Hi Julie,

Full conference papers were independently reviewed in a double-blind review by a minimum of four members of the AAAI-10 program committee. I have attached the full list of program committee members below. Please let me know if you have any further questions.

Regards,

Carol Hamilton

Dear Conference Organiser,

I understand that you were the one of the organisers of the AAAI Conference on AI held in Atlanta Georgia on 11-15 July 2010. Could you please tell me whether all conference papers were independently refereed in full, through a process of external assessment or peer review? If so, could you also please let me know if assessors had a broad national or international representation. This information is required for a publications collection to be submitted to the Australian Government Department of Education, Science and Technology.

A response to this correspondence stating that full conference papers were independently refereed or peer reviewed and giving the list of assessors is sufficient. Thank you for your assistance.

kind regards

Julie
