ABS PUBLICATIONS

All publications issued by the Australian Bureau of Statistics are listed in the Catalogue of Publications (1101.0), which is available free of charge from any ABS Office.

A separate list of the publications issued by the N.S.W. Office is also available free of charge by contacting :

Australian Bureau of Statistics

Information Services
Phone (02)268-4611

or
St. Andrew's House
Sydney Square
Sydney

or
Box 796 GPO
Sydney 2001

A list of the publications issued by the N.S.W. Office during the last month is shown on the back cover of this publication.

In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, computer printout, clerically-extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made as shown above.

SYMBOLS AND OTHER USAGES

Standard notations are used throughout this publication, with meanings as follows :

n.a.	Not available.
n.p.	Not available for separate publication (but included in totals where applicable).
n.y.a.	Not yet available.
p	Preliminary - figure or series subject to revision.
r	Figure or series revised since previous issue.
..	Not applicable.
-	Nil or rounded to zero.
	(where a line drawn across a column between two consecutive figures) break in continuity of series.

Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured - and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the annual publication Seasonally Adjusted Indicators (1308.0), issued by the Central Office of the Bureau.

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted - government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

(a) The statistics shown are compiled on the basis of the month of registration rather than the month of occurrence. (b) The figures shown in this table relate to events registered in N.S.W. rather than to the concept of 'resident' population. (c) Deaths under one year of age. (d) For quarterly periods, an equivalent annual rate. (e) Number per 1,000 of mean estimated resident population. (f) Number per 1,000 live births.

LABOUR FORCE STATUS OF THE CIVILIAN POPULATION AGED 15 AND OVER, N.S.W.

Note. The tables on pages 2 to 5 contain estimates derived from the Monthly Population Survey, which is conducted on a sample basis throughout Australia. Explanatory notes and a technical note about the estimates are contained in *The Labour Force, New South Wales (6201.1)* which is issued quarterly and is available free, on request, from the N.S.W. Office of the Bureau.

(a) Working days lost refers to man-days lost by (i) employees who were directly involved in the dispute and (ii) employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; excluded is the time lost, as a result of the disputes, by employees in other establishments. (b) Relates to industrial disputes involving a stoppage of work for a minimum of 10 man-days. Disputes are classified by industry according to the Australian Standard Industrial Classification (ASIC).

AVERAGE WEEKLY EARNINGS OF EMPLOYEES, N.S.W.
(dollars)

The estimates of average weekly earnings for the March quarter 1984 were obtained from a new sample selected from the recently upgraded ABS register of businesses. The new and old samples were run in parallel for both September quarter 1983 and December quarter 1983 and estimates for the previous quarters have been revised based on the relationship between the estimates produced from the new and old sample surveys for the December quarter 1983.

CONSUMER PRICE INDEX

Note. The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage and salary earner households. The Index covers a large and representative selection of commodities and services arranged in eight major groups. Significant changes in consumer expenditure patterns have been reflected in the Index by the introduction of additional items and altered weighting patterns.

PRICE INDEXES OF ARTICLES PRODUCED BY MANUFACTURING INDUSTRY, AUSTRALIA

Note. These indexes are on a net sector basis. Thus, the All Manufacturing Industry Index relates to articles produced for sale or transfer outside the Manufacturing Division of the Australian Standard Industrial Classification (ASIC), for export, or for use as capital equipment, whilst the subdivision indexes also include articles produced for sale or transfer to other subdivisions within the Manufacturing Division.

IMPORT PRICE INDEX, AUSTRALIA

Note. The Import Price Index is a fixed weights index and is weighted using the pattern of Australian imports during the three years 1978-79, 1979-80 and 1980-81. Commodities whose prices are directly represented in the index constituted 84 per cent of the total value of imports of merchandise into Australia in 1980-81. Further details of the index are contained in the publication Import Price Index (6414.0).

Index groups relate to commodities defined in terms of selected divisions of the Australian Import Commodity Classification (AICC) 1981-82 (1204.0).

EXPORT PRICE INDEX, AUSTRALIA

Note. The Export Price Index is a fixed weights index. The weights of the commodities directly represented in the index have been derived from values of exports in the years 1974-75, 1975-76, and 1976-77. These commodities accounted for 89 per cent of the total value of exports of merchandise from Australia in the period 1974-75 to 1976-77. Further details of the index are contained in the publication Export Price Index (6405.0).

Index groups relate to commodities defined in terms of selected divisions of the Australian Export Commodity Classification (AECCL) 1978-79 (1203.0).

(a) These are gross contents of metallic minerals produced, as determined by assay, and make no allowance for losses in smelting and refining. The quantities shown are therefore, in general, greater than those actually recoverable. (b) Content of fine metal. (c) Includes the metallic contents (when finally separated) of zircon-rutile concentrates recovered in N.S.W. and finally separated in Queensland. Excludes the metallic contents of zircon-rutile concentrates recovered in Queensland and finally separated in N.S.W.

(a) The figures shown are estimates derived from sample surveys based on the periodic Censuses of Retail Establishments. For periods prior to the June quarter 1982 the estimates are based on the 1973-74 Census. For the June quarter 1982 the Census on which estimates are based was changed to the 1979-80 Census. It is to be noted that licensed hotels and motels predominantly engaged in providing accommodation were included in the series based on the 1973-74 Census but those businesses are excluded from the new series. For further details of the scope and coverage of the surveys and comparability of the new series with the previous series, see Retail Sales of Goods, Australia (8503.0).

The Deputy Commonwealth Statistician Issues a large range of publications presenting statistics relating to New South Wales. All of these are obtainable from the Australian Bureau of Statistics, St. Andrew's House, Sydney Square (George Street, next to Sydney Town Hall), Sydney.

The New South Wales Year Book presents a comprehensive statistical survey of the social, demographic, and economic structure and growth of the State, and describes the legislative provisions and administrative arrangements which are of significance for a proper interpretation and analysis of the statistics of the State. The Pocket Year Book and New South Wales In Brief contain a wide range of statistical and other material in compact form and are useful for handy reference. More recent statistics are available in the Monthly Summary of Statistics. The Handbook of Local Statistics presents a selection of the more important statistics available for geographical areas of the State. More detailed statistics relating to matters treated generally in the above publications are available in the various Subject Bulletins, which range from preliminary monthly statements to detailed bulletins presenting the results of periodic censuses, etc. A complete list of New South Wales statistical publications appears on the outside back cover. A selection of the more important subject bulletins is shown below.
