the Returning Officer shall determine by lot which of the candidates shall be elected.

17. Where two or more candidates have the same number of votes and it becomes necessary to exclude one of them, then whichever of the candidates was lowest on the poll at the last count or transfer at which they had an unequal number of votes, shall be excluded and, if such candidates have an equal number of votes at all preceding counts or transfers or if there was no preceding count or transfer, the Returning Officer shall decide by lot which candidate shall be excluded.

18. In determining which candidate is next in the order of the voter's preference, any candidates who have been declared elected or who have been excluded shall not be considered, and the order of the voter's preference shall be determined as if the names of such candidates had not been on the voting paper.

19. Where on any count or transfer it is found that on any voting paper there is no candidate next in the order of the voter's preference, that voting paper shall be set aside as exhausted.

20. The Returning Officer may if he thinks fit, on the request of any candidate setting forth the reasons for the re-
quest, or of his own motion, re-count the voting papers received in connection with any election.

20. (1) Where, before the poll is declared at an election, the Returning Officer is satisfied that the election has been vitiated by reason of an irregularity in the course or conduct of the election, he may declare the election to be void from the commencement of the election or from such point in the proceedings of the election as he specifies in the declaration, being a point in those proceedings after the notification of the fact that the election was necessary but before the occurrence of the irregularity.

(2) Where, in pursuance of the last preceding sub-section, the Returning Officer declares an election to be void from the commencement of the election, he shall, as soon as practicable after making the declaration, conduct a further election in accordance with these Rules in place of the void election.

(3) Where, in pursuance of sub-section (1) of this section, the Returning Officer declares an election to be void from a point in the proceedings after the notification of the fact that the election was necessary, he shall determine what further proceedings in the election are necessary to ensure that the election will be regularly conducted and shall, subject to the next succeeding sub-section, conduct those further proceedings in accordance with these Rules in place of the void proceedings.

(4) In the conduct of any further proceedings in an election under the last preceding sub-section, the Returning Officer may, notwithstanding anything contained in section 1 or 2 of this Schedule, determine the intervals to be allowed between the occurrence of any events in the course of those further proceedings.

21. (1) The Returning Officer shall retain the voting papers on which votes have been recorded at an election for the period of three months after the declaration of the poll at that election.

(2) After the expiration of that period, the Returning Officer may destroy the voting papers.

DISCIPLINE ORDER

(Made by the Master and Fellows, 23 October 1957)

1. In this Order—

‘The House’ means University House, and includes the buildings, courtyards and out-houses of University House and the lawns and gardens surrounding University House bounded by Balmain Crescent, Liversidge Street, Garran Road, and the water-course between University House and the Old Hospital Buildings which runs from Balmain Crescent to Garran Road.

‘The Master’ includes any person authorized under the provisions of this Order to exercise the powers of the Master.

‘Prejudicial conduct’ means conduct prejudicial to the good order of the House committed in the House, and includes breach of a provision concerning conduct in the House contained in a Statute of the University, a Rule of the Council or an Order of the Master and Fellows.

2. (1) The Master or a Fellow may require any person (not being a member or resident of the House) to leave the House.

(2) A person who has been required to leave the House under (1) hereof shall forthwith leave the House and shall not enter the House thereafter unless given permission to do so by the Master.

(3) A Fellow shall report to the Master the circumstances of any action taken by him under this section.

3. (1) If, in the opinion of the Master or a Fellow, a member or resident of University House has engaged in prejudicial conduct, the Master or such Fellow may make an order (herein called a suspension order) suspending the rights and privileges of such member or resident (herein called a suspended person), and shall communicate such order, either verbally or in writing, to the suspended person.

(2) If so requested, the Master or a Fellow when communicating a suspension order shall give the suspended person a written summary of his reasons.

(3) A suspension order shall operate for such period as the Master or Fellow making it specifies, but not exceeding forty-eight hours from the time of its communication.

(4) Subject to (5) hereof, a suspended person shall leave the House forthwith and shall not enter the House for the period of the suspension.
(5) A suspended person may attend the Master in the House or elsewhere and request the Master to call a Special Meeting of the Governing Body to consider the suspension. The Master shall as soon as is conveniently possible call such meeting, at which the person who made the suspension order and (if he desires) the suspended person shall attend. The Governing Body may hear such persons as it thinks fit and (if he desires) shall hear the suspended person and any person whose presence the suspended person procures to give evidence in support of his defence, and after such hearing the Governing Body may confirm, vary or quash the suspension order, or may exercise the powers given by sub-section (1) of the next succeeding section.

4. (1) In respect of any member or resident of the House (herein called a defendant) who has engaged in prejudicial conduct, the Governing Body may exercise the following powers:

(a) it may cancel a defendant's membership;
(b) it may suspend a defendant's membership for such period as it thinks fit, entirely or in relation to such privileges of membership as it specifies;
(c) it may exclude a defendant from the House for such period as it thinks fit, generally or in relation to such parts of the House or the use of such facilities of the House as it thinks fit;
(d) it may impose a fine not exceeding twenty pounds;
(e) it may refer the matter to the Vice-Chancellor, to be dealt with by the general disciplinary processes of the University.

