EXPLANATORY NOTES

A brief outline of the major definitions used in compiling the statistics in this publication is contained in the following explanatory notes and in table footnotes. For a more detailed description refer to the information paper Foreign Trade Statistics: An Overview (5481.0).

2. This publication, which replaces part of Cat No. 5404.0, contains statistics of Australia's exports classified according to the Australian Export Commodity Classification (AECC) (1203.0). From 1 July 1978, the AECC has been based on the United Nations Standard International Trade Classification (SITC) Revision 2.

3. The value of exports is the free on board (FOB) value of the goods expressed in Australian dollars.

4. In accordance with United Nations recommendations, total exports excludes transactions of non-merchandise trade. Refer to Section 9(b) of the AECC for a complete list of commodities comprising non-merchandise trade. The monthly value of non-merchandise trade is shown in Table 1.

5. Exports are recorded statistically in the month when the entries are lodged with the Australian Customs Service. Regular exporters or their agents may provide details of their export shipments on a periodic rather than an individual shipment basis by submitting weekly or monthly returns. These "periodic returns" must be submitted to the Australian Customs Service within seven days of the end of the period in question covering all shipments during that period. All other exporters are required to report each individual shipment prior to the ship's departure. Approximately 90 per cent of monthly export values are recorded on periodic returns. The statistical month for Customs outports (generally ports other than those at which the main Customs office in each state is located) closes on the 21st of each month, whereas for mainports the statistical month is the calendar month.

6. Because of the way in which exports data are collected and processed approximately 40% of total export trade by value shown for a particular month reflects actual shipments in that month, while approximately 55% reflects actual shipments during the previous month with the remaining 5% by value exported in earlier months. For individual commodities these percentages may vary considerably.

7. Restrictions are placed on the release of statistics for certain commodities for reasons of confidentiality. These

restrictions do not affect total export figures, but they can affect statistics at all levels of the AECC. Refer to table footnotes and the Appendix for specific details. The information paper Confidentiality and the Release of Foreign Trade and Shipping Statistics (5486.0) describes fully the confidentiality process.

8. Revisions to previously published data frequently occur due to continuing data quality checks and statistics in this publication should be considered preliminary.

9. Export statistics are also available on microfiche, special returns, and magnetic tape. A comprehensive series of information papers describe these services. For more information, please contact any ABS office.
