

*"We're not  
taking any  
more chances"*

We've been together for quite some time but we wish we'd met earlier. We've both had partners before... and you know, with AIDS around, you can never be sure.

So we're going to stay true to each other. And until we know our status we're not taking any more chances.

*If you're thinking about sex  
think about Karamap*

If you're unsure, don't have sex  
or always use a condom.