(2) Except in the case of a defendant who is a suspended person under section 3, and in respect of whose suspension a Special Meeting of the Governing Body is held under subsection (5) of section 3, the Master shall give written notice to a defendant of the prejudicial conduct alleged against him, and of the time and place of a Special Meeting of the Governing Body at which such allegation is to be considered. The Master shall summon a Special Meeting of the Governing Body accordingly at which the Governing Body may hear such evidence as it thinks fit and (if he desires) shall hear the defendant and any persons whose presence the defendant procures to give evidence in support of his defence, and after such hearing if the Governing Body decides that the defendant has engaged in prejudicial conduct, it may exercise such one or combination of powers given by this section as is appropriate.
5. (1) A decision of the Governing Body under sections 3 and 4 hereof shall be final.

(2) Notwithstanding anything contained in this Order, the Master may at any time permit a suspended person or a person who has been excluded from the House to enter the House for such special purpose and for such period as the Master specifies, but subject to such permission the suspension order or the exclusion as the case may be shall remain in effect.

(3) The Governing Body may in its discretion at any time remit or modify any penalty imposed under section 4.

6. Notices required to be given or served under this Order shall be sufficiently given or served if left at or posted to the place of residence of the person entitled to the notice last known to the Master.

7. (1) A Special Meeting of the Governing Body convened for any of the purposes of this Order may adjourn its proceedings from time to time and shall do so (and shall notify a suspended person or defendant accordingly) if in its opinion the suspended person or defendant has not had adequate notice of the prejudicial conduct alleged against him.

(2) Fines shall be paid to the Master within seven days of imposition.

(3) If a suspended person or defendant fails to comply with a suspension order or a decision made in his case by the Governing Body, such failure shall constitute prejudicial conduct for the purpose of this Order and may be separately dealt with as such under section 4 hereof.

8. When the Governing Body makes an order under section 4 cancelling membership or suspending or excluding from the House in the case of a member or employee of the University, the Master shall report the circumstances to the Vice-Chancellor.

9. The powers of the Master under this Order shall in his absence be exercised by the Deputy Master, or in the absence of the Master and the Deputy Master, by a Fellow authorized for such purpose by the Master or the Deputy Master or by a Special Meeting of the Governing Body.

PRINCIPAL ACTIVITIES

Chancellorship

Sir Howard Florey, now Lord Florey of Adelaide, Provost of The Queen's College, Oxford, and President of the Royal Society, has
accepted Council's invitation to serve as Chancellor for a period of two years from 1 August 1965, on the expiry of Sir John Cockcroft's term of office. As a member of the Academic Advisory Committee Sir Howard was closely associated with the concept of the University and in particular, with the establishment of the John Curtin School of Medical Research. Lord Florey will become the University's third Chancellor.

Visit of the Chancellor and Lady Cockcroft
The Chancellor (Sir John Cockcroft) and Lady Cockcroft visited the University in September. During his stay of 12 days the Chancellor chaired the September meeting of Council, officially opened the H. C. Coombs Building of the Research Schools of Social Sciences and Pacific Studies, attended the opening of the Chancellery and conferred honorary degrees on Sir Owen Dixon and the Hon. J. J. Dedman, presided at a University Dinner and attended Commencement Dinners at University House and Bruce Hall. He also officially opened the Commonwealth Scientific and Industrial Research Organization Computing Research Centre, visited the radio telescope at Parkes and addressed the Australian Capital Territory Branch of the Australian Institute of Physics.

Deputy Vice-Chancellorship
Emeritus Professor A. D. Trendall resigned the office of Deputy Vice-Chancellor on 29 September. The University records its deep appreciation of his loyal service throughout his tenure of office which commenced in March 1958. Council on the recommendation of the Vice-Chancellor and with the concurrence of the Professorial Board, appointed Professor A. H. Ennor, C.B.E., F.A.A., Dean of the John Curtin School of Medical Research, to succeed Emeritus Professor Trendall as Deputy Vice-Chancellor, for a period of two years.

University Chaplains
The University has decided not to appoint chaplains in the University; religious bodies may appoint ministers of religion as chaplains and the University will provide facilities to enable chaplains to meet students and staff.

Affiliated Colleges
The University has approved in principle the grant of affiliation to colleges, not under direct University control, established to provide residence for University students.

University Press
The University has approved in principle, as a basis for submission to the Australian Universities Commission for the triennia 1967-9 and 1970-3, a recommendation of the academic boards that a Uni-
versity Press should be established not later than 1974. The Press would be a Publishing House without printery.

