(Machine-readable data file plus user's guide)

Census of population and housing, 1976 [machine-readable data file]: local government area summary files, occupation, industry, qualifications / Principal investigator, Australian Bureau of Statistics -- Canberra : Australian Bureau of Statistics [producer], 1976. Canberra : Social Science Data Archives [distributor], 1984.

1 data file + accompanying user's guide (99 p.).

Summary: The Local Government Area Summary Files (De Facto), Occupation, Industry, Qualifications originally contained the full classification for occupation, industry and qualifications for each Local Government Area (LGA) in Australia. Only data for NSW and Victoria is available here. The records for each LGA include geographic area codes for State, Statistical Division, Statistical Subdivision, and LGA. Each record also has an indicative code of occupation or industry or qualification. The tables include counts for males and females by occupational status (in the case of occupation or industry) and labour force status (in the case of qualifications).

ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts based in whole or in part on these data should:

- (i) identify the data and original investigators by including the bibliographic reference for the data file given on the reverse of the title page;
- (ii) acknowledge the Social Science Data Archives and, where the data are made available through the Social Science Data Archives by another archive, acknowledge that archive;
- (iii) declare that those who carried out the original analysis and collection of the data bear no responsibility for the further analysis or interpretation of them.

In order to assemble essential information about the use of archival resources and to facilitate the exchange of information about users' research activities, individuals are requested to deposit two copies of each completed manuscript, thesis abstract, or reprint to the Social Science Data Archives.

ANALYSIS CONDITIONS

RESEARCH TOPIC (ABSTRACT)

Population counts have been conducted from a very early period in Australia's history. Initially, these counts were solely head counts called 'musters', which were important as a means of matching food and other supplies to the numbers of people needing them. The first regular census was taken in New South Wales in 1828 using census-taking methods essentially adapted from methods used in England at that time.

With Federation in 1901, census-taking became the responsibility of the Commonwealth Government. In 1905 the 'Census and Statistics Act' was passed which gave authority to the Governor-General to appoint a Commonwealth Statistician, one of whose duties was the taking of the census.

The 'Census and Statistics Act 1905' stipulated that a census be taken in 1911 and every tenth year thereafter. In 1930 the Act was amended to make the year in which the census was to be conducted more flexible, by the addition of the words 'or at such other times as prescribed'. Since 1911, censuses have been held in 1921, 1933, 1947, 1954, 1961, 1966, 1971 and 1976.

The Act also stipulated a number of topics which must be asked in each census: name, age, sex, relationship, marital status, duration of marriage, birthplace, nationality, period of residence, religion, occupation, material of outer walls and number of rooms in the dwellings, and allowed for other topics to be included 'as prescribed'.

KIND OF DATA

census data

The Local Government Area Summary Files (De Facto), Occupation, Industry, Qualifications originally contained the full classification for occupation, industry and qualifications for each Local Government Area (LGA) in Australia. Only data for NSW and Victoria is available here.

The records for each LGA include geographic area codes for State, Statistical Division, Statistical Subdivision, and LGA. Each record also has an indicative code of occupation or industry or qualification. The tables include counts for males and females by occupational status (in the case of occupation or industry) and labour force status (in the case of qualifications).

DEFINITION OF TOTAL UNIVERSE (UNIVERSE SAMPLED)

All members of the community are counted at the dwelling in which they are staying on census night, regardless of where they usually live. Special provision is made for persons who are not in a private or non-private dwelling, e.g. camping out, at work, travelling on long distance trains or buses and those on boats and planes. The census does not count Australian residents who are overseas but does count people who are visiting Australia. Diplomatic representatives, their families and their dwellings are excluded.

In conformity with the 1967 repeal of Section 127 of the Constitution, 1976 Census statistics include Aborigines.

SAMPLING PROCEDURES

Preliminary processing conducted soon after Census night produced a complete count of the population classified by age, sex, marital status and birthplace (Australia, UK and Other). However, it was decided to process only a sample of schedules in the final processing phase. The following sampling scheme was adopted:

- a). process all schedules from non-private dwellings (motels, hostels, gaols, etc.) in Australia;
- b). process all schedules from private dwellings in the Northern Territory;
- c). process 50% of schedules from private dwellings in other States and the ACT. This sample was selected at the Collection District level by randomly selecting either the first or second private dwelling in the CD and then systematically taking every second private dwelling after that. All persons within each private dwelling were included in the sample.

DATES OF DATA COLLECTION

30 June 1976

METHOD OF DATA COLLECTION

self-completion (distribute, collect)

The 'Census and Statistics Act 1905' specifies the manner in which the census must be collected. Section 10(1) states that 'For the purpose of taking the census, a form called the Householder's Schedule shall be prepared, and left, in accordance with the regulations, at every dwelling throughout the Commonwealth'. Collectors are responsible for the delivery of census forms to all households prior to census day and again for collection after census day.

ACTIONS TO MINIMISE LOSSES

All persons are required to complete census forms and collectors are instructed to ensure that contact is made and completed forms are collected. Those people who do not co-operate are approached by senior staff who endeavour to overcome problems or objections and who, where necessary, outline fully the consequences of non-compliance. Prosecutions will be considered only after these measures have failed.

Collectors are trained to provide help on request to any persons who have difficulty in completing the census forms. Interpreters are used for persons who have language problems.

Confidentiality of personal or household information is assured. Any person who does not want his or her form to be seen by the collector can obtain from the collector an envelope in which to seal the form. The form is then checked for completeness by the group leader. Individual members of a household may request a separate form and envelope in which to record and seal his/her census information. In exceptional circumstances, a householder may post a completed form to the appropriate census office.

DATA GATHERING STAFF

The census field operation is controlled and conducted jointly by the Australian Bureau of Statistics and the Australian Electoral Office. Permanently employed Divisional Returning Officers in the Electoral Office become Divisional Field Supervisors for the census and they are responsible for the recruitment, training and general supervision of temporary census staff.

Approximately 2,500 group leaders and 30,000 collectors are recruited for short term duties. Each group leader is responsible for approximately 12 collectors who themselves are responsible for the delivery and collection of census forms from an average of 200 dwellings.

The special collectors recruited to deliver and collect the forms in large establishments (hospitals, hotels, gaols, etc.) are usually the proprietors or managers of the individual establishments. Likewise, the persons in charge of trains, buses, planes, etc. in transit on census night are usually recruited as special collectors for the enumeration of persons travelling throughout census night.

Every effort is made to avoid having collectors work in the same area as they live to avoid, as far as possible, the collection of information from people they know personally.

Aboriginal collectors are used in areas where there is a large aboriginal population.

All staff employed either temporarily or permanently on the census sign an undertaking which provides that he/she will not, without lawful authority, alter any document or form and will not divulge the contents of any form filled up or information obtained in the course of his/her duties. Offenders are subject to prosecution.

WEIGHTING

weighting criteria

Counts of persons obtained from the 50% sample are not weighted by a factor of 2 to get CD estimates but by a different factor (usually very close to 2) which ensures that the totals for males, females and all persons, derived from the final processing phase, agree with those from the preliminary processing phase. Final counts of private dwellings are weighted by a factor of 2, as the sample was chosen on the basis of the number of dwellings.

