Figure 2. 15 Series and the 5 year date periods for which records exist. By the use of shading relative quantities of records in each period are indicated. With this information we can gauge much more about the organisation and its recordkeeping history.
CSIRO Division of Atmospheric Research (1988 - 2005)

Commonwealth Scientific and Industrial Research Organisation

From: 1988
Aspendale, Victoria, Australia

To: 30 June 2005

Functions: Industrial or Scientific Research and Meteorology

Location: Aspendale, Victoria

Summary

The CSIRO Division of Atmospheric Research took the place of the Division of Atmospheric Physics in 1988. Atmospheric Research carries out research in areas such as weather, climate and atmospheric pollution. This enables it to provide advice on issues such as air pollution, climate change and variability, ozone depletion and severe weather. On 1 July 2005 the Division was merged with CSIRO Marine to form CSIRO Marine and Atmospheric Research.