Fellowships in the Creative Arts
The University has established two classes of Fellowships in the Creative Arts as a means to stimulate the output of creative work in Australia. The Class A Fellowships are intended to free Australian artists from economic anxiety and routine tasks for a substantial period of time; Class B Fellowships will enable distinguished artists usually from abroad, including Australian 'expatriates', to be associated with the University for shorter periods. Both classes are open to creative artists of all types, e.g. musicians, writers, sculptors, painters. The first awards have now been made — a Class A Fellowship to Mr John Perceval for a period of two years in the first instance; a Class B Fellowship to Mr Sidney Nolan for a period of six months.

Office of University Fellow
Council has established the office of University Fellow having in mind that the University from time to time will wish to make special arrangements to honour a person working in the University after retirement. The number of such Fellowships tenable at any one time would not normally exceed three. Professor Sir Keith Hancock who will retire at the end of 1965 has accepted the first University Fellowship under the scheme.

Opening of the Chancelry
The Chancelry of the University, a dignified five-storey building, was officially opened by Sir Leslie Martin, C.B.E., F.R.S., Chairman of the Australian Universities Commission, on 10 September. The building will provide a permanent centre for the governing body and the University administration. A feature of the building is the 'R. C. Mills Room', named in honour of the late Professor Richard Charles Mills, first Chairman of the University's Interim Council.

Opening of the H. C. Coombs Building
The H. C. Coombs Building which houses the Research Schools of Social Sciences and Pacific Studies was officially opened by the Chancellor, Sir John Cockcroft, at an informal ceremony on 11 September. The building comprises two hexagons, one housing the Research School of Social Sciences and the other the Research School of Pacific Studies. In the course of the proceedings Professor P. H. Partridge, Deputy Chairman of the Board of the Institute of Advanced Studies and Director of the Research School of Social Sciences, paid tribute to the Pro-Chancellor, Dr H. C. Coombs, after whom the new building is named. He referred to Dr Coombs' wise, shrewd and liberal share in the government of the University,
and said that his presence in and about the University had done much to stimulate intellectual life. It was therefore a source of pleasure and pride to all concerned when Dr Coombs was persuaded to allow his name to be associated with the building.

**Academic Salaries**
Council adopted the new salary scales indicated in the Report of the Eggleston Inquiry into Academic Salaries.

**Retiring Age**
The University, after inquiry, has confirmed the present practice whereby Professors and other members of the academic staff retire not later than at the age of 65.

**First Asian Fellowship**
The University has awarded the first Asian Fellowship, which commemorates the visit of H.M. The King of Thailand in 1962, to H.S.H. Prince Subhadradis Diskul, Chief Curator of the National Museum, Bangkok, Acting Dean of the Faculty of Archaeology in Silpakorn University, and special lecturer in Far Eastern Arts in Chulalongkorn University and Mahamakut Rajvidyalai, a university for Buddhist monks. Prince Subhadradis will arrive in Canberra in April 1965 and will hold the Fellowship for six months.

**Forestry Science**
As envisaged in the previous Report, the University has established a Department of Forestry within the Faculty of Science. The Department of Forestry offers a course leading to the degree of Bachelor of Science (Forestry) and facilities for postgraduate studies in Forestry. The University has set up an Advisory Body on Forestry Education, including representatives of supporting forestry services, to present the views and needs of the practice of the profession to the University. Dr. J. D. Ovington, Head of the Woodland Section of the Nature Conservancy in Britain, has been appointed Professor and Head of the Department of Forestry, and is expected to take up duty in May 1965.

**Research School of Biological Sciences**
The question of establishing a Research School of Biological Sciences in the University has been approved in principle by both academic boards, and a submission has been put before the Australian Universities Commission. The Australian Academy of Science has urged the University to expand its work in this field.

**Department of Clinical Science**
Following a letter from the Chairman of the Canberra Community Hospital Board, informal discussions have taken place between
representatives of the University and of the Board relating to the establishment and running of a Department of Clinical Science of the John Curtin School of Medical Research to be located at the Canberra Community Hospital. Agreement has been reached on the space and facilities needed and on matters affecting organization and control.

Medical Education in the School of General Studies

Informal discussions have taken place on the possible establishment of an undergraduate medical school in the 1970-2 triennium. A seminar on medical education is likely to be held in the University in 1966 to which leading world authorities on medical education would be invited.

New Departments and Chairs Established

The University established the following new Departments and Chairs.

Second Chair of Biochemistry in the John Curtin School of Medical Research — to be filled.

Second Chair of Anthropology and Sociology in the Research School of Pacific Studies — Dr W. E. H. Stanner.

Department of German in the Faculty of Arts — Professor H. Kuhn as Professor and Head of the Department.

Second Chairs of English, History and of Political Science in the Faculty of Arts — to be filled.

Department of Accounting and Public Finance in the Faculty of Economics — Professor R. L. Mathews as Professor and Head of the Department.

Department of Forestry in the Faculty of Science — Dr J. D. Ovington as Professor and Head of the Department.

DEVELOPMENTS OF 1964 IN SUMMARY

THE INSTITUTE OF ADVANCED STUDIES

Throughout the year plans for the establishment of the fifth Research School of the Institute, The Research School of Chemistry, were discussed with the University's advisers in the United Kingdom. Designs and specifications of the building to house the School were worked out, and tenders for its construction will be called before the middle of 1965. The planning of the School has proceeded smoothly and there is every reason to believe that research will have
commenced in the School by about the beginning of the next triennium.

