The tables in this publication and other 1985-86 Retail Census publications are also available on floppy disk. For more information contact Information Services (details above).

EXPLANATORY NOTES

Introduction

This publication presents industry details for statistical divisions (SD), statistical retail areas (SRA), and statistical local areas (SLA), for Victoria, compiled from the Retail Census conducted in respect of the year ended 30 June 1986. It also includes details for selected items by industry groups for designated shopping areas.

2. The 1985-86 Census was the ninth retail census since 1948 and the fourth conducted throughout Australia as a component of the ABS's integrated industry statistics system. This system has been developed so that data from each industry sector conform to the same basic conceptual standards thereby allowing comparative analysis across different industry sectors. The results of the Retail Census are therefore comparable with periodic collections undertaken for the mining, manufacturing, electricity, gas, construction, transport, wholesale trade, and selected services industries. Comprehensive data for the retail industry were last collected as part of the 1979-80 Census of Retail Establishments and Selected Service Establishments.

Scope

3. The scope of the 1985-86 Retail Census included all establishments (defined in paragraphs 11 and 12) classified to Subdivision 48 (Retail Trade) of the 1983 edition of the Australian Standard Industrial Classification (ASIC) except Shoe repairers (ASIC class 4846), Electric appliance repairers n.e.c. (ASIC class 4857) and Bread and milk vendors (ASIC classes 4878 and 4879).

Coverage

4. The aim of the census was to include all retail establishments that operated at any time during the year ended 30 June 1986. Seasonal businesses which normally operate during certain periods of the year are included as far as possible even if they were not operating at 30 June 1986. However, in general, establishments which ceased operations during the year or commenced operations during the last two months of the year are included in census results only if their contribution to statistical aggregates is significant.

5. Some types of retailing are not fully included in the census even though they would be classified to industries covered by the census. The main types of retailing which are deficient (because adequate lists do not exist) are retailing from non fixed premises, such as occasional market stalls, independent van sales, some types of door-to-door selling, and vending machine sales. Retail sales by establishments not classified to retailing industry are excluded.

Methodology

6. The 1985-86 Retail Census was collected by means of a questionnaire despatched and returned by

mail. Telephone contact and personal visits were used for follow up of outstanding responses. All retail establishments received a set of questions designed to obtain basic operating data (trading hours, employment, wages and salaries, turnover, and for most industries, floor space); these census items are included in this publication.

7. A sample of establishments received an additional set of questions designed to obtain detailed structure and performance measures (stocks, expenses) and details of goods and services sold. These questions enabled estimates to be made of value added, stocks, purchases, selected expenses, and commodity items. Estimates for these sampled items are only possible on a larger geographic basis than the areas included in this publication.

8. The period covered by the census was, in general, the twelve months ended 30 June 1986. Where businesses were unable to supply information on this basis an accounting period which most closely approximated the reference period was accepted.

Reliability of data

9. The data contained in this publication are compiled from the census component of the 1985-86 Retail Census and are therefore not subject to sampling error. However, other inaccuracies, called non-sampling error, occur in any statistical collection. Non-sampling errors can be attributed to many sources: inability to identify all retailers in Australia; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, processing, and estimation for missing or misreported data. Every effort is made by the ABS to reduce the non-sampling error to a minimum by employing careful questionnaire design, trying to obtain responses from all selected establishments, and employing efficient operating procedures.

Census disclosure rules

10. In accordance with the Census and Statistics Act 1905, under which the information was collected, no data are published that would disclose the operations of an individual establishment or business. For this reason a number of data items have been aggregated, or the data not available for publication are included in totals where applicable.

Statistical unit

11. The basic unit for which statistics are reported in ABS integrated industry collections is the establishment. In general, this is a unit covering all the operations carried on under the ownership of one enterprise (business) at a single physical location i.e. an individual store. An enterprise is defined as the unit comprising all operations in Australia of a single

operating legal entity. For retail censuses, a retail establishment is an establishment predominantly engaged in retailing activity. However, the data collected for the retail establishment cover all activities at the location. This publication contains statistics relating only to establishments. Enterprise statistics are compiled and published separately (see paragraph 28).