OTHER ANALYSIS CONDITIONS

Balancing edits are employed to ensure that the total numbers of persons and dwellings in each CD remain consistent at all stages of processing.

Consistency edits are used to detect responses which appear to be inconsistent with other responses on the same schedule, or in conflict with census definitions or processing rules.

While every effort is made to minimise undercounting in the census, some inevitably occurs - for example, the inadvertant omission of very young children or the treatment by the census collector of an occupied dwelling as unoccupied. Refusal by householders to complete the census schedule is not a significant cause of under-enumeration and accounts for less than 0.5% of households.

DIMENSIONS OF DATA SET

The Summary Files originally contained 3 files of LGA level summary data. File A holds data for NSW and Victoria, files B and C hold data for the other States and Territories. Only File A is held by the Social Science Data Archives. There is a set of records for each LGA in NSW and Victoria (460). Each set contains a record for every occupation, industry and qualification code that occurs in the LGA. The overall file size is 235,840 physical records.

ACCESSIBILITY

There is no restriction on the use or resale of the data. However, if the data is sold, the buyer must be informed that the same data is available on magnetic tape or on microfiche or in printed form from the ABS.

REFERENCES TO RELEVANT PUBLICATIONS/RESULTS/STUDIES

PUBLICATIONS/REPORTS BY THE PRIMARY INVESTIGATOR

The main publications containing results of the 1976 Census of Population and Housing are:

Characteristics of Population in Local Government Areas (Preliminary) - shows, for each State and Territory, age, sex, marital status and birthplace of population for each LGA, Statistical Division, Subdivision and District.

Population and Dwellings in Local Government Areas and Urban Centres (Preliminary) - shows, for each State and Territory, population by sex and number of occupied and unoccupied dwellings in each LGA and principal urban centres.

Bulletin 1. Population and Dwellings: Summary Tables.

Contains 62 tables at the State or Section of State level summarising most population and dwelling topics. Published in 9 parts, one for each State and Territory and one for Australia as a whole.

Bulletin 2. Population and Dwellings: Cross-classified Tables. Contain 79 tables all at the State geographic level. Five major population topics are covered in detail: demographic, birthplace, labour force, income, and family characteristics. Published in 9 parts, one for each State and Territory and one for Australia as a whole.

Bulletin 3. Characteristics of the Population and Dwellings in Local Government Areas. Contains 49 tables for each LGA within each State. There are 33 tables of population characteristics and 16 tables of dwelling characteristics. The LGA tables for each State or Territory are in loose-leaf form in a four ring folder.

A number of Information Papers discuss either technical aspects of the census or provide information about specific 1976 Census topics.

 RECORD INFORMATION

The LGA 1 OIQ Summary File contains 235,840 physical records. There is a set of records for each LGA in NSW and Victoria (460). Each set contains a record for every occupation, industry and qualification that occurs in the LGA. All records are 80 bytes (8 bit characters) long.

Each record contains 17 cells of information including record identifiers, geographic indicatives and tables or counts of persons. The 3 record types are distinguished on the basis of occupation or industry or qualifications. The format is the same for each type as follows:

Field Content	Start Position	Field Length
1. Record length (0080)	1	4
2. Record type: 01=occupation 02=industry 03=qualifications	5	2
3. Zero fill (00)	7	2
4. State	9	1
5. Statistical Division	10	2
6. Statistical Subdivision/ District	12	1
7. Census LGA Code	13	3
8. Occupation/Industry/Qualification code	16	4
9. Zero fill	20	13
10. Males x STC 1 (see STC codes below)	33	6
11. Females x STC 1	39	6
12. Males x STC 2	45	6
13. Females x STC 2	51	6
14. Males x STC 3	57	6
15. Females x STC 3	63	6
16. Males x STC 4	69	6
17. Females x STC 4	75	6

Table of codes for Fields 10 to 17:

STC (Status Code)	Occupational status (Record types 01,02)	Labour Force status (Record type 03)
1	Wage or salary earner	Employed
2	Self employed	Unemployed
3	Employer	Not in labour force
4	Unpaid helper	Not applicable

Details of the record codes are given in the ABS documentation: Local Government Area Summary Files, Occupation, Industry, Qualifications (Final Data): Technical Details, ABS Cat. No. 2135.0.

The relevant pages have been attached.

For details see ATTACHMENT 1 (7p.)

OCCUPATION CODES

There are 395 possible occupation codes. Records exist only for those occurring in each particular LGA. Details of occupation codes are given in the ABS documentation:

Information Paper No. 9 (iii) Occupation Classification Extract
ABS Cat. No. 2114.0.

The relevant pages have been attached.

For details see ATTACHMENT 2 (14p.)

INDUSTRY CODES

There are 576 possible classes of industry. Records exist only for those occurring in each particular LGA. Details of industry codes are given in the ABS documentation:

Information Paper No. 9 (ii) Industry Classification Extract
ABS Cat. No. 2113.0.

The relevant pages have been attached.

For details see ATTACHMENT 3 (21p.)

QUALIFICATIONS CODES

There are 497 possible levels of qualifications. Records exist only for those occurring in each particular LGA. Details of qualifications codes are given in the ABS documentation:

Information Paper No. 9 (iv) Classification of Educational
Qualifications ABS Cat. No. 2115.0.

The relevant pages have been attached.

For details see ATTACHMENT 4 (13p.)

SAMPLING ERRORS

Since the Census figures derived from final processing are based on a 50% sample of schedules, it is likely that they will differ from the figures that would have been obtained if all schedules had been processed. These differences are called sampling errors.

For details see ATTACHMENT 5 (7p.)

ATTACHMENT 1**2.1.1 State (STE)**

The possible values that a State code can take and their meanings are:

- 1 New South Wales
- 2 Victoria
- 3 Queensland
- 4 South Australia
- 5 Western Australia
- 6 Tasmania
- 7 Northern Territory
- 8 Australian Capital Territory

These data are available on magnetic tape in the Local Government Area Descriptor File, described in *Information Paper No. 6 (2105.0)*.

2.1.2 Statistical Divisions (STD) (*De facto*, File Set 7 only)

These are relatively homogeneous regions characterised by identifiable social and economic links between inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. In addition, in 1976, Statistical Divisions, Statistical Subdivisions and Statistical Districts have been designed to be compatible, where possible, with State Planning regions.

Names and associated codes are available on magnetic tape in the Local Government Area Descriptor File, described in *Information Paper No. 6 (2105.0)*.

2.1.3 Statistical Subdivision/District (STD) (*De facto*, File Set 7 only)

Delimited on the same basis as Statistical Divisions but as partitions of the latter. The same field code is also used to identify Statistical Districts which comprise a fixed statistical area generally encompassing centres of 25,000 or more inhabitants.

Names and associated codes are available on magnetic tape in the Local Government Area Descriptor File, described in *Information Paper No. 6 (2105.0)*.

2.1.4 Census LGA Code

These are the principal tabulation units used in the publication of census data. They correspond in all but a few instances to legal Local Government Areas as defined at 31 January 1976. The exceptions are :

- (i) Some very minor areas for which boundary changes, involving nil or very minor populations, were received too late for implementation.
- (ii) City of Brisbane, Northern Territory and ACT, which are divided into statistical areas, which are treated as LGAs for census purposes.