Following Professor Catcheside's arrival in Canberra to take up his appointment as Head of the new Department of Genetics in the John Curtin School of Medical Research, discussion of the proposed Research School of Biological Sciences was continued. An outline of the academic structure of the School was worked out together with concrete proposals for its foundation and early development in the 1967-9 triennium. The proposals were approved by the Council at its November meeting and incorporated in the University's submission to the Australian Universities Commission for the 1967-9 triennium.

Representatives of the University and of the Canberra Community Hospital carried on discussions in connection with the proposal to establish a Department of Clinical Science in the John Curtin School of Medical Research, the Department to be accommodated within the Hospital. Agreement on all substantial questions was reached by the representatives of the University and the Hospital and it will be possible to advertise the Chair of Clinical Science early in 1965.

Research in the four Schools of the Institute continued for the most part in the directions established in earlier years. The Research Schools of Social Sciences and Pacific Studies moved to their new permanent building, the H. C. Coombs Building, in June: the Building was formally opened by the Chancellor in September. The vacating of the Old Hospital Buildings by the two Social Science Schools left the way clear for the erection of the next stage of the building of the Department of Geophysics and Geochemistry.

Forty-eight students received the degree of Doctor of Philosophy at the Conferring of Degrees Ceremony in April. At the end of 1964, there were 270 candidates for the degree of Doctor of Philosophy enrolled in the Research Schools and 60 in departments of the School of General Studies. During the year 136 scholarships were taken up. Of the 330 students enrolled for the degree of Doctor of Philosophy at the end of the year 190 came from overseas.

THE SCHOOL OF GENERAL STUDIES

In many countries throughout the world student enrolments during the past five years have increased at an abnormally high rate and Australia has been no exception. The very high birth rates of the later years of World War II, and of the years immediately after, were reflected in a rising rate of university enrolments. In the Australian scene total student numbers rose by just over 41 per cent for the five years 1960-4, but for the School of General Studies the increase was no less than 123 per cent! Only Monash University had a faster rate of growth during this period in Australia; its rapid expansion was a necessity to cope with demands which could
no longer be met by the University of Melbourne. The figures of
growth are:

Such a rapid rate of growth might have caused serious embar­
rassment and difficulties but for two factors. First, there was in
most faculties space and staff available to cope with the flood of
numbers, albeit with some difficulty. Second, the financial provision
made by the Commonwealth Government, on the advice of the
Australian Universities Commission, made possible a rapid ex­
pansion of staff and teaching facilities. It is to be noted, however,
that actual enrolments each year over this period have run ahead
of the predictions on which financial estimates were based. It now
appears likely that some limitation of enrolments will soon be
necessary if the standard of teaching and facilities is to be main­
tained.

The pattern of enrolments by faculties altered very little in 1964
compared with the previous year. Arts remained easily the largest
faculty with a total enrolment of about 1,000 students; the approxi­
mate figures for other faculties were — Economics 370, Science
320, Law 220 and Oriental Studies 100. These figures include all
enrolments for the degrees of master and bachelor, as well as a
certain number (about 150) enrolled for individual subjects but
not for degree courses. The figure of new enrolments in all cate­
gories in 1964 was 870 compared with 811 in the previous year. The
enrolments for higher degrees and honours degrees also showed
a significant increase. A gratifying feature was the continued rise
in the proportion of full-time students enrolled.

As would be expected, the number of degrees conferred has
risen sharply; from 85 in 1963 to 132 in 1964. There were 12 master's
degrees in the total, and the graduates from individual faculties
were Arts 63, Economics 37, Science 22, Law 6 and Oriental Studies
4. The number of honours degrees awarded also showed a very
satisfactory increase.

The growing numbers of students has been matched by a cor­
responding expansion in physical facilities. The Zoology Building
was completed and occupied late in the year, while the Oriental
Studies Building came close to completion. Increased residential accommodation was provided in Bruce Hall by extension of the Dining Hall and a new block to accommodate 56 women members. These opened in February 1964. Lennox House (which had previously housed some 20 to 30 Commonwealth employees in addition to some 90 to 100 students) became a University Hall of Residence housing about 115 students and staff. The construction of a new hall (Burton Hall) to house 250 students was also well advanced by the end of 1964. This will be the first stage of a complex of two new halls with a central block for dining halls and common rooms; they are intended eventually to house 500 residents.

By the end of 1964 a great improvement in provision for non-resident students was also in sight as the new University Union neared completion. This will be a social centre for staff and students as well as providing cafeteria and restaurant facilities. Construction also began on a new building for the Faculty of Economics which for several years will also house the Faculty of Law. As a result of this activity much of the University site has resembled a construction camp, but every year sees welcome additions to the permanent buildings. For the most part these are attractive in addition to being well designed for the functions they have to perform. For this much credit must go not only to the Site Consultant and the project architects but also to the Associate Registrar and Bursar, and their officers, as well as to the Users' Committees which have devoted so much of their time and thought to the preparation of briefs.