12. The establishment statistics also include data relating to separately located administrative offices and ancillary units (such as head offices, repair and maintenance workshops, storage units, and transport units) serving retail establishments and forming part of the enterprise which owns and operates the establishment.

Industry classification

13. The classification of census units to industry for the 1985-86 Retail Census was based on the 1983 edition of the ASIC. There was no change to the classification for Retail Trade between the 1983 edition of ASIC and the 1978 edition which was used for the 1979-80 Retail Census.

14. Each ASIC class is defined in terms of a specified range of economic activities designated as primary to it. Similarly each ASIC group is defined in terms of the economic activities designated as primary to the classes within that group, and so on. An establishment mainly engaged in economic activities which have been designated as primary to a particular class has been classified to that class whether or not that establishment is also engaged in other 'secondary' activities. For example an establishment predominantly engaged in retailing petrol is classified to ASIC class 4864 (service stations) regardless of any other business activities the establishment may have.

15. Retail Trade, as specified in the ASIC, generally includes the sale (or resale) of new or used goods to final consumers for personal or household consumption. Sales to businesses are considered to be wholesale sales. To conform with the concepts and definitions used in the Australian National Accounts, the sales of certain commodity items are treated as wholesale rather than as retail sales. These commodity items are building materials; builders' hardware and supplies such as tools of trade, paint, etc; commercial refrigerators; business machines; tractors, farm machinery and implements; earth moving equipment; and grain, feed, fertilisers and agricultural supplies. Consequently, where sales of these items constitute the predominant activity of an establishment, the establishment has been classified as a wholesale establishment.

16. Where sales of wholesale items are made by an establishment predominantly engaged in retail activities, then the sales of these commodities are

shown in retail census tabulations as wholesale sales and are included in turnover figures.

17. It should be noted that establishments mainly engaged in both baking and retailing cakes are treated as retailers, but establishments mainly engaged in both baking and retailing bread are treated as manufacturers and are excluded from the Retail Census. Establishments whose main activity is photo-finishing are treated as manufacturers.

18. In addition, the following industry classes:

- * 4861 New motor vehicle dealers
- * 4862 Used motor vehicle dealers
- * 4866 Motor cycle dealers
- * 4867 Boat and caravan dealers

include all establishments predominantly engaged in either wholesaling or retailing new or used motor vehicles, motor cycles, boats, caravans, trailers, etc. Sales of motor vehicles (other than sales to motor vehicle dealers) whether for industrial, commercial, or private use are treated as retail sales in the census (despite the inclusion of some wholesale sales). Establishments whose predominant activity is wholesaling new tyres, tubes, batteries, or new motor vehicle parts or accessories have been classified as wholesale establishments.

19. During 1985-86 some service stations sold petrol on a commission basis. In these cases the commission earned is included in other operating revenue and thus in turnover but the actual value of the retail sales of petrol is not included.

Definitions

20. The information shown in the tables relates to establishments which operated at any time during the year unless otherwise stated. Establishments at 30 June. The number of retail establishments in operation at 30 June 1986. It does not include the number of separately located administrative offices and ancillary units.

Persons employed at 30 June. Employees plus proprietors and partners working on a full or part-time basis, including those working at separately located administrative offices and ancillary units. Unpaid helpers are excluded. Part time employees are those who work less than 35 hours per week.

Wages and salaries. Gross earnings of all employees, before taxation and other deductions. Earnings of employees working at separately located administrative offices and ancillary units are included. Drawings of working proprietors and partners of unincorporated enterprises are excluded. Working proprietors of incorporated enterprises are considered to be employees.

Turnover. Sales of goods (retail and wholesale) and all other operating revenue from outside the enterprise.

Total floor space at 30 June. Total floor area occupied by establishments (whether rented, leased, or owner occupied) including office space, storage space, selling space, basements, and upper floors.

Average weekly trading hours. The average number of hours businesses usually open for trading each week.

Population. This data is obtained from the 1986 Population Census results and is the SLA population on a place of usual residence basis. Persons were counted according to their stated place of usual residence. Overseas visitors and Australians overseas are excluded and no adjustment is made for census underenumeration.

