A GENERAL DESCRIPTION OF THE UNIVERSITY

The city of Canberra, which has since 1927 been the capital of the Commonwealth of Australia, is situated in the Australian Capital Territory. The Territory is about 200 miles by road south-west of Sydney, and 400 miles north-east of Melbourne, and is connected to those cities by good air and road services and by rail. Canberra, which is now developing rapidly as the national capital, is the headquarters of most of the Departments of the Commonwealth Government, and has a population of some 110,000. The city is 1,800–2,000 feet above sea level and has a pleasant and healthy climate. It has been laid out in accordance with a comprehensive plan, and an imaginative program of tree-planting has made the city and growing suburbs very attractive. When the plan of the city of Canberra was decided upon in 1916, a site close by the main city area was set aside 'for university purposes'.

An authoritative statement on the history and development of Canberra and the Capital Territory is included in each issue of the Official Year Book of the Commonwealth of Australia, which may be consulted in most libraries and in the offices of Australian diplomatic and consular representatives abroad. Reference may also be made to Canberra—A Nation's Capital, edited by H. L. White, Canberra, 1954.

Canberra University College

In 1927 the Commonwealth Government, recognising the great public importance of providing facilities for higher education at the seat of government, appointed a Committee to report on the provision of university facilities for residents of Canberra, with particular reference to the needs of officers of the Federal Public Service and their families. This Committee recommended the establishment of a university with certain facilities.

In January 1929 the University Association of Canberra was formed with the main object of promoting the establishment of a university in Canberra. Proposals put forward by the Council of the University Association were accepted by the Commonwealth Government and in December 1929 the Canberra University College Ordinance was passed, providing for the creation of a University College pending the establishment of a teaching university in Canberra. Arrangements were made with the University of Melbourne which amounted to recognition of the College by that University on terms permitting of its full development in the faculties of arts, science, commerce and law. Lectures were arranged in fourteen subjects of the arts, science and commerce courses and

* The Commonwealth Government had taken over the Australian Capital Territory in 1911.
the first lectures were given on 31 March 1930. There were thirty-two students enrolled.

Early development of the College was slow, being hampered by the depression of the early thirties and the war, but enrolments rose sharply in the immediate post-war years. The first professors were appointed in 1948, and by 1960 the full-time teaching staff had increased to ninety, with a student enrolment of more than 800, of whom 240 were full-time students.

The Decision to Establish the University

While the College was still some way from its full establishment, at the end of the 1939-45 war, a group of people with academic interests who were concerned in other connections with shaping the post-war development of Australia, came together to consider future university development in Canberra. It was from these deliberations that there emerged the Bill which, on its enactment by the Commonwealth Parliament in August 1946, became the Australian National University Act.

The University envisaged in the Act was to differ in two main ways from the universities already established by the Australian States. In the first place, although the Act stated that 'the University may provide for the incorporation in the University of the Canberra University College', the University was to be primarily concerned with research and research training. In the second place it was envisaged that the University would select certain defined fields in which to begin its work, those first contemplated being the medical sciences, the physical sciences, the social sciences and Pacific studies.

Early Activities of the University

The University Act placed complete power of management in the hands of a Council and, to provide for the development of the University before the Council could be formed, the Act established an Interim Council. The Interim Council included substantial representation of the professorial staffs of the other Australian universities, and conducted the University's affairs from its appointment in August 1946 until the permanent Council took office in July 1951.

Very early in its operations the Interim Council established an Academic Advisory Committee of four members, all of whom held senior academic appointments in the United Kingdom and were either themselves Australian or were well acquainted with academic matters in Australia. The Committee took a leading part from 1947-51 in advising the Interim Council on the basic plans and early development of the University.

The Interim Council, as soon as it had decided to establish the four original research schools, set about recruiting senior staff members for them.
The first appointments were made in 1948 and, until premises were available in Canberra, the Librarian and Heads of Departments concerned worked in other centres. By the end of 1952 all but two Departments had been moved to Canberra, though even then most were housed in temporary quarters. Simultaneously, the Interim Council sought to advance the interests of other Australian universities by means of the award of scholarships and research fellowships for study abroad and the arranging of seminars in Canberra to which leading overseas scholars were invited.

Association with Canberra University College

Development of the University continued steadily, both in regard to the building up of staff and in the provision of permanent buildings, but the Government was obliged to come to a decision on the future of Canberra University College which was rapidly approaching the stage when it could either become an independent university, which meant the development of postgraduate studies as well as undergraduate teaching, or when, as envisaged in the Australian National University Act of 1946, it should be incorporated in the University.

The Government decided that the College's future lay with the University and asked the two Councils to submit proposals for a desirable form of association. In March 1960 an Act was passed giving effect to this decision and on 30 September 1960 the Canberra University College became associated with the Australian National University as its School of General Studies, while the four research schools continued their work in the Institute of Advanced Studies.

Government of the University and the Act of 1960

The Act of 1960 provided for the dissolution of the governing body of the College and for an enlarged Council of the University. The Council includes members of Parliament, of the University staff, of the student body and of Convocation, and persons appointed by the Governor-General. The Chancellor, or in his absence the Pro-Chancellor, presides at meetings of the Council. The present holders of these offices are Dr H. C. Coombs and Mr Justice R. M. Eggleston, respectively.

Convocation will eventually be a body composed primarily of graduates of the University, but in order to bring Convocation into existence at an early stage, and to foster the interest of Australian academic leaders in the University, special steps were taken. The University invited to membership of Convocation its academic and certain non-academic officers, the members of the Academic Advisory Committee, the Chancellors and Vice-Chancellors (or equivalent officers) of the other Australian university institutions and other research organisations and five other members nominated by each of those bodies. Association with the College has enlarged Convocation to include members and past members of the former
Council of the College, members of the College staff, and graduates of the University of Melbourne who took their degrees through the College: in addition 200 other persons were invited, together with those members of Parliament who were graduates. Though at present the only function of Convocation is to elect members of the Council, it is hoped that, as the University develops, ways will be found to give Convocation opportunities to exercise an influence in university affairs commensurate with the wisdom and experience of its members. Occasional meetings of local members are now held in centres such as Melbourne and Sydney.

The University's senior academic bodies are the Boards of the Institute and of the School. The Vice-Chancellor is the Chairman of both Boards, which comprise, in the Institute, the Heads of Research Schools, the Heads of Departments within those Schools, the Deputy Vice-Chancellor and three members of the Board of the School; in the School the Board consists of all professors of the School, the Deputy Vice-Chancellor and three members of the Board of the Institute. A Deputy Chairman of each Board is appointed by the Council. There is also a Professorial Board, comprising all professors of the University, but its role is purely advisory. While the Council is the governing body of the University, it looks mainly to the Boards of the Institute and of the School for guidance and advice in all matters of academic policy and practice. The Institute is responsible for matters concerning doctoral degrees and the School for other degrees, though students reading for degrees of master or Doctor of Philosophy may be supervised in either the Institute or the School.

Administrative Structure

The administrative staff is led by the Vice-Chancellor, who is the principal executive officer of the University. He is assisted by the Deputy Vice-Chancellor in matters of academic policy and by the Secretary to the University in the conduct of financial policy and in the supervision of the University's academic and general administration.

The Registrar is the secretary of the Council and of the Professorial Board and is responsible, under the Vice-Chancellor, for correspondence with public bodies and for communicating the general policy of the University.

The Bursar is responsible for the financial implications of new policies and developments, budgets, accounting services, business management and for residential housing.

The Registrar (Property and Plans) is responsible for the co-ordination of planning, including the relating of academic plans to the provision of buildings and site development to suit the requirements of teaching and research.

The Academic Registrar is secretary of the Boards of the Institute
of Advanced Studies and of the School of General Studies and is responsible for the administrative services arising from the work of the Boards, including matters related to academic staff appointments and student matters.

Administrative services within the research schools are provided by business or laboratory managers, who are responsible to the directors or deans concerned, and by graduate assistants who work with the directors and deans but are responsible to the Academic Registrar.

In the School of General Studies faculty secretaries work with the deans but are responsible to the Academic Registrar. The Business Manager in the Registrar's office provides special services to the deans.

The Institute of Advanced Studies

The Institute comprises six research schools, which are led by directors or deans: the John Curtin School of Medical Research (Director: Professor F. J. Fenner, F.A.A., F.R.S.), the Research School of Physical Sciences (Director: Professor E. W. Titterton, C.M.G., F.A.A.), the Research School of Social Sciences (Director: Professor W. D. Borrie), the Research School of Pacific Studies (Director: Professor O. H. K. Spate), the Research School of Chemistry (Dean: Professor A. J. Birch, F.A.A., F.R.S.) and the Research School of Biological Sciences (Director: Professor D. G. Catcheside, F.A.A., F.R.S.). Besides the directors and deans, the permanent academic staff of the Institute comprises professors, readers, professorial fellows, senior fellows and fellows. Each professor who is a head of department is responsible for the research conducted and the research training given in his department. In addition to the permanent staff, senior research fellows and research fellows are appointed for periods of from one to five years. Postdoctoral fellows are appointed for periods of from one to two years. There are also a number of visiting fellows who are appointed for periods of up to one year. At 30 September 1968 there were 320 members of the academic staff and 386 full-time research students.

From the beginning it was recognised that if the best standards in research were to be maintained, generous provision for study leave should be made to facilitate contact with research workers overseas. Professors are entitled to one year's leave in four with a maximum allowance for expenses of $3,200; other permanent members of staff also benefit from liberal provisions. Shorter leave can be taken before the full leave is due.

The conditions on which all members of the academic staff of the Institute are appointed lay down that the member's principal responsibility is to devote himself to research and the advancement of knowledge in his subject, and the University's policy is to make
every effort to ensure that the member’s time will be unencumbered by other duties. There is, however, a responsibility on members of the staff to assist in the training of graduate students and to make such contributions as they can to the work being done by the other Australian universities.

The School of General Studies

The School consists of five faculties, each of which is responsible under the general oversight of the Board of the School of General Studies for academic matters falling within its special field. There are Faculties of Arts, Economics, Oriental Studies and Science, each comprising groups of kindred departments, and a Faculty of Law.

The academic staff of the School comprises professors, associate professors, readers, senior lecturers and lecturers. There are also demonstrators and tutors, and a number of part-time lecturers, demonstrators and tutors. Study leave provisions are comparable with those in other Australian universities. At 30 September 1968, there were 279* members of the academic staff and approximately 3,800 students.

Members of the academic staff of the School, while being responsible in the first instance for undergraduate teaching and for courses leading to degrees of master, have the opportunity to supervise students for postgraduate work leading to the degree of Doctor of Philosophy. The research requirements of the staff are that they will devote a reasonable proportion of their time to research or other original work in their subjects.

The University Library

The University Library comprises three main collections with several branch libraries.

The Advanced Studies collection of some 260,000 volumes is closely related to the special interests of the six Research Schools in the Institute. It has a wide range of periodical literature and is strong in the fields of anthropology and linguistics, mathematics, mathematical statistics, physics, chemistry and the non-clinical medical sciences, and has sought to acquire a good working collection of secondary material of high standard in the social sciences.

The General Studies collection (approximately 165,000 volumes) is designed to further teaching at all levels in the Faculties of Arts, Economics, Law and Science, and to provide research facilities in the humanities.

The Oriental collection (mainly Chinese, Japanese and Indonesian) is primarily a research collection and at present contains approximately 85,000 volumes.

* Including Demonstrators and Tutors.
A GENERAL DESCRIPTION

The resources of the National Library of Australia are available to members of the University, who also have the advantage of access to many specialised collections of material held by government instrumentalities in Canberra.

Site and Buildings

The main University site occupies about 320 acres of land in the Canberra districts of Acton and Turner and a further 200 acres at Mount Stromlo, ten miles from Canberra.

At the present time, twenty-six buildings have been erected on the main site in an attractive parkland setting on the shores of Lake Burley Griffin.

The recently completed development of Sullivans Creek which passes through the site to empty into Lake Burley Griffin, includes ponds, cascades and landscaping. Two road bridges and a pedestrian bridge span the Creek and link the two halves of the site.

The growing demand for sporting facilities on the site can no longer be met adequately by the existing sports oval and pavilion. A second sports field has been developed which is expected to become the University's major sporting area.

A pavilion to serve this sports field was completed during 1968.

The first stage of the Chancelry, a permanent building to house the University's administrative staff, was completed in 1964 and further stages were completed in 1965 and 1968. Elements of the University administration are still housed in temporary buildings and additional stages are planned for the Chancelry complex.

University House, the University's first collegiate building, was completed in 1954 and provides accommodation for single research students reading for the degree of Doctor of Philosophy and for staff members and staff without children. The house also serves as a faculty club for non-resident members of the University.

The recently opened Staff Centre provides dining facilities and other amenities for members of staff and their guests: a limited number of bedrooms for short-term visitors, is also available.

The University Union building was occupied in 1965 and provides service and amenities primarily for students but also for other members of the University community.

The Institute of Advanced Studies

The John Curtin School of Medical Research building was occupied in March 1957. An isotope laboratory was recently completed. In October 1967, the Department of Clinical Science occupied a laboratory and clinical facilities in a new wing of the Canberra Community Hospital.

The main building of the Research School of Physical Sciences was opened in September 1952. In 1963 the Department of Mathe-
matics moved into a permanent building and the Geophysics build-
ing and extensions to the Cockcroft Building were completed in
1965.

The Department of Astronomy, situated at Mount Stromlo
Observatory, operates a field station at Siding Spring Observa-
atory, Coonabarabran, northern New South Wales, where three telescopes,
three houses and a residential lodge have been built. A 150-inch
_telescope is to be established at Siding Spring Observatory as a
joint British/Australian venture. With the addition of this telescope
Siding Spring Observatory will be one of the major observatories in
the world.

The H. C. Coombs Building which was opened in 1964 houses
the Research Schools of Social Sciences and Pacific Studies. The
H. C. Coombs Lecture Theatre was completed during 1968.

A building for the Research School of Chemistry was completed
during 1967.

The Research School of Biological Sciences was established dur-
ing 1968 and planning for a permanent building for this School is
in progress.

The School of General Studies

The first permanent building, the Haydon-Allen Building, was
occupied in July 1960 and extensions were completed in 1962 and
1968.

The Physics Building was occupied in 1961, the Chemistry Build-
ing in 1962, the Geology Building in 1963 and the Zoology Building
in 1964. A laboratory and animal house for the Department of
Zoology was completed in 1967.

During 1968 buildings were completed for the Departments of
Forestry and Botany. A controlled environment house had been
completed earlier for Botany in that Department's experimental
area on the site. The first stage of the Law Building was also com-
pleted.

The Faculty of Oriental Studies occupied in 1965 a new building
which it shares with the Department of Far Eastern History in
the Institute of Advanced Studies. The Copland Building for the
Faculty of Economics was completed in 1966.

There are now three Halls of Residence on the site each of
which provides accommodation for both men and women students.
Bruce Hall, named after the first Chancellor, Lord Bruce of Mel-
bourne, was occupied early in 1961. With the 1963 extension it
provides 210 study-bedrooms. Two new halls provide for an addi-
tional 500 students; Burton Hall and Garran Hall were completed
in 1965 and 1966 respectively.

Accommodation for the 1969 academic year is available in two
of the three affiliated colleges approved for establishment on the
site—John XXIII College and Ursula College.
Housing

Houses and flats have been built, or their tenancies otherwise acquired in numbers sufficient to make it possible to house staff with families coming to Canberra, at least for an initial period. Research students with children are also eligible for housing assistance. In addition fifty flats have been provided for married research students without children.

Finance

The University's expenditure in 1967 was $15,736,445 for running expenses and $7,898,414 for capital and other non-recurrent expenditure. Apart from relatively small amounts received from gifts, rents and fees, income was provided by the Commonwealth Parliament.
DESCRIPTIONS OF THE WORK OF THE DEPARTMENTS

The research being carried out in the various departments and the equipment and other facilities available are as follows:

THE INSTITUTE OF ADVANCED STUDIES

THE JOHN CURTIN SCHOOL OF MEDICAL RESEARCH

Biochemistry

Several different problems are being studied in the Department. The biosynthesis and function of aromatic compounds in bacterial cells is being investigated, with particular reference to ubiquinone, vitamin K and \( \beta \)-aminobenzoic acid. In these studies the techniques of biological chemistry are being combined with those of microbial genetics. Kinetic investigations are being made, by a second group, of the reaction catalysed by ATP: arginine phospho-transferase with the object of elucidating the reaction mechanism and the function of divalent metal ions in the activation of this enzyme. A kinetic approach is also being used to determine the basic mechanisms of the reactions catalysed by threonine deaminase, IDP-ase and IMP dehydrogenase which are enzymes subject to either allosteric activation or inhibition. Another research group is concerned with the distribution and biosynthesis of compounds containing carbon-phosphorus bonds with catabolism of such compounds by micro-organisms; a number of transport systems in micro-organisms are also under investigation. Studies on protein chemistry are in progress relating enzyme structure and function and to characterise proteins and their genetic variants. The Department is well equipped and has facilities for work to be carried out on almost any aspect of biochemistry.

Clinical Science

The Department of Clinical Science is housed in the Canberra Community Hospital where it has both laboratory and clinical facilities. Its activities are orientated towards the pathogenesis of coronary heart disease and are concerned with such aspects as lipid and carbohydrate metabolism, obesity, nutrition, blood pressure, catecholamine metabolism, and blood platelet, coagulation and fibrinolytic behaviour. These studies are linked to an epidemiological project in New Guinea.

Experimental Pathology

Research in the Department of Experimental Pathology is concerned with the pathology, physiology and biochemistry of lipid
transport and metabolism with special reference to cardiovascular disease, the structure and functioning of the blood-vascular and lymphatic systems in various diseased states and the reactions of the tissues to foreign matter and the nature of immune responses.

Medical Chemistry

The intense and detailed study of biologically-active substances, and their close relatives, is the most important activity of the Department. This takes the form of correlating physical properties with chemical structure and has often pointed up inaccuracies in commonly accepted chemical formulae. Such correlations supply biochemists and other kinds of biologists with fundamental data for understanding the more complex systems with which they work, and constantly shed new light on the physicochemical basis of drug action. These aims are implemented as follows.

Organic chemical studies which include the synthesis of relevant heterocyclic substances such as pteridines, purines, pyrimidines, triazoles, and their azalogues, followed by exploration of their reactions, rearrangements, and behaviour under biological conditions; in addition, the stereochemistry of reduced and biologically active heterocycles is being investigated. Appropriate compounds are forwarded to colleagues in various parts of the world for inclusion in pharmacological and other research projects.

Physical chemical studies, e.g. computer calculation of equilibria in solutions containing metal ions and several complexing agents, as models for biological systems. Stability constants of metal complexes and effects on oxidation-reduction potentials. The kinetics of nucleophilic displacements. Preferred structures of tautomeric substances and other systems of biological interest from ultra-violet, infra-red and Raman spectroscopic techniques. N.m.r. studies of heterocycles especially nucleosides and conformations of physiologically active compounds.

Research is conducted in analysis, and visitors come for instruction in new types of combustion methods currently used for organic elemental microanalysis. Ionisation constants are determined as a service to other scientists in Australia.

Microbiology

The Department is concerned with the structure and role of antigens and with viruses, principally of animal origin. Research is being conducted using intact animals and cultured cells as aspects such as the pathogenesis of viral infection, fate of injected antigens, viral multiplication and the structure of viruses and antigens. A variety of techniques is used: histological, immunological, biochemical, biophysical and genetic.
Urban Biology Group

This program consists of a study of the biological consequences of the processes of civilisation. Emphasis is on the effects of civilisation, and particularly of urbanisation, on the biology of the human species, and on the implications of these effects for society.

Physical Biochemistry

The Department has a general interest in the experimental and theoretical investigation of physicochemical aspects of biochemistry and the light that this may throw on structure, function and methodology. Work is in progress on conformational changes in closely related proteins; on enzymes and enzyme systems concerned with sulphate metabolism; on the macromolecular components of connective tissue and their interactions and on the application of the geometric theory of differential equations in the description of complex interacting systems of various kinds. The Department is equipped with the more important instruments required for this type of work.

Physiology

The Department is divided into two sections: one concerned with neurophysiology and the other with neuropharmacology. The neurophysiological section is predominantly concerned with the neurology of the visual system. There are three laboratories fully equipped for studies on the visual system, one general laboratory equipped for electrophysiology and one laboratory equipped for studies on the biophysics of muscle.

Research work is in progress in the following fields: (a) the neurophysiological basis of form vision, binocular single vision and stereopsis using single unit recording techniques; (b) the properties of single-unit visual receptive fields at various levels in the visual pathway; (c) the projection of the visual fields onto the visual centres in the brain; (d) the biophysics of muscular contraction.

The facilities available for neuropharmacology include two fully equipped neurophysiological laboratories using micro-electrophoretic techniques, chemical and neurochemical laboratories and apparatus for the identification of synaptic transmitter substances in the brain and spinal cord, and the mode of action of drugs on nerve cells.

