

Reference No. 14.8

B

REGISTRATIONS OF NEW MOTOR VEHICLES, MAKE OF VEHICLE : AUSTRALIA  
JULY 1973

The accompanying statement, which contains information on make and horsepower of new motor vehicles registered during July 1973, is supplementary to that issued on 29 August 1973 (Reference No. 14.6). A quarterly bulletin *Motor Vehicle Registrations* (Reference No. 14.2) giving information in greater detail will be issued at a later date.

2. The statistics in this preliminary statement are derived from information as recorded on registration documents. The figures include vehicles with diplomatic and consular plates and all Commonwealth-owned new vehicles other than those belonging to the defence services. Although the position varies from State to State, in these statistics, 'registrations' generally means registrations processed by the motor vehicle registration authorities in the States and Territories during the period. In some States, registrations of new motor vehicles are not recorded in the statistics until some time after registration.

3. The boundary between light commercial type vehicles and trucks has been defined by confining the former to vehicles with a carrying capacity of less than 1 tonne. Because of the absence of details of carrying capacity on the registration records in certain States, it has been necessary to impute carrying capacity by reference to R.A.C. horsepower rating in order to ensure consistent treatment across Australia in these statistics. This affects some vehicles in the vicinity of 1 tonne carrying capacity.

4. In all States, 'capital city' registrations refer to vehicles whose registered owners' addresses are located within the capital city statistical division as defined for the 1971 Population and Housing Census. All registrations in the Australian Capital Territory are included under 'capital city' while those in the Northern Territory are included under 'other areas.'