Statistical areas of Victoria

21. The Statistical area framework used in this publication is provided by the Australian Standard Geographic Classification (1216.0)

22. Victoria has been divided into 12 statistical divisions (SD). Each SD is composed of a number of contiguous statistical local areas (SLA). Generally, SLA's equate to legal local government areas. Some differences occur, particularly where only part of a legal local government area is contained in a major urban centre.

23. The intermediate level of this framework is the statistical sub-division (SSD). A fixed outer boundary has been defined around large urban centres. Included are the immediately surrounding rural areas which allow for anticipated growth over a twenty year period. In some cases, statistical sub-division boundaries bisect one or more Legal Local Government Areas

24. With the exception of shopping centres, SRA's are the lowest Geographic level for the purpose of publishing Retail Census data disaggregated by industry. These are composed of either single, or groups of contiguous SLA's. SRA boundaries do not cross SD, SSD, or SLA boundaries.

25. Appendix 1 provides an index of Statistical Areas of Victoria used in this publication.

26. Table 3 of this publication provides details of Retail operations for selected shopping areas in the Melbourne Statistical Division. For comparison purposes, the ABS has attempted to provide statistics for the shopping areas for which details were published in respect of the 1979/80 Census of Retail and Selected Service Establishments. Users should be aware that statistics published in Table 3 exclude details of ASIC Group 486 (Motor vehicle dealers; petrol and tyre retailers).

27. Appendix 2 lists the 1986 ABS Population Census Collector's Districts used in preparation of the shopping area statistics.

Publications program

28. The following Retail Census publications will be released by October 1988.

Retail Industry: Details of Operations, 1985-86 (Separate publication for each State and Territory, 8622.1 to 8622.8). Contain details by industry of employment, wages and salaries, turnover, stocks, purchases, transfers-in and selected expenses, value added, floor space, and average weekly trading hours. Commodity and other income item details by industry class are also included

Retail Industry: Establishment Size Statistics, 1985-86 (Separate publication for each State, 8626.1 to 8626.6). Contain industry and commodity statistics classified by size of establishments for respective States. The primary measure used to classify establishments by size is the value of turnover. However, some tables provide data classified according to the number of persons employed at 30 June 1986.

Retailing in Australia, 1985-86 (8628.0). Contains industry and commodity data by size of establishments; data on the extent of foreign participation in the retail sector; industry concentration statistics; measures of productivity; and financial performance.

Retailing in the Northern Territory, 1985-86 (8629.7).
Retailing in the Australian Capital Territory, 1985-86 (8628.8). Contain industry and commodity statistics classified by size of establishments and industry details for statistical areas of the Northern Territory and the Australian Capital Territory.

Enterprise Statistics, Australia, 1985-86 (8103.0). Contains some of the major economic characteristics of enterprises in Australia mainly engaged in retail activities during the year ended 30 June 1986.

29. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues on Tuesdays and Fridays a *Publications Advice* (1105.0) which lists publications to be released in the next few days. These are available from any ABS office.

Special tabulations

30. Additional information is available from unpublished Retail Census data. A charge may be levied depending on the amount of data requested and the medium on which they are provided. Inquiries should be made to Information Services in the nearest ABS office.

Data in computer-readable form

31. This and all other standard Retail Census publications are also available on floppy disk. Inquiries should be directed to Information Services in the nearest ABS office.

Statistics on Viatel

32. Selected economic, social and population statistics are available on VIATEL *656#.

TELESTATS

33. Foreign trade statistics tailored to users' needs are available on TELESTATS, Phone (062) 52 5404.

AUSSTATS

34. Thousands of up-to-date time series are available on AUSSTATS through CSIRONET, Phone (062) 52 6017.

CDATA86

35. CDATA 86 comprises a database, on CD-ROM (COMPACT DISC - READ ONLY MEMORY), of the 1981 and 1986 Population Census summary data, map boundary data, and SUPERMAP software

for accessing and manipulating data and for producing tabulations and maps. Retail census data will become available on CDATA 86 during 1988.

For further information regarding CDATA 86, contact the ABS by telephoning (03) 615 7000; ask for Information Services.