Census LGAs are numbered consecutively in alphabetical order within each State or Territory.

Names and associated codes are available on magnetic tape in the Local Government Area Descriptor File, described in *Information Paper No.6* (2105.0).

2.1.5 Occupation, Industry and Qualification Codes.

No major or minor group totals appear on the file. As previously mentioned the code values and their meanings are contained in *Information Papers 9(iii)*, *9(ii)* and *9(iv)* respectively.

MAJOR GROUP 7/8: TRADESMEN, PRODUCTION-PROCESS WORKERS AND LABOURERS, N.E.C.	
MINOR GROUP 7/8A: SPINNERS, WEAVERS, KNITTERS, DYERS AND RELATED WORKERS	
Fibre Preparers	600
Spinners and Winders, Textile, excluding Rayon Spinners	601
Weavers, including Loom Tuners	602
Knitters and Knitting Machine Setters, including Hosiery	603
Bleachers, Dyers and Finishers, Textiles	604
Textile Factory Workers (so described)	605
Textile Fabric and Related Product Makers, n.e.c.	606
MINOR GROUP 7/8B: TAILORS, CUTTERS, FURRIERS AND RELATED WORKERS	
Tailors	607
Dressmakers	608
Other Garment Makers, including Furriers	609
Milliners	610
Upholsterers and Related Workers	611
Cutters, Textile Products, Leather Garments and Gloves	612
Machinists, Sewers, Embroiderers, Textile Products, Leather Garments and Gloves	613
Clothing and Related Product Factory Workers (so described)	614
Apparel and Related Product Workers, n.e.c.	615
MINOR GROUP 7/8C: LEATHER CUTTERS, LASTERS, SEWERS (EXCEPT GLOVES AND GARMENTS) AND RELATED WORKERS	
Boot and Shoe Makers and Repairers, not Factory	616
Boot and Shoe Factory Operatives	617
Leather Goods Makers, not Clothing, Boot or Shoe	618
MINOR GROUP 7/8D: FURNACEMEN, ROLLERS, DRAWERS, MOULDERS AND RELATED METAL MAKING AND TREATING WORKERS	
Furnacemen, Metal	619
Rolling Mill Operatives, Metal	620
Blacksmiths, Hammersmiths and Forgemen	621
Moulders and Coremakers	622
Metal Making and Treating Workers, n.e.c.	623
MINOR GROUP 7/8E: PRECISION INSTRUMENT MAKERS, WATCHMAKERS, JEWELLERS AND RELATED WORKERS	
Watch and Clock Makers and Repairers, including Watchmakers and Jewellers (so described)	624
Optical Mechanics and Optical Dispensers	625
Optical Instrument Makers and Repairers	626
Dental Mechanics	627
Limb Makers and Fitters	628
Other Precision Instrument Makers and Repairers	629
Office Machine Mechanics	630
Jewellery Makers and Repairers, including Jewellery Engravers	631
MINOR GROUP 7/8F: MACHINE TOOLMAKERS, METAL MACHINISTS, MECHANICS, PLUMBERS AND RELATED METAL WORKERS	
Fitters, metal, n.e.c., Fitters and Turners (so described)	632
Machine Toolmakers, Diemakers, Metal	633
Machine Tool Setters and Operators, Metal, including Metal Machinists (so described)	634
Vehicle Body Builders	635
Motor Vehicle Mechanics	636
Aircraft Mechanics	637

Classification of Occupations – *continued*

<i>Occupation</i>	<i>Code Number</i>
Sheetmetal Workers	638
Metal Can, Drum and Keg Makers	639
Panel Beaters	640
Plumbers	641
Pipe and Gas Fitters	642
Welders and Flame Cutters	643
Boilermakers, including Metal Plate and Structural Steel Workers	644
Electroplaters, Dip Platers	645
Engineers (so described), not professional, n.e.c.	646
Mechanics, Servicemen (so described), n.e.c.	647
Foremen, Metal Working (so described), n.e.c.	648
Metal Workers, n.e.c.	649
 MINOR GROUP 7/8G: ELECTRICIANS AND RELATED ELECTRICAL AND ELECTRONICS WORKERS	
Electricians, including Electrical Mechanics	650
Electrical Fitters	651
Electronic Fitters	652
Radio, T.V., Mechanics and Repairmen	653
Radio, T.V., Transmission, Technicians and Mechanics	654
Telecommunication Technicians	655
Linemen, Electrical, Cable Jointers	656
Foremen, Electrical (so described), n.e.c.	657
Cinema Projectionists and Sound Recording Operators	658
Electrical and Electronic Workers, n.e.c.	659
 MINOR GROUP 7/8H: METAL WORKERS, METAL AND ELECTRICAL PRODUCTION-PROCESS WORKERS, N.E.C.	
Assemblers, Process Workers, Metal, Electrical (so described)	660
Factory Workers, Metal, Electrical (so described)	661
Iron Workers, Metal Workers (so described)	662
Tradesmens Assistants, Metal, Electrical	663
Inspectors, Viewers, Checkers, Examiners, Metal, Electrical, n.e.c.	664
 MINOR GROUP 7/8I: CARPENTERS, WOODWORKING MACHINISTS, CABINETMAKERS AND RELATED WORKERS	
Carpenters, Joiners	665
Cabinetmakers	666
Sawyers, Woodworking	667
Woodworking Machinists	668
Patternmakers, Metal Foundry, etc.	669
Polishers, Furniture	670
Sawmill and Timber Yard Workers, n.e.c.	671
Woodworking Factory Workers (so described), n.e.c.	672
Woodworking Tradesmen's Assistants	673
Wood Treaters	674
Woodworkers, n.e.c.	675
 MINOR GROUP 7/8J: PAINTERS AND DECORATORS	
Painters and Decorators, Building Construction and Maintenance, including Painters (so described)	676
Painters, n.e.c.	677

