BUILDING APPROVALS : AUSTRALIA, FEBRUARY, 1965

Statistics of building approvals have been compiled from (a) permits issued by local government authorities in the areas subject to building control by these authorities and (b) contracts let or work commenced and day labour projects authorized by governmental authorities. They relate only to approvals for buildings, as distinct from the construction of roads, bridges, railways, earth works, water storage, etc. Values shown represent the estimated cost when completed (excluding cost of land) of new buildings and alterations and additions to existing buildings. Additions of £5,000 and over are included with new buildings in all States, except New South Wales, where they are included in "alterations and additions". Building is classified as "Private" or "Government" according to ownership.

For purposes of comparison, it should be borne in mind that the volume of building approvals is affected from month to month by the number of large projects such as blocks of flats and multi-storey office buildings approved in particular months and also by the administrative arrangements of local government and semi-governmental authorities.

The following tables show details of building approvals for February, 1965, and three months ended February, 1965, in comparison with details for earlier periods.

In this issue two new tables have been added - Table 3, page 5, showing the total value of private buildings approved, by type of building, and Table 4, page 6, showing corresponding information for government buildings approved.