In the field of academic development there have also been some important advances. Foremost among those perhaps was the decision taken by the University, at the request of the Commonwealth Government, to assume responsibility for forestry education in Canberra. For some 50 years the Australian Forestry School at Yarralumla has provided the final two years of the four-year forestry course that led to forestry degrees in most Australian universities. By mutual agreement between the Commonwealth, the States and the University, the decision was taken to incorporate the Australian Forestry School in the University as a Department of Forestry in the Faculty of Science. The decision has been welcomed by students and staff of the School, and by the forestry profession as being in the best interests of forestry education. In view of the importance of forestry to the Australian economy, and of the urgent need to develop forest resources, the decision could be a vital one for Australia. This step was followed soon after by the appointment of Dr J. D. Ovington, Chief of the Woodland Section of the Nature Conservancy in Britain, as the first Professor of Forestry. The University will confer the degree of Bachelor of Science (Forestry) and, in due course, appropriate higher degrees.
Further important steps were taken by the appointment of Professor A. L. Basham, of the School of Oriental and African Studies, London, as first Professor of Oriental Civilization, and of Professor J. W. de Jong of the University of Leyden, as first Professor of South Asian and Buddhist Studies, in the Faculty of Oriental Studies. These two distinguished scholars will take up duty during 1965, and it can be expected that their presence will give further stimulus to Asian studies in Canberra and Australia.

In the Faculty of Arts the University was fortunate in persuading Dr Hanna Neumann, Reader in Mathematics in the Institute of Advanced Studies in this University, to accept an invitation to fill the new Chair of Pure Mathematics which had been created in 1963. The appointment of Dr H. Kuhn to the new Chair of German was also a source of great satisfaction to the University, but to the end of 1964 the Chairs of Russian and Japanese had remained unfilled.

In the Faculty of Economics the chief new development was the establishment of a Department of Accounting and Public Finance with the appointment of Professor R. L. Mathews of the University of Adelaide as Professor and Head of the Department. For many years some units of accountancy had been offered to students in the Faculty of Economics with the assistance of part-time staff. As Professor of Commerce in Adelaide since 1958, Professor Mathews had built up a strong department; with the assistance of two full-time senior lecturers in 1965 we hope for a similar satisfactory development.

In the Faculty of Law a significant event was the appointment of Judge A. H. Simpson, Senior Puisne Judge of the Malaysian High Court in North Borneo, to a readership in law. Judge Simpson's practical experience will be of particular value to the Faculty in its moot programme which is considered so important in the training of a lawyer. The Faculty also broke new ground by its decision to introduce as an optional unit in the degree course a new subject of Air and Space Law, a field in which Professor Richardson has specialized for some years. A notable landmark in the vigorous development of the Law Faculty was the publication during 1964 of Federal Law Review. Its appearance was widely welcomed as a valuable contribution to legal studies, and was fittingly celebrated by a dinner in the University attended by the Chief Justice of the High Court of Australia, Sir Garfield Barwick, the Attorney-General, Mr B. M. Snedden, and senior officers of the University as well as members of the Faculty and students. It is with great regret that we have to record the resignation of Professor R. L. Sharwood at the end of 1964; he leaves us to become Warden of Trinity College and to rejoin the Faculty of Law in the University of Melbourne.

The School of General Studies during 1964 has also sought to
grapple with academic problems of general application to this and other universities. The failure rate in Australian universities has been a matter of concern for some years, and this has been tackled in a variety of ways. The first method has been a constant effort to improve teaching methods, particularly by the use of the tutorial system. Stricter measures have been taken to encourage academic progress, and students with unsatisfactory records may be excluded after one year. Admission is refused to students with unsatisfactory records in other universities. Although some improvement has been achieved the task is difficult so long as it is possible to gain matriculation in Australia generally with a low level pass. Short of adopting a system of selection on entry it is impossible to refuse enrolment to many students of low potential. During the year it became clear that we may be obliged to do this in order to cope with excessive numbers of new enrolments.

More serious than the problem of actual examination failures in this University is the problem of 'wastage' in student enrolment. By this is meant the considerable percentage of students who cancel their enrolments in the course of the academic year. The actual proportion of failures among those who present for examination is not so disturbing, even though it is higher than it ought to be. Over the five years 1960-4 the percentage of passes for all examination units ranged from 75.1 to 76.3, and in 1964 it was 75.8. But there is a very considerable falling off, of the order of 15 to 20 per cent of students, who having enrolled, abandon their studies in the course of the year. Undoubtedly the majority of these are part-time students, but a detailed study of the problem is still to be undertaken.