Classification of Occupations – continued

<i>Occupation</i>	<i>Code Number</i>
MINOR GROUP 7/8K: BRICKLAYERS, PLASTERERS AND CONSTRUCTION WORKERS, N.E.C.	
Bricklayers	678
Plasterers	679
Concrete and Terrazzo Workers	680
Glaziers	681
Tilers, Ceramic, Floor, Wall	682
Foremen, Building and Construction, n.e.c.	683
Building Tradesmen Assistants, n.e.c.	684
Pipelayers, Construction	685
Building and Construction Workers, n.e.c.	686
MINOR GROUP 7/8L: COMPOSITORS, PRINTING MACHINISTS, ENGRAVERS, BOOKBINDERS AND RELATED WORKERS	
Compositors and Typesetters	687
Printing Machinists, Printers (so described)	688
Stereotypers and Electrotypers	689
Photo-engravers, Engravers, Printing	690
Bookbinders	691
Printing Workers, n.e.c.	692
MINOR GROUP 7/8M: POTTERS, KILNMEN, GLASS AND CLAY FORMERS AND RELATED WORKERS	
Glass Formers, Cutters, Grinders, Finishers	693
Potters and Related Clay and Abrasive Formers	694
Furnacemen and Kilnmen, Glass and Ceramics	695
Brickyard and Pottery Workers (so described)	696
Glass Factory Workers (so described)	697
Glass and Ceramics Workers, n.e.c.	698
MINOR GROUP 7/8N: MILLERS, BAKERS, BUTCHERS, BREWERS AND RELATED FOOD AND DRINK WORKERS	
Millers, Grain and Related Products	699
Bakers, Pastrycooks	700
Confectionery Makers	701
Brewers, Winemakers and Related Workers	702
Butchers and Meat Cutters	703
Food Preservers and Cannery Workers	704
Dairy Product Process Workers	705
Soft Drink Makers	706
Food and Drink Process Workers, n.e.c.	707
MINOR GROUP 7/8O: CHEMICAL, SUGAR AND PAPER PRODUCTION-PROCESS WORKERS	
Chemical Production-Process Workers	708
Sugar Millers and Processors	709
Paper, Paper Board and Fibre Board Makers	710
MINOR GROUP 7/8P: TOBACCO PREPARERS AND TOBACCO PRODUCT MAKERS	
Tobacco Preparers and Tobacco Product Makers	711
MINOR GROUP 7/8Q: PAPER PRODUCTS, RUBBER, PLASTIC AND PRODUCTION-PROCESS WORKERS, N.E.C.	
Rubber Product Workers	712
Plastic Product Workers	713
Tanners, Fellmongers and Related Workers	714
Photographic Printers and Developers	715
Stone Cutters and carvers	716
Paper Product Makers	717

Classification of Occupations – *continued*

<i>Occupation</i>	<i>Code Number</i>
MINOR GROUP 7/8R: PACKERS, WRAPPERS, LABELLERS	
Packers, Wrappers, Labellers	720
MINOR GROUP 7/8S: STATIONARY ENGINE EXCAVATING AND LIFTING EQUIPMENT OPERATORS	
Stationary Engine Drivers	721
Boiler Firemen	722
Crane and Hoist Operators	723
Riggers and Cable Splicers	724
Operators of Earth Moving and Other Construction Machinery	725
Material Handling Equipment Operators	726
Oilers and Greasers, Machinery and Vehicles, excluding Ships	727
MINOR GROUP 7/8T: STOREMEN AND FREIGHT HANDLERS	
Waterside Workers, n.e.c.	728
Storemen, including Storemen and Packers (so described)	729
Freight Handlers, n.e.c.	730
MINOR GROUP 7/8U: LABOURERS, N.E.C.	
Railway and Tramway Repairmen, Fettleers, n.e.c.	731
Labourers, n.e.c., including Labourers (so described)	
Index entries for occupation codes 732-743

ATTACHMENT 5**SAMPLING ERRORS ASSOCIATED WITH CENSUS ESTIMATES (REVISED)**

This Appendix discusses the sampling errors associated with the data from the main processing phase of the 1976 Census: Data from the preliminary processing phase is not subject to sampling errors because all schedules were included. Unlike the preliminary data, the final data from the main processing phase is based on the processing of all census schedules from non-private dwellings, all schedules from the Northern Territory and a 50% sample of private dwellings in the other States and the A.C.T. Any estimate for the Northern Territory from either the preliminary or main processing phase is not subject to sampling error since all schedules for the Northern Territory were processed. Counts of the total number of males, total number of females and total number of persons for a CD or LGA from the final processing phase were constrained to agree with those from the preliminary processing phase. Therefore, these estimates of total are not subject to sampling error.

WHAT IS SAMPLING ERROR

Since only a 50% sample of private dwelling schedules was processed, it is likely that the estimates derived from the census would differ from figures which would have been obtained if all schedules were included. These differences are called sampling errors. The sampling error associated with any estimate can be estimated from the sample results and one measure so derived is the standard error. The particular 50% sample selected was one of a large number of possible 50% samples. Each possible 50% sample would have yielded different estimates. The standard error measures the variation of all the possible 50% sample estimates around the figures which would have been obtained if all schedules had been processed.

Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained if all schedules had been processed, and about nineteen chances in twenty that the difference will be less than two standard errors.

Another measure of the sampling error is the relative standard error, which is obtained by expressing the standard error as a percentage of the estimate; that is

$$\text{Relative Standard Error} = \frac{\text{Standard Error}}{\text{Estimate}} \times 100$$

Both standard error and relative standard error are used in the following discussion of the reliability of the estimates. An example of their application is as follows:

Example

If an estimate of 70 has a relative standard error of 10%, then the standard error of that estimate is 10% of 70 or 7. Thus there are two chances in three that the figure that would have been obtained if all schedules had been processed will be in the range $70 \pm (1 \times 7)$ or 63 to 77, and nineteen chances in twenty that this figure is between $70 \pm (2 \times 7)$ or 56 to 84.

An estimate of less than 10 persons or dwellings should be treated with caution as it will be subject to such high sampling error (relative standard error generally in excess of 40%), as to detract seriously from its value for most reasonable uses.

PRESENTATION OF SAMPLING ERRORS

It would have been impracticable to publish standard errors of all census estimates because difficulties in presentation would have been encountered with the large number of estimates. In addition, computer production of all standard errors would have been costly.

Consequently, graphs and tables which relate the relative standard error of an estimate to the size of the estimate are given at the end of this Appendix. As can be seen from the graphs, the larger an estimate the greater its reliability and thus the smaller the relative standard error. The graphs are not intended to give a precise measure of the error for a particular estimate, but provide an indication of the likely magnitude of the relative standard error for estimates of any particular size.

HOW TO DETERMINE THE SAMPLING ERROR ON AN ESTIMATE

There is no sampling error on an estimate if

- . the estimate is total males, total females or total persons in a CD, LGA or aggregations of these areas.
- . the estimate relates to the Northern Territory.

If the estimate is greater than 1000 persons or dwellings, then the relative standard error will be less than 2.5% and so the sampling error can be assumed to be negligible for most practical purposes.

The relative standard error or standard error for any other estimate may be found by reference to the graphs and tables given at the end of this Appendix. A complete description of the methods to be used to obtain the relative standard error for any estimate is given in the following sections.

SAMPLING ERRORS ON DWELLING AND PERSON ESTIMATES

Sampling errors depend on the type of estimate concerned.

- 1 For dwelling estimates the relative standard errors are given by LINE D (refer GRAPH 1).
- 2 For person estimates refer to GRAPH 2. Sampling errors on person estimates depend on the particular topic of interest. Two groups of topics have been identified:

- . Use LINE A if the estimate involves any of the following topics:

Year of arrival; period of residence; birthplace (if overseas); country of citizenship (if overseas); religion; languages regularly used; racial origin.

- . Use LINE B for all other topics related to persons.

The difference between the relative standard errors for different person estimates arises because some characteristics are generally similar for persons in the same dwelling, but differ from persons in different dwellings. That is these characteristics are clustered by dwelling (for example, religion and racial origin). The sampling scheme used involved the inclusion of ALL persons in selected dwellings rather than selection of every second person in a dwelling. Hence for characteristics which are clustered by dwelling there is a greater chance that such persons would have been either undersampled or oversampled. Thus estimates of number of persons classified by characteristics which are clustered by dwelling will have somewhat higher relative standard errors.