THE RESEARCH SCHOOL OF PHYSICAL SCIENCES

Astronomy

The Observatory at Mount Stromlo (ten miles west of Canberra) is one of the major observatories in the southern hemisphere. It is equipped with a wide range of telescopes, the largest being
the 74-inch reflector, together with a full range of auxiliary equipment. The program of research is extensive, with special emphasis on problems of stellar and galactic evolution. Observations are made of the characteristics of stellar and nebular radiation by photoelectric and spectroscopic techniques. Theoretical investigations aimed at interpreting these observations are an essential part of the work. Active lines of research include the physics of pulsating stars, the chemical composition of stars, evolutionary studies of stars in Globular Clusters and the Magellanic Clouds and optical studies of radiogalaxies. While the Observatory employs optical techniques exclusively, it works in close collaboration with the radio-astronomy section of the Radiophysics Laboratory of the Commonwealth Scientific and Industrial Research Organization in Sydney.

Mount Stromlo Observatory maintains a field station on Siding Spring Mountain near Coonabarabran, New South Wales. The principal instrument at the field station is a 40-inch reflector of modern design.

**Diffusion Research Unit**

Experimental and theoretical studies in this Unit come within the broad field of 'liquid state physics'. On the experimental side, radio-tracer diffusion techniques have been developed to obtain fundamental data on transport processes in liquids. Electrolyte and non-electrolyte solutions are under study at normal temperatures and the liquid rare gases at low temperatures. The theoretical work is concerned with relating the data from the latter studies to current liquid state theories.

**Electron and Ion Diffusion Unit**

The Unit is investigating collision processes of both low energy electrons and positive ions in monatomic and polyatomic gases. The basis of the work is the precise determination of a number of transport coefficients for electron or ion swarms drifting and diffusing through the gas under investigation. In some instances electron attachment and ionisation are significant processes. The data obtained from these measurements are analysed to determine the energy dependence of the cross-sections for the relevant collision processes.

**Engineering Physics**

Research in the Department centres on using the homopolar generator for experiments requiring very high currents: these include (a) powering very intense magnetic fields for solid state physics investigations at temperatures ranging down to one degree absolute; (b) studies of the characteristics of stabilised electric arcs in air at
currents up to one million amperes; (c) fundamental studies on the conduction of very heavy currents across sliding contacts; (d) studies on megawatt arc heaters for high temperature gas experiments. A toroidal plasma machine is used in investigations of the stability and properties of plasmas.

A small group in the Department is working on information processing and systems science, including fundamental studies relating to the automation of experiments and equipment and the processing and detection of signals in noise, particularly relating to the output of seismic arrays. The Department co-operates with the Department of Geophysics and Geochemistry in the operation of the United Kingdom Atomic Energy Authority array at Tennant Creek, Northern Territory.

**Geophysics and Geochemistry**

The main lines of work of the Department are:

(a) Experimental deformation of rocks, minerals and ceramics. Equipment for deforming specimens of various sizes at confining pressures of up to 10,000 atmospheres and temperatures of up to 1000°C is available, together with strain-gage, X-ray and optical facilities for deformation studies.

(b) Palaeomagnetism. The Department possesses both astatic and spinner type magnetometers capable of measuring susceptibility and remanent magnetisation of rocks, including weakly magnetised sediments. Equipment is available for alternating field and thermal demagnetisation experiments. An automatic recording Curie balance, high and low field torque meters for anisotropy studies and equipment for investigations at elevated temperatures are available for studying the magnetic properties of rocks and minerals.

(c) Seismology. A seismological observatory equipped with long and short period Benioff instruments has been established. A study of local seismicity is being made using the results of this and fourteen other closely spaced stations. Measurements of crustal thickness have been made using portable equipment with quarry blasts or atomic explosions as sources. The Department also co-operates in operating the 20-element United Kingdom Atomic Energy Authority array at Tennant Creek, Northern Territory.

(d) Geothermal measurements. Apparatus for measuring temperatures and thermal conductivities of rocks is available.

(e) Igneous and metamorphic petrology and geochemistry. A full range of microscope, X-ray, spectrographic and chemical facilities is available. An electron probe X-ray microanalyser has been installed. An A.E.I. spark source mass spectrograph (MS7) is in use for studying trace elements.
(f) Phase equilibria at high temperatures and pressures. Apparatus capable of attaining pressures up to 200,000 atmospheres and temperatures up to 1800°C for sustained periods is in operation. The apparatus is currently used for studying phase equilibria in the mantle and the origin of magmas.

(g) Isotope geology and age determinations. The Department possesses Metropolitan-Vickers, Nuclide and Reynolds type mass spectrometers. These are being used for age determination by potassium-argon and rubidium-strontium methods, and in the study of isotope ratios in ore leads. Facilities for mineral separation are available. The Department also operates a carbon-14 dating laboratory in conjunction with the Department of Anthropology and Sociology.

Mathematics
Research in pure mathematics is currently in group theory, abstract algebra, functional analysis, classical analysis and non-linear differential equations. There is at present no research in applied mathematics.

Nuclear Physics
Two accelerating machines are in use in the Department—a 12 MeV tandem electrostatic generator, which was brought into operation in 1961, and a 2 MeV electrostatic accelerator installed in 1962.

These machines allow a wide coverage of research problems in low energy nuclear physics to be made, and are equipped with the most modern ancillary devices. High resolution and large solid angle particle spectrometers are available and detection methods include scintillation counter, solid state counter, gas counter, nuclear emulsion and activation techniques. Four pulse height analysers are in use with presentation by fast print-out, punched tape or on an X-Y plot. An I.B.M. 1800 data acquisition and processing unit was brought into operation in 1967 and is on-line to an I.B.M. 360 computer. Among other things the I.B.M. 1800 computer provides multi-parameter analysis facilities.

Among the main lines of research are: (a) the determination of the locations and properties of the energy levels of nuclei with \( A < 40 \); (b) the study of the interaction of fast neutrons with matter including some aspects of the fission process; (c) \( \text{He}^3 \) and \( \text{He}^4 \) induced reaction studies; (d) pick-up (inverse stripping) and double stripping processes; (e) nuclear reactions initiated by heavy ion bombardments.

The tandem generator is one of the first of its type in the world and is the most precise and flexible accelerating machine yet designed for this energy range. With the installation of inclined-field accelerating tubes early in 1965 the maximum energy of the machine was raised to 14 MeV. It is expected in the future to
accelerate polarised ions. The machine is equipped with a 600 KeV injector which allows He³ and He⁴ ions to be accelerated to 14 MeV. In addition small beams of both ions can be obtained at energies up to 20 MeV by negative ion injection.

The 2 MeV electrostatic accelerator which was installed in August 1962, is used mainly to accelerate H¹, H² and He³ ions.

**Theoretical Physics**

Research is being carried out in theoretical problems of nuclear physics, on the physics of elementary particles and on many body problems and plasmas. About half the work is in fields related to the experimental activities of the School and the remainder on questions of a more general nature.

**THE RESEARCH SCHOOL OF SOCIAL SCIENCES**

**Demography**

In addition to formal demography, the Department’s interests include historical studies of population trends and movements and the interrelations of demographic, social, economic and cultural factors, with particular reference to three regions: Australia and New Zealand; the Pacific Islands, including New Guinea; and southern and eastern Asia. Past and current research interests include studies in the fields of population growth; marriage and the family; mortality; fertility; the history and structure of ethnic minorities; economic, social and cultural impact of immigrants; immigration policies; economic demography with particular reference to labour force analysis; demographic aspects of urbanisation and internal migration; population policies and population control; simulation of population structures and trends by computer analysis.

**Economic History**

The main research interests of the Department are in the analysis of empirical experience of long-run economic development, through the definition of rates and character of growth; the analysis of conditions of development; and the structural and institutional changes and forms accompanying this development. Work is being carried on in the general context of the comparative development of a number of advanced countries. Current research provides for specific studies of major business institutions and market structure, and the activity of public authorities; and work is being undertaken to complete a number of major statistical series, to attempt the measurement of several basic economic relationships and generally to analyse and interpret economic behaviour in terms of rates and stability of growth, structural trends and investment and institutional policy.
Economics
The work of the Department has three main branches—economic statistics, applied economics and economic theory. The central interest is in processes and problems of economic growth and fluctuation. Research fields include the capital market and monetary institutions; the principles and practice of social accounting; capital accumulation and technical progress; theoretical and statistical analyses of international trade, productivity and investment in relation to the Australian work force; national and international policies for development and stability.

Education Research Unit*
This unit was established in 1968 and will carry out research on various aspects of education and society. It will bring together sociologists, psychologists, economists, political scientists, historians and others interested in working in the areas of secondary and higher education.

Projects commenced in 1968 were the socialisation of students in several professional faculties in six Australian universities; the policies and recruitment of staff and students in colleges of advanced education; and the decentralisation of education administration in New South Wales. In 1969 work will begin on the economics of education.

History
The major emphasis has been on the growth of Australian society. Within this general theme recent changes in the staff of the Department mean that additional emphasis will be given to British influences, particularly upon Australian intellectual history. Australian labour history is aided by a fine collection of trade union records, and the special materials in Canberra are particularly valuable for the study of the early years of the Commonwealth of Australia.

In recent years provision has been made for the study of aspects of modern Indian history, and British social and intellectual history of the nineteenth century. Close collaboration exists with other departments in the Institute of Advanced Studies and with the Department of History in the School of General Studies.

In Canberra there is a great amount of material for the study of Australian history, and in other fields, particularly modern British and Commonwealth history and aspects of American and European diplomatic history, material is considerable and growing. While the Department is not at present prepared to accept scholars in all these fields, the material is useful for comparative study. The principal

* Staff working in the Education Research Unit are attached to other departments.
collections, printed and manuscript, are contained in the National Library of Australia, the Commonwealth Official Archives and the University Library.

Provision has been made for field-work in Indian and Australian history.

Law
The Department exists to carry out research in depth into the operation of legal systems, generally, and in relation to particular branches of law. It is at present concentrating on five main topics: public law (especially the constitutional and administrative law of Australia); international law; common law (in particular, the law of contract, personal property, and aspects of torts); and the general theory of law (in particular, techniques of judicial reasoning). The Department does not train persons for the active practice of law. A good working law library is available at the University, and free use is also made of the law collections of the National Library of Australia and in the Attorney-General's Department.

Philosophy
The Department places special emphasis on four areas of investigation: social and political philosophy, including the philosophy of education; the history of post-mediaeval Western movements in philosophical and social thought, including Continental and Russian thought; the logic and methodology of social science and history; the philosophy of mind, in its relation both to theories of human action and to theories of knowledge. These special studies are pursued in the context of more general problems of logic, metaphysics and ethics, in which members of the Department take a continuing interest.

Political Science
The Department is working in selected areas of four fields: Australian politics, bureaucracy and public policy, comparative politics and world politics.

Structural studies of the Australian party system and political attitudes are supported by regional and national survey research, the compilation and analysis of comprehensive election statistics; case studies of party and pressure group organisation and strategy; and research on Australian political history since 1890.

The work on bureaucracy includes history and organisation of Australian and New Guinea public services and public service associations; case studies in the administration of selected government policies; studies of ministerial responsibility and public service neutrality; and organisation theory.

In comparative politics, the Department's main present interests are in power structures and personal leadership in the USSR All-
Union Government and selected Republics. Comparative research is also done on political parties and elites in South-East Asian countries and on political development in New Guinea.

In world politics the Department's work is complementary to that of the Department of International Relations. It is concerned with the political theory of the subject: specifically, with the structural development and future of the nation-state system; with the peacekeeping and other political roles of international organisations (e.g., UN and EEC) within the system; with strategic theory as that is related to political theory; with the nature of the nation-state and its relationships to international organisations; and with the connection between states' foreign and domestic politics.

**Sociology**

Pending the appointment of a professor, the Acting Head of this Department is Professor P. H. Partridge. Research so far has been concentrated in the following major areas: sociological studies of ethnic minorities; community studies; social stratification and mobility; social structure of cities; sociology of religion; sociology of education; the social and demographic structure of the family in 'developed' societies. To date most projects, some of which have made extensive use of sample and survey theory and techniques, have been based on Australian data, but a wider objective is comparative studies of 'developed' or 'industrial' societies.

**Statistics**

The Department is engaged in developing the theory of probability and the mathematical theory of statistics in order (a) to devise methods of analysing statistical data in the biological, physical and economic sciences, and (b) to study processes and phenomena in those subjects in which some random element enters in an essential way. Most of the work of the Department is being devoted to developing new theoretical tools for this purpose and applying them in economics, geophysics, genetics and other sciences.

**Urban Research Unit**

The Unit was established in 1966 as a multidisciplinary team to examine various aspects of urban development in Australia. The major activity of the Unit is research into the process of urban development. This is being pursued firstly through a case study of selected areas in Sydney. In these areas development is being studied in detail, with particular emphasis on how decisions related to development are made in both the public and the private sector. A study in Melbourne is oriented more to expenditure measurement. The ultimate objective of both is to assist public authorities to improve the quality of the decisions they make in the area of urban development.
Another study is examining the policies of state housing authorities in Australia. The Unit takes responsibility under the direction of a steering committee, for organising Joint Urbanisation Seminars, attended by people from government, private enterprise and universities.

**Archives**

The archives section collects records of business firms, trade unions and similar organisations in Australia and its territories, thus preserving essential raw material to be used in academic research work.

At present it holds the records of 107 businesses, 155 employee organisations (trade unions, 'white-collar' associations, etc.), forty-two collections of microfilm, and some printed material. Collection of business records is largely governed by individual research projects being carried out or anticipated. On the other hand, collection of union and similar records, which began officially in 1959, is intended to cover the non-current records of all of these organisations.

**THE RESEARCH SCHOOL OF PACIFIC STUDIES**

**Anthropology and Sociology**

Since 1950 the Department has undertaken an extensive program of field research in New Guinea, Australia, Indonesia, India and the islands of the Pacific. At present work is concentrated in New Guinea, Australia, South and South-East Asia. At the end of 1968 approximately one hundred research inquiries were in progress or had been made by scholars, research fellows, permanent members of the staff and visitors using the facilities of the Department. Each inquiry usually requires from twelve to twenty-one months of field research, sometimes divided into two periods, together with a similar length of time spent at the University in preparation, library research and the writing of reports. The subjects of inquiry have varied widely but may be described broadly as the traditional social organisation and culture of non-European peoples within the Pacific region, their contemporary state and the changes taking place under modern conditions. Inquiries have also been made into matters of colonial administration and into sociological problems within European Australia. Studies in prehistory have been undertaken within the same region. The Department is well equipped with seminar and other research facilities. A small collection of specimens of material culture is being added to as research proceeds.

**Biogeography and Geomorphology**

The work of the Department is almost equally divided between studies of contemporary geomorphological and plant ecological pro-
cesses on the one hand and historical (Quaternary) geomorphology and vegetation studies. There is emphasis on karst and coastal problems and on sedimentological techniques in geomorphology. In biogeography most work is presently concentrated in montane regions of both Australia and New Guinea.

The Department has a well-equipped palynology laboratory and facilities for ecological and geomorphological work in laboratory, glasshouse and field. A small station is maintained on Mount Wilhelm in New Guinea.

Economics

The Department is concerned with theoretical and applied problems of economic growth and trade. Its primary interest is in the economic development of the countries of South-East Asia and the Pacific region, especially the territories of Papua and New Guinea, Malaysia and Indonesia, and in Australia’s economic relations with these countries.

Far Eastern History

The Department is engaged in research into the ancient, mediaeval and modern history of China and Japan. In the Chinese section present emphasis is on Chinese influences on neighbouring countries; contact between China, the West and the Pacific, particularly the spread of ideas and technical inventions in the case of the former and of certain aspects of cultural diffusion in the latter area; general history of Chinese science; Han and pre-Han history with special attention to archaeological evidence and scientific data; Yüan period history—a biobibliographical project has commenced; early Ch’ing period—Chinese Jewish communities; modern Chinese history, including a project to publish the Morrison papers and an inter-departmental Modern China area study program which is in the course of establishment. The Japanese section concentrates on modern political and economic development.

Facilities for research depend on both the Oriental collection of the University Library which exceeds 55,000 volumes in the Chinese and Japanese languages, and the Orientalia Section of the National Library of Australia which totals 70,000-80,000 volumes. There is also a representative collection in the University Library of works in European languages about the Far East.

Human Geography

The larger part of the work of the Department is at present in the cultural and economic geography of an extensive tropical region north of Australia, with concentrations at present in Melanesia and in Malaya and Thailand. There is also a strong continuing interest in industrial, urban and transportation geography within Australia. Points of emphasis include the study of economic development at
both macroregional and local levels, and the adaptation of theoretical approaches including model building to geographical research in non-western societies, and in Australian cities.

The Department has a regional map collection and cartographical facilities which are used by the Research Schools of Pacific Studies and Social Sciences, and by the University Press.

**International Relations**

The Department is concerned with the general study of international politics, especially as this concerns Australia. Its empirical work emphasises the international politics of the Asian and Pacific regions with special reference, at present, to the foreign policies of Malaysia, Indonesia, Japan, India, and the Chinese Peoples’ Republic, and the international behaviour of the smaller states of South-East Asia, and to Australia’s relations with them. Work is being carried out on aspects of Australian defence policy, on the background of Australian foreign policy and on Australia’s past diplomatic experience. The Department is closely connected with the newly organised Strategic and Defence Studies Centre. Members of the Department also pursue theoretical studies of basic questions in international relations. Theories of world politics, past and present, are studied critically. Research facilities include a press library containing a collection of the main Asian English-language newspapers, together with newspaper clippings arranged in accordance with the Department’s general and regional interests.

**Linguistics**

In previous years, linguistic research in the Research School of Pacific Studies was carried out by staff and scholars constituting a section of the Department of Anthropology and Sociology but in March 1968, an independent Department of Linguistics was established.

The Department is primarily concerned with the analysis, description, and classification of the indigenous languages of Australia, New Guinea, and the Pacific Islands. Research has been carried out in other geographical areas, principally South-East Asia, and some of this will continue, though the main focus in the future will be on Oceanic languages in general. In addition to work in structural linguistics, in which a major contribution has been made to our knowledge of the taxonomy of Papuan languages, the Department is also interested in such socio-linguistic questions as the place of vernacular languages in education, the emergence of contact languages (pidgins) and their potential as national languages, the relationship between linguistic and ethnographic data, and the significance of linguistic classification for the interpretation of migrations and the prehistory of the region studied. The Department is also responsible for publishing, under the general title...
Pacific Linguistics, a series of occasional papers, books, and monographs, covering the research interests of the Department; manuscripts are contributed by outside linguists, as well as by members of the Department.

New Guinea Research Unit

The Unit conducts inter-disciplinary social science research in Papua and New Guinea as well as operating with personnel from the departments of the Research School of Pacific Studies. It began active work in January 1961, and has established permanent housing and other facilities for research personnel resident in Papua-New Guinea. The Unit's principal research projects include the process of urbanisation, the relation of land tenure to particular aspects of productivity, changes in political organisation in New Guinea, the potential for industrial developments and motivation among New Guinean people. Projects on which research is now proceeding include studies of resettlement, markets, inter-tribal and inter-cultural relations, and voluntary associations. Through the generosity of the Rural Credits Development Fund of the Reserve Bank of Australia, the Unit has been able to develop work into subsistence agriculture, cash cropping and co-operatives. Co-operation with the departments of the School is maintained through daily contact and formally by a committee controlling the Unit's activities under the chairmanship of the Director. (Address of Port Moresby office: Box 1238, P.O., Port Moresby. Cables: Natuniv Port Moresby. Telephone: Port Moresby 53200. Contact may also be made through the Unit's office in Canberra.)

Pacific History

The Department is concerned with the study of problems relating to sustained contact between western and indigenous cultures in the Pacific Islands and in South Asia, principally Indonesia and Malaysia. The general focus of this study is that of the colonial society, its origins, its functions, and its development towards self-rule and national independence. Fields of inquiry include political development and the formulation of administrative policy; the establishment and operation of commercial, industrial, and plantation enterprises, labour traffic, and land policies; and missionary activity. Much of the Department's research requires the use of unpublished records held by government archives, mission societies, commercial firms, research libraries, and private persons. Field trips are frequently undertaken to engage in documentary research and to collect data from informants associated with the areas being studied. The Department also offers a program of seminars based upon its current research.

The Pacific Manuscripts Bureau, which is concerned with the
location and photo-copying of manuscripts relating to the Pacific Islands, is attached to the Department.

The *Journal of Pacific History* is sponsored and edited by members of the Department.

**Strategic and Defence Studies Centre***

This Centre was established during 1966 by the Director, Research School of Pacific Studies. An Advisory Committee includes members of the Research Schools of Pacific Studies, Physical Sciences and Social Sciences, and the School of General Studies. A small, full-time research staff has been recruited.

