IEEE IV 2008 Symposium closed

Dear visitor of the website of IV'08. The Intelligent Vehicles 2008 Symposium was held from 4-6 June in Eindhoven. We are looking back to a successful congress: more than 400 visitors, 200 presentations, 3 impressive keynote presentations, 35 demonstrations, good weather and many smiling faces. On our website you can find the photographs that were taken as well as excerpts from the extensive media coverage. As organizers we thank all the people who attended the event and made it possible.

The 2008 IEEE Intelligent Vehicles Symposium (IV'08), which is an annual forum sponsored by the IEEE Intelligent Transport Systems Society, will take place in Eindhoven, the Netherlands during June 4-6, 2008. Eindhoven provides a splendid conference location. The Conference centre, hotel and demonstration site are all in walking distance, right in the City centre, next to the railway station and the Phileas semi-automated bus system to the airport. Welcome to Eindhoven!

The Intelligent Vehicles Conference gathers researchers from industry, universities and public authorities to discuss research and applications for intelligent vehicles, including the communication between vehicles and between vehicles and infrastructure.

The technical sessions of the symposium consist of plenary presentations and interactive poster sessions. The demonstrations will be given at the same location as the technical sessions.

All activities, sessions as well as the demonstrations are at the campus of the Eindhoven University of Technology.

The demonstrations will be held in the direct vicinity of Eindhoven University of Technology. Live demonstrations are expected to be provided by various research groups from Europe.