If an estimate is known to include a large number of persons from non-private dwellings where all schedules were processed (for example an estimate of males ten to fifteen years of age in a CD with a large boarding school for boys), then the relative standard error as read from the graph will overestimate the true relative standard error.

Example

Consider an estimate of the number of female university graduates in an LGA. The relative standard error will be derived from LINE B of GRAPH 1. If the estimated number of female university graduates in the LGA is 50, then reading from this line, the relative standard error is approximately 12%. The standard error on the estimate is $50 \times 12/100 = 6$. Therefore, there are nineteen chances in twenty that the number of female university graduates in the LGA is in the range 30 (2x6) or 18 to 42.

Relative standard errors for dwelling and person estimates may also be determined from Table 1 which sets out relative standard errors for selected estimate sizes.

SAMPLING ERRORS ON ESTIMATES OF PROPORTIONS AND PERCENTAGES

Proportions and percentages formed from the ratio of two census estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. The formula for the relative standard error of a proportion is given below.

Relative Standard Error (x/y)

$$\approx \sqrt{\{\text{Relative Standard Error (x)}\}^2 - \{\text{Relative Standard Error (y)}\}^2}$$

The relative standard error on a percentage is the same as for the corresponding proportion. Thus the relative standard error on an estimate of 58% is the same as that on the proportion 0.58.

Example

Consider an estimate of the labour force participation rate for persons born overseas for a particular LGA. If the number of persons born overseas who are in the labour force is 100 and the total number of persons born overseas is 160, then the estimated proportion is $100/160 = 0.63$. The relative standard errors for both the numerator and denominator will be derived from GRAPH 2 LINE A. Reading from this line, the relative standard error of the numerator (i.e. the number of persons born overseas who are in the labour force) is approximately 14%, and the relative standard error of the denominator (i.e. the number of persons born overseas) is approximately 11%. The relative standard error of the estimate of the proportion is therefore

$$\sqrt{14^2 - 11^2} = 8.6\%$$

The standard error on the proportion is $8.6 \times 0.63/100 = 0.05$. Therefore, there are nineteen chances in twenty that the labour force participation rate for persons born overseas for the LGA is in the range $0.63 \pm (2 \times 0.05)$ or 0.53 to 0.73.

As can be seen from the above formula, the relative standard error of a proportion or percentage will always be less than the relative standard error of the numerator. However, whenever a proportion or percentage is small (i.e. the denominator considerably greater than the numerator), it will be reasonable to approximate the relative standard error of the proportion or percentage by the relative standard error of the numerator.

For proportions or percentages where the denominator is the total number of males, females or persons in a CD or group of CDs, the relative standard error of the denominator is zero because these totals were derived from the preliminary processing phase. In these cases, the relative standard error of the proportion or percentage is given simply by the relative standard error of the numerator.

Example

Consider an estimate of the percentage of persons born overseas for a particular CD. If the number of persons born overseas in the CD is 300 and the total number of persons in the CD is 1000, then the estimated percentage is $(300/1000) \times 100 = 30\%$. The relative standard error on the denominator is zero since estimates of total persons in a CD are not subject to sampling error. The relative standard error on the numerator can be obtained from GRAPH 2 LINE A. This graph gives the relative standard error on the numerator as approximately 8.1%. Therefore, the relative standard error on the percentage is also 8.1% and hence the standard error on the estimate of percentage is $8.1 \times 30/100 = 2.5$ percentage points. Therefore, there are nineteen chances in twenty that the percentage of persons born overseas in the CD will lie within the range $30 \pm (2 \times 2.5)$ or 25% to 35%.

Relative standard errors for estimates of proportions or percentages may also be determined from Table 2 which sets out relative standard errors for selected percentages or proportions.

SAMPLING ERRORS ON ESTIMATES OF DIFFERENCES

The relative standard error on differences between two estimates of numbers or between two estimates of proportions (or percentages) can also be derived from the graphs of relative standard errors.

1 For differences between estimates from the 1976 Census and those from the 1971 Census, the standard error of the difference will be identical to the standard error of the 1976 estimate alone, since 1971 estimates are not subject to sampling error.

Example

If estimates for the 1971 and 1976 Censuses are 500 dwellings and 800 dwellings respectively, then the difference is estimated as 300 dwellings. The 1971 estimate has no relative standard error, whilst the 1976 estimate has a relative standard error (as read from GRAPH 1) of approximately 3% and hence a standard error of 3% of 800 or 24. The standard error of the difference is 24 and there are nineteen chances in twenty that if all schedules from the 1976 Census had been processed, the observed difference would be within the range $300 \pm (2 \times 24)$ or 252 to 348.

For differences between two 1976 Census estimates the standard error of the difference may be approximated by the following formula:

$$\text{Standard Error (z-y)} = \sqrt{\{\text{Standard Error (z)}\}^2 + \{\text{Standard Error (y)}\}^2}$$

This approximation will be exact for differences between estimates of the same characteristic in two different areas (e.g. LGAs, CDs), or for differences between separate and uncorrelated characteristics in the same area. If, however, there is positive correlation between the characteristics (e.g. comparison of number of lawyers with number of persons with law degrees), the above approximation will overestimate the true standard error. If there is a negative correlation between the characteristics (e.g. comparison of the percentage of persons who travel to work by train and by car), it will underestimate the true standard error.

Example

If the estimates for two LGAs of the total number of occupied dwellings are 1000 and 800 and the number of occupied dwellings with outer walls of brick are 250 and 650 respectively, then the percentage of occupied dwellings with brick walls in each of these LGAs is $(250/1000) \times 100 = 25\%$ and $(650/800) \times 100 = 81.2\%$ respectively. The difference between these estimated percentages is therefore 56.2%. The calculation of the standard error of this difference requires the standard error of each of the percentages to be calculated. The relative standard errors on each of the estimates of numbers (1000, 800, 250 and 650) can be derived from GRAPH 1 LINE D. Using the formula given in the previous Section, the relative standard errors on each of the percentages are:

$$\sqrt{6.0^2 - 3.0^2} = 5.2\% \quad \text{and} \quad \sqrt{3.7^2 - 3.3^2} = 1.7\%$$

The standard errors on each of the percentages are

$$5.2 \times 25/100 = 1.3 \quad \text{and} \quad 1.7 \times 81.2/100 = 1.4.$$

Finally, the standard error on the difference is

$$\sqrt{1.3^2 + 1.4^2} = 1.9 \text{ percentage points.}$$

Therefore, there are nineteen chances in twenty that the difference between the percentage of occupied dwellings with brick walls in the different LGAs will be within the range $56.2 \pm (2 \times 1.9)$ or 52.4 to 60.0%.

AUSTRALIAN BUREAU OF STATISTICS

CENSUS OF POPULATION AND HOUSING AUSTRALIA

30 JUNE 1976

HOUSEHOLDER'S SCHEDULE

The Census is taken under the authority of the *Census and Statistics Act 1905-1973*.
Under this Act:

- (a) it is *compulsory* to provide all the information requested (except religion),
- (b) all the information you provide in this Schedule *will be kept secret* and seen only by sworn employees of the Australian Bureau of Statistics. It will be used only to produce statistics.

