Hi Sharon

Yeah all these pre ANU

Thanks

Darren

Hi Darren

I know you are travelling, but I have a quick question for you. I have been updating your publications in Aries and have come across a few publications that I need clarification:

<!--[if !supportLists]-->1. <!--[endif]-->2013 - *Development of an educational cartoon to prevent worm infections in Chinese schoolchildren* – you have not affiliated ANU on this paper. Was this research done before you started at ANU? If so I can still add it to Aries, but as an external paper, so it will still go onto your researcher page under your publications.

<!--[if !supportLists]-->2. <!--[endif]-->2013 - *Anthelmintic activity of the cyclotides (kalata b1 and b2) against schistosome parasites* - you have not affiliated ANU on this paper. Was this research done before you started at ANU? If so I can still add it to Aries, but as an external paper, so it will still go onto your researcher page under your publications.

<!--[if !supportLists]-->3. <!--[endif]-->2015 - *Can mass drug administration lead to the sustainable control of schistosomiasis?*- you have not affiliated ANU on this paper. Was this research done before you started at ANU? If so I can still add it to Aries, but as an external paper, so it will still go onto your researcher page under your publications. If this research was done while working at ANU, I will need to get you to complete an affiliation statement. We can sort this out when you come back.

Thanks

Sharon
