

Plate B.7 Artefacts collected as lag deposits from
surface of Silt B

1. Top left Fine grained siliceous core, red yellow.
2. Top right Fine grained siliceous artefact, dark
 red, white patinated, use wear on two
 surfaces.
3. Centre left Fine grained siliceous flake, no
 evidence of use.
4. Pirri point, fine grained yellow brown
 siliceous rock.
5. Dark red fine grained siliceous
 artefact.
6. Lower right Bone point recovered from in situ in
 Pleistocene sediments, Gill's Gully 1,
 showing polished tip.