HOW TO FILL IN THIS FORM:

- Read the instructions on this page and at the top of page 1.
- Give details of *all* persons on pages 1-7 who spent the night of WEDNESDAY 30 JUNE 1976 in this household.
- Complete particulars of this dwelling on page 7.
- Please use ink or ball point pen.
- Read each question and any instructions carefully; give your answer and then follow the directions to the next question which applies. Most questions can be answered simply by placing a tick in an appropriate box.

e.g. Yes Yes
 or or
 No No

- If you do not know the exact answer to a question give the best estimate you can.
- After filling in the Schedule, sign it on the front page.
- The completed Schedule should be ready to hand to the Collector who will call on THURSDAY 1 JULY 1976 or as soon as possible after that day.
- If you have any difficulties in completing the Schedule ask your Collector to help or telephone Perth 25 4411 for assistance.

I certify that to the best of my knowledge and belief this schedule has been correctly filled in.

Signature of Collector

Signature of Householder

Date

Street, etc.

City, town or suburb

Postcode

ALL PERSONS

Notes on Visitors and Boarders. If any person in the household such as a visitor prefers to fill in a separate form to maintain privacy, ask the Collector for a "Personal Slip". This should be filled in by that person, sealed in the envelope and handed by you, unopened, to the Collector. For each person who uses a Personal Slip, write only the name, sex and relationship of the person and write "P.S." in the age question on this Schedule.

ALL PERSONS

Notes on Visitors and Boarders. If any person in the household such as a visitor prefers to fill in a separate form to maintain privacy, ask the Collector for a "Personal Slip". This should be filled in by that person, sealed in the envelope and handed by you, unopened, to the Collector. For each person who uses a Personal Slip, write only the name, sex and relationship of the person and write "P.S." in the age question on this Schedule.

List in the top row all persons (including visitors) THURSDAY 1 JULY 1976 without having been USE ONE COLUMN FOR EACH PERSON. If the

	PERSON 1	PERSON 2	PERSON 3
1. Name: <ul style="list-style-type: none"> Enter the household head as Person 1. If no head, select one household member as Person 1. For unnamed baby write "Baby" and Surname. ALL PERSONS

Notes on Visitors and Boarders. If any person in the household such as a visitor prefers to fill in a separate form to maintain privacy, ask the Collector for a "Personal Slip". This should be filled in by that person, sealed in the envelope and handed by you, unopened, to the Collector. For each person who uses a Personal Slip, write only the name, sex and relationship of the person and write "P.S." in the age question on this Schedule.

PRESENT ON CENSUS NIGHT:

ent the night of WEDNESDAY 30 JUNE 1976 in this household or returned on
 elsewhere.
 re than 8 persons in this household, obtain Personal Slips from the Collector.

What is a Household? Persons living and eating together as a domestic unit
 are a household. A person living alone is also a household. If there is more
 than one household, obtain extra Schedules from the Collector AND FILL
 IN A SEPARATE SCHEDULE FOR EACH HOUSEHOLD.

THIS HOUSEHOLD PLEASE COMPLETE BELOW DETAILS OF THIS DWELLING

10. How many rooms are there in this dwelling?

- Write the number of each type of room.
- Count each room once only.
- Except for kitchens and bathrooms, a room shared with another household should be counted only by the principal householder.
- Do not count toilets, pantries, laundries, storerooms, halls or corridors.

Type of Room:	Number
Bedroom(s)	
Permanently enclosed sleepout(s)	
Bedsitting room	
Combined lounge/dining room	
Dining room

11. Do you or any usual member of this household pay rent for this dwelling?

- If instalment payments are made under purchase contracts, mortgage agreements, etc., do not regard as rented; such payments should be shown in question 12.

Yes
 or
 No → Go to question 12

To whom is the rent paid?

State Housing Commission, W.A. 1
 Employer 2
 Other 3

What is the weekly rent?

Include the weekly equivalent of any rates payable separately by this household, e.g. sanitation, garbage, water rates (other than excess water).

\$ c

Is this dwelling rented furnished or unfurnished?

Furnished → No more questions
 Unfurnished

12. Is this dwelling owned (or being purchased) by you or any usual member of this household?

Yes
 or
 No → No more questions

Is there a mortgage (or contract of sale) on this dwelling?

Yes — one only
 Yes — more than one
 No → No more questions

Who holds the mortgages (or contracts of sale) on this dwelling?

	First mortgage (tick one box only)	Second and other mortgages (tick boxes which apply)

HAVE YOU MISSED ANY PAGES OR QUESTIONS?

Please check

- that everyone, including babies, who spent Census Night in this household has been included on this form
- that all questions have been answered as required for each person. It is very easy to forget to tick a box or leave out information because you don't think the question applies. You should answer every question except where instructions tell you otherwise
- that the dwelling questions have been answered
- that the front page has been signed

For Collector's Use Only

1. Tick the box which best describes the structure in which this dwelling is contained—

0 	1 	2 	3 	4 	5 	6 	7 	8
Separate house	Semi-detached house	Terrace house	Mobile dwelling	Improvised dwelling	Block of flats or home units of up to and including 3 stores	Block of flats or home units above 3 stores	Group of villa units or town houses	Dwelling and non dwelling combined

EACH ON A SEPARATE BLOCK OF LAND

2. How many dwelling units are there in the whole building?

3. If dwelling unit is unoccupied, the reason for being unoccupied—

- | | |
|---|--|
| <input type="checkbox"/> 1 For sale | <input type="checkbox"/> 5 Holiday home |
| <input type="checkbox"/> 2 To let (other than holiday home) | <input type="checkbox"/> 6 Condemned or awaiting demolition |

| <input type="checkbox"/> 4 Vacant for repairs or alterations | <input type="checkbox"/> 8 Other |
- Specify

Total persons in household i.e. listed on page 1 and on any <u>extra</u> Personal Slips issued.	Males	Females	Persons

TOPICS

Topics of special interest are described below because:

- some are new
- there is a risk that the data could be misinterpreted
- the actual questions asked can be seen by referring to the Census Schedule

SEX - Question 2

Where the respondent failed to answer this question, the answer was imputed from other information on the Schedule.

FAMILY - Question 4

Information is collected using the household as the basic unit of enumeration. A household is defined as a person or group of persons living as a domestic unit with common eating arrangements.

For Census purposes every household must have a head. Where none was stated by the respondent a head was imputed during the coding process. Having determined the head of the household, one or more families were then identified, based on specific relationships to that head of the household.

Two types of families are recognised:

Primary Family Unit (PFU). The head of the PFU is also the head of the household.

Secondary Family Unit (SFU). There can be up to three SFU's in any one household. In the relatively few instances where there were more than three SFU's in a household, members of the additional SFU's were coded as "other non-family members".

In the 1976 Census a 'commune' was recognised for the first time; it consists of a head (who is also head of the household) and of commune members. Many communes may not have been identified in the Census as a group of people were only identified as a commune when ALL the respondents described themselves as commune members.

