

E5- The metabolism of synthetic anabolic-androgenic steroids

Dear Margaret and Jenny

From the correspondence below, I think it is clear that we will not be able to obtain the page numbered paper or verification material for the Conference Paper u4005981xPUB358 in time to claim it for the 2009 HERDC round.

I have changed the category to E5.

Cheers - Christine

**Subject:** RE: Fwd: URGENT - Please complete outstanding HERDC publications THIS WEEK!

Christine,

My unofficial sources tell me that the books are printed and have been awaiting delivery since before Christmas. No idea when they will be shipped at this stage. We think there is an unresolved payment issue between Turkey and the UK which is holding things up.

Andrew

Christine,

I have no further information. If Andrew also does not then I suggest we let it go.

cheers,

Mal.

Hi Mal/Andrew

Do you have a page numbered version of this publication yet?

McKinney AR, Stewart RT, Kerwick CM, Young EB, Vadasz A, McLeod MD The metabolism of synthetic anabolic-androgenic steroids in the greyhound: boldenone undecylenate and stanozolol. In Proceedings of the 17th International Conference of Racing Analysts and Veterinarians. Houghton E, Ipekkeskin F, Wade JF, Yazicioglu N, eds. R&W Publications: Newmarket, UK (2009), pp. 116–124.

If you have a copy of the proceedings we also need (so we can claim it for HERDC):

1. Photocopy of proceedings titles, contents, copyright date, ISBN/ISSN (can be pages from CD-ROM, website etc)
2. Proof of national or international significance (from conference materials - eg. List of participants)

The deadline is approaching (see below).

Regards - Christine

**Subject: URGENT - Please complete outstanding HERDC publications THIS WEEK!**

Hi,

This is the final week we can accept changes and additions for the 2009 HERDC publications listing. After next weekend we will be sending out the FINAL spreadsheets, in order to submit to DIISR on 30 June.

If there are items in your Faculty/Department that have \*\*, or that were highlighted in YELLOW on your preliminary spreadsheet then please attend to them urgently this week. Please remove the \*\* when they are finalized. If they are not completed we will have to change them to "non-HERDC"

Thanks to you for all your hard work - we know it isn't easy, with all your competing tasks to complete!

Regards,  
Margaret & Jenny