Deputy Commonwealth Statistician

SUMMARY OF FINDINGS

Overview of retailing in Victoria

The 1985-86 Retail Census recorded 41,896 retail establishments operating in Victoria on 30 June 1986, an increase of 5.7 per cent over the 30 June 1980 total of 39,621. Retail sector turnover in Victoria during 1985-86 was almost \$26,000m, an increase of nearly 24 per cent over 1979-80 (expressed in 1985-86 prices). Employment in the Victorian retail sector increased from 211,271 to 249,477 (18.1 per cent) over the period.

In the Melbourne Statistical Division (MSD) there were 29,101 establishments on 30 June 1986, which represented an increase of 4.8 per cent over the 30 June 1980 total of 27,769. There were 12,795 establishments in the Rest of State (ROS) - those parts of Victoria outside the MSD - , an increase of 7.4 per cent on the 30 June 1980 figure of 11,852. Employment in the MSD increased from 154,167 to 183,610 (an increase of 19.1 per cent), whereas the ROS increased by 13.3 per cent (57,104 to 65,867). In contrast, the increase in turnover was essentially consistent. Expressed at 1985-86 prices, the MSD registered an increase of 24 per cent from \$16,219m in 1979-80 to 20,114m 1985-86, and the ROS increased by almost 23 per cent from 4,772m to 5,864m.

In 1985-86, the MSD's share of the aggregates for Victoria was: 69.5 per cent of the total retail establishments in Victoria; 73.6 per cent of retail sector employment; 77.4 per cent of turnover; and 77.2 per cent of wages and salaries paid to retail sector employees in Victoria. The comparable figures in 1979-80 were: establishments, 70.1 per cent; employment, 73.0 per cent; turnover, 77.3 per cent; and wages and salaries, 76.4 per cent.

Other main features are-

Dandenong was the largest single shopping area in the MSD (other than the central business district) with turnover of \$238m from 703 retail establishments.

Doncaster Shoppingtown recorded the highest turnover per square metre of floorspace of the major shopping areas - \$3,964. Parkmore Shopping Centre (Keysborough) registered the second highest turnover/floorspace ratio at \$3,882.

The central business district of Melbourne accounted for 5.5 per cent of turnover in the MSD and 4.2 per cent of total Victorian turnover. This compares with 7.0 per cent of the MSD and 5.5 per cent of Victoria in 1979-80.

In terms of turnover expressed at 1985-86 prices, the major growth areas in Victoria were the statistical divisions (SDs) of Central Gippsland (an increase of 40.5 per cent), East Gippsland (29.3 per cent), and North Eastern (26.0 per cent).

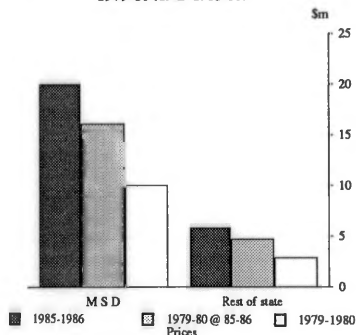

Each SD, other than Wimmera, experienced steady growth between 1979-80 and 1985-86, particularly the eastern part of the State. Wimmera registered decreases in population, number of establishments, and employment. Turnover in the Wimmera SD increased by only 0.9 per cent (at 1985-86 prices).

SELECTED ITEMS AND CONTRIBUTION TO STATE, STATISTICAL DIVISIONS, VICTORIA, 1985-86

Statistical division	No. of establishments	Per cent of State	Employment. (No.)	Per cent of State	Turnover (\$m)	Per cent of State
Melbourne	29,101	69.5	183,610	73.6	20,114	77.4
Barwon	1,996	4.8	12,030	4.8	1,083	4.2
South Western	1,100	2.6	5,315	2.1	467	1.8
Central Highlands	1,181	2.8	6,129	2.5	575	2.2
Wimmera	686	1.6	2,720	1.1	230	0.9
Northern Mallee	922	2.2	4,710	1.9	424	1.6
Loddon - Campaspe	1,777	4.2	8,765	3.5	753	2.9
Goulburn	1,555	3.7	7,816	3.1	681	2.6
North Eastern	875	2.1	4,725	1.9	396	1.5
East Gippsland	776	1.9	3,932	1.6	369	1.4
Central Gippsland	1,463	3.5	7,953	3.2	755	2.9
East Central	464	1.1	1,772	0.7	132	0.5
Total Victoria	41,896	100.0	249,477	100.0	25,979	100.0