Further information on families is contained in:

Information Paper No 4 - Family (Catalogue No. 2119.0)

Information Paper No 9(i) - Classification of Characteristics (Catalogue No. 2112.0)

USUAL RESIDENCE AND INTERNAL MIGRATION - Questions 6, 7, 8

Questions 6, 7 and 8 on the 1976 Census Schedule enable measurement of the population in terms of their usual (de jure) place of residence and the number of persons who have changed their place of residence since the previous Census 1971 and the year previous to the 1976 Census.

Each individual was asked to record the full address of his usual residence at Census date, one year previously and five years previously. For each person, the LGA of usual residence was coded for each of these dates.

See Information Paper No 16 Internal Migration (Catalogue No. 2123.0) for further explanation of this topic.

BIRTHPLACE OF FATHER AND MOTHER - Question 9

The stated birthplace was coded to one of the following 20 countries, groups of countries or areas:

- Australia
- United Kingdom and Eire
- Germany
- Greece
- Italy
- Malta
- Netherlands
- Yugoslavia
- Other countries in Europe
- Cyprus
- Bangladesh, India, Pakistan, Sri Lanka
- Lebanon
- Indonesia, Malaysia, Philippines
- Turkey
- Other countries in Asia
- USA and Canada
- Other countries in America
- Arab Republic of Egypt
- New Zealand
- All other countries

BIRTHPLACE - Question 10

The birthplace was coded to the States and Territories of Australia, Australia (undefined), at sea, and 97 further countries and areas. Where the respondent failed to supply the information on his/her place of birth this was imputed, principally on the basis of answers to questions on country of citizenship, birthplace of parents, racial origin, and languages usually spoken. The detailed rules used can be made available on request.

PERIOD OF RESIDENCE - Question 12

This question presented some problems in terms of the level of non-response obtained. The high level of not stated (above 30% in the ACT) has been confirmed as a response problem and not a processing or programming error. The question was tested in pilot tests before the 1976 Census and worked much better in these tests. It is important that care is taken when using these data.

RELIGION - Question 13

The Census and Statistics Act 1905 declares:

"No person shall be liable to any penalty for omitting or refusing to state the religious denomination or sect to which he belongs or adheres".

Consequently, a number of respondents omit their religion from the Census Schedule.

HANDICAPS - Question 15

A question on handicaps was asked in 1976 with the aim of identifying the incidence and effect of handicaps in the community. The data obtained from the handicap question shows the ways in which people are handicapped because of a serious long-term illness or physical or mental condition. The handicap question does not seek to identify the condition of the handicap eg missing limbs, diabetes - but the nature of the handicap in 7 different areas of activity. The respondent could indicate (if applicable) that he/she was handicapped in any combination of the 7 areas of activity, viz:

Handicapped in education

- " " getting or holding a job
- " " getting about alone
- " " doing housework
- " " sporting or recreational activity
- " " in acts of daily living, eg dressing, bathing
- " " other way

It is possible to obtain the number of persons affected in any particular way or the number of ways in which people are handicapped.

CHILDMINDING - Question 17

The question on childminding was asked for the first time in the 1976 Census. The childminding question relates only to children aged 0 - 5, deliberately precluding any information as to how children at school are minded out of school hours. The resulting information will not therefore be relevant to all childminding facilities. Also while the question will yield information on the number of children attending pre-school or day care centres, it does not provide any information on how long a child spends there.

The age structure of an area may have changed between Census day and publication of results, which means the information has limitations for immediate planning purposes. The publication Child Care, May 1977, (Catalogue No 4001.0) may also be useful.

RACE - Question 18

The purpose of the race question is basically to identify two important minority groups in Australia - Aborigines and Torres Strait Islanders. However, persons of Chinese and Pacific Islands origin may also be identified separately at a broad geographic level.

The race question is one of self-identification; the respondent identified himself/herself as belonging to a particular racial group.

For further information on this topic, refer to Information Paper No 19.

LANGUAGE - Question 19

The question refers to languages regularly used, NOT all languages that can be spoken by or understood by respondents. Although the question allowed for any number of languages to be recorded, a maximum of four (the first four stated) were coded. Each of these languages were coded using an alphabetical list of languages. In summary, this list included 14 specific languages (those coded 0-13 in the following list) and then for all other languages, coders had to check the birthplace code before coding to "same as birthplace" or "other language".

For example, a person who spoke English, French and Finnish (and was born in Finland) would show up as codes 4, 5 and code 14 in the following classification.

A person who spoke English and French only, would be allocated to codes 4 and 5 irrespective of the place of birth.

LANGUAGES REGULARLY USED

This topic relates to persons five years of age or older only.

Code	Description
0	Aboriginal language
1	Arabic
2	Chinese
3	Dutch
4	English
5	French
6	German
7	Greek
8	Italian
9	Macedonian
10	Polish
11	Serbo-Croat
12	Spanish
13	Ukrainian
14	Language same as birthplace
15	Other language, nei
16	(Not stated)
17	(Not applicable)

From this coding, a large number of classifications can be derived. Two specific classifications which have been derived are:

- A
- English only
 - English and one "other" language
 - " " two " languages
 - " " three or more "other" languages
 - No English
 - Not stated
 - Not applicable
- B
- Aboriginal language
 - Arabic
 - Chinese
 - Dutch
 - English
 - French
 - German

B (Cont'd.)

Greek
Italian
Macedonian
Polish
Serbo-Croat
Spanish
Ukrainian

Language same as birthplace

Czech
Hungarian
Maltese
Portugese
Russian
Slovene
Turkish
Other

Other language, nei

Not stated
Not applicable

It should be noted that (A) is a count of persons classified by the combination of languages spoken (B) is a count of languages spoken (ie a person who spoke French and Italian would appear twice in the table).

EDUCATION - Questions 20-22

The education questions presented some problems in coding due to abbreviated responses, partial non-response and misunderstanding of the question.

For questions 20 and 22 some respondents gave the initials or local name of the institution attended or qualifications gained; some gave an address different from the official address for the particular institution; some omitted details such as field of study (which means their qualification was allocated a general rather than a specific code).

Question 22 asked for details of the HIGHEST QUALIFICATION obtained, not for all qualifications obtained.

"Age left school" was asked in 1976 instead of "level of schooling" to overcome confusion caused by the difference in the State and Overseas education systems and the variations in those systems over past decades. The change also simplified the question for people educated overseas.

LABOUR FORCE - Questions 27 and 32-37

The labour force questions cover people 15 years of age and over.

Australia subscribes to internationally adopted definitions under which the labour force is defined as comprising persons who worked for payment or profit, or had a job from which they were temporarily absent (eg on holiday, sick), persons who were temporarily laid off without pay, and persons who did not have a job and were actively looking for work.

The main purpose of the 1976 Census questions on the labour force was to identify the characteristics of the labour force, for the purposes of international comparisons, for benchmark data for monthly labour force assessment, and for national accounting purposes.

INCOME - Question 31

The income question in the 1976 Census asked people to state which of 14 income categories applied to their income. It was to include all sources of gross income (eg child endowment, scholarships, interest payments). When using income data it is important to remember that it is difficult to determine its quality.

NOTE:

For Census purposes Family Income is defined as the combined incomes of the head and spouse, where both are present, or the individual income of the head where no spouse is present. This definition of 'family' is different from the definition used in relation to persons in a household (see earlier in this Section).