The Centre holds regular and special seminars throughout the year, and occasional larger conferences. A major conference was held in September 1967 on the implications for Australia of British defence policies. It was attended by members of five Australian universities, officials, diplomats and the press. In February 1968 a conference was held in Wellington, New Zealand, on Australia-New Zealand defence co-operation.

A working collection of documentary material from public sources has been established.

**THE RESEARCH SCHOOL OF CHEMISTRY**

The School spans the fields of inorganic, organic, physical and theoretical chemistry.

Work is being carried out in the following fields: development of new organic synthetic methods; biosynthesis of mould metabolites and antibiotics; use of modern physical methods, including mass-spectroscopy, in the examination of natural products; some aspects of organo-metallic chemistry; solid state physics and physical chemistry of molecular crystals; ultra-violet and spin-resonance spectroscopy, particularly of solids; electronic theory of polyatomic molecules and crystals.

**THE RESEARCH SCHOOL OF BIOLOGICAL SCIENCES**

*Behavioural Biology*

The group will be concerned with two main themes. One is the structure and function of nerve cells in lower animals where relatively simple situations permit an analysis of mechanisms, the other is the behaviour of Australian mammals or birds.

*Developmental and Cell Biology*

The group is concerned with research on aspects of the development of animals, plants and micro-organisms and with the ultra-structure and function of cells and cell organelles in relation to

*Staff working in the Strategic and Defence Studies Centre are attached to other departments.*
their development. Protein and nucleic acid metabolism in relation to development are stressed, but descriptive studies of growth and development and investigations of environmental and hormonal regulation of these processes are also envisaged.

Environmental and Population Biology

The group is concerned with studying the effect of environmental factors on the physiological performance and ecological distribution of various species and populations. Areas of particular interest include environmental physiology, with emphasis on the effects of environmental stress; water and ion transport in cells and tissues and associated biochemical energy transformation; environmental physics, with reference to transfer processes in the soil and atmospheric microenvironment; and quantitative ecology, particularly the analysis and simulation of important physiological and ecological processes.

Genetics

The group is equipped for research on molecular and biochemical genetics. It uses micro-organisms, especially the fungus Neurospora crassa and bacteria, as its main experimental material. The problems under particular study include the mechanisms of recombination and mutation, the genetical control of recombination, the fine structures of genes and their relation to function, the genetics of permease systems, complementation, the primary structure and properties of histidinol dehydrogenase and its variants, and the control of metabolism, with particular attention to mechanisms of regulation and of feedback inhibition.

Molecular Biology

The unit will be concerned with the molecular biology of cell differentiation, growth and multiplication and will have a special interest in the relation between protein synthesis and nucleic acids.

Taxonomy

This unit will be concerned with taxonomic principles in general and with the study of selected groups of Australian plants.

THE SCHOOL OF GENERAL STUDIES

THE FACULTY OF ARTS

Classics

The Department offers full pass and honours courses in both Latin and Greek, a one year course in each of Greek Civilization and Roman Civilization (art, history and literature in translation) and in the Classical Tradition in European civilisation, and supervision for the degree of master in classics. The courses are
designed to allow the fullest scope to the special abilities of the staff and the special interests of the individual student by offering, where appropriate, optional topics of study rather than set books.

**Greek**
The first-year course assumes no knowledge of Greek and is devoted to mastering the elements of the language, a special course being available for those with adequate previous knowledge. Greek II and III comprise a series of options covering aspects of the history, literature, thought, art and language of Greece. The fourth year concentrates on some particular period of Greek civilisation and studies it in detail from these aspects.

**Latin**
A course is available for students with no previous knowledge of Latin, and students may under certain conditions pass from this into the second and third years. The normal first year (Latin 1b) and Latin II and III comprise a series of options covering aspects of the history, literature, thought, art and language of Rome together with exercise in translation into Latin and extensive reading of Latin literature. The fourth year concentrates on some particular period of Roman civilisation and studies in detail its history, literature, art, thought and language.

**English**
The Department of English offers courses in English Literature (including Australian and American Literature) and in Early English Literature and Language. Students proceeding to a pass degree may take majors, sub-majors or single units in either or both of these fields. Students proceeding to an honours degree in English must take majors in both. In English Literature (which deals with major poets, novelists and dramatists since the fourteenth century), Australian Literature and American Literature, an historical approach serves as the basis for training in the discipline of literary criticism, which is the main purpose. In Early English Literature and Language the aim is to promote a critical understanding of mediaeval literature through a precise knowledge of its language and an acquaintance with its cultural background. For the honours degree a comprehensive study of English Literature (both mediaeval and modern) is required in the first three years, while in the fourth a special period is chosen for detailed investigation. The choice includes advanced training in the language and literature of the English Middle Ages, an introduction to a second mediaeval vernacular or to mediaeval Latin, and a study of Renaissance, Augustan or modern English literature. Supervision is also offered to candidates for the degrees of Master of Arts and Doctor of Philosophy.
French

For the Pass Degree of Bachelor of Arts the Department offers a three-year course in French Language and Literature, and a two-year course in French Studies. The former is designed to ensure proficiency in spoken and written French, an acquaintance with various aspects of French civilisation, a knowledge of literary history, a training in the methods of literary criticism, and an appreciation of works by major writers from the seventeenth century onwards. French Studies consist of the early history of the language together with literature of the Middle Ages and of the sixteenth century. Candidates for the degree with honours take all five of these units in their first three years. The fourth-year syllabus consists of literature of the twentieth century, further studies in the literature of previous centuries, and advanced language work.

The research interests of the present staff lie in the following fields: the mediaeval chroniclers, the theatre in the Middle Ages and the sixteenth century, the nineteenth and twentieth-century novel, the twentieth-century theatre, and comparative literature.

General Linguistics

The first two years’ work in General Linguistics provides a self-contained introduction to synchronic or descriptive linguistics. The first year is spent on a survey of phonology (phonetics and phonemics) while the second year curriculum includes more advanced work on phonemics and an introduction to modern grammar. It is assumed that, by the end of their second year, students will have a general understanding of the main problems and achievements in this field.

In the third year, students divide their time between the study of instrumental phonetics and a series of lectures on historical and comparative linguistics.

A fourth (honours) year is offered.

Geography

The Department is being developed to offer a balanced coverage of teaching and research in physical and human geography. General surveys are complemented by detailed consideration of research problems and methods. It is hoped that, in due course, the subject will become available to students in science as well as in arts and economics. Students enrolled for pass and honours degrees pursue a common course, but after first year, honours students read more deeply in all their courses and in their fourth year devote their attention exclusively to geographical studies. Research work is at present being carried on by staff and by candidates for postgraduate degrees in the fields of geomorphology, climatology and hydrology, political, social (including medical) geography, and economic geography. Close relations are maintained with the Depart-
ment of Human Geography and with the Department of Biogeography and Geomorphology.

**German**

For the Pass Degree of Bachelor of Arts the Department offers a three-year course in German Language and Literature, and a two-year course in German Studies. The former is designed to give students a good command of spoken and written German, an acquaintance with German civilisation, a knowledge of literary history, a training in the methods of literary criticism, and an appreciation of works by major writers from the eighteenth century onwards. German Studies consist of the history of the language together with literature of the Middle Ages and of the sixteenth and seventeenth centuries. Candidates for the degree with honours take all five of these units with some extra work in their second and third years. The fourth-year syllabus consists of a deepened study of selected aspects of German or Germanic languages and literatures. A course in Elementary German is specially designed to provide, in one year, a practical knowledge of German for those who have not previously studied the language. Students who undertake further work during the holidays may qualify for German I by means of an entrance test. German I(s) caters for the needs of social science students; literary texts are replaced by reading material on German history and politics.

The research work of the staff has extended to both linguistics (present-day German usage, bilingualism, translation) and literature (Romantics, mediaeval textual criticism, modern radio plays). Research work currently undertaken by postgraduate students concerns Przbyszewski, a comparison between James Joyce and Robert Musil, mediaeval relics in the German fairy-tales, and problems of gender in modern German.

**History**

The three courses available in history for first-year students proceeding to pass degrees in arts, economics, or law, are British History from the eighteenth to the twentieth centuries, Ancient History and a study of the Church from its origins to the time of the Reformation (Modern History A). In later years the choice is from American History, Australian History, Renaissance and Reformation History, more recent European History (since 1815), and Indian History. The honours courses consist in more extensive explorations of phases and aspects of the periods listed above, together with an introduction to the masters of historical writing, for the light they throw both on these topics, and on the fundamental questions of method and understanding in the study of the human past. Successful honours students at present proceed direct to the degree of Master of Arts by writing a thesis; pass students who
wish to take the degree of master first study two of the honours degree subjects, write an essay of about 15,000 words on an approved subject and pass a qualifying examination in them.

Mathematics
The Departments of Pure Mathematics and Applied Mathematics each offer full courses for pass and honours degrees. These courses may be taken concurrently by a student specialising in mathematics as part of a degree of bachelor in arts or science, while sections of these courses may also be taken by students specialising in other subjects.

The courses for the pass degree extend over three years giving an introduction to the basic mathematical disciplines and their applications. The honours degree requires additional work in mathematics including a fourth year of study. It may be taken either as an honours degree in pure and applied mathematics, or in each separately, or as a degree in either of these combined with some other subject, such as statistics or theoretical physics. A combined honours course in pure mathematics and philosophy is also provided. Beyond this the Departments offer postgraduate courses leading to the degrees of Doctor of Philosophy and master. The major research interests of the Departments are at present in group theory, abstract analysis, numerical analysis, theoretical astronomy and hydrodynamics.

Philosophy
The Department engages in teaching and research work in all the main fields of philosophical inquiry. Its teaching program comprises six unit courses for arts students, designed also, in some cases, to be of value to students in other faculties, and a series of special honours courses to which students reading for the pure honours degree in philosophy devote their whole time in their third and fourth years. Combined honours courses are provided for, and the Department, in conjunction with the Department of Pure Mathematics, currently teaches a combined honours course in philosophy and pure mathematics. Research work, at the present time, is concerned mainly with problems in ethics, philosophy of mind, philosophy of science (natural and social), logic, metaphysics, and Greek philosophy. Facilities are available for students doing postgraduate work in arts on these and other philosophical problems.

Political Science
The Department offers courses at both pass and honours levels in political theory and institutions, public administration and international relations for the degree of bachelor in either arts or economics. For the arts degree, political science units may be com-
WORK OF THE DEPARTMENTS

combined with a wide range of units offered by other departments in the Faculty of Arts; for the economics degree, a margin of choice is available but there is a core of prescribed units in economics and statistics. Particular units offered by the Department may also be approved for inclusion in courses for the degrees of Bachelor of Arts (Oriental Studies) and Bachelor of Laws and also in the combined arts/law course. An honours degree course in political science requires, besides the special (fourth) honours year, additional work at the higher standard in four of the ten units undertaken in the first three years of the course.

Psychology
See the Faculty of Science.

Russian
For the Pass Degree of Bachelor of Arts a three-year course in Russian is offered. This is designed to provide facility in reading, writing and speaking Russian, and a critical appreciation of representative works of Russian literature. No previous knowledge of the language is assumed. Candidates for the degree with honours take additional courses in Russian literature, language, society and thought in their first three years. In their final year they undertake specialised studies in history of literature, history of language and history of literary criticism, together with advanced practical language work. They are also required to write a short thesis on a literary topic.

The chief areas of research interest of the present staff are nineteenth and twentieth-century literature and modern Russian syntax and morphology.

Supervision is available for candidates for the degree of Master of Arts.

THE FACULTY OF ECONOMICS

Accounting and Public Finance
The Department undertakes research and offers courses in accounting and public finance in the Faculty of Economics. Accounting is studied as a basic academic discipline among the social sciences. Emphasis is therefore placed on theoretical aspects of accounting and on its role in relation to business management, public administration and the formulation of national economic policy.

Accounting I is a self-contained course in the elements of accounting. Accounting II is a course in managerial accounting and business organisation. Accounting IIIA and Accounting IIIB consist of a number of optional half-units as follows: public authority accounting; national economic accounting; financial accounting theory; company finance. The courses in public authority account-
ing and national economic accounting are concerned with the role of accounting in providing governments with the information they need to manage their own affairs and to control the economy. Financial accounting theory is an advanced course in income measurement and valuation theory, while company finance is especially concerned with the theory of financial management.

A fourth (honours) year is available to students wishing to specialise in accounting.

The course in Public Finance is an optional one-year unit which is most conveniently taken in the third year of the pass degree. It is concerned chiefly with taxation theory and policy, public expenditure theory and policy, government financial institutions and the national debt. A fourth-year honours course is also available in Public Finance.

A graduate who has obtained a degree of bachelor in economics or commerce at a recognised university may enrol for the degree of Master of Economics in accounting or public finance. Suitably qualified graduates may also undertake studies and research in accounting or public finance leading to the degree of Doctor of Philosophy.

The Department's research activity is concerned mainly with problems of financial accounting theory, managerial accounting, public authority accounting (including the accounts of public enterprises), national economic accounting and public finance in Australia.

**Economic History**

The Department conducts teaching and research in economic history and history of economic thought, its courses being available both in the Faculty of Economics and the Faculty of Arts. Four units are offered, all of which deal chiefly with modern periods. Economic History I is intended as an introductory survey and is concerned primarily with British and American development since the late eighteenth century. It also includes a discussion of international economic conditions from 1919. Economic History II offers an intensive course on the economic development of Australia, including a study of Australian trade policy since the nineteen-thirties. The syllabus in Economic History III includes the economic development of Japan since c. 1867 and some other countries since 1945. History of Economic Thought discusses the development of economic theory in relation to economic problems and policies since the seventeenth century.

A fourth (honours) year is available to students wishing to specialise in Economic History.

The Department's research interests lie mainly in Australian economic history and the history of economic thought. For the latter, materials are available in the Kashnor Collection at the National Library of Australia, as well as the University Library.
Economics
Degree courses in economics can be taken either in the Faculty of Economics or in the Faculty of Arts. In the Faculty of Economics the emphasis is on professional training; economics is studied in combination with related disciplines such as statistics, mathematics, economic history, political science or accounting. In the Faculty of Arts the economic major can be combined with a variety of arts subjects. The economics major consists of three one-year courses, in which the student studies the main branches of economic theory, the organisation of business enterprise and the main problems of economic policy. Throughout, the course is closely related to Australian conditions, but much attention is given to international economics and the economic affairs of nations with whom Australia has important trade relations. In addition to the three central courses, there are one-year courses in public finance, mathematical economics, labour economics, agricultural economics, history of economic thought and economic geography.

Honours students are required to take the pass course with some additional honours work in the first three years and a fourth honours year in which they do advanced work in economics. The Department offers postgraduate courses in economics for the degrees of Master of Arts and Master of Economics.

Political Science
See the Faculty of Arts.

Statistics
Statistics is concerned with the process of drawing inferences from data which have been generated by some mechanism in which chance elements play a part. As such its study is closely associated with that of the Theory of Probability. The Department provides a (non-mathematical) course in statistical methods for economists and for other social scientists. In addition a series of courses is given dealing with the theory of the statistical methods as well as their practice. These courses, which are mathematical in content, also deal with various applications of the Theory of Probability so that a considerable part of that range of subjects which is often called 'Operational Research' is covered.

Research in the Department at present consists of work in mathematical statistics and pure and applied probability, and in the applications of statistical methods. Fields of special interest are time series analysis, multivariate analysis, econometrics, queuing and renewal theory, limit theorems of probability, Markov chains and theories of traffic flow.

THE FACULTY OF LAW
The Faculty of Law offers courses for the Pass Degree of Bachelor of Laws, the Degree of Bachelor of Laws with Honours and the
degree of Master of Laws. A full-time student can complete the undergraduate course for the degree of Bachelor of Laws in four years. The course may also be taken part-time. It is possible to complete a combined arts/law or economics/law course leading to qualification for the two degrees in five years of complete full-time study.

A student taking the Bachelor of Laws degree course receives basic training in New South Wales, Victorian and Commonwealth law. In addition to the inclusion of legal subjects of direct practical value, the course includes subjects which have a more general perspective making possible an appreciation of the totality and function of law in modern society. A student may take a general course or may specialise in his third and fourth years in either the commercial law or public law fields.

The degree of Bachelor of Laws is recognised in Victoria and New South Wales as a professional qualification. Australian National University graduates may, subject to completing certain postgraduate requirements prescribed in the two States, practise in Victoria as a barrister and solicitor or in New South Wales as a barrister or solicitor. State requirements refer principally to the service of articles under a qualified solicitor. In Victoria one year's articles are served after graduation and in New South Wales if a graduate wishes to practise as a solicitor he must undertake one year's articles and one year's qualified practice. There is no requirement as to articles in New South Wales for a graduate who intends to practise at the Bar.

After admission in either State a graduate may have his name entered on the High Court Register which entitles him to practise in all federal jurisdictions, including the Australian Capital Territory.

THE FACULTY OF ORIENTAL STUDIES

Asian Civilization

In order to acquaint the student with Asian culture, seven special courses are presented. The introductory course in Asian Civilization gives a general survey of the social forces which moulded the peoples of Asia. It integrates their civilisations into the wider picture of Asian history and world history itself. In the second and third year courses the student is offered a choice between a Far Eastern, a South-Eastern Asian and a South Asian specialisation. The Far Eastern courses deal in some detail with the history, institutions and thought of China and Japan. The South-Eastern courses cover the continental countries of the area, together with Indonesia and the Philippines. The South Asian courses cover the area of the present-day India, Pakistan and Ceylon. In all three regions, apart from political history, emphasis is also given to archaeology, literature, philosophy, art, religion and anthropology.
Special second and third-year courses are provided for honours students, and intensive training in special aspects of Asian civilisation is given in fourth-year honours courses. Research supervision for the degrees of Master of Arts and Doctor of Philosophy is provided in all the regions covered by the Department.

Chinese
The full three-year course includes both modern and classical Chinese. The course in modern Mandarin aims to develop a practical skill and an active command of the Chinese language as spoken and written today. The first year is wholly devoted to basic language study. The more advanced second and third-year courses include readings of a representative selection of contemporary literature, newspaper texts and documentary prose.

Classical Chinese is taught from the first year as a separate major. In the second and third years the students read an extensive selection of classical and mediaeval texts composed by China's great philosophers, historians, essayists and poets.

A fourth-year honours program provides intensive courses in either classical or modern literature.

Indonesian Languages and Literatures
The courses offered are Bahasa Indonesia and Malay* I, II and III, and Javanese A and B. Instruction in certain other Indonesian languages (Minangkabau, Sundanese, Balinese) can be arranged as required.

Bahasa Indonesia and Malay I is devoted to Bahasa Indonesia, the national language of Indonesia, as a modern language, and is designed to give the student competence in the basic skills of speech, reading and composition.

Bahasa Indonesia and Malay II is likewise modern in orientation, and aims to develop a more active command of the language. During this year, emphasis is laid on the cultural and documentary aspects of the texts studied.

Bahasa Indonesia and Malay III includes the study of texts in so-called classical Malay, and other older forms of the language. However, an important proportion of this course is given to the continued development of practical skills and modern literary studies.

Javanese A is a course in the literary language, accepted as standard since the seventeenth century. Prescribed texts include selections from local chronicles and Javanese religious and ethical works. Javanese B is a course devoted to the forms of the language extant between the tenth and the sixteenth centuries. Prescribed

* For convenience, modern Malay and Bahasa Indonesia are grouped together. During the first two years, however, the major emphasis is laid on the projection of Malay known as Bahasa Indonesia.
texts include selections from Old Javanese historical works, court poems and renderings of the great Indian epics.

The Department also offers a unit in Elementary Literary Arabic for the benefit of students with a special interest in the Islamic period of Indonesian-Malaysian civilisation. It is available for students not enrolled in any of the other units offered by the Department.

Since many of the standard works for studies in the Indonesian field (dictionaries and grammars for linguistic work, monographs and articles for historical studies) are in Dutch, a two-hour per week tutorial class in Dutch is provided within the Faculty. This class is recommended for pass degree students, compulsory for honours degree students, and is normally to be followed in the second year. Separate enrolment is not necessary.

Japanese
The Department offers two types of courses. The three-year course in Japanese language at either pass or honours standard is designed to provide competence in the modern language for those who require it as a means of communication or as a tool of research, for example in social sciences. A student who has completed this course will be reasonably fluent in speaking and in reading modern materials, although a short period of practice in the country would be desirable for full control of the language. Since the course requires no previous knowledge, it calls for a considerable effort of study.

For students who plan to specialise in Japanese language or literature the Department provides in addition to the basic language courses, a second-year unit in literary Japanese and a third-year unit in either classical or modern literature. These are available to students who began their courses in 1967. Students in this category normally plan to take courses in the Honours School of Japanese.

In the fourth (honours) year work is selected from further study of Japanese linguists, literature (modern or pre-modern emphasis), historical background and teaching methodology, taking into account the needs and interests of the student.

The research interests of the Department are at present in the fields of Japanese linguistics and social and economic history.

