(a) Employees in the defence forces, at home or abroad, and Government "relief" workers are excluded. From July, 1941, estimated total employment is based on Pay-roll Tax returns and records of Government employment. All figures to June, 1943, are final.

(b) Includes employees of Australian Government authorities (Commonwealth, State and Local) and of Allied Governments.

(c) From July, 1942, monthly figures are estimates subject to slight revision.

(d) Includes Allied Works Council projects.

(e) Includes Education, Health, Hotels and Restaurants, Professional and Personal Service (except private domestics).

(f) Revised.

(a) Includes Government establishments, annexes, and certain private firms engaged exclusively in aircraft and shipbuilding, but excludes private factories engaged partly on war contracts and partly on other work.

(b) 1942-43 monthly figures are subject to slight revision.

(c) From July, 1943, monthly figures are estimates, subject to revision.

TRADE UNION UNEMPLOYMENT RETURNS.

The only regular records of unemployment available in comparable form over a considerable period are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 56 per cent. of the total trade union membership and between 20 and 25 per cent. of all wage and salary earners. For some States the returns are a more representative sample than for others. This table, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of trend of unemployment as reported by secretaries of trade unions.

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally. (b) Preliminary figures subject to revision, based on average wholesale prices in the period shown. (c) Revised.

EXPORT PRICE INDEX.

These index-numbers are compiled from the prices of 20 commodities which constitute about 85 per cent. of all exports. The prices are multiplied by the average quantities exported during a fairly recent and representative period.

(Base : Average 3 years ended June, 1939 = 1,000.)

EXPORT PRICE INDEX (CHANGING BASE).

The index-numbers in the table above, while they indicate satisfactorily the general trend of the market, take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (including gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

(Base : Weighted Average Price Level in corresponding months of preceding year = 1,000.)

PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base average 3 years ended June, 1939 = 1,000 from the revised series published in *Production Bulletin* No. 34, Part II. They are based in general on prices realized in the principal markets of Australia.

(Base: Average 3 years ended June, 1939 = 1,000.)

WHOLESALE PRICE INDEX.

BASIC MATERIALS AND FOODSTUFFS.

The construction of this new index has been made possible by the collection of new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of General Wholesale Prices. The price quotations have in the main been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base: Average 3 years ended June, 1939 = 1,000.)

(a) Year ended December following.

(b) Revised.

RETAIL PRICE AND WAGE-RATE INDEXES.

In the tables on this and the following page the index-numbers have been recomputed uniformly to the base average 3 years ended June, 1939 = 1,000 in order to facilitate comparisons with other data. The absolute index-numbers differ, in consequence, from those appearing in other publications of the Bureau.

(Base: Average 3 years ended June, 1939 = 1,000.)

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £ of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recompiled from original base, par values.

(a) See note (a) on page 19. These 34 shares relate to leading companies and do not include bank shares nor mining shares. (b) Compiled by the Stock Exchange of Melbourne. The index-numbers of bank shares and silverlead shares represent averages (weighted by paid-up capital, with adjustment in the case of bank shares) of the mean monthly prices on the Melbourne Stock Exchange. The preference share index-numbers are based on the reciprocals of average yields. Recomputed from original base, May, 1926. (c) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. End-of-month values were used until December, 1930, and mean monthly values thereafter. Recomputed from original base, April, 1928.

(a) Partly estimated in respect of the City of Sydney.

NOTE.—The National Security (Building Control) Regulations, which operated on 5th December, 1940, placed the granting of building permits for new buildings or alterations costing more than £5,000 under the control of the Commonwealth Treasurer. Various amending regulations made the control more stringent. On 19th June, 1942, the control passed to the Department for War Organization of Industry, after which date only alterations costing less than £35 can be made without consent.

The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under the Regulations.

The values shown exclude, in general, air raid shelters and alterations for protection against air raids.

BUILDING PERMITS: METROPOLITAN AND PROVINCIAL.

£'000.

NOTES.

A. This column is the total of all series available continuously since 1928-29 for which information is at present collected at least quarterly. Columns G above and J on the next page are omitted as the information is not available for the earlier years, and column L on the next page is omitted because quarterly figures are not available.

F. Includes the Cities of Geelong West, Mildura and Warrnambool and the Towns of Horsham, Newtown and Chilwell, and Sale.

G. Includes the Cities of Ballarat, Bendigo and Geelong, and Shepparton Borough.

NOTE.—See footnote on p. 21. The values shown exclude, in general, air raid shelters and alterations for protection against air raids.

(a) Excludes Uniform Gauge Railway January to June, 1942.

(b) Excludes Uniform Gauge Railway.

(c) These

figures do not present satisfactory monthly comparisons, because of the periodical inclusion in expenditure of amounts to be set aside for special purposes.

(d) Subject to revision.

NOTE.—Minus sign (—) indicates loss.

WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. The returns do not relate to all wholesale trade, nor do they necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree by such changes. Insufficient information is available to enable adjustments to be made to the crude figures on this account, but endeavour is being made to obtain data that will enable approximate adjustments to be made. Monthly totals are compiled on a basis comparable with the monthly averages for preceding years.

An index of activity in New South Wales is afforded by monthly returns of the sales of 42 large factories.
£'000.

(a) The Act came into operation on 18th August, 1930. The rates of tax were 2½ per cent. as from 1st August, 1930; 6 per cent. from 11th July, 1931; 5 per cent. from 26th October, 1933; 4 per cent. from 11th September, 1936; 5 per cent. from 22nd September, 1938; 6 per cent. from 3rd September, 1939; 8½ per cent. from 3rd May, 1940; 5, 10 and 15 per cent. on different classes of goods from 22nd November, 1940; 5, 10 and 20 per cent. from 30th October, 1941; 12½ and 25 per cent. from 1st May, 1942. From 21st July, 1943, rationed clothing, &c., was reduced to 7½ per cent. With certain specified exemptions, all goods sold in Australia, including imports, are taxable. The list of exemptions was extended as from 11th July, 1931; 2nd September, 1932; 11th November, 1932; 27th October, 1933; 1st August, 1934; 13th December, 1934; 25th October, 1935; and 26th September, 1936. The list of taxable goods was extended as from 3rd June, 1940, and 22nd November, 1940. (b) Net sales under Sales Tax Acts subject to revision. (c) Not yet available.

RETAIL TRADE.

Statistics of retail sales are collected in three States but are available for publication in only two, namely, New South Wales and Queensland. In New South Wales the Retail Traders Association Research Bureau, in co-operation with the Commonwealth Bank, collects returns from a number of large Sydney stores. In Queensland returns are collected by the Bureau of Industry from twelve large department stores in Brisbane and their branches in country towns. Because of the relatively rapid development of chain store business, it is uncertain to what extent the department store figures are representative of all retail trade.

(a) Customers' Deposits: excludes amounts deposited by trading banks with Commonwealth Bank.

(b) Includes Short-term Loans, other than Treasury Bills, of the Commonwealth Bank.

(c) In computing the ratios the figures relating to the Rural Bank of New South Wales have been excluded.

BANK CLEARINGS.

In the absence of statistics of debits to customers' accounts, bank clearings form a useful index of the money-value of cheque payments. Since they do not include cheques deposited in the banks on which they are drawn, the figures are not exhaustive, and their comparability is sometimes impaired by the effects of banking amalgamations. Cheque clearings connected with the redemption or issue of Treasury Bills have been excluded from the following table, but adjustments have not been made for other sporadic transactions concerned with public finance.