Closely allied to the problem of wastage and failure rates is the problem of student numbers. In the course of planning the use of the University site much thought was given during 1964 to the optimum number of students that could be accommodated on the present area. The general conclusion was that if standards were to be preserved, the University should aim at a medium size of 7,000 to 8,000 students. The Council has adopted a planning figure of 7,000 of whom approximately 80 per cent (5,700) would be undergraduate students. If such a goal could be achieved it would be a sound guarantee that standards could be preserved, for it would inevitably require selection of students at some future date.

The School of General Studies has continued to keep steadily before it goals of high standards and the achievement of a national character. It is clear that the provision of residential halls is helping us to achieve the latter objective; each year sees an increasing proportion of full-time students coming from beyond the borders of the Australian Capital Territory. The provision of a limited number of National Undergraduate and Oriental Studies Scholarships also helps in this process, and has given a great stimulus to
the academic work of the University. The maintenance of the teaching and research standards of the University requires not only adequate numbers of staff but also a sufficient proportion of senior status. Accordingly, the University in 1964 accepted the principle that as staff grows in size we should aim to preserve a ratio of not less than one professor to every 10 members of staff, and that the larger departments in particular should have more than one full professor.

Student activities continue to develop and flourish and more new clubs and societies were formed to cope with social and intellectual activities. The scope for the operation of these will be greatly improved when the University Union is ready early in 1965. At times student activities flourished rather too vigorously in directions that took a destructive and anti-social character. A series of provocative ‘raids’ on the Royal Military College, Dunktroon, inevitably led to vigorous counter-attack, and considerable damage was done to Bruce Hall in the University. This brought very unfavourable publicity both for the University students and the Dunktroon cadets, and the University put a ban on further ‘raids’ by students on the Royal Military College with stringent penalties for those who infringed the prohibition. Students and cadets met the cost of the damage, and steps have now been taken to foster friendly relations between them.

University authorities have felt growing concern during 1964 at incidents of this kind, and the behaviour of university teams on interstate visits also produced unfavourable public reactions. The decision was taken by the University to deal firmly with such behaviour, but above all to seek the co-operation of responsible student organizations which are equally disturbed at the behaviour of a minority of their fellows. There are good prospects therefore of directing student energies and enthusiasm into more productive and useful channels. Most activities are already of this kind, and very creditable work is done in raising money for World University Service to assist students in need throughout the world, to provide scholarships for aboriginal students, and to foster musical, dramatic and intellectual activities. Students also co-operated very usefully in preparing plans for University buildings, especially the University Union and the new Halls of Residence.

The year 1964 was a year packed, as usual, with interest and activity. The preparation of the submission to the Australian Universities Commission for the triennium 1967-9 was a tremendous task which involved devoted work by members of the academic and administrative staff. Needless to say, the time was given ungrudgingly and it is expected that the result will repay the effort involved. Despite some setbacks and disappointments the year, as a whole, has been one of very gratifying achievement.
REPORT OF THE COUNCIL

GENERAL UNIVERSITY ACTIVITIES

Adult Education

Forty-five courses were offered during 1964, an increase of three over 1963, and enrolments remained constant at about 1,280.

The first residential school in adult education in Canberra, was arranged in association with the Victorian Council for Adult Education and held in May. It was entitled 'Canberra—Our National Capital', and was very successful with enrolments from all the eastern states.

A refresher course in geography for school teachers was conducted in association with the Department of Geography in the School of General Studies.

The Australian Association of Adult Education held its annual conference at Bruce Hall.

Arrangements have been made with the Board of the School of General Studies for the provision of courses in remedial English for undergraduates who fail to reach an adequate standard in a list in comprehension and expression which in 1965 will be taken by all undergraduates enrolling for the first time.

Drama Committee

The Committee met three times during the year. It concerned itself in its deliberations with the general fostering of dramatic activity in the University and the development of adequate theatrical facilities. It was instrumental in securing University support for Macbeth in Camera, brought to Canberra by the Arts Council; arranged the purchase of additional lighting equipment for use in the Childers Street Hall and elsewhere; and made a grant to the Australian National University Dramatic Society to assist it in meeting the costs of its production of Marching Song.

The Committee maintained its interest in plans for the proposed theatre in the H. C. Coombs Building, and is at present conducting a survey of stage lighting installations in other Australian university theatres.

Research Students' Association

The Research Students' Association maintained its representation on the Board of Management of the University Union and the Halls of Residence Users' Committee. It held two receptions for newly-arrived scholars, a general meeting for the adoption of constitutional amendments, and a forum on South-East Asian Affairs. The Association negotiated with University authorities on flats for married scholars, the working accommodation of scholars within the University, uniform travel allowances, and the management of the former Annexe to Bruce Hall in Northbourne Avenue as a
co-operative. It continued to operate the thesis typing scheme and, in co-operation with the University, inaugurated an insurance scheme for scholars.

Guest Speaker at the Annual Lecture sponsored by the Association was Professor Linus Pauling who spoke on 'The Significance of Science to World Affairs' on 4 November.

