Introduction

2. While the statistics are described as being for calendar months, it should be noted that:

- for trading banks* the data relate to the period ending on the second Wednesday of the month following the month stated and may cover either a 4 or 5 week period.
- for savings banks* the data relate to the period ending on either the last Monday (one bank), the last Wednesday (five banks) or the last day (five banks) of the month stated and may cover either a 4 or 5 week period.

Seasonal adjustment

3. Details of the methods used in seasonally adjusting these series are given in *Seasonally Adjusted Indicators, Australia* (1308.0). Seasonally adjusted series shown in this publication have been revised following the annual re-analysis of data.

4. Large fluctuations occurring in series as a result of irregular influences are not removed by seasonal adjustment. Particular care should therefore be taken in interpreting individual month-to-month movements.
