The Age of Online Collections

- Digital images
- Sound recordings
- Video
- Metadata
- Data sets
- Text
Online Collections

- Optimal access
- Optimal impact
- Digital curation/preservation
Call for participation

We ask ethnographic researchers to deposit textual, audio or video material with PARADISEC to ensure that it is discoverable and remains available into the future. For more information please visit our website: paradisec.org.au

PARADISEC offers a number of services for cost recovery fees, including digitisation of audio material and training in ethnographic documentation techniques of recording, data management, and data linkage. Topics covered include:

- use and comparative advantages of types of recording equipment;
- lexicographic software;
- transcription and interlinearising of texts;
- linkage of digitised audio and transcripts;
- managing information as it is collected to facilitate later access;
- assessment and cataloguing of data collections.

Please contact us for further information on costing and availability of services.

Keywords
- corpus callosum and sulcus, cingulate gyrus, sulcus, calcarine sulcus, cuneus of occipital lobe, parieto-occipital sulcus, central sulcus, precentral sulcus, pregyrus, tentorium cerebelli, brainstem, superior colliculus, pons, medulla oblongata, atlas, auditory tube, larynx, trachea, oesophagus

General Description
- Midsagittal section of head and neck.

Note:
- a) The splenium (41) of the corpus callosum (3), the cingulate gyrus (2) and its isthmus (40), and the cingulate sulcus (1).
- b) The calcarine sulcus (25)
Sustainable Collections

Sustain the information beyond the life of its underpinning elements:

- technology
- personnel
- funding
