Hi Gagan:

Yes, a significant amount of work was done on this paper while at ANU.

cheers

JR

Hi Gagan

That's a great question. We can interpret his statement either way so we'll seek clarification

We need to ask: was the bulk, or a significant part of the article done while affiliated with the ANU?

'Significant' can be interpreted either for use of time or an awakening (ah-ha type of) moment.

His answer will determine if this article remains a HERDC item or becomes an ExtC1 for the ERA collection.

Please ask if more questions / clarification is needed.

Cheers
Jenny

Hi John,

In reference to the publication listed below, Did any of the research leading to this publication carried out at ANU?

If the research wasn't carried out here then we can't claim it.

Please let me know.

Thanks

Direct transcriptional control of the Arabidopsis immune receptor FLS2 by the ethylene-dependent transcription factors EIN3 and EIL1
