FOREWORD

This supplement provides quarterly estimates of the main components of gross national product and expenditure at current and constant prices from September quarter 1959 to June quarter 1971. It thus extends to earlier periods, on a consistent basis, some of the series given in "Quarterly Estimates of National Income and Expenditure, No. 46, December Quarter 1971" (Reference No. 7.5). The estimates, as well as the definitions and concepts, are consistent with those of the forthcoming "Australian National Accounts, National Income and Expenditure 1970-71" (Reference No. 7.1), selected details of which have been published in three preliminary statements (Reference Nos 7.2, 7.3 and 7.4).

It should be noted that estimates for the more recent quarters may be revised by subsequent quarterly bulletins and that quarterly estimates for some past years may be affected by later revisions to annual totals.

Brief descriptions of the items, together with notes and references on seasonal adjustment, are given in bulletin No. 46 (Reference No. 7.5).

Discrepancies between totals and sums of components in the tables are due to rounding.

TABLE 1. - MAIN AGGREGATES AT CURRENT PRICES

\$ million

Period	Net current expenditure on goods and services			Gross fixed capital expenditure			Value of physical changes in stocks	Statistical discrepancy	Gross national expenditure	plus Exports of goods and services	less Imports of goods and services	Gross national product