South Asian and Buddhist Studies
The three-year course in Sanskrit concentrates on classical Sanskrit. The first year is devoted to the study of Sanskrit grammar and the reading of easy classical texts. The second and third-year courses include readings of various specimens of Sanskrit literature and the study of the history of Sanskrit literature.

A four-year honours course includes seminars in Pali and Prakrit in the second and third year. The fourth honours year is devoted to the reading of Vedic texts and a selection of more difficult San-
skrit texts, with the addition of seminars in text criticism and research methods.

The study of Sanskrit is a necessary prerequisite for the study of ancient Indian culture in its various aspects, and it also provides a basis for the study of modern Indian languages.

THE FACULTY OF SCIENCE

Biochemistry

Biochemistry is concerned with studying living things by using chemical procedures and concepts. The undergraduate course provides a general introduction to modern biochemistry with the possibility of some specialisation, particularly in molecular genetics, the biochemistry of development and metabolic regulation; the honours year is designed primarily as an introduction to research. The Department has facilities for postgraduate work leading to the degrees of Master of Science and Doctor of Philosophy. The research interests of the Department are centred around aspects of the biochemistry of differentiation and development and the control of metabolic processes in non-microbial systems; special emphasis is being given to the role of nucleic acids and mitochondria in these processes.

Botany

Instruction is given in botany leading to the pass and honours degree of Bachelor of Science. Facilities are available for research leading to the degrees of Master of Science and Doctor of Philosophy. The main research interests of the Department at present are studies in inheritance and breeding systems, experimental taxonomy, plant physiology particularly relating to growth substances and photosynthesis and also studies in mycorrhizae, ecology and environmental analysis.

The Department transferred to the permanent Botany Building in 1968. This comfortable building is conveniently located between the Zoology Building and the Forestry Building. A group of eight glasshouses for raising plants for experimental use has been provided on the campus on a site immediately adjoining that of the permanent departmental building. Several phytotron cabinets are available for controlled environment studies, both in the Department and in the Ceres phytotron itself. A building housing eight of these forms part of the glasshouse-field plot complex. Facilities are available too for work in the field.

Chemistry

The Department presents three-year courses in chemistry for the Pass Degree of Bachelor of Science and four-year courses for the Degree of Bachelor of Science with Honours. Various fields of inor-
ganic, organic and physical chemistry are developed simultaneously during the first two years, but some specialisation is permitted in the third and fourth years. The fourth year includes an introduction to research.

Students enrolled for the degrees of Master of Science and Doctor of Philosophy can work in the usual fields of pure chemistry, or in certain aspects of applied chemistry. The research program at present includes investigations in: X-ray crystallography, coordination chemistry, interhalogens, photo-chemistry, high temperature reactions, organic natural products, heterocyclic synthesis, atomic and molecular spectroscopy, macromolecular systems, reaction kinetics, aspects of quantum chemistry. There are also groups studying the wool fibre and insect attractants.

**Forestry**
The Department was established in 1965 as the national centre for higher forestry education. The first year of the four-year forestry course leading to the degree of Bachelor of Science (Forestry) is taken in other science departments of this University or in science departments of other universities by arrangement. Normally the second year is taken partly in the Department of Forestry and partly in other science departments of this University, whilst the last two years of the course are taken wholly within the Department and lead to pass or honours degrees.

Research facilities are available for students taking the degrees of Master of Science and Doctor of Philosophy. The major research interests of the Department are silviculture, tree physiology, wood science, resource management, forest mensuration, biology, pathology, pedology, economics and utilisation.

**Geology**
The Department offers the normal courses of instruction in geology for the pass and honours degree of Bachelor of Science. In addition, facilities are provided for research towards the degrees of Master of Science and Doctor of Philosophy. The principal research interests in the Department are in the fields of invertebrate palaeontology and micropalaeontology, igneous, metamorphic and sedimentary petrology; stratigraphy; structural, economic and petroleum geology; and crystallography.

**Mathematics**
See the Faculty of Arts.

**Physics**
In addition to the regular pass and honours courses of instruction in physics towards the degree of Bachelor of Science, facilities are provided for research towards the degrees of Master of Science and
Doctor of Philosophy. The major research interests in the Department are in the fields of low energy atomic collision processes, solid state physics and high temperature gas dynamics.

The Department is located in a well equipped building which provides the customary workshop and service facilities for both teaching and research.

Psychology

Courses in psychology are planned to contribute to the general educational background of students rather than to give specific professional training. Their concentration is upon core psychological theory and technique upon which any of a variety of applications in research, teaching, vocational guidance, counselling or industrial personnel administration may be built. Applied psychology, as such, is not taught.

The emphasis is upon the understanding of behaviour, personality and interpersonal interaction as both biological and social phenomena. Courses are designed to provide a sound basis of psychological method and findings for advanced research in psychology or for the practice of psychology as a profession.

From the courses offered, a variety of study programs may be constructed from a single unit general survey to an intensive honours program. A student may read psychology for a pass degree or an honours degree in arts or in science, and in either case for a single major in association with other relevant units or for greater specialisation in psychology itself.

The Department pursues no co-ordinated research program but has research interests and facilities for postgraduate students in the areas of group behaviour, the counselling relationship, personality theory, the development of thought processes and perception, general experimental and physiological psychology, including the effects of environmental heat on behaviour.

Theoretical Physics

The Department, which is housed in the Physics Building, offers courses in theoretical physics at third and fourth-year levels for the pass and honours degree of Bachelor of Science. Facilities are provided for research leading to the degrees of Master of Science and Doctor of Philosophy. At present the principal research interests in the Department are in the fields of quantum mechanics, scattering theory, general relativity theory and optical aberration theory.

Zoology

Zoology may be broadly defined as the study of the animal kingdom in all its aspects. The Department offers undergraduate courses extending over three years for a pass degree and four years
for an honours degree. Extensive facilities for the postgraduate work leading to the degrees of Master of Science and Doctor of Philosophy are available. The research interests of the Department, which occupies a new well-equipped building, are chiefly centred around invertebrate physiology, parasitology, endocrinology, developmental biology, biochemistry, freshwater biology, histochemistry and ecology.

DEPARTMENT OF ADULT EDUCATION

The function of the Department is to provide courses for adults who are concerned to develop and to extend their knowledge in some field of the humanities, social and physical sciences, and who do not wish to undertake a degree course or who are already graduates.

The courses provided range in length from one term to three years. They are designed to stimulate the active engagement of the students in the study of a subject. This may be in a new field peripheral to or remote from a student's earlier studies, or to refresh knowledge that advances in learning are beginning to render obsolescent. Lectures are complemented by the participation of students in discussion, reading and written work, field excursions or other forms of active learning. In many courses provision is made by the Canberra Public Library Service of specially selected reading matter to supplement texts purchased by the student.

Short intensive refresher and other types of schools and seminars are conducted, ranging in duration from two to three days to three weeks. Discussion and kit courses, and the requisite books and other materials, designed and produced by the University of Sydney, are available through the Department to residents of the Australian Capital Territory.

COMPUTER CENTRE

The Computer Centre is equipped with an I.B.M. 360 model 50 with 256 K bytes of core store, five disc drives, four magnetic tape drives and a card reader and line printer.

This equipment is used to provide a computing service to the University, and members of the staff of the Computer Centre are available to advise and assist in the planning and execution of computing projects. Introductory courses in computer programming are given during the year and more advanced courses and seminars are organised in specific problem areas.

Research is currently being undertaken in numerical analysis in the numerical solution of differential equations, general problems in the approximation of functions, and in optimisation techniques, also in the structure and implementation of programming languages with particular reference to exploiting the features of the
new language PL/1. In addition, the effect of the various parameters of a time sharing computer system are being investigated with a particular reference to maximising the efficiency of the University installation.

Supervision is provided for students enrolled for the degrees of Master of Science and Doctor of Philosophy, and formal instruction is given to undergraduates, particularly those enrolled for courses in statistics and accounting. This work is to be expanded following approval for second and third-year units in Digital Computing to be offered by the Computer Centre within the Faculty of Economics.
GENERAL INFORMATION

ADMISSION AND TRAINING OF RESEARCH STUDENTS
IN THE INSTITUTE OF ADVANCED STUDIES

The University confers, on the recommendation of the Institute of Advanced Studies, the degree of Doctor of Philosophy, to which most of its research students proceed. Research students admitted by the School of General Studies may, in certain circumstances, study in the Institute for the degrees of master.

Before being admitted as a research student a candidate will normally be required to show that he has graduated from this or another university of senior standing and that he has since had an initial training in research.

In general, students for the degree of Doctor of Philosophy will be required to spend three years of full-time work in the University and will during that time be required to live in Canberra. Those whose fields of study make field-work important are given opportunities to undertake such work and may receive contributions towards their expenses. Periods of field-work are counted as part of the study required for a degree.

The principal work of the research student is the pursuit of an approved piece of research under supervision and the submission of a thesis based upon that research. There is an oral examination on the thesis. The student is also given training in the research techniques required for the pursuit of his subject, and opportunities for considering the relationship of this specialised work with a more general background of theory. In most cases research students are required to attend some seminar classes and to prepare interim papers.

Research students who do not hold awards which provide exemption from fees are required to pay fees totalling $135 per annum.

A number of scholarships is awarded each year to enable students from Australia and elsewhere to come to the University and study for the degree of Doctor of Philosophy. Medical Scholarships may be awarded to those legally qualified to practice medicine. Applications for enrolment as research students or for the award of scholarships may be made at any time. The main selection of scholars is made in February, May and November each year.

ADMISSION AND DEGREE COURSES IN THE SCHOOL OF GENERAL STUDIES

Descriptions of the degree courses in arts, economics, law, oriental studies and science which are available in the School of General Studies are given in the Faculty Handbook; the Handbook contains details of syllabuses and book lists, admission and enrol-

Admission

Applications for admission to a hall of residence or affiliated college are made to the Academic Registrar by 31 October each year.
Private Lodgings

Each year the University seeks for students private lodgings which it inspects and approves. Inquiries concerning such accommodation should be made at the Student Administration office.

UNIVERSITY UNION

The University Union is a society of university students and staff which aims to provide in the University a common meeting place for its members and to promote their intellectual and social interests, and general welfare.

The Union is an integral part of the University. Its constitution, granted by the Council, gives it a substantial degree of freedom in the management of its affairs. It is managed by a Board of Management, the membership of which includes representatives of the University Council, the students (undergraduate and post-graduate) and the staff.

Located in Ellery Circuit near the General Studies Building of the University Library, the Union occupies University premises specially designed for its purposes. The premises provide dining, common and recreation rooms, rooms for student clubs and societies, a milkbar, coffee-lounge and service shop.

Membership is open to students, staff, members of the Council and Convocation, and graduates of the University. Undergraduates are required to be members. A full-time student undertaking an undergraduate course pays an entrance fee of $11 and an annual fee of $22; a part-time student pays the entrance fee of $11 and an annual fee of $14. The annual membership fee for a member of the staff is $11 (with exemption from entrance fee). The fee for life membership is $50 plus the entrance fee. A staff member may be admitted to life membership without additional payment after eight consecutive years of membership. Life membership is not normally available to undergraduates.

The Secretary of the Union is E. C. de Toth, M.A. (W. Aust.).

UNIVERSITY FELLOWSHIPS

Council has established the office of University Fellow as a means of honouring a limited number of distinguished scholars and enabling them to continue scholarly work after their retirement. A small committee of Council considers nominations. Maximum tenure is three years and no more than three fellowships can be current at one time.

ASIAN FELLOWSHIPS

The Council of the University has established an Asian Fellowship to which it will invite distinguished scholars from the staffs of Asian universities who during their stay at the Australian National
University will undertake research or teaching in their chosen academic disciplines. The University hopes that the establishment of this Fellowship will help to bring Australia more immediately into contact with the civilisation, the knowledge and the philosophy of Asian peoples. Appointment is made on the advice of a selection committee.

An Asian Fellowship is normally held for no less than six or more than twelve months and no more than one fellowship may be held at any one time.

The following Asian Fellows have been appointed:
1965—Prince Subhadradis Diskul
    —Professor Wang Gungwu
1967—Dr Li Chi
1968—Professor Shigeru Hayashi

CREATIVE ARTS FELLOWSHIPS

Fellowships in the Creative Arts were established by the University to encourage creative work in the arts in Australia. A Committee of Council considers nominations of artists in various fields for awards in one or two broad classes, one for promising or established people to enable them to spend a substantial period of their work free from economic anxiety; the second category is for distinguished artists, usually from abroad, including overseas Australians, to enable them to contribute to artistic life in Australia for shorter periods.

The following Fellows have been appointed:
1965 —Mr Sidney Nolan
1965-1966—Mr John Percival
1967 —Mr George Dreyfus
1968 —Mr Rodney Hall

SCANDINAVIAN—AUSTRALIAN CULTURAL FUNDS

In 1952, to mark Australia's Jubilee Year, the Danish, Norwegian and Swedish communities in Australia each raised a fund for the encouragement of close and friendly scientific, educational and cultural relations between their countries and Australia, particularly by assistance towards meeting the expenses of visits in either direction. The administration of the funds was vested in the Australian National University.

Applications for grants from the income of the funds are invited in September or October each year from persons who wish, for reasons connected with their work, to visit one of the Scandinavian countries. Grants, which are usually of the order of $100-$200, are awarded for visits to one of the three Scandinavian countries in rotation over a three-year period. For example, awards for 1968 were for visits to Denmark; in 1969 awards will be for visits to
Sweden and in 1970 to Norway—this cycle to be repeated in subsequent years. Grants are payable on 1 July each year.

The University retains the right to make grants at other times in suitable cases, if funds allow. The availability of the funds is also made known in the Scandinavian countries for the benefit of persons intending to visit Australia.

EMERITUS PROFESSORS

The University has established a Roll of Emeritus Professors of the University. Council may from time to time direct the insertion on the roll of names of professors who have left the University by reason of age or ill health, or in other circumstances such that they are unlikely to take a fresh appointment to a chair. A list of Emeritus Professors is given in Former Officers of the University.

AUSTRALIAN NATIONAL UNIVERSITY PRESS

The Press is the scholarly publishing department of the University. It is under the administrative and financial control of the Vice-Chancellor. The Editorial Committee, which replaced the former Publications Committee, is the academic body responsible for the editorial policy of the Press. The present imprint was established in 1965, and the first Director was appointed late in 1967.

Publications by the Press reflect many of the research and teaching activities of the University. In the last two years the publishing program has been expanded considerably and is now as large as any university program in Australia.

UNIVERSITY CO-OPERATIVE BOOKSHOP LTD

At the invitation of the University the University Co-operative Bookshop Ltd established a bookshop on the University site early in 1966, located, for the time being, on the lower ground-floor of the University Union. The bookshop stocks books which are prescribed or recommended for reference or preliminary reading in connection with courses of study in the School of General Studies and a good range of other books likely to be of interest to staff and students. The Bookshop is willing to order any book not held in stock.

A member of the Co-operative receives an annual dividend which consists of a percentage of the amount spent on books. The membership fee is $5 payable once (not annually) and is returnable upon termination of membership. Normal discount on book purchases applies to all staff and students who are not members of the Co-operative.

A University Bookshop Committee with membership drawn from the academic boards, students' associations and the University Union has been established to consult with the management of the Bookshop on the needs of the users of the Bookshop.
GENERAL INFORMATION

Hours of operation of the Bookshop are 8.30 a.m. to 5.30 p.m. Monday to Friday. During terms the Bookshop remains open until 6.30 p.m. on Tuesday and Wednesday.

THE MORRISON LECTURE

The George Ernest Morrison Lecture was founded by Chinese residents in Australia and others in honour of Dr G. E. Morrison, who was a native of Geelong, Victoria. The lecture was established with the object of improving cultural relations between China and Australia, the intention of the founders being that it should be delivered each year on a subject broadly covered by the title Ethnology. From the time of its inception until 1948 the lecture was associated with the Australian Institute of Anatomy, but in that year the responsibility for the management of the lectureship was accepted by the University.

OTHER UNIVERSITY LECTURES

The University arranges a program of public lectures each year. It is also the University's practice to invite newly appointed professors to give Inaugural Lectures.

OTHER OFFICIAL PUBLICATIONS

The University furnishes an annual report of its academic, financial and other transactions to the Governor-General and the report is tabled in Parliament. Copies of these reports are available on request to the Registrar.

*The Australian National University News*, which gives information about University developments, including staff appointments, is available on request to the Registrar.

The University also publishes a *Faculty Handbook* which contains details of the courses available in the School of General Studies. The Handbook can be obtained from the Academic Registrar, price $1 (post free).

Several other publications containing general information about the University are available on request to the Registrar.

Staff Association

The objects of the Association include advancing the welfare of members in respect of ethical and professional standards, and conditions of service. The Association is a member body of the Federation of Australian University Staff Associations which undertakes salary negotiations and concerns itself with matters of interest to academic staff generally.

Membership is open to members of the academic staff and some other persons in the full-time service of the University possessing university degrees or equivalent qualifications. Tutors, demon-
Administrators, research assistants and departmental assistants are admitted to associate membership.

General Staff Association Incorporated
Administrative and Allied Officers' Association

These Associations were formed to promote the interests of members, to maintain and improve the conditions of their employment and the relations between them and their employer and to advance the well-being of the University. To further these ends the Associations, which, between them, make provision for membership by all categories of non-academic staff, have negotiated improved conditions of employment and have served as an effective channel of communication between the University administration and staff.

In 1966 these two Associations joined with the Staff Association to form a Staff Council, having as its main aim the promotion and negotiation of benefits mutual to members of the three groups.

The General Staff Association has a Conciliation/Welfare Officer who works in close co-operation with its Executive Council and all sections of the University.

STUDENTS' ASSOCIATIONS

There are two students' associations in the University—the Australian National University Research Students' Association and the Australian National University Students' Association. Through these Associations the views of students on matters affecting their welfare and the welfare of the University are made known to the academic and administrative staff.

Membership of the Australian National University Students' Association, and of the Sports Union, is compulsory for all students enrolled in undergraduate courses in the School of General Studies. At the beginning of each academic year the Students' Representative Council, which is the executive committee of the Australian National University Students' Association, organises an Orientation Week program to introduce new students to the University.

The Students' Representative Council controls student clubs, societies and social functions. It operates a student loan fund which grants loans to students in need of assistance.

The executive committee of the Sports Union, called the Sports Council, is the controlling body for all student sport in the University.

All students enrolled for the degrees of master, Doctor of Philosophy, and for courses of research not leading to a degree, are members of the Australian National University Research Students' Association and through payment of the compulsory general services fee, may use the sporting facilities at the University and become members of affiliated sporting clubs, and may use the facilities
of the University Union. They may also apply for formal membership of the University Union, the Sports Union and of the clubs and societies affiliated with the Students' Representative Council. The Research Students' Association has at its disposal a small welfare fund, loans or grants from which may be made to research students at the discretion of the trustees of the fund, who are themselves research students. It also operates thesis typing and group insurance schemes, both in conjunction with the University.

MEMBERSHIP OF INTER-UNIVERSITY BODIES

The University is a member of the Association of Commonwealth Universities, whose headquarters are at 36 Gordon Square, London, W.C.1. The Secretary-General of the Association, Dr J. F. Foster, will gladly answer inquiries about the University, with whose development he has been closely concerned. Details of appointments and awards offered by the University are available from the Association.

The University is also a member of the International Association of Universities, whose offices are at 19 Avenue Kleber, Paris 16, and of the Australian Institute of Nuclear Science and Engineering.

VICE-CHANCELLOR’S DISCRETIONARY FUND

The Vice-Chancellor has at his disposal a Discretionary Fund from which he can make grants, or more usually loans, to staff and students of the University who are suffering particular financial hardship.

Applications may be made to the Vice-Chancellor; inquiries may be made to him or to a senior administrative officer.

UNIVERSITY WELFARE SERVICES

Dean of Students

The Dean of students is responsible for the co-ordinated functioning and development of the University Health Service and the University Counselling Service. He also maintains liaison with the Chaplains appointed by Churches to work within the University and with student activities not controlled directly by the University. These include the University Union and student associations. The Dean is concerned generally with all matters connected with the welfare of the student body.

University Health Service

The University Health Service consists of a Director (a qualified medical practitioner) and a nursing sister. Any student, part-time or full-time, undergraduate or postgraduate, may seek the Director's advice on health problems. Appointments to see the Director may be made at room 214 on the second floor in the south wing of the Copland Building, or by telephoning 493598.
University Counselling Service

The University Counselling Service is available to both graduate and undergraduate students of the University and members of staff. It is located on the second floor in the south wing of the Copland Building and offers the following services:

Counselling: dealing with study problems, adjustment to academic life and research, or personal difficulties.

Graduate Appointments: providing career information, scholarship information and arranging campus interviews.

Part-time and Vacation Employment: helping students to find suitable part-time work and/or employment during University vacations. Students may register for employment at room 229 or by telephoning 492442.