Because the question asked for income within a stated range, the combined income was calculated by adding the midpoint of the range declared by the head to the midpoint of the range declared by the spouse.

The income of other family members is not included. See also Information Paper Nos 14 Family (Catalogue No 2119.0) and 15 Income (Catalogue No 2120.0) for further explanation.

OCCUPATION - Question 38

This question refers to a person's occupation 'in the main job held last week.' Occupation is defined as the type of work performed by an employed person and should not be confused with the type of productive activity, business or service carried out by the establishment in which a person works, eg a carpenter employed by a steel-making establishment would have the occupation of 'carpenter' and industry of 'steel manufacture'.

The Australian Classification of Occupations was designed primarily for use in classifying occupation descriptions recorded on schedules of the 1976 Census. It has been adopted from and closely adheres to the principles embodied in the International Standard Classification of Occupations issued by the International Labour Office of Geneva, 1958 and as revised in 1968.

Further information on Occupation is contained in Information Paper No 9(iii) - Occupation Classification Extract (Catalogue No 2114.0).

JOURNEY TO WORK - Question 39

Journey to Work data is tabulated for 8 study areas within Australia and is presented on the basis of origin and destination zones.

The Journey to Work data relates only to persons 15 years of age and over who were employed and were usual residents of enumerated dwellings in the study areas.

The tabulations of Journey to Work data are very large and consequently they will generally be available only on magnetic tape. This means that users of these data will need access to computing facilities for analysis. The complexity of the data also means that cross-classification with other characteristics of the work force must be limited if required at CD level.

However, at LGA of origin and LGA of destination level, more characteristics will be available.

The accuracy of the data is especially affected at small area level by the time lapse between collection of the data and its tabulation. Therefore, care must be taken in the interpretation of the data. Users should also be aware of the sampling errors that are the result of the sample processing. Because of the complexity of this topic, users of the data are advised to refer to Information Paper No 17 Journey to Work (Catalogue No 2124.0) for more details.

INDUSTRY - Question 40

Industry is the type of productive activity, business or service carried out by the establishment in which a person is employed. Within a single firm or establishment many people may be employed all of whom perform different occupations in order to make a particular product or render a particular service. The industry code of each of these individuals is the same. The classification of establishments into "type" of industry is very detailed and is based on the MAJOR activity of each establishment.

During processing, the majority of the industry coding was performed from the "Industry and Destination Zone Index" which is a list of industrial establishments pre-coded to industry. This index was based upon the Australian Standard Industrial Classification (ASIC); Preliminary Edition, 1969. Further information about Industry is contained in Information Paper No 9(ii) Industry Classification Extract (Catalogue No 2113.0).

TRAVEL TO WORK - Question 41

This question asked how each person travelled to work on the day before the Census. If the person did not go to work on that day, the usual method of travel was asked.

Some modes of transport appear in unlikely places eg tram or ferry in the ACT. This is possible, as a person may have been working in some other place on the day before the Census.

DWELLINGS

Twelve questions relating to private dwellings were asked of the householder in the 1976 Census. Another three questions on the back of the Schedule were completed by the collector. Questions asked of a householder relate to dwelling type while the collector completed questions relating to dwelling structures.

For Census purposes, dwellings are divided into two groups, occupied dwellings and unoccupied dwellings.

. An OCCUPIED DWELLING is defined as the premises occupied by a householder on Census night (for definition of Household see below).

1 A private dwelling is normally a house or flat but it can also be a tent, houseboat or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. It is important to remember that the Census definition of a private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see Household below).

2 Non-private dwellings are hotels, hostels, non-private boarding houses, gaols, religious and charitable institutions, defence establishments and other communal dwellings. Usually, occupants of such dwellings will be using communal facilities such as hotel dining-rooms or mess halls. A caravan in a caravan park (whether permanently or temporarily) is treated as part of a non-private dwelling, as are self-contained units provided by commercial enterprises such as hotels, motels or guest-houses.

Any private dwelling in which there were three or more boarders shown in Question (the question on relationship) was reclassified as a private boarding house. For the purpose of this rule a whole family boarding was counted as only ONE boarder. The major difference between 1971 and 1976 is that in 1971 the dwelling was reclassified and processed as a NON-PRIVATE DWELLING. Consequently all the dwelling characteristics were lost — the number of such cases is unknown. For 1976 a special code was assigned to these office defined boarding houses to allow them to be classified as PRIVATE DWELLINGS.

. An UNOCCUPIED DWELLING is a structure built specifically for living purposes and capable of being lived in, but unoccupied at the time of the Census. Vacant houses, holiday houses, huts, cabins (other than seasonal worker's quarters) and houseboats are therefore counted as unoccupied dwellings; but vacant tents, garages and caravans (even if normally occupied) are not. Only private dwellings can be classified as unoccupied. Unoccupied dwellings include dwellings vacant because they have been newly completed, dwellings vacant for demolition or repair, holiday homes, dwellings to let, and dwellings where the household was absent on Census night.

HOUSEHOLD

For Census purposes, a household is a person or group of persons who live together and eat together as a single domestic unit. It is possible, then, for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his food for himself is not a member of the family's household but constitutes a separate household and therefore completes a separate Householder's Schedule. As an occupied dwelling is defined as the premises occupied by a household on Census night (see above), the number of households and number of occupied dwellings is identical and the number of occupied dwellings as defined for Census purposes in an area may be greater than the known number of structures.

NUMBER OF VEHICLES - Dwelling Question 8

The aim of this question was to count the number of vehicles owned or used by members of the household, which were parked at or near the dwelling on Census night.

MORTGAGES - Dwelling Question 12

This question relates only to occupied private dwellings being purchased by any usual resident of the household and with one or more mortgages on the dwelling. From the question it is possible to identify the number of dwellings with no mortgage, one mortgage, and two or more mortgages. The question also gives the amount of monthly repayment on the first mortgage, other mortgages and the total monthly mortgage repayments. Fourteen sources of mortgages (incl. not applicable and not stated) were identified as follows:

Description

Not applicable
Trading bank
Saving bank
Building society
Life assurance society
Solicitors trust fund
Employer
Finance company
State housing body
Local Government body
State or Australian Government
Defence or War Service Homes
Private lender or other source
Not stated

NQ025.0631209
6

Using this source list details of the source of first mortgage can be obtained and also details of up to three "other" mortgage sources are obtainable. Although up to three "other" mortgages can be recorded no distinction can be made as which is the second, third or fourth mortgage. No one can have two "other" mortgages of the same type.

A number of derived classifications can be obtained from the source of "other" mortgage. One such derived classification is as follows:

One mortgage only
Two mortgages only
Three mortgages only
Four mortgages only
Not applicable

Extreme care should be taken when specifying or using tables containing mortgage information. Further details of other derived classifications and recommended table specifications can be made available on request.

DWELLING STRUCTURE

The collector answered this question by looking at the outside of a dwelling. Because of the variations in structures, opinions differed as to what was a terrace house, a semi-detached dwelling or a villa unit. Some separate dwellings with a flat at the back were missed.

These problems of identification must be kept in mind when data on dwelling structures are being used.