Students' Association

The past year has been a most progressive one. The increase in Student's Association fees from £2 to £3 financially enabled the Association to broaden its scope of activities and the growth in student numbers naturally engendered a widening in the scope of student activities. It was the last year that students were forced to use the inadequate Childers Street buildings for Common Room facilities, as in 1965 the University Union will be occupied. Not only will the University Union provide better physical amenities, but it should also become the essential central meeting place for all students.

Due to the increase in funds many improvements have been made in the Association's activities. The student newspaper Woroni became a regular fortnightly newspaper for the first time thus vastly increasing its usefulness to the average student. Student clubs and societies now receive an allocation of well over £1,000, which is triple the figure received in 1962.

The Student Loan Fund, administered by the Students' Representative Council, commenced operation in 1964 and was frequently used. Money from this fund is distributed by a committee consisting of two members of the University academic staff and the President of the Students' Representative Council. All meetings of this Committee are strictly confidential.

A successful Bush Week raised £1,069 which was allocated to the New South Wales Spastic Appeal and a Papua and New Guinea Scholarship Scheme established by the Students' Representative Council, details of which had not been finalized.

Sports Union

After initially establishing itself as an active and important body in student affairs in 1963, the Sports Union further expanded its activities in 1964. The total number of affiliated clubs rose to 20 with the addition of rowing, sailing, athletics, baseball, judo, bushwalking, mountaineering and men's basketball clubs. This increase has enabled a much wider range of sporting tastes to be catered for.

The Sports Council, which is the executive body of the Sports Union, financed student participation in local and intervarsity sport. In addition, it negotiated with the University on future sporting needs and on improvements to existing sporting facilities.
Inaugural Lecture
Professor A. H. Johns, who took up his appointment as Head of the Department of Indonesian Languages and Literature in the University on 12 July 1963, gave his Inaugural Lecture in the Chemistry Lecture Theatre on 30 June. Professor John's lecture, which has since been published, was entitled *Indonesian Studies in Australia: An Open Horizon*.

Public Lectures
There was a great diversity in the programme of 16 public lectures given at the University in 1964. The lecturers were from the disciplines of anthropology, archaeology, astronomy, chemistry, economic history, English, geology, Far Eastern history, the history of South Asia and the comparative study of religions.

The University co-operated with learned bodies in Canberra and beyond for a number of the lectures, the first of which was arranged by the Australian Institute of Nuclear Science and Engineering. This lecture, entitled 'Radiation in Macromolecular Chemistry', was given by Professor D. I. Jordan, Angas Professor of Physical and Inorganic Chemistry at the University of Adelaide.

The Canberra Archaeological Society and the University arranged a lecture by Professor J. G. D. Clark, Professor of Archaeology at the University of Cambridge, on 'The Agricultural Revolution in Prehistoric Europe: The Spread of Farming Into Europe from the Near East'. Professor Clark also gave a late afternoon lecture on 'The Pre-historian's View of Man'.

In association with the Australian Capital Territory Classical Association, the University arranged an illustrated lecture by Sir John Beazley, Lincoln Emeritus Professor of Archaeology at the University of Oxford, on 'The Berlin Painter, One of the Greatest Athenian Artists of the Late Archaic Period'.

In a public lecture arranged by the University and the Canberra Sociological Society, Dr Margaret Mead, Curator of Ethnology at the American Museum of Natural History and Adjunct Professor of Anthropology at Columbia University, discussed 'The Future as an Era of Shared Culture'.

To mark the Shakespeare quarter-centenary Mrs Dorothy Green, Lecturer in English in the University, gave a talk on 'Two Boards and a Passion'. Mrs Green also spoke on 'The Novels of Louis Stone' in the first of the year's Commonwealth Literary Fund Lectures. The second of these lectures was given by Dr H. P. Heseltine, Lecturer in English at the University of New South Wales, who chose for his subject 'Banjo Paterson: A Poet Nearly Anonymous'.

Professor F. H. T. Rhodes, Head of the Department of Geology at the University College of Swansea, who visited the University as a Commonwealth University Interchange Visitor, spoke on 'The
Evolution of Life', and Professor P. Dark, Professor of Anthropology at the Southern Illinois University, gave an illustrated lecture on 'The Art of Ancient Benin, a West African Kingdom'.

Professor C. P. FitzGerald, Head of the Department of Far Eastern History in the University, lectured on 'Modern Archaeology and Ancient China' in conjunction with a photographic exhibition of Chinese archaeology held in the R. G. Menzies Building of the University Library.

The University presented a public lecture by Professor Toshi-taka Komatsu, Professor of Economic History at Waseda University, Tokyo, on 'Economic Problems of Contemporary Japan Since 1955'.

Professor A. L. Basham, Professor of History of South Asia at the School of Oriental and African Studies, London, lectured on 'Aspects of Indian Religious Life and Thought'.

Professor D. Y. Martynov, Director of the Sternberg Astronomical Institute at the Moscow State University gave a lecture on 'The Universe and Mankind'.