There is no charge for these services and strict professional confidence is maintained. Inquiries and appointments may be made at room 227 or by telephoning 492442.
SCHOLARSHIPS AND FELLOWSHIPS

POSTGRADUATE SCHOLARSHIPS

AMPOL SCHOLARSHIP

The Ampol Scholarship is available for award to a student who has completed the course for the Pass Degree of Bachelor of Science or the Degree of Bachelor of Science with Honours in any Australian university.

The purpose of the scholarship is to assist a student to undertake a further year of study in the field of geology at the Australian National University. The scholarship is valued at $1,200 and is tenable for one year. The University may supplement the allowance of a scholar enrolled for the degree of master.

Further information may be obtained from the Academic Registrar.

AUSTRALIAN NATIONAL UNIVERSITY RESEARCH SCHOLARSHIPS

For the Degree of Doctor of Philosophy*

Tenure

Scholarships are usually awarded for an initial period of two years, but will normally be extended for the whole period of the approved course, usually three years. The University may terminate a scholarship at any time if, in the opinion of the Board of the Institute of Advanced Studies, the scholar is not making satisfactory progress in his course.

The award of a scholarship is dependent on the satisfactory outcome of a medical examination conducted by a physician nominated by the University.

Emoluments

Scholars at present receive a living allowance of $2,540 per annum; medically qualified scholars receive $3,660 per annum.

Married scholars with dependent children are granted additional allowances of $775 per annum for the first child, and $225 per annum for each other child. Medically qualified scholars will not be granted additional allowances exceeding $1,000 per annum for their children. Married scholars without children whose wives are not in employment may be granted an additional allowance of $550 per annum.

The allowances may be reduced if the scholar is in receipt of assistance for educational purposes from other sources.

* In special cases the Board of the Institute may recommend scholarships for advanced research students not proceeding to a degree.
Living allowances start on the date the scholarship is taken up in Canberra and are paid fortnightly in arrear; they finish when the scholar ceases to attend the University (except for approved absences during the course).

**Accommodation**

Single scholars and married scholars not accompanied by their wives or children normally live in University House or a hall of residence. The University gives assistance in the matter of accommodation for married scholars accompanied by their wives and children, but can give no undertaking in this respect.

**Travel Grants**

The University will make the following contribution towards the expenses incurred by a scholar in coming to and returning from Canberra, subject to the condition that the contribution for the return journey will not necessarily be paid if the scholarship is terminated for any reason before the end of the course for which the scholar is enrolled:

(a) *Persons living in Australia*: the equivalent of a second class rail fare for the scholar and his family.

(b) *Persons from abroad*: a grant for fares will be fixed in each case. It is normally sufficient for economy class return air fares by the most direct route. Half of the grant is available for the journey to Australia. Subject to certain conditions the balance is paid at the end of the scholarship. The University will also contribute towards the travel expenses of a scholar's wife and dependent children (if any) if he was married prior to the date of embarkation.

The University will, on request in advance, consider making a grant of up to $100 towards the cost of transporting books, papers and personal effects.

**Fees**

Scholars are exempt from the payment of fees for admission, tuition and graduation. All research students are required to become members of the Australian National University Research Students' Association. A composite general services fee of $15 per annum is payable and will be deducted from the scholarship emoluments.

**Field and Research Expenses**

Scholars who are required to undertake field-work or research work away from Canberra will receive a special allowance. This allowance will not normally provide for a scholar's wife or family to accompany him while on such work.
Income Tax

At the present time scholarship allowances are exempt from Australian income tax.

Outside Work

A scholar may not engage in paid outside work of any kind, or undertake or conduct any paid occupation or business, or engage in the practice of any profession, without the permission of the Council. In general, permission will not be granted for anything other than a very small amount of university teaching in a subject directly relevant to a scholar's training.

Superannuation and Insurance

The University does not make provision for superannuation for scholars.

The Vice-Chancellor may, however, grant a loan to a scholar to enable him to meet an existing superannuation commitment. The University operates a group life, accident and sickness insurance scheme for research students. Membership is at present voluntary. The University contributes to the cost of premiums paid by holders of scholarships awarded by the University.

Thesis

A scholar is required to deposit in the University Library a copy of the thesis or other results of research at the conclusion of the course.

Terms

Except for periods approved for field-work, a scholar is required to be in attendance at the University for forty weeks, including the periods of University terms, during each year and he may also be required to be in attendance for a further six weeks at the discretion of his supervisor.

Courses

Unless otherwise stated in the offer of a scholarship, it is awarded on condition that the applicant becomes a candidate for the degree of Doctor of Philosophy and pursues his research to the satisfaction of the Board of the Institute. The Board will determine the department or departments in the Institute or in the School in which the scholar is to undertake work for the degree. The offer of a scholarship does not imply any commitment by the University as to the subject of the research work to be undertaken or, if field-work is necessary, the country or area in which this will be done.
General
Scholars are subject to the Australian National University Act 1946-1967 and to the Statutes and Rules of the University.

For the Degree of Master

Accommodation
Unmarried scholars are expected to live in a University hall of residence or in an affiliated college. Married scholars are assisted to find accommodation but no undertaking can be given in this respect.

Travel Grants
A scholar receives a second class rail fare coming to and returning from Canberra, subject to the following conditions:
(a) if the scholarship is terminated for any reason before the end of the course for which the scholar is enrolled the contribution towards the return journey will not necessarily be paid;
(b) the contribution for the return journey will be in respect of the fares to the place from which the scholar came or to his immediate destination on leaving Canberra on the conclusion of the scholarship, whichever is the less costly;
(c) if the scholar receives a travel grant from another source, the contribution may be reduced accordingly or not paid.

The University will also contribute towards the travel expenses of a scholar’s wife and dependent children (if any) if he was married prior to the date on which the award was made.
The University will, on request in advance, consider making a grant of up to $100 towards the cost of transporting books, papers and personal effects, but will not normally contribute towards the cost of transporting furniture.

COMMONWEALTH POSTGRADUATE AWARDS

The Commonwealth Government provides a number of awards each year for postgraduate students in Australian universities. Applicants must be permanently resident in Australia but this does not exclude Australians temporarily resident abroad.

Preference will be given to students who will be enrolling for the degree of Doctor of Philosophy (the course for which extends over three years), but applications may also be made by students who will be enrolling for a degree of master (a one or possibly two-year course). A scholarship will normally be extended for the whole period of the approved course.

Further details are available from the Academic Registrar. The conditions of award of Commonwealth Postgraduate Scholarships are subject to alteration at any time. Applications for scholarship for the degree of master close on 31 October, and for the degree of Doctor of Philosophy on 30 September.

COMMONWEALTH SCHOLARSHIP AND FELLOWSHIP PLAN

Countries which have from time to time invited applications from Australian graduates for these scholarships are Britain, Canada, New Zealand, India, Pakistan, Ceylon, Malaysia, Hong Kong, Nigeria, Rhodesia and Nyasaland, East Africa, Malta and Jamaica. They do not all invite applications every year.

The Australian Government similarly offers scholarships to citizens of other Commonwealth countries for study at this and other Australian universities.

UNDERGRADUATE SCHOLARSHIPS

COMMONWEALTH UNIVERSITY SCHOLARSHIPS

The Commonwealth Government provides a number of scholarships each year (6,000 in 1969) for open competition among students who wish to undertake tertiary courses at universities and other approved institutions.

The administration of the Commonwealth University Scholarship Scheme in New South Wales and the Australian Capital Territory is in the hands of the Department of Education and Science which operates through its Branch Office in Sydney. The following types of award are available:

(a) Open Entrance Scholarships: These are awarded in order of merit to applicants who sit for a matriculation qualifying examination in their own state. (Candidates in New South Wales and the Australian Capital Territory are usually considered on the basis of results obtained in the New South Wales Higher School Certificate Examination). Candidates must be under twenty-five years of age on 1 January in the year in which they will commence their studies.

(b) Later Years Scholarships:

(i) Second or Third Years. To be eligible students must have passed the full first year of the approved tertiary course at first attempt and they must have made satisfactory progress. Part-time applicants must have completed two part-time years equivalent to one full year of the full-time course.

(ii) Fourth or Later Years. To be eligible it is not necessary to have passed first year at first attempt but progress must have been satisfactory according to the progress rules.

Applicants in both these categories must be under twenty-five years of age on 1 January of the year in which they desire to use the scholarship.

(c) Mature Age Scholarships: These are designed to cater for candidates who did not undertake university or tertiary studies when leaving school but who have decided to do this at a more advanced age.
Applicants who desire to commence a course must be over the age of twenty-five years and under the age of thirty years on 1 January of the year in which the scholarship is desired. Mature age applicants may compete on the basis of matriculation results but preference is given to those who have already completed part of their course.

A Commonwealth University Scholarship covers all compulsory tuition fees but does not cover the cost of instruments, books or accommodation. Subject to a means test, a living allowance may be paid to a full-time student.

Applications must reach the Sydney Office of the Department of Education and Science by 30 September each year. Further information may be obtained from the Academic Registrar or the Officer-in-Charge, Sydney Office, Department of Education and Science.

Graduates are not required to live in a hall of residence or affiliated college. Their accommodation fees are not met by the University.

Except with the permission of the University, the scholarship may not be held in conjunction with any other scholarship or award.

(4) Where a member has made an election under the last preceding sub-section, the moneys held by the Council and any securities representing any such moneys, together with the income from those moneys or securities, shall, for the purpose of this Statute, be treated as nearly as possible as if they were a life assurance policy effected on the life of the member for the purposes of this Statute.

10. (1) The Council may agree to accept for the purposes of the Scheme an existing policy of assurance on the life of a member in lieu of the policy required to be effected under the last preceding section, if the policy is transferred in statutory form to the University and at the date of the transfer is not encumbered.

(b) the policy has been accepted for the purposes of the Federated Superannuation System for Universities (Great Britain).

11. (1) Subject to the next succeeding section, a member shall contribute five per centum of his salary and the University shall contribute annually a sum equal to ten per centum of the member's salary.

(2) Contribution under this section shall be paid until the member ceases to be in the service of the University or reaches the age of sixty-five years, whichever first occurs.
(3) The contributions under this section shall, except as otherwise provided in this Statute, be applied by the Council in payment of the yearly premium on the policy.

(4) The University may deduct from payments of salary to the member the amounts necessary to meet the member's contributions under this section.

(5) The Council may pay a premium upon the policy in anticipation of contributions by the member or the University, or in default of contributions by the member.

12. (1) If, after the policy has been effected, the salary of a member is increased or reduced, the contributions under the last preceding section shall not be increased or reduced unless and until the rate of the increased or reduced salary is greater or less, by more than One hundred dollars per annum, than the rate of salary upon which those contributions are being made for the time being.

(2) Where, by reason of a change in salary, the contributions in respect of a member are increased or reduced, the sum assured under the policy shall be appropriately adjusted.

(3) If a member is absent from the service of the University, with or without remuneration from the University—

(a) he shall pay his contributions for the period of his absence unless the Council, in its discretion, agrees to pay those contributions; and

(b) the Council may determine, in its discretion, whether the University or the member shall pay the University’s contributions for that period and those contributions shall be paid accordingly.

(4) Payments referred to in the last preceding sub-section shall be made, at the election of the member, either in advance or by fortnightly payments.

13. Where the premiums upon a policy which is proposed to be accepted for the purposes of the Scheme are payable in sterling currency, the Council may make an arrangement with the member with respect to payment of the exchange upon those premiums and for the variation of the rights of the member under this Statute in consequence of the arrangement, and in any such case this Statute operates subject to the terms of the arrangement.

14. (1) A policy effected for the purposes of the Scheme shall be either in the name of the University or in the name of the member and in the latter case it shall be assigned in statutory form by the member to the University.

(2) The member shall arrange for the policy to be delivered by the life office to the University.
(3) The University shall retain possession of the policy, but will make it available for inspection by the member at any reasonable time.

15. (1) A member shall not, without the consent in writing of the Council, assign, either absolutely or as security, or charge his interest or any part of his interest in the policy.

(2) If a member—
   (a) becomes bankrupt or, without the consent in writing of the Council, assigns or charges or attempts to assign or charge his interest or any part of his interest in the policy or does or suffers anything by which his interest in the policy, or any part of that interest, would or might, through his act or default or by operation or process of law, become vested in or payable to any other person; or
   (b) becomes a lunatic or is in the opinion of the Council incapable of managing his own affairs, the rights and interests of the member in the policy forthwith determine and the Council may surrender the policy, or continue the policy for the time being and surrender it later, or continue it until maturity or the prior death of the member.

(3) Any moneys representing the member's rights and interests so determined which are received by the Council, whether upon surrender or at maturity of the policy or on the death of the member, shall, at the option of the Council, be—
   (a) applied towards the maintenance or benefit of the member or his dependants or of such one or more of them as the Council, in its discretion, thinks fit;
   (b) paid in any of the ways mentioned in section seventeen of this Statute;
   (c) paid into the Supplementary Superannuation Benefits Fund; or
   (d) paid into the 1966 Supplementary Superannuation Benefits Fund.

16. The University has a lien or charge upon the policy in respect of a member and the moneys payable under the policy for all moneys owing by the member in pursuance of this Statute and for premiums paid in anticipation of contributions, or in default of contributions by a member, and not recouped.

17. (1) If a member dies in the full-time service of the University before the policy matures, the University shall receive payment of the moneys payable under the policy from the life office and, subject to sections fifteen and sixteen of this Statute and to the next succeeding sub-section, shall pay those moneys, or the balance of those moneys, as the case may be—
(a) to the designated beneficiary or, if there is more than
one designated beneficiary, to the designated bene-
ficiaries in such proportions as the member specified;

(b) to a person who the Council determines is to be
deemed to be the designated beneficiary of the mem-
ber; or

(c) if there is no designated beneficiary and no person
who is to be deemed to be the designated beneficiary—

(i) to the executor or administrator to whom probate
of the will or letters of administration of the estate
of the member has or have been granted; or

(ii) where, after a period considered by the Council
to be reasonable, there is no such executor or
administrator—to the next of kin of the member
or as the Council, in its absolute discretion,
determines.

(2) Where a member who—

(a) is an eligible member for the purposes of Part V; or

(b) is contributing to the 1966 Supplementary Super-
annuation Benefits Fund,
dies leaving a widow or widower who is, or is to be deemed
to be, the designated beneficiary in relation to the member,
the University shall pay the moneys, or the balance of the
moneys, referred to in the last preceding sub-section to the
Supplementary Superannuation Benefits Fund or to the 1966
Supplementary Superannuation Benefits Fund, as the case
requires.

18. (1) If the policy matures while the member is in the
full-time service of the University, the University shall receive
payment of the moneys payable under the policy from the
life office and, subject to sections fifteen and sixteen of this
Statute and to this section, the University shall pay those
moneys to the member on the thirty-first day of December in
the year in which he attains the age of sixty years.

(2) If the member dies before the thirty-first day of Decem-
ber in the year in which he attains the age of sixty years the
Council shall pay the moneys in the manner provided in the
last preceding section.

(3) If the Council thinks fit, the University may, in lieu of
paying to the member moneys referred to in this section, use
those moneys in the purchase of an annuity payable to the
member during his life-time.

(4) If the member continues in the full-time service of the
University after the thirty-first day of December in the year
in which he attains the age of sixty years, the moneys payable
under the policy which would otherwise be payable to the
member, together with contributions by and in respect of the member under section eleven of this Statute made after the maturity of the policy, shall be invested by the Council in securities authorized by law for the investment of trust moneys, and the securities shall be held until the member ceases, by death or retirement, to be in the service of the University, whereupon the securities shall be realized and the proceeds, together with any income received from the investments, shall—

(a) in the case of death—be paid in the manner specified in the last preceding section; or
(b) in the case of retirement—be paid to the member or used in the purchase of an annuity payable to the member during his life-time.

(5) A payment of moneys under this section shall not be made—

(a) to, or for the purchase of an annuity payable to, a member who is an eligible member for the purposes of Part V; or

(b) where a member who is an eligible member for the purposes of Part V dies leaving a widow or widower who is, or is deemed to be, the designated beneficiary in relation to the member—to the widow or widower, but those moneys shall be paid to the Supplementary Superannuation Benefits Fund.

(6) A payment of moneys under this section shall not be made—

(a) to, or for the purchase of an annuity payable to, a member who is contributing to the 1966 Supplementary Superannuation Benefits Fund; or

(b) where a member referred to in the last preceding paragraph dies leaving a widow or widower who is, or is to be deemed to be, the designated beneficiary in relation to the member—to the widow or widower, but those moneys shall be paid into that Fund.

19. (1) If a member resigns from the full-time service of the University before the sixtieth anniversary of his birthday, and his resignation is accepted by or on behalf of the Council, the Council shall, subject to sections fifteen and sixteen of this Statute, transfer the policy to the member or according to his direction, and the transfer shall be in full settlement of all claims of the member under this Scheme.

(2) The provisions of this section extend to the case of a member whose appointment expires by effluxion of time.
before the sixtieth anniversary of his birthday and who is not forthwith appointed or re-appointed to an office by virtue of holding which he is eligible to continue to be a member of the Scheme.

20. If a member is dismissed from the full-time service of the University before the sixtieth anniversary of his birthday, the Council may deal with the policy or the policy moneys as it thinks just.

21. If a member becomes a contributor under the Superannuation Act 1922-1951, the policy shall be dealt with in such manner as the Council, in its discretion, determines.

(2) Subject to this section, the appropriate pension, for the purposes of this Part, in relation to an eligible member who holds on retirement an office specified in the last preceding sub-section is the appropriate pension in respect of that office.

(3) If a member referred to in the last preceding sub-section has, on retirement, less than forty years' university service (whether continuous or otherwise), the rate per annum of the appropriate pension in relation to him is reduced—

(a) by Thirty-two dollars for each complete year by which his university service is less than forty years or by Three hundred and twenty dollars, whichever is the less; and

(b) by the amount specified in the following table opposite to his office for each complete year, if any, by which his university service is less than thirty years:
(4) For the purposes of this Part, the appropriate pension in respect of an office other than an office referred to in subsection (1) of this section is, subject to the next succeeding sub-section, a pension at such rate per annum as is prescribed by the Rules to be the appropriate pension in respect of that office and the appropriate pension in relation to an eligible member who on retirement holds that office is, subject to this section, the appropriate pension in respect of that office.

(5) The Rules may provide that there shall be two or more appropriate pensions, at such rates as are specified, in respect of an office other than an office referred to in sub-section (1) of this section and, in that case, the Rules shall make provision for or in relation to the ascertainment of the appropriate pension in relation to each eligible member who holds such an office.

(5A) The appropriate pension in relation to an eligible member who on retirement holds an office in respect of which there are two or more appropriate pensions is the appropriate pension ascertained in accordance with the provisions referred to in the last preceding sub-section.

(5B) The Rules may provide for the reduction of the rate per annum of the appropriate pension in relation to an eligible member who holds an office other than an office referred to in sub-section (1) of this section if his university service is, on his retirement, less than a specified number of years.

(6) Where an eligible member makes, or is deemed to have made, under sub-section (1) of section twenty-five of this Statute, after a promotion referred to in that sub-section, an election to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted, the eligible member shall, for the purposes of this section, be deemed to hold the
office that the member held immediately before he was promoted.

(7) If—

(a) a member has received, in respect of any of his university service a payment or benefit that is similar to, or of the same type as, a benefit payable under this Statute; or

(b) a member who, having taken the transfer of his policy or received an amount under sub-section (2) of section thirty-two of this Statute, is restored to health, is again employed by the University and again becomes an eligible member,

the rate per annum of the appropriate pension in relation to the member is reduced by an amount equal to the rate per annum, or, in the case of a married member, the initial rate per annum, of the annuity that could, in the opinion of the actuary, be purchased in respect of the member with an amount equal to the value that the benefit so received would, in the opinion of the actuary, have had on the retirement of the member if it had been invested at the time of receipt.

(8) Without in any way affecting the generality of paragraph (a) of the last preceding sub-section, a member shall be deemed to have received, in respect of any of his university service, a payment or benefit that is similar to a benefit payable under this Statute if, in relation to any part of that service—

(a) there has been paid to or in respect of the member a payment or benefit from a superannuation or retirement benefit scheme or arrangement;

(b) there has been paid to, or in respect of, the member a refund of the contributions (including interest on those contributions, if payable) paid by the member to such a scheme or arrangement; or

(c) the member or any other person has a deferred entitlement to a benefit under such a scheme or arrangement.

(9) Where the Council has approved, as university service of a member for the purposes of this Part, a part only of the full-time service by the member as a teacher or other officer of another university or any other full-time service of a similar nature by the member, the whole of any payment or benefit received or deemed to have been received by the member in respect of the whole or a part of that full-time service shall be deemed, for the purposes of the last two preceding subsections, to have been received in respect of the part of the full-time service that has been approved by the Council.
24. (1) Each of the following persons is an eligible member for the purposes of this Part:

(a) a member who is a member on the date of commencement of the Amendment Statute;

(b) a member who has not, on the day on which he is enrolled as a member, attained the age of forty years; and

(c) a member who has elected to remain, or to become, an eligible member under sub-section (4) of this section.

