Dear Jenny,

Am not sure what 'statement' is required but the study was performed through ANUMS and the attribution is on the published paper.

Steve

Hi All

I will need to move this from a HERDC eligible item if the requested statement is not provided.

Subject: Authors Affiliation needed - An anonymous survey of registrar..

Hi Lucille and Stephen

While looking at the Journal Article:

'An anonymous survey of registrar training in the use of Kjelland's forceps in Australia'

in the Journal: Australian and New Zealand Journal of Obstetrics and Gynecology [By Stephen ROBSON](#)

I have found we need a statement from your Author, as according to the byline it seems they were at another location. An reply email to me will be sufficient.

Could you please confirm if the author is willing to sign a statement of affiliation to the ANU so it can be added to this record in the HERDC data collection.

If this research was not done with the ANU then we will move this record to an 'Ext C1' and it may be considered for the ERA collection in future years.

Thanking you in advance.
Cheers

Jenny Taylor
