EXPLANATORY NOTES

Introduction

This publication contains estimated resident population by age and sex of Statistical Local Areas (SLAs) and broader Statistical Areas of Victoria at 30 June 1991. Estimates in this form have been published for the years 1988 onwards, but this issue is the first in which estimates have been provided for a Census year.

2. The estimated resident population is compiled according to the place of usual residence of the population.

Methodology

3. The estimated resident population data contained in this publication are derived from 1991 Census population counts by making the following adjustments.

- (i) Census counts on a place of usual residence basis are obtained by counting each person in their stated SLA of usual residence, rather than where they were counted on census night. Persons who do not state their address of usual residence on the census form are proportionately allocated to all the SLAs in the State/Territory. Overseas visitors are excluded from these counts.

- (ii) These usual residence census counts are then adjusted for census undercount, by applying undercount rates derived from the 1991 Post-Enumeration Survey. These rates take into account differences in undercount according to a person's age, sex and geographic location.

- (iii) Australian residents temporarily overseas on census night, excluded from census counts, are added back into the population. Estimates of Australians temporarily overseas on census night are obtained from passenger card data for persons returning to Australia in the year following the census.

- (iv) The above three adjustments result in the estimated resident population for each SLA as at census date, 6 August 1991. To obtain the estimated resident population as at 30 June 1991, the estimated increase in the population of each SLA due to natural increase and net migration between 1 July and 6 August is subtracted from the 6 August 1991 population estimate.

Reliability

5. Estimates for each age and sex category are shown to the nearest unit without rounding; accuracy to this level is not claimed and should not be assumed. Estimates in catalogue 3203.2 are published to the nearest hundred persons in the Melbourne Statistical Division, and the nearest ten persons in the rest of Victoria. Rounding is not done in this

publication however because rounding of small cells could result in substantial year to year fluctuations owing to the rounding process rather than the actual population change.

Australian Standard Geographical Classification

6. The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification (ASGC), Edition 2.1* (1216.0).

Changes to Statistical Boundaries

7. All population data contained in this publication are on a 30 June 1991 boundary basis.

Data on Floppy Disk

8. Estimated resident population classified by age and sex for 30 June 1986, 1987, 1988, 1989, 1990, and 1991 is available on floppy disk - a separate disk for each year and priced at \$75 each. Order forms can be obtained from the Victorian Office by contacting the ABS Bookshop on (03) 615 7000 or fax (03) 615 7798.