(2) If the Council is satisfied that the health or physical condition of a member who was a member on the date of commencement of the Amendment Statute or a member who had not, on the day on which he enrolled as a member, attained the age of forty years, is not such as to justify his remaining an eligible member without payment by him of contributions to the Fund, the Council may, within two months after the commencement of the Amendment Statute or the enrolment of the member, as the case requires, direct that the member shall not remain an eligible member unless the member pays contributions to the Fund in accordance with such conditions as the Council determines, and the member ceases to be an eligible member unless he elects to pay contributions in accordance with those conditions.

(3) If a person has become a member by reason of a direction of the Council under sub-section (3) of section six of this Statute, the provisions of the last preceding sub-section apply, mutatis mutandis, to and in relation to the member.

(4) A member who is enrolled as a member after the commencement of the Amendment Statute and has, on the date on which he is so enrolled, attained the age of forty years may, if he has obtained the approval of the Council, make, within twenty-six weeks after the Council has granted the approval, an election in writing to become an eligible member.

(5) A member ceases to be an eligible member if he becomes a contributor under the Superannuation Act 1922-1957.

25. (1) An eligible member who, having attained the age of forty years, is promoted after the date of commencement of the Amendment Statute to an office the appropriate pension in respect of which is greater than the appropriate pension in respect of the office that he held immediately before his promotion may, within twenty-six weeks after he is promoted, make an election in writing—

(a) to contribute for increased supplementary benefits or

(b) to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted.
(2) An eligible member who, in respect of one promotion to which the last preceding sub-section applies, does not elect to contribute for increased supplementary benefits does not have the right to make an election under that sub-section in respect of any subsequent promotion.

(3) An eligible member, being an eligible member entitled to elect in pursuance of sub-section (1) of this section, who does not, within the period referred to in that sub-section, elect to contribute for increased supplementary benefits shall be deemed to have elected to continue to be an eligible member entitled to supplementary benefits as if he held the office that he held immediately before he was promoted.

(4) Where—

(a) in pursuance of sub-section (5) of section twenty-three of this Statute, the Rules make provision for or in relation to the ascertainment of the appropriate pension in relation to each eligible member who holds a particular office; and

(b) by reason of the application of those provisions in relation to an eligible member after he has attained the age of forty years, a greater appropriate pension would become the appropriate pension in relation to the eligible member on his retirement, the eligible member shall be deemed to have been, for the purposes of this Part, promoted to an office in respect of which there is a greater appropriate pension, and the preceding provisions of this section and sub-section (6) of section twenty-three of this Statute apply, mutatis mutandis, to and in relation to the member.

26. Except as provided by section twenty-nine A of this Statute, a member who is an eligible member by virtue of paragraph (a) or (b) of sub-section (1) of section twenty-four of this Statute is not, unless the Council has otherwise determined in accordance with sub-section (2) or (3) of that section, required to contribute to the Fund.

27. (1) A member who remains an eligible member by virtue of electing to pay contributions in accordance with conditions determined by the Council under sub-section (2) or (3) of section twenty-four of this Statute shall contribute to the Fund in accordance with those conditions.
(2) Where an eligible member who has contributed to the Fund in accordance with the last preceding sub-section resigns from the full-time service of the University and his resignation is accepted by the Council, the Council shall pay to him from the Fund such portion of the sum of the amounts so contributed by him to the Fund as is determined by the Actuary having regard to all the relevant circumstances and to actuarial principles and practice.

28. (1) A member—
   
   (a) who is an eligible member by virtue of paragraph (c) of sub-section (1) of section twenty-four of this Statute; or
   
   (b) who is an eligible member who elects to contribute for increased supplementary benefits in pursuance of paragraph (a) of sub-section (1) of section twenty-five of this Statute,

shall contribute to the Fund in accordance with the succeeding provisions of this section.

(2) There shall be deducted from each fortnightly payment of salary of the member falling due after the date on which the member makes the election, or if, on that date, the member is absent from the service of the University, after the member ceases to be so absent, an amount calculated in accordance with the following formula:

\[
\frac{4}{13} \times \frac{1}{26} \times R
\]

(3) For the purpose of the formula in the last preceding sub-section, R means the amount per annum that, in the opinion of the actuary, is required to be paid into the Fund after the date of the election to enable supplementary benefits or increased supplementary benefits for and in respect of the member to be provided from the Fund.

29. In determining the value per annum of R referred to in sub-section (3) of section twenty-eight of this Statute—

(a) the actuary shall assume—

(i) that there will be no change in the office held by the member;

(ii) in the case of a member who, when he became a member, effected for the purposes of the Scheme, or had had accepted for those purposes, an assurance policy on his life that does not provide for payment of the whole of the sum assured on the maturity of the policy or on the death of the member occurring before the maturity date—that that policy does so provide; and

\[\text{Manner of making determination for purposes of section 28}\]

\[\text{Added by Statute No. 24}\]
(iii) in the case of a member who, when he became a member, elected, under sub-section (3) of section nine of this Statute, that the contributions under section eleven of this Statute in respect of him should be held and accumulated by the Council—that there had been effected on the life of the member, for the purposes of the Scheme, when he became a member, an assurance policy providing for the payment of the whole of the sum assured on the member attaining his prescribed age or on the death of the member before attaining that age for such amount as would, in the opinion of the actuary, have been obtainable at an annual premium equal to those contributions;

(b) the actuary shall take into account any payments which are already required to be made by the Council in respect of the member in pursuance of paragraphs (a), (b) and (c) of sub-section (3) of section forty-one of this Statute.

29A. (1) In this section, unless the contrary intention appears—

'the commencing date', in relation to an eligible member, means the first day of July, One thousand nine hundred and sixty, or the date on which he is enrolled as a member, whichever is the later date;

'the election date', in relation to an eligible member, means the date on which he makes an election under this section.

(2) An eligible member may, before the first day of November, One thousand nine hundred and sixty-three or the expiration of the period of six months after the date on which the eligible member is enrolled as a member, whichever is the later, elect to contribute to the Fund in accordance with this section.

(3) Where an eligible member makes an election under this section, the Council shall deduct from each fortnightly payment of his salary falling due after the election date such amount as the actuary determines from time to time having regard to all the relevant circumstances and to actuarial principles and practice.

(4) Where, in relation to an eligible member who has made an election under this section, one or more fortnightly pay days have occurred during the period from and including the commencing date to and including the election date, the eligible member shall, upon making the election, forthwith
pay to the Council an amount equal to the amount determined by the actuary under the last preceding sub-section multiplied by the number of those fortnightly pay days.

(5) The Council shall pay to the Fund any amounts received by it in pursuance of this section.

(6) Where an eligible member who has made an election under this section—

(a) retires after attaining sixty years of age but before the thirty-first day of December in the year in which he attains the age of sixty-five years;
(b) resigns from the full-time service of the University and his resignation is accepted; or
(c) is dismissed from the full-time service of the University,

the Council shall pay to him from the Fund an amount equal to the sum of the amounts contributed by him to the Fund under this section.

32. (1) A member may elect not to contribute to the Fund.

(2) An election under the last preceding sub-section shall be in writing and shall be delivered to the Registrar—

(a) in the case of a member who is a member at the commencing date—within six months after the date of commencement of the Amendment Statute; or

(b) in any other case—within six months after the date of commencement of the Amendment Statute or within six months after the date on which he became a member, whichever is the later.

33. (1) In addition to any other payments that the member is required to make under this Statute, a member shall contribute to the Fund a percentage of his annual salary ascertained in accordance with the following table having regard to—

(a) where the salary applicable to the position of the member may be increased by regular increments, the maximum amount to which that salary may be increased; or

(b) where the salary applicable to the position of the member may not be so increased, the salary payable to the member per annum.

34. (1) In this section, a reference to a share of a member in the Supplementary Superannuation Benefits Fund means the part of that Fund as determined by the actuary that is attributable to the contributions of the member to that Fund.

(2) Where a member who was an eligible member within the meaning of Part V at the commencing date does not elect not to contribute to the Fund, the share of the member in the Supplementary Superannuation Benefits Fund shall, at the discretion of the Council, acting with the advice of the actuary—

(a) be paid to a member; or

(b) be transferred to the Fund.
(3) Where the Council determines that the share of a member in the Supplementary Superannuation Benefits Fund is to be transferred to the Fund, it shall be applied, as determined by the Council, towards reducing the amount that the member would otherwise have to pay to the Fund in pursuance of the last preceding section.

(4) The share of a member in the Supplementary Superannuation Benefits Fund shall be determined at the date at which the period of university service of the member is to be determined in pursuance of sub-section (5) of the last preceding section.

35. (1) The Council shall deduct from each fortnightly payment of salary falling due to a member such amount as the Council determines in respect of the contributions that the member is required to make to the Fund.

(2) Where one or more fortnightly pay days have occurred during the period from and including the date at which the period of university service of the member is to be determined in pursuance of sub-section (5) of section thirty-three of this Statute to and including a date six months after the commencement of the Amendment Statute, the member shall, within four weeks of that last-mentioned date, pay to the Council an amount equal to the amount determined by the Council under the last preceding sub-section multiplied by the number of those fortnightly pay days.

(3) The Council shall pay to the Fund any amounts received by it in pursuance of this section.

36. (1) The pension payable to a member on the entitlement date applicable to him shall be an amount per annum ascertained as follows:

(a) if the member has had not less than forty years university service—the amount set out in the second column of the table in this sub-section opposite to the annual salary that the member was receiving at the date of his retirement that is set out in the first column of that table;

(b) if the member has had less than forty years but not less than thirty years university service—the amount set out in the second column of the table in this sub-section opposite to the annual salary that the member was receiving at the date of his retirement that is set out in the first column of that table less an amount equal to one per centum of that amount for every year by which the member’s service is less than forty years; and

(c) if the member has had less than thirty years univer-
sity service—the amount set out in the second column of the table in this sub-section opposite to the annual salary that the member was receiving at the date of his retirement that is set out in the first column of that table less an amount equal to the total of—

(i) ten per centum of that amount; and

(ii) two and one-half per centum of that first-mentioned amount for every year by which the member's service is less than thirty years.

(2) Subject to the next succeeding sub-section, a member whose salary is increased during the period of twelve months immediately preceding the entitlement date applicable to him and who thereby becomes eligible to receive a higher rate of pension at that date shall, before pension at the rate applicable to that higher salary becomes payable to him, pay an amount equal to the amount of contributions that he would have had to pay the Fund if he had been in receipt of that higher
salary for the whole of the period of twelve months immediately preceding that date.

(3) Where—

(a) after, but as from a date before, the entitlement date applicable to a member; or

(b) after, but as from a date before, the entitlement date applicable to a former member in receipt of a pension under this Part who retired on or after that entitlement date,

his salary is increased and he would thereby, if that date had not been reached, have become eligible to receive a higher rate of pension at that date, he is entitled, subject to the next succeeding sub-section, to be paid a pension at that higher rate from the entitlement date or the date on which he retires or retired, as the case requires.

(4) A member or a former member is not entitled to receive a pension under the last preceding sub-section unless he pays an amount equal to the amount of the contributions to the Fund that he would have had to pay if he had been in receipt of that higher rate of salary for the whole of the period of twelve months immediately preceding the entitlement date applicable to him.

(5) Where—

(a) a member referred to in sub-section (2) of this section dies before attaining the entitlement date applicable to him; or

(b) a member or former member referred in sub-section (3) of this section dies before the date on which an increase in salary, that would have been applicable to him, is made,

pension at the rate applicable to the higher rate of salary payable to, or that would have been payable to, the member or former member is payable in respect of the member or former member without payment of the contributions or further payment of the contributions referred to in whichever of sub-sections (2) or (4) of this section is applicable.

(6) Where—

(a) a member dies before attaining the entitlement date applicable to him;

(b) after, but as from a date before his death, an increase in salary that would have been applicable to him is made; and

(c) the salary that he would have received as so increased would have made him eligible to receive a higher
rate of pension at the entitlement date applicable to him,

the pension payable in respect of the former member shall be increased as from the date of his death to the pension that would have been payable if the former member had been in receipt of that increased salary at the date of his death.

(7) Where the appointment of a member to the University is terminated because of invalidity or incapacity, this section applies in relation to the member as if the references in this section, other than in paragraph (a) of sub-section (5) and in sub-section (6), to the entitlement date applicable to the member were references to the date on which the appointment of the member was terminated.

37. (1) If—

(a) a member has received, in respect of any of his university service, a payment or benefit that is similar to, or of the same type as, a benefit payable under this Statute; or

(b) a member, being a member who has taken the transfer of his policy or received an amount under sub-section (2) of section forty-four of this Statute and is restored to health, is again employed by the University and again becomes a member,

the rate per annum of the appropriate pension in relation to the member shall be reduced by an amount equal to the rate per annum, or, in the case of a married member, the initial rate per annum of the annuity that could be purchased in respect of the member with an amount equal to the value that the benefit so received would have had on the retirement of the member if it had been invested at the time of receipt.

(2) Without affecting the generality of paragraph (a) of the last preceding sub-section, a member shall be deemed to have received, in respect of any of his university service, a payment or benefit that is similar to a benefit payable under this Statute if, in relation to any part of that service—

(a) there has been paid to or in respect of the member a payment or benefit from a superannuation or retirement benefit scheme or arrangement;

(b) there has been paid to or in respect of the member a refund of the contributions (including interest on those contributions, if payable) paid by the member to such a scheme or arrangement; or

(c) the member or any other person has a deferred entitlement to a benefit under such a scheme or arrangement.
(3) Where the Council has approved, as university service of a member for the purposes of this Part, a part only of the full-time service by the member as a teacher or other officer of another university or any other full-time service of a similar nature by the member, the whole of any payment or benefit received, or to be deemed to have been received, by the member in respect of the whole or a part of that full-time service shall be deemed, for the purposes of the last two preceding sub-sections, to have been received in respect of the part of the full-time service that has been approved by the Council.

38. Where a member who is contributing to the Fund—
(a) retires after attaining sixty years of age but before the entitlement date applicable to him;
(b) resigns from the full-time service of the University and his resignation is accepted; or
(c) is dismissed from the full-time service of the University,
the Council shall pay to him from the Fund an amount equal to the sum of—
(d) ninety per centum of the amounts contributed by him to the Fund; and
(e) if the share of the member in the Supplementary Superannuation Benefits Fund was transferred to the Fund by virtue of sub-section (2) of section thirty-four of this Statute, the amount, if any, that remains after deducting from that share the amount that has been applied in pursuance of sub-section (3) of that section towards reducing the contributions payable by the member to that Fund.

39. (1) This section applies to a member who when he became a member—
(a) had a policy other than an endowment assurance policy; or
(b) elected under sub-section (3) of section nine of this Statute that the contributions under section eleven of this Statute in respect of him should be held and accumulated by the Council.

(2) A member to whom this section applies who is a member at the entitlement date applicable to him shall be entitled to benefits under this Statute as if this section did not apply to him.

(3) Where—
(a) a member to whom this section applies dies; or
(b) the appointment to the University of a member to whom this section applies is terminated because of invalidity or incapacity,
before the entitlement date applicable to the member, the Council shall pay to him from the Fund or, if he is dead, to a person referred to in paragraph (a), (b) or (c), as the case requires, of sub-section (i) of section seventeen of this Statute an amount equal to the sum of—

(c) the amounts contributed by the member to the Fund;

(d) the amounts, if any, contributed by the member to the Supplementary Superannuation Benefits Fund; and

(e) the amount of the contributions paid by the University in respect of the member to either of the Funds referred to in the last two preceding paragraphs.

Part VII—General Provisions Relating to Supplementary Superannuation Benefits

40. (1) In this Part—

'the actuary' means an actuary appointed by the Council to be an actuary for the purposes of performing any of the functions that an actuary is required to perform under this Part;

'the Fund', in relation to a member, means the Fund to which the member is contributing by virtue of Part V or Part VI.

(2) In this Part, in relation to a member, expressions used have the meaning they have in Part V or Part VI, whichever is applicable to the member.

(3) In this Part, a reference to a member shall be read as a reference to an eligible member within the meaning of Part V or to a member who is contributing to the 1966 Supplementary Superannuation Benefits Fund, as the case requires.

41. (1) If a member is absent from the service of the University, with or without remuneration from the University, he shall pay, at his election, either in advance or by fortnightly payments, to the University in respect of his period of absence, an amount determined by the Council, not being an amount greater than—

(a) in the case of an eligible member within the meaning of Part V—the aggregate of—

(i) one and one-quarter per centum of the salary of the member for that period; and

(ii) three and one-quarter times the amount of the contributions, if any, that would have been payable by the member during that period under Part V if he had not been so absent; or

(b) in the case of a member who is contributing to the 1966 Supplementary Superannuation Benefits Fund—
three times the amount of the contributions that would have been payable by the member during that period to the Fund if he had not been so absent.

(2) Where a member fails to make an election under the last preceding sub-section, he shall be deemed to have elected to pay the amount referred to in that sub-section by fortnightly payments.

42. A deduction shall not be made from a payment of salary falling due to a member—
   (a) subject to the last preceding section—while the member is absent from the service of the University;
   (b) where the member ceases to contribute to the Fund—after the member so ceases to contribute; or
   (c) where the member continues in office after the entitlement date applicable to him—after that date.

43. (1) Subject to this Part, in the event of the retirement of a member at or after the entitlement date applicable to him, he is entitled, at his election—
   (a) to be paid a pension for his life at a rate per annum equal to the rate per annum of the appropriate pension in relation to the member;
   (b) to be paid—
      (i) an amount equal to the moneys that would, under section eighteen of this Statute, be paid to, or used in purchasing an annuity payable to, the member if he were not contributing to the Fund; and
      (ii) where the rate per annum of the pension referred to in the last preceding paragraph exceeds the rate per annum, or, in the case of a married member, the initial rate per annum, of the annuity that could be purchased in respect of the member with the amount referred to in the last preceding sub-paragraph—a pension for his life at a rate per annum equal to the excess; or
   (c) to be paid an amount equal to the sum of—
      (i) an amount equal to the moneys that would, under section eighteen of this Statute, be paid to, or used in purchasing an annuity payable to, the member if he were not contributing to the Fund; and
      (ii) an amount equal to ninety per centum of the amounts contributed by the member to the Fund.

(2) A member is not entitled to benefits under this section unless he transfers to the University all his rights and interests in the moneys referred to in sub-paragraph (i) of paragraph (b), or sub-paragraph (i) of paragraph (c), of the last preceding sub-section, whichever is applicable to the member.
(3) Subject to this Part, where a former member, other than a member who did not make an election under section twenty-nine A of this Statute, dies while in receipt of, or entitled to, a pension under this section, his widow is entitled to be paid a pension for her life, or until her remarriage, at a rate per annum that is equal to five-eighths of the rate per annum of the pension of the deceased person.

(4) Subject to this Part, where a former member who did not make an election under section twenty-nine A of this Statute dies while in receipt of, or entitled to, a pension under this section, his widow is entitled to be paid a pension for her life or until her remarriage, at a rate per annum that is equal to one-half of the rate per annum of the pension of the deceased person.

(5) Where a former member dies while in receipt of, or entitled to, the pension referred to in paragraph (a) of subsection (1) of this section, his widow is entitled, in addition to the pension referred to in whichever of the last two preceding sub-sections is applicable to her, to a pension at the rate of Two hundred and eight dollars per annum in respect of each child in her custody who is under the age of sixteen years, or, if the child is attending school, college or university as a full-time student, twenty-one years.

44. (1) Subject to this Part, a member, other than a member referred to in section thirty-nine of this Statute, who has his appointment to the University terminated because of invalidity or incapacity is entitled to be paid a pension for his life at a rate per annum equal to—

(a) one-half of the rate per annum of his salary on retirement; or

(b) the rate per annum of the pension that would be the appropriate pension in relation to the member on his retirement if his university service were increased by the additional service that he would have if he continued in the service of the University without increase in salary until he reached the entitlement date applicable to him, whichever is the less.

(2) A member may elect, in lieu of the pension referred to in the last preceding sub-section—

(a) to take a transfer of his policy, or, if the member so desires, to be paid an amount equal to the value of that policy, at the member's retirement; or

(b) where the policy has matured before the retirement of the member—to be paid an amount equal to the moneys that would, under section eighteen of this
Statute, be paid to, or used for purchasing an annuity payable to, the member if he were not contributing to the Fund,

together with—

(c) an amount equal to ninety per centum of the amounts contributed by the member to the Fund; or

(d) in an appropriate case, a pension for his life at a rate per annum ascertained in accordance with the next succeeding sub-section.

