Biography

Dr. Ken Young is based at Dookie - a rural campus of the University of Melbourne in the Goulburn Valley. The valley is considered the food bowl of the Australia being close to all the major Australian commodities such as perennial fruit crops, winter rainfed annual cropping (cereals, oilseeds and pulses), and irrigated and rainfed grazing industries.

His interests lie in spatial management of nutrients and crops, seed ecology, weed management, organic / sustainable agricultural systems and adoption of new technologies (e.g. genetically modified organisms and precision agriculture).

From Seedling to Supermarket: The Social and Environmental Implications for Australia of the Restructuring of Agri-food Supply Chains

Abstract:

Supermarkets are involved in the restructuring of agri-food supply chains, the contours and impacts of which are poorly understood. The aims of this study are to: document the changes that are occurring in agri-food supply chains; compare and contrast the Australian and overseas experience; and, identify the social and environmental impacts of such transformations. This will be the first time that Australian social scientists have examined supermarket conduct as it affects actors within the food chain. The expected outcomes include new insights into: supermarket power; the regulation and governance of agri-food chains; and supermarket influence on diet and consumer health.

Profile

The School of Social Science is dedicated to excellence in teaching and research in anthropology, archaeology, criminology and sociology, as well as multi- and inter-disciplinary programs. Our common focus is to explore culture and society across space and through time. The School is one of the leaders in social science scholarship in Australia.

The School of Social Science contains some of the strongest groups of researchers in Anthropology, Archaeology, Criminology and Sociology in Australia. Their research is highly diverse and draws on a range of theoretical and methodological approaches from across the social sciences. School research is also greatly enhanced by the activities of a large and active group of postgraduate students. Most research in the School falls into one of six broad theme areas that cross discipline boundaries:

Family and Individual Well-being
Social Aspects of Sustainable Development
Social Inequality
Indigenous (particularly Australian Aboriginal) Cultures
Cultural Heritage and Archaeological Science
Communication and Cross-Cultural Studies
Social Cohesion and Identity

Head Of School

Biography

Geoff is a leading Australian sociologist with interests in rural and regional sociology, globalisation/localisation, natural resource management, and governance

Prior to accepting the position of Professor of Sociology and Head of the School of Social Science at The University of Queensland in 2002, he was Foundation Professor of Sociology (1992-2002) and Executive Director, Institute for Sustainable Regional Development (1998-2002) at Central Queensland University. Before this he was Associate Professor of Sociology and Foundation Director, Centre for Rural Social Research, Charles Sturt University. He has been a program leader with the CRC for Sustainable Sugar Production and a member of the management committee of the Fitzroy Basin Association.

Forgiveness, reconciliation and transitional justice

Schaap, Dr Andrew (2005) *Forgiveness, reconciliation and transitional justice*, in Williams, Dr John and Lang, Dr Anthony F, Eds. *Hannah Arendt and International Relations: Readings Across the Lines*, chapter 4. Palgrave.

Full text available as:
[PDF](#) - Requires [Adobe Acrobat Reader](#) or other PDF viewer.

Abstract

In this chapter, I develop an Arendtian account of political forgiveness against the background of recent discussion about reconciliation and transitional justice within the study of international relations. I begin by reviewing the philosophical literature on the nature of personal forgiveness. I argue that forgiveness involves

SKENE Loane. Should the law limit genetic tests on embryos and foetuses? [online]. UNIVERSITY OF NEW SOUTH WALES LAW JOURNAL 29 (2) 2006 : 250-253. Availability: <http://search.informit.com.au.ezproxy.lib.unimelb.edu.au/fullText.dn=20070094;res=AGISPT> ISSN: 0313-0096. [cited 26 Mar 07].

SHOULD THE LAW LIMIT GENETIC TESTS ON EMBRYOS AND FOETUSES?

LOANE SKENE*

As genetic technology improves, there will be an increasing number of tests available to detect foetal abnormalities. Many couples will wish to take advantage of these tests to improve their chances of having a 'healthy' baby and avoiding the transmission of genetic conditions to their children and grandchildren. An issue arises whether there should be limits on the tests that are

Done

Not so obvious:

It places stress on a University's reporting structures

“I'm new to the University, and have 50 publications to declare Who is going to put them into the system? ”

“I have somebody's Grant/Contract incorrectly reported as mine. Who should I contact”

“My professional name is not my legal name...”

Responding to the Stresses:

It isn't enough to collect the information once.

**Quality information on this scale needs to be collected quickly,
but with minimal risk of getting the details wrong**

Problem:

The University is Still an information Silo.

Hard to get information into the Silo

We don't know anything about the external people that we collaborate with

As research moves into the realm on virtual organizations, administration will follow...