The Charles Strong Memorial Lecture for the year was given by Dr E. G. Parrinder, Reader in the Comparative Study of Religions at King's College, London, and the annual Morrison Lecture was given by Dr Wang Ling, Professorial Fellow in Far Eastern History in the University. Dr Wang's lecture was entitled 'Calendar, Cannon and Clock in the Cultural Relations between Europe and China'.

Publications Committee

The Publications Committee is a committee of Council whose members are appointed from the Institute of Advanced Studies and the School of General Studies. It administers a fund to finance the publication of some of the research work carried out in the University and of work cognate with that research, and it controls a small publishing section.

In 1964, for the first time, the majority of the books were published by the University; hitherto they have been published in association with established publishers.

Nine works were published during the year: Dr C. Forster, Industrial Development in Australia, 1920-1930: Dr R. G. Crocombe, Land Tenure in the Cook Islands (in association with Oxford University Press); Dr C. A. Price, Jewish Settlers in Australia; Dr P. J. O'Farrell, Harry Holland: Militant Socialist; Mr F. Langman (ed.), A. H. Clough, Selected Poems; Dr R. Appleyard, British Emigration to Australia; Mr J. Zubrzycki, Settlers of the Latrobe Valley; Mr M. A. Jaspan, South Sumatran Folk Literature; Mrs D. Gollan, An Exchange Student at Moscow. Three others—Dr B. D. Graham, French Socialists and Tripartisme, 1944-1947, Dr E. C. F. Bird, Coastal Landforms, and Dr M. Roe, Quest for
Authority in Eastern Australia, 1835-1851 (in association with Melbourne University Press)—are due for publication early in 1965 while a further 12 titles are at different stages of editing and/or production.

The Publications Section has continued, as it has in the past, to distribute the departmental papers of the Departments of Demography, Economics, Geography and International Relations, as well as the New Guinea Research Unit Bulletin. In addition it has seen through the press the Commonwealth Literary Fund and the Research Students' Association Lectures.

SITE AND BUILDINGS

Details of buildings completed in 1964, those under construction and in the design stage, are given in the 'Building Programme Summary' which appears later in this Report.

Following the acceptance by the Government of the recommendations of the Australian Universities Commission for the 1964-6 triennium, planning of buildings proceeded rapidly. Construction commenced on the University Union and the Oriental Studies Building in January 1964, the Halls of Residence in June, the Geophysics Building in July, the Sports Pavilion in August, the Economics Building in November and extensions to the Chancery in December.

At Mount Stromlo Observatory the Duffield Building was completed in October.

The 40-in. telescope at Siding Spring Observatory near Coonabarabran, New South Wales, was completed in May and the 16-in. telescope was completed in June. Work has commenced on a residential lodge and two houses.

The completion of the Canberra Lakes Scheme has necessitated a large amount of work being done on Sullivans Creek which runs through the University site. The first stage of the work changed the course of the stream so that the higher water level would not cause swamp conditions. An area of about seven acres was reclaimed for buildings. Two bridges have been built over the creek which has now been transformed into an attractive water feature.

The second central boiler house and the hot water reticulation around the University site have been completed. Work to connect all buildings to this system is well in hand.

The University has continued a programme of planting and landscaping for the whole of the site.

The National Capital Development Commission has assisted the University by acting as its agent for many of the University's projects.

The University's submission to the Australian Universities Commission for the triennium 1967-9 is now in an advanced stage.
ENROLMENTS

One hundred and six new research students were enrolled in the Institute of Advanced Studies in 1964 (up to 31 July) for courses of higher research. The new research students include: 58 Australians, 16 from Britain, five from New Zealand, four from Canada, three from India, two from Japan, two from South Africa, two from Taiwan, two from Malaysia, three from U.S.S.R., one each from the U.S.A., Yugoslavia, Germany, Ceylon, Tonga, Columbia, Vietnam, Korea, Hong Kong.

There were 904 enrolments of new students in the School of General Studies compared with 827 in 1963. The total number of students enrolled was 2,071 compared with 1,621 in 1963. Of these 860 were full-time students and 1,151 were part-time students. Students enrolled in 1964 for the degree of master numbered 165 (120 in 1963). The number of enrolments for bachelors' degrees was 1,746. There was one enrolment (2 in 1963) for a subgraduate diploma course and 159 enrolments (144 in 1963) for miscellaneous courses.

ACADEMIC PUBLICATIONS

The following bibliography lists the scholarly books and articles published by members of the University from 1 October 1964 to 30 September 1965. The list includes publications by former members when such publications are based on work carried out at the University.

Works of joint-authorship are listed under the name of the author first appearing in the credit line or contents list of the original journal. Each author's publications are in alphabetical order, grammatical articles and the convention 'Contribution to' having been ignored. Where any title begins with a figure, that figure has been regarded as spelt out for alphabetical order purposes.

Bibliographies for previous years will be found in the Calendars for the years 1958 to 1965 inclusive. Consolidated lists will be published in 1966 and every five years thereafter. An alphabetical list of the journals cited, showing places of publication and the abbreviations used, was printed in the 1958 Calendar.