(3) Where the rate per annum of the pension to which a member would be entitled under sub-section (1) of this section exceeds the rate per annum, or in the case of a married member, the initial rate per annum, of the annuity that could be purchased in respect of a member—

(a) with an amount equal to the value of the policy of the member at his retirement; or

(b) with the moneys referred to in paragraph (b) of the last preceding sub-section,

the rate of the pension referred to in paragraph (d) of the last preceding sub-section is a rate per annum equal to the excess.

(4) Where—

(a) a member is entitled to benefits under this section; and

(b) the share of the member in the Supplementary Superannuation Benefits Fund had been transferred to the 1966 Supplementary Superannuation Benefits Fund by virtue of sub-section (2) of section thirty-four of this Statute,

there shall be payable to the member, in addition to any amount payable to him under this section, an amount equal to the amount, if any, that is ascertained by deducting from that share the amount that has been applied in pursuance of sub-section (3) of section thirty-four of this Statute towards reducing the contributions payable by the member to the 1966 Supplementary Superannuation Benefits Fund.

(5) A member, other than a member who takes a transfer of his policy in accordance with paragraph (a) of sub-section (2) of this section, is not entitled to benefits under this section unless he transfers to the University all his rights and interests in that policy or in the moneys referred to in paragraph (b) of that sub-section, as the case may be.

(6) Where the University has a lien or charge on the policy of the member by virtue of section sixteen of this Statute, the member is not entitled to benefits under this section unless he discharges, or enters into an agreement with the Council to discharge, that lien or charge.
(7) Subject to this Part, where a former member, other than a member who did not make an election under section twenty-nine A of this Statute, dies while in receipt of, or entitled to, a pension under this section, his widow is entitled to be paid a pension for her life, or until her remarriage, at a rate per annum equal to five-eighths of the rate per annum of the pension of the deceased person.

(8) Subject to this Part, where a former member who did not make an election under section twenty-nine A of this Statute dies while in receipt of, or entitled to, a pension under this section, his widow is entitled to be paid a pension for her life, or until her remarriage, at a rate per annum that is equal to one-half of the rate per annum of the pension of the deceased person.

(9) Where a former member dies while in receipt of, or entitled to, a pension referred to in sub-section (1) of this section, his widow is entitled, in addition to the pension referred to in whichever of the last two preceding sub-sections is applicable to her, to a pension at the rate of Two hundred and eight dollars per annum in respect of each child in her custody who is under the age of sixteen years, or if the child is attending a school, college or university as a full-time student, twenty-one years.

(10) This section does not apply to a member who is compulsorily retired because of invalidity or incapacity that is due to wilful action on the part of the member for the purposes of obtaining a benefit under this section.

(11) The Council may, from time to time, suspend the payment, or vary the amount, of pension payable to a former member under this section if it is satisfied, after due inquiry, that—

(a) the invalidity or incapacity of the former member has ceased or substantially altered; and

(b) the suspension or variation, as the case may be, will not cause hardship to the former member.

45. (1) Subject to this Part, where a member dies leaving a widow who is, or is to be deemed to be, the designated beneficiary of the member, the widow is entitled, at her election—

(a) to be paid a pension for her life, or until her remarriage at a rate per annum that—

(i) in the case of a widow of a member who did not make an election under section twenty-nine A of this Statute—is equal to one-half; or

(ii) in any other case—is equal to five-eighths, of the rate per annum of the pension to which the member would have been entitled under sub-section (1) of the last preceding section if he had, on
the day of his death, been compulsorily retired because of invalidity or incapacity and had satisfied the requirements of sub-sections (5) and (6) of that section; or

(b) to be paid—

(i) an amount equal to the moneys that would, under section seventeen or section eighteen of this Statute, have been paid to the widow if the member had not been contributing to the Fund; and

(ii) where the rate per annum of that pension exceeds the rate per annum of the annuity that could be purchased for the widow for her life with the amount referred to in the last preceding sub-paragraph—a pension for her life, or until her remarriage, at a rate per annum equal to the excess.

(2) A widow who is entitled to be paid the pension referred to in paragraph (a) of the last preceding sub-section is entitled, in addition to that pension, to a pension at the rate of Two hundred and eight dollars per annum in respect of each child in her custody who is under the age of sixteen years, or, if the child is attending a school, college or university as a full-time student, twenty-one years.

(3) Where—

(a) a widow is entitled to benefits under this section; and

(b) the share of the deceased member in the Supplementary Superannuation Benefits Fund had been transferred to the 1966 Supplementary Superannuation Benefits Fund by virtue of sub-section (2) of section thirty-four of this Statute,

there shall be payable to the widow, in addition to any amount payable to her under this section, an amount equal to the amount, if any, that is ascertained by deducting from that share the amount that had been applied in pursuance of sub-section (3) of section thirty-four of this Statute towards reducing the contributions payable by the deceased member to the 1966 Supplementary Superannuation Benefits Fund.

(4) The widow of a member is not entitled to benefits under this section unless, in any case where the University has a lien or charge on the policy of the member by virtue of section sixteen of this Statute, she discharges, or enters into an arrangement with the Council to discharge, that lien or charge.

(5) Where a member dies, and at the rate of his death, his wife is dead, the amount referred to in sub-section (3) of this section shall be paid to the University and the University
shall dispose of that amount as if it were moneys to which sub-section (1) of section seventeen of this Statute applied.

46. (1) Subject to this Part, where a widow who is in receipt of a pension in respect of a child under sub-section (5) of section forty-three, sub-section (9) of section forty-four or sub-section (2) of section forty-five of this Statute dies, the child is entitled to be paid a pension at the rate of Five hundred and twenty dollars per annum, or at a rate of such amount as is determined in accordance with sub-section (3) of this section, whichever rate is the higher, until he attains the age of sixteen years, or, if the child is attending a school, college or university as a full-time student, twenty-one years.

(2) Subject to this Part, where—
(a) a former member dies while in receipt of, or entitled to a pension referred to in paragraph (a) of sub-section (1) of section forty-three or sub-section (1) of section forty-four of this Statute;
(b) at the date of the death of the former member, the wife of the member is dead, but, if she had survived the former member, would have been, or would have been deemed to have been, the designated beneficiary of the former member; and
(c) the former member leaves a child,
the child is entitled to be paid a pension at the rate of Five hundred and twenty dollars per annum, or at a rate of such amount per annum as is determined in accordance with the next succeeding sub-section, whichever rate is the higher, until he attains the age of sixteen years, or, if the child is attending a school, college or university as a full-time student, twenty-one years.

(3) The amount to be determined for the purposes of the last two preceding sub-sections is the sum of Two hundred and eight dollars and an amount ascertained by dividing by four (or if the number of children of the former member and of his wife in respect of whom pension is payable under this section is greater than four, by the number of those children) the amount of the annual rate of the pension that, but for her death or divorce, would, by virtue of sub-section (3) or (4) of section forty-three of this Statute, sub-section (7) or (8) of section forty-four of this Statute or sub-section (1) of section forty-five of this Statute, as the case may be, have been payable to his wife.

(4) A pension under this section is payable, on behalf of the child, to a person approved by the Council.

47. Where—
(a) a female member dies leaving a widower; or
(b) a former female member dies leaving a widower to whom she was married at the date of her retirement, the provisions of sections forty-three, forty-four, forty-five and forty-six of this Statute apply as if the word ‘widower’ were substituted for the word ‘widow’, the word ‘husband’ were substituted for the word ‘wife’, and such other modifications were made as are necessary.

48. The Council may, if it thinks fit, determine, either before or after the making by a person of an election referred to in section forty-three, section forty-four or section forty-five of this Statute, that the person shall be paid a pension in accordance with paragraph (a) of sub-section (1) of section forty-three, sub-section (1) of section forty-four or paragraph (a) of sub-section (1) of section forty-five, as the case may be, and, upon the making of the determination—

(a) a pension shall be payable to that person accordingly; and
(b) that person ceases to have the right to make an election or an election made by that person shall not have any effect, as the case may be.

49. (1) This section applies only to and in relation to a member to whom Part V applies.

(2) Subject to this section, where—

(a) a member who, when he became a member, had a policy other than an endowment assurance policy, dies or retires before that policy matures; or

(b) a member who, when he became a member, elected, under sub-section (3) of section nine of this Statute, that the contributions under section eleven of this Statute in respect of him should be held and accumulated by the Council dies or retires, a pension payable under this Statute to or in respect of the member ceases to be payable to or in respect of the member from a date when, in the opinion of the actuary, that part of the Fund that is attributable to payments into the Fund made in respect of the member would, if the payments out of the Fund to or in respect of the member (including payments of premiums, if any, falling due for payment under an assurance policy on the life of the member) had been made from that part, be exhausted.

(3) In forming an opinion for the purposes of the last preceding sub-section in the case of a retired member, the actuary shall assume that there has been paid into the Fund in respect of the member an amount that is, in the opinion of the actuary, the value, at the time of forming the opinion, of the unmatured policies, if any, of the member.
(4) This section does not affect the rate of pension payable to or in respect of a member whose policy has matured.

50. (1) When a pension ceases to be payable to or in respect of a person by virtue of the last preceding section, the Council may, in its discretion, authorize the payment to the person who was in receipt of the pension of an allowance at a rate per annum not exceeding the rate per annum of the pension at the time of cessation.

(2) When a person to whom an allowance is being paid under the last preceding sub-section dies leaving a widow, widower or child who would, if the person had died while in receipt of a pension under this Statute, have been entitled to be paid a pension under this Statute, the Council may, in its absolute discretion, authorize the payment to the widow or widower, or to a person on behalf of the child, as the case may be, of an allowance at a rate per annum not exceeding the rate per annum of the pension that the widow, widower or child, as the case may be, would have been entitled to be paid.

(3) The Council may cancel an allowance under this section at any time.

51. (1) If a person in receipt of a pension under this Part—
(a) becomes bankrupt or, without the consent in writing of the Council, assigns or charges, or attempts to assign or charge, his interest, or any part of his interest, in the pension or does or suffers anything to be done by which his interest in the pension, or any part of that interest would or might, through his act or default or by operation or process of law, become vested in, or payable to, any other person; or
(b) is, in the opinion of the Council, incapable of managing his own affairs,
the pension ceases to be payable to the person.

(2) When a pension ceases to be payable to or in respect of a person by virtue of the last preceding sub-section, the Council may, in its discretion, authorize the payment from time to time to the person, or to a dependant of the person, of such sums of money as the Council determines.

(iii) The examiners for a written examination so directed shall be the examiners appointed under sub-rule (2) of this rule, but one of the examiners so appointed shall be a member of the staff of the University.

(iv) Subject to sub-rule (6) of this rule the Academic Registrar and the examiners shall arrange for the holding of a written examination so directed.
(1) The candidate shall not less than three months before the time at which he wishes to be examined give notice to the Academic Registrar in such form as the Board requires. The Faculty Board, Director or Dean may dispense with this requirement in special cases.

(2) (a) The Degree Committee shall after recommendation from the Faculty Board, Director or Dean of the appropriate Research School appoint not fewer than two examiners in such a manner that except by special leave of the Board one is not a member of the staff of this University and one, other than the candidate's supervisor should he be an examiner, is likely to be able to take part in the oral examination.

(b) The Degree Committee may at any stage of the examination appoint an additional examiner and shall do so in the event of disagreement between two original examiners unless the Degree Committee is of the opinion that there are special circumstances which render the appointment of an additional examiner unnecessary.

(c) If none of the examiners appointed under paragraphs (a) and (b) above is available for the oral examination an additional examiner shall be appointed by the Degree Committee. The examiner or examiners present at the oral examination shall act for absent examiners and shall submit a report on the oral examination to them.

(3) (a) Subject to the provisions of paragraph (b) of this sub-rule, a candidate enrolled on or after 1 January 1959 shall within the last six months of his course present to the Academic Registrar three copies of a thesis in such form as the Board prescribes, embodying the results of his approved research. The thesis shall be a complete study incorporating an account of the result of the candidate's work during his approved course.

(aa) The thesis must be a connected piece of writing which may comprise a series of papers on related topics, provided that these are accompanied by an adequate explanation of their relationship to each other and to the wider context of the subject. The thesis or component parts thereof may, if already published, be submitted in the published form.

(b) In special circumstances the Board, on the recommendation of the Degree Committee, may grant an extension of time of not more than one year for the submission of the thesis. In very exceptional
circumstances the Board may grant a further ex-
tension of time but in no circumstances may the
total extension of time exceed two years.

(4) A candidate enrolled before 1 January 1959 shall present
his thesis in accordance with the rules in force at the
time of his enrolment.

(5) (a) The candidate shall be examined orally on the sub-
stance of his thesis and on his knowledge of the
subject unless the Degree Committee on the recom-
pendation of the examiners exempts the candidate
from oral examination. The Degree Committee shall
not, except in very exceptional circumstances, ex-
empt from oral examination a candidate who has
submitted for examination work done jointly with
another person. The oral examination shall, except
with the permission of the Degree Committee, be
held in Canberra.

(b) If in the opinion of the Degree Committee satisfac-
tory arrangements for the holding of an oral ex-
amination cannot be made and the candidate should
not be exempted from an oral examination, the Com-
mittee shall require the candidate to take a written
examination covering the field ordinarily covered by
an oral examination, and the Academic Registrar
shall make arrangements with the examiners accor-
dingly.

(c) If the examiners are not fully satisfied by the oral
examination they may recommend to the Degree
Committee that the candidate shall take a written
examination, the Degree Committee may require the
candidate to take such examination, and the Aca-
demic Registrar shall make arrangements with the
examiners accordingly.

(6) The Board may give directions as to the procedure to
be followed in the conduct of examinations; subject to
these directions and to these Rules, the Degree Com-
mittee may act as it thinks fit in any particular ex-
amination.

(7) Each examiner, though at liberty to consult or cor-
respond with the other examiner or examiners, is asked
to submit an independent report after the whole ex-
amination has been completed. This report shall in-
clude a reference to any written examination directed
under sub-rule (1A) (b) of this rule, to any oral ex-
amination, and to any written examination held in
lieu of or in addition to an oral examination, and a
recommendation that the candidate be admitted or be
not admitted to the degree.
(8) (a) When the Degree Committee has concluded its consideration of the examiners' reports it shall make a recommendation to the Board that the candidate be admitted or be not admitted to the degree.

(b) If the Degree Committee recommends that a candidate be not admitted it shall further recommend to the Board whether the candidate should be permitted to revise and resubmit his thesis or, if the revision necessary is sufficiently substantial, to rewrite the thesis for a new examination.

(c) The Degree Committee shall recommend a period not exceeding twelve months from the date of the Board's decision in which a thesis which is to be revised or rewritten shall be submitted.

(9) (a) If the Board, having considered the recommendations of the Degree Committee, is of opinion that the candidate is fit to be admitted to the degree it shall recommend to the Council that he be admitted and on his fulfilling the prescribed conditions he shall be so admitted.

(b) The Board may, on the recommendation of the Degree Committee, decide that the candidate be not admitted to the degree but be re-examined. The Board shall decide whether the re-examination shall be carried out by the examiners appointed in the first place or by new examiners, and in the latter case the new examiners shall be appointed by the Degree Committee. The re-examination may take the form of a revision or re-writing of the thesis, or of a written examination in such subjects as the Board on the recommendation of the Degree Committee shall direct. So far as applicable the preceding sub-rules of this rule shall apply to a re-examination under this sub-rule, but a revised or rewritten thesis shall be submitted and a written examination held not later than twelve months from the date of the Board's decision.

(c) The Board may refer a recommendation back to the Degree Committee for further consideration.

(d) The Vice-Chancellor may, in his discretion, extend beyond twelve months the period in which a thesis referred to in sub-paragraph (b) of this paragraph is to be submitted.
21. The Faculty Board, Director or Dean of any Research School may make such additional regulations not inconsistent with these rules concerning the examination of candidates in that School as it thinks fit, and compliance with such regulations shall for a candidate in that School be a condition of taking an examination.

22. (i) Any person who—
   (i) holds a degree of this University; or
   (ii) (a) holds a degree of another University, which degree and University are approved for this purpose by the Board; and
   (b) is certified by the Board to have or have had a substantial connection with this University*, may at the discretion of the Board be admitted as a candidate for the degree of Doctor of Letters or Doctor of Science or Doctor of Laws.

   (2) In addition to the persons referred to in the last preceding sub-rule, the Board may admit as a candidate for the degree of Doctor of Letters, Doctor of Science or Doctor of Laws a person who has or who has had a substantial connection with this University and in the opinion of the Board, having regard to his eminence in learning, is a suitable candidate for that degree.

23. (1) A candidate for the degree of Doctor of Letters or Doctor of Laws or Doctor of Science shall submit his published works in such manner as the Board prescribes. The Board shall appoint not fewer than two examiners, one of whom shall be an external examiner. The Board may at any stage of the examination appoint an additional examiner. Each examiner shall submit an independent report on the examination.

   (2) Each examiner shall recommend to the Board that the candidate be admitted, or be not admitted, to the degree.

   (3) If the Board is of opinion that the candidate has made an original and substantial contribution to knowledge and scholarship, it shall recommend to the Council that he be admitted to the degree and on his fulfilling the prescribed conditions he shall be so admitted.

24. A candidate for any degree shall not submit for examination work in respect of which a degree has been awarded in any University.

* If the grounds on which admission is sought are that the applicant is, or has been, a member of the academic staff of the University, the Board requires a minimum of three years service.
25. (1) Subject to sub-rule (2) of this rule each candidate for a degree shall before the degree is conferred deposit in the Library a copy of every thesis or published work successfully submitted for examination for the degree.

(2) The Degree Committee may, on the recommendation of the Librarian, exempt a candidate for the degree of Doctor of Letters or Doctor of Science or Doctor of Laws from the provisions of this rule or specify which of the works submitted shall be deposited.

(3) The Registrar shall retain one copy of every thesis submitted by a candidate who after examination is not admitted to a degree. The Registrar shall allow access to an unsuccessful thesis only after consultation with the Head of the Department concerned and after considering the views and interests of the candidate.

26. (1) The Council may admit *honoris causa* to the degree of Doctor of Letters, Doctor of Science or Doctor of Laws a person who has been recommended by the Board of the Institute of Advanced Studies and the Board of the School of General Studies on the ground of his distinguished eminence in learning.

(2) The Council may admit *honoris causa* to the degree of Doctor of Laws a person who has been recommended by the Board of the Institute of Advanced Studies and the Board of the School of General Studies on the ground of his distinguished eminence in public service.

27. A person who holds a permanent academic appointment in the University and who is recommended by the Board to the Council may be admitted to the degree either of Master of Arts or of Master of Science as the Board decides.

(3) The Board shall, when it admits a person to be a candidate for the degree of Doctor of Philosophy under this
rule, specify the Department or Departments in which he shall work for the degree.

(4) Subject to the next succeeding sub-rule, a person who has been admitted to be a candidate for the degree of Doctor of Philosophy under this rule shall not submit a thesis for the degree before the expiration of such period, being not less than two years, after his admission as the Degree Committee determines, and the University shall not admit him to the degree unless he was a full-time member of the academic staff of the University throughout the period so determined.

(4A) Where a person was, prior to his appointment as a full-time member of the academic staff of the University, pursuing a course of study for the degree of Doctor of Philosophy, the Degree Committee shall, as soon as practicable after his appointment, fix a period during which that person shall be required to continue to pursue his course of study before submitting a thesis for that degree.

(5) The Faculty Board, Director or Dean of the appropriate Research School shall—

(a) appoint a supervisor of each person admitted by the Board to be a candidate for the degree of Doctor of Philosophy under this rule and report each such appointment to the Board; and

(b) before the expiration of twelve months from the date on which each person is so admitted by the Board, report to the Board the research topic approved by the Faculty Board, Director or Dean for that person.

(6) A person admitted to be a candidate for the degree of Doctor of Philosophy under this rule shall pursue his course of research to the satisfaction of the Board.

(7) If the supervisor of a person admitted to be a candidate for the degree of Doctor of Philosophy under this rule is of opinion that the person has failed to pursue his research satisfactorily, he shall report to the Board accordingly and the Board may, after considering any recommendation made by the Faculty Board, Director or Dean of the appropriate Research School, resolve that the person cease to be a candidate for the degree, and the person shall thereupon cease to be such a candidate accordingly.

(8) Where a person who has been admitted as a candidate for the degree of Doctor of Philosophy under this rule ceases to be a full-time member of the academic staff of the University, he shall apply to the Degree Committee to determine a period within which he may submit a thesis for the degree.
(g) An application under the last preceding sub-rule shall be lodged with the Degree Committee within six months, or within such longer period as the Committee permits, from the date on which the person ceases to be a full-time member of the academic staff of the University.

(10) Where an application has been made under sub-rule (8) of this rule, the Degree Committee shall determine such period, commencing from the date on which the applicant ceased to be a full-time member of the academic staff of the University, as the Committee, having regard to the circumstances of the case, thinks fit.

6. (1) A candidate shall pursue his course for the Pass Degree of Bachelor of Science subject to the following conditions:

(a) the units to be taken by the candidate shall be approved by the Faculty;

(b) a candidate shall not take a unit set out in Group C of the table unless he has obtained at least six points in respect of the units set out in Group A of the table.
(2) The Faculty may determine that a candidate may not take a unit specified in the determination unless he has passed another unit specified in the determination or takes that unit concurrently.

(3) The Faculty may determine that the content of a unit approved for the degree course of the Faculty or of another Faculty is substantially the same as the content of another unit for the degree course of the Faculty or of another Faculty and, in such a case, a candidate for the Pass Degree of Bachelor of Science may take only one of those units for his Degree.

7. A candidate's performance in a unit shall be classified as 'High Distinction', 'Distinction', 'Credit', 'Pass', 'Conditional Pass' or 'Fail'.

8. (1) A candidate may be granted a conditional pass in not more than two of the units specified in the next succeeding sub-rule. The units in respect of which a conditional pass may be granted are—

(a) one unit from Group A in the table;
(b) one unit from Group B in the table in respect of which the candidate may count one point for the degree; and
(c) one unit from Group C in the table in respect of which the candidate may count one point for the degree being a unit approved by the Faculty.

(3) In determining whether or not to classify a candidate's performance in a unit as 'Conditional Pass', the Faculty shall take into account the candidate's overall performance in his course.

(4) A candidate who obtains a conditional pass in a unit shall, for the purposes of rules 4 and 5 of these Rules, be deemed to have passed the unit.

(5) Except with the approval of the head of the department concerned, a candidate who obtains a conditional pass in a unit shall be deemed not to have passed that unit for the purposes of the operation of a determination made by the Faculty under sub-rule (2) of rule 6 of these Rules.

9. Except with the approval of the Faculty, a candidate shall not be admitted to the Pass Degree of Bachelor of Science unless he has completed the requirements for the degree within the period of eight years from the date of commencement of the academic year in which he passed the first unit of his course.
Admission to Pass Degree

10. A candidate who has complied with the preceding provisions of these Rules may be admitted to the Pass Degree of Bachelor of Science.

THE DEGREE WITH HONOURS

15. (1) The course for the Degree with Honours shall extend over one academic year of ten months of full-time study, shall consist of such work as the head of the department concerned may direct and may include any of the units prescribed for the Pass Degree.

(2) Except with the approval of the Faculty, the course for the Degree with Honours shall be continuous with the course for the Pass Degree.

Eligibility for candidature

16. (1) A candidate is eligible to enrol for the Degree with Honours if—

(a) he has completed the requirements for the Pass Degree of Bachelor of Science and has reached a standard in the field of study in which he proposes to specialize that, in the opinion of the Faculty, acting on the recommendation of the head of the department concerned, is satisfactory; or

(b) he has been admitted to equivalent status towards the degree.

Requirements of Degree

17. In order to qualify for the degree of Bachelor of Science with Honours, a candidate is required—

(a) to pass such examinations and reach such standard in other required work, as the Faculty, on the recommendation of the head of the department concerned, directs; and

18. Except with the approval of the Faculty, a candidate may not, or may not continue to, pursue the course for the Degree with Honours if, at any time during that year, he enrolls for a diploma or another degree course in the University or for a unit forming part of a diploma or another degree course.

19. A candidate who fails to qualify for the degree with honours may be admitted to the Pass Degree.

20. Except with the approval of the Faculty, a candidate who has enrolled for the Degree with Honours and fails to qualify for that degree shall not be permitted to re-enrol for that degree.

(a) ‘subject’ includes a unit within the meaning of any Courses of Study Rules; and

(b) a reference to the head of a department shall be read as including a reference to the Dean of a Faculty in which there are no departments.

(2) For the purposes of these Rules, where an examination is required to be taken in several parts, each part shall be deemed to be a separate examination.

2. (1) A Faculty may, by resolution, delegate all or any of its powers or functions under these Rules with respect to an examination in a subject to the head of the department responsible for that subject.

(2) A delegation under this rule is revocable by resolution of the Faculty and does not prevent the exercise of a power or function by the Faculty.
3. This Part applies to examinations in subjects for the degree of Bachelor or for Diplomas.

4. An examination in a subject to which this Part applies shall, subject to any directions of the Board of the School of General Studies, be held at such time and place, and in such manner, as the Faculty responsible for the teaching of that subject directs.

5. (1) Subject to this rule, a Faculty shall permit a student who—
(a) has enrolled for a subject in that Faculty;
(b) has complied with the appropriate Courses of Study Rules of that Faculty with respect to that subject;
(c) has attended lectures and classes in that subject as required by the Faculty; and
(d) has performed such practical or other work in that subject as the Faculty requires,
to sit for an examination in that subject upon making an application in accordance with this rule.

(2) An application for permission to sit for an examination shall be made to the Academic Registrar, and be accompanied by any prescribed fee for the examination, not later than the last day of the second term in a year.

(3) An application that is not accompanied by the prescribed fee shall, for the purposes of this rule, be deemed not to have been made.

(4) A Faculty may refuse a student permission to sit for an examination in a subject if the student has not paid the fees prescribed for that subject.

(5) Where a student fails to make an application within the time specified in sub-rule (2) of this rule, the Faculty may permit him to sit for the examination if—
(a) he makes the application, accompanied by the prescribed fee, before the examination is held;
(b) he pays any additional prescribed fee; and
(c) the Faculty is satisfied that the granting of permission to the student to sit for the examination will not interfere with the arrangements for holding the examination.

6. (1) There shall be not less than two examiners for an examination in a subject, who shall be appointed by the Faculty concerned on the recommendation of the head of the department concerned.
(2) The head of the department concerned or, if he is not one of the examiners, one of the examiners appointed by him, shall be the chairman of the examiners.

(3) The examiners shall classify the results of an examination in accordance with the appropriate Courses of Study Rules.

(4) The results of an examination shall be reported by the chairman of the examiners to the head of the department concerned, who shall forward them to the Faculty concerned for its approval.

(2) A student seeking such permission shall lodge an application with the Academic Registrar in writing within seventy-two hours after the time fixed for the examination that he failed to attend or within such further time as the Faculty, in special circumstances, allows.

(3) An application under the last preceding sub-rule shall be accompanied by a statement in writing of the circumstances that prevented the student attending the examination and any evidence in support of the application.

8. (1) A student who considers that his studies during a year in respect of a subject have been adversely affected by illness or other cause, or who is adversely affected by illness or other cause in the course of an examination in that subject, may furnish a statement of the circumstances in writing to the Academic Registrar, together with any medical or other evidence, before the examination is held, or may inform the supervisor at any time in the course of the examination.

(2) Where a student so informs the supervisor during the course of an examination, the supervisor shall notify the Academic Registrar accordingly.

(3) Upon receiving such a notification the Academic Registrar shall furnish a report to the Dean of the Faculty concerned, who shall inform the examiners and the Faculty of the details of the report.

(4) The examiners may take the report into account in examining the student in the subject.

(5) The Faculty may permit the student to sit for a special examination in the subject.
9. (1) A candidate at an examination shall not communicate with the examiners concerning the examination.

(2) After the results of an examination have been published, a candidate at the examination who desires to obtain information concerning results obtained by him at the examination shall address any enquiries or communications for that purpose to the Academic Registrar.

(3) The head of the department shall forward the examiners' reports to the Faculty and, if the examiners' reports differ as to the result of the examination, shall inform the Faculty of that fact.

(4) Where the examiners' reports differ, the Faculty may invite the examiners to consult, or consult further, with the object of resolving their differences or submitting a joint report, or may take such other action as it thinks fit.

12. (1) Unless the Faculty concerned otherwise determines, a thesis or other work submitted for the degree of Master shall be in the English language.

(2) Except with the permission of the Faculty concerned, a candidate shall furnish to the Academic Registrar three typewritten or printed copies of his thesis or other work, one of which shall be lodged by the Faculty with the Librarian after it has been accepted for the degree for which it was submitted.

(3) The form of typewriting or printing in which copies of a thesis or other work are to be furnished shall be as determined by the Board of the School of General Studies.
13. Where it is provided by any Rules made under the Enrolment, Courses and Degrees Statute that a candidate for the degree of Master shall be examined for that degree in a manner other than by the submission of a thesis or other work, or shall be examined on the subject of his thesis or other work, the examination shall be held at such time and place as the Faculty concerned, subject to any directions of the Board of the School of General Studies, determines.

(i) the first preference votes given for each candidate on all unrejected voting papers shall be counted;

(ii) the aggregate number of such first preference votes shall be divided by one more than the number of candidates required to be elected, and the quotient
increased by one, disregarding any remainder, shall be the quota, and (except as hereinafter provided in sub-section 10) no candidate shall be elected until he obtains a number of votes equal to or greater than the quota;

(3) any candidate who has, upon the first preference votes being counted, a number of such votes equal to or greater than the quota shall be declared elected;

(4) where the number of such votes obtained by any candidate is equal to the quota, the whole of the voting papers on which a first preference vote is recorded for such elected candidate shall be set aside as finally dealt with;

(5) where the number of such votes obtained by any candidate is in excess of the quota, the proportion of votes in excess of the quota shall be transferred to the other candidates not yet declared elected, next in the order of the voter's preferences, in the following manner:

(a) all the voting papers on which a first preference vote is recorded for the elected candidate shall be re-examined, and the number of second preference votes, or (in the case provided for in section 18) third or next consecutive preferences, recorded for each unelected candidate thereon shall be counted;

(b) the surplus of the elected candidate shall be divided by the total number of votes obtained by him on the counting of the first preference votes, and the resulting fraction shall be the transfer value;

(c) the number of second or other preferences ascertained in paragraph (a) to be recorded for each unelected candidate, shall be multiplied by the transfer value;

(d) the resulting number shall be credited to each unelected candidate, and added to the number of votes obtained by him on the counting of the first preference votes;

(6) (a) where, on the counting of the first preference votes or on any transfer, more than one candidate has a surplus, the largest surplus shall be first dealt with. If then more than one candidate has a surplus, the then largest surplus shall be dealt with, and so on; provided that, if one candidate has obtained a surplus at a count or transfer previous
to that at which another candidate obtains a surplus, the surplus of the former shall be first dealt with;

(b) where two or more surpluses are equal, the surplus of the candidate who was the highest on the poll at the count or transfer at which they last had an unequal number of votes shall be first dealt with, and if they had an equal number of votes at all preceding counts or transfers, the Registrar shall decide which candidate's surplus shall be first dealt with.

(7) (a) Where the number of votes obtained by a candidate is raised up to or above the quota by a transfer as aforesaid, he shall thereupon be declared elected. And in such case, notwithstanding the fact that he may have reached the quota, such transfer shall be completed, and all the votes to which he is entitled therefrom shall be transferred to him, but no votes of any other candidate shall be transferred to him;

(b) where the number of votes obtained by a candidate is raised up to, but not above, the quota by a transfer as aforesaid, the whole of the voting papers on which such votes are recorded shall be set aside as finally dealt with:

(c) where the number of votes obtained by a candidate is raised above the quota by a transfer as aforesaid, his surplus shall be transferred to the candidates next in the order of the voters' respective preferences, in the following manner:

(i) The voting papers on which are recorded the votes obtained by the elected candidate in the last transfer shall be re-examined, and the number of third, or (in the case provided for in section 18) next consecutive preferences recorded for each unelected candidate thereon counted;

(ii) the surplus of the elected candidate shall be divided by the total number of voting papers mentioned in paragraph (i), and the resulting fractions shall be the transfer value;

(iii) the number of second (or other) preferences, ascertained in paragraph (i), to be recorded for each unelected candidate, shall be multiplied by the lastmentioned transfer value;
(iv) the resulting number shall be credited to each unelected candidate, and added to the number of votes previously obtained by him.

(8) (a) where, after the first preference votes have been counted and all surpluses (if any) have been transferred as hereinbefore directed, no candidate, or less than the number of candidates required to be elected, has or have obtained the quota, the candidate who is lowest on the poll shall be excluded, and all the votes obtained by him shall be transferred to the candidates next in the order of the voter's respective preferences, in the same manner as is directed in sub-section (5);

(b) the votes obtained by such excluded candidate as first preference votes shall first be transferred, the transfer value of each vote in this case being one;

(c) the other votes of such excluded candidate shall then be dealt with in order of the transfers in which, and at the transfer value at which, he obtained them;

(d) each of the transfers which takes place under the two previous clauses of this sub-section shall be deemed for all purposes to be a separate transfer.

(9) (a) Where a number of votes obtained by a candidate is raised up to or above the quota by any such transfer as aforesaid, he shall thereupon be declared elected. And in such case, notwithstanding the fact that he may have reached the quota, such transfer shall be completed, and all the votes to which he is entitled therefrom shall be transferred to him, but no other votes shall be transferred to him;

(b) where the number of votes obtained by a candidate is raised up to, but not above, the quota, by any such transfer as aforesaid, the whole of the voting papers on which such votes are recorded shall be set aside as finally dealt with;

(c) where the number of votes obtained by a candidate is raised above the quota by any such transfer as aforesaid, the surplus shall be transferred to the candidates next in the order of the voters' respective preferences in the same manner as is directed in sub-section (7), paragraph (c); Provided that such surplus shall not be dealt with until all the votes of the excluded candidate have been transferred;
(d) where any surplus exists it shall be dealt with before any other candidate is excluded.

(10) The same process of excluding the candidate lowest on the poll and transferring his votes to other candidates shall be repeated until all the candidates, except the number required to be elected, have been excluded, and the unexcluded candidates who have not already been so declared, shall then be declared elected.

16. In an election under Part III of these Rules at which two candidates are to be elected the result of the election shall be determined in the following manner:

(1) The Returning Officer shall prepare a list of the candidates, shall count the first and second preference votes given for each candidate on all unrejected voting papers and shall credit the aggregate of those votes to the candidates.

(2) The candidate who has received the greatest aggregate number of first and second preference votes shall, if that number constitutes an absolute majority of the votes, be elected.

(3) If no candidate has received an absolute majority of the votes, the counting of votes shall proceed as follows:

(a) the candidate who has received the lowest aggregate number of first and second preference votes shall be excluded and each voting paper on which a first or second preference vote has been counted to him shall be counted to the candidate next in the order of the voter's preference;

(b) if a candidate then has received an absolute majority of votes, he shall be elected;

(c) if no candidate has received an absolute majority of votes, the procedure of excluding the candidate who has received the lowest number of votes and counting each of the voting papers counted to him to the unexcluded candidate next in the order of the voter's preference shall be repeated until one candidate has received an absolute majority of votes; and

(d) the candidate who has received an absolute majority of votes shall be elected.

(4) Where a candidate is elected—

(a) the Returning Officer shall again prepare a list of the candidates (including any candidates excluded in the course of counting of votes under sub-sec-
tion (3) of this section) and credit each candidate with the first and second preference votes counted to him in accordance with sub-section (1) of this section; and

(b) the elected candidate shall be excluded and each voting paper on which a first or second preference vote has been counted to him shall be re-examined and counted to the candidate next in the order of the voter's preference.

(5) If none of the remaining candidates has then received an absolute majority of votes, the counting of votes shall proceed in the manner provided by sub-section (3) of this section.

(6) Where all except two of the candidates have been excluded and each of the remaining candidates has received the same number of votes—

(a) if no candidate has previously been elected, each of the candidates shall be elected;

(b) if a candidate has previously been elected—

(i) the candidate who received the largest number of first preference votes shall be elected;

(ii) in the event of each candidate receiving the same number of first preference votes—the candidate who received the largest aggregate number of first and second preference votes shall be elected; and

(iii) in the event of each candidate receiving the same aggregate number of first and second preference votes—the Returning Officer shall determine by lot which of the candidates shall be elected.

17. Where two or more candidates have the same number of votes and it becomes necessary to exclude one of them, then whichever of the candidates was lowest on the poll at the last count or transfer at which they had an unequal number of votes, shall be excluded and, if such candidates have an equal number of votes at all preceding counts or transfers or if there was no preceding count or transfer, the Returning Officer shall decide by lot which candidate shall be excluded.

18. In determining which candidate is next in the order of the voter's preference, any candidates who have been declared elected or who have been excluded shall not be considered, and the order of the voter's preference shall be determined as if the names of such candidates had not been on the voting paper.
19. Where on any count or transfer it is found that on any voting paper there is no candidate next in the order of the voter's preference, that voting paper shall be set aside as exhausted.

20. The Returning Officer may if he thinks fit, on the request of any candidate setting forth the reasons for the request, or of his own motion, re-count the voting papers received in connection with any election.

20a. (1) Where, before the poll is declared at an election, the Returning Officer is satisfied that the election has been vitiated by reason of an irregularity in the course or conduct of the election, he may declare the election to be void from the commencement of the election or from such point in the proceedings of the election as he specifies in the declaration, being a point in those proceedings after the notification of the fact that the election was necessary but before the occurrence of the irregularity.

(2) Where, in pursuance of the last preceding sub-section, the Returning Officer declares an election to be void from the commencement of the election, he shall, as soon as practicable after making the declaration, conduct a further election in accordance with these Rules in place of the void election.

(3) Where, in pursuance of sub-section (1) of this section, the Returning Officer declares an election to be void from a point in the proceedings after the notification of the fact that the election was necessary, he shall determine what further proceedings in the election are necessary to ensure that the election will be regularly conducted and shall, subject to the next succeeding sub-section, conduct those further proceedings in accordance with these Rules in place of the void proceedings.

(4) In the conduct of any further proceedings in an election under the last preceding sub-section, the Returning Officer may, notwithstanding anything contained in section 1 or 2 of this Schedule, determine the intervals to be allowed between the occurrence of any events in the course of those further proceedings.

21. (1) The Returning Officer shall retain the voting papers on which votes have been recorded at an election for the period of three months after the declaration of the poll at that election.

(2) After the expiration of that period, the Returning Officer may destroy the voting papers.

‘The Master’ includes any person authorized under the provisions of this Order to exercise the powers of the Master.

‘Prejudicial conduct’ means conduct prejudicial to the good order of the House committed in the House, and includes breach of a provision concerning conduct in the House contained in a Statute of the University, a Rule of the Council or an Order of the Master and Fellows.

2. (1) The Master or a Fellow may require any person (not being a member or resident of the House) to leave the House.

(2) A person who has been required to leave the House under (1) hereof shall forthwith leave the House and shall not enter the House thereafter unless given permission to do so by the Master.

(3) A Fellow shall report to the Master the circumstances of any action taken by him under this section.

3. (1) If, in the opinion of the Master or a Fellow, a member or resident of University House has engaged in prejudicial conduct, the Master or such Fellow may make an order (herein called a suspension order) suspending the rights and privileges of such member or resident (herein called a suspended person), and shall communicate such order, either verbally or in writing, to the suspended person.

(2) If so requested, the Master or a Fellow when communicating a suspension order shall give the suspended person a written summary of his reasons.

(3) A suspension order shall operate for such period as the Master or Fellow making it specifies, but not exceeding forty-eight hours from the time of its communication.

(4) Subject to (5) hereof, a suspended person shall leave the House forthwith and shall not enter the House for the period of the suspension.
Powers of Governing Body

4. (1) In respect of any member or resident of the House (herein called a defendant) who has engaged in prejudicial conduct, the Governing Body may exercise the following powers:

(a) it may cancel a defendant's membership;

(b) it may suspend a defendant's membership for such period as it thinks fit, entirely or in relation to such privileges of membership as it specifies;

(e) it may refer the matter to the Vice-Chancellor, to be dealt with by the general disciplinary processes of the University.

(2) Except in the case of a defendant who is a suspended person under section 3, and in respect of whose suspension a Special Meeting of the Governing Body is held under subsection (5) of section 3, the Master shall give written notice to a defendant of the prejudicial conduct alleged against him, and of the time and place of a Special Meeting of the Governing Body at which such allegation is to be considered. The Master shall summon a Special Meeting of the Governing Body accordingly at which the Governing Body may hear such evidence as it thinks fit and (if he desires) shall hear the defendant and any persons whose presence the defendant procures to give evidence in support of his defence, and after such hearing if the Governing Body decides that the defendant has engaged in prejudicial conduct, it may exercise such one or combination of powers given by this section as is appropriate.
5. (1) A decision of the Governing Body under sections 3 and 4 hereof shall be final.

(2) Notwithstanding anything contained in this Order, the Master may at any time permit a suspended person or a person who has been excluded from the House to enter the House for such special purpose and for such period as the Master specifies, but subject to such permission the suspension order or the exclusion as the case may be shall remain in effect.

(3) The Governing Body may in its discretion at any time remit or modify any penalty imposed under section 4.

(2) Fines shall be paid to the Master within seven days of imposition.

(3) If a suspended person or defendant fails to comply with a suspension order or a decision made in his case by the Governing Body, such failure shall constitute prejudicial conduct for the purpose of this Order and may be separately dealt with as such under section 4 hereof.

9. The powers of the Master under this Order shall in his absence be exercised by the Deputy Master, or in the absence of the Master and the Deputy Master, by a Fellow authorized for such purpose by the Master or the Deputy Master or by a Special Meeting of the Governing Body.