This table establishes the comparative significance of retailing activity in each statistical division (SD). Analysis of turnover per establishment indicates a wide range of averages; from \$691,000 in the MSD and \$543,000 in Barwon to \$284,000 in East Central and \$335,000 in Wimmera. Average employment per establishment yields a slightly smaller range. The average employment per establishment varied between the MSD at 6.3 persons per establishment, and, at the other end of the range, East Central, at 3.8. The average turnover per establishment for the ROS was \$458,000 and average employment per establishment was 5.1 persons.

CHART 1. TURNOVER, MELBOURNE STATISTICAL DIVISION AND REST OF STATE, 1979-80 AND 1985-86.

Turnover growth was consistent for the State with almost 24 per cent real growth (at 1985-86 prices) for the ROS and 24 per cent for the MSD. Comparison of the nominal turnover data produces growth figures of 96 per cent and 98 per cent, respectively.

CHART 2. NUMBER OF ESTABLISHMENTS, STATISTICAL DIVISIONS, ROS, VICTORIA, 1985-86.

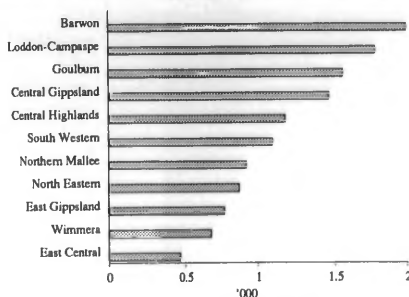

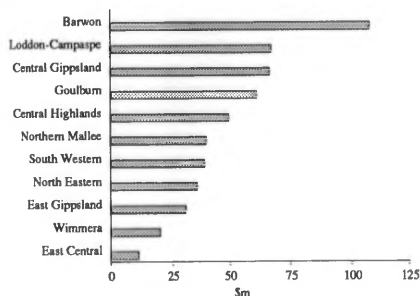

CHART 3. WAGES AND SALARIES, STATISTICAL DIVISIONS, ROS, VICTORIA, 1985-86.

The ROS reported a 7.9 per cent increase in the number of retail establishments - from 11,852 at 30 June 1980 to 12,795 at 30 June 1986, a rate of growth greater than that for the MSD (4.8 per cent). Major growth areas in the ROS were East Gippsland (16.5 per cent), Central Gippsland (14.7 per cent) and Goulburn (14.4 per cent). The ROS contained 30.5 per cent of all retail establishments located in Victoria on 30 June 1986.

Wages and salaries paid to retail sector employees in the ROS during 1979-80 were 23.6 per cent of the Victorian total; in 1985-86 the proportion had decreased slightly to 22.8 per cent. The average wage/salary figure per person employed in Victoria in 1985-86 was \$9,310; in the MSD the average was \$9,766 and for the ROS it was \$8,038. The average wage/salary in the ROS ranged from \$8,960 in Barwon to \$6,068 in East Central. Wages and salaries excludes the drawings of working proprietors and partners.

Maps 1 and 2 (following) show turnover and employment concentrations for Statistical Retail Areas (SRA) in the Melbourne Statistical Division.

Smaller SRAs bordering on the Port Phillip Bay coastline together with SRAs in the outer areas are generally in the lowest range. Significant exceptions were Frankston and the Port Melbourne/South Melbourne combination which recorded turnover and employment in the higher ranges. Three inner suburban SRAs, Fitzroy, Collingwood, and Kew, are also in the lowest size range of both turnover and employment. The growth corridors to the west, north, east, and south-East of the MSD are evident in these maps where the SRAs of Werribee, Whittlesea, Lillydale and Berwick reveal turnover and/or employment in higher ranges than their outer MSD neighbouring SRAs.

Apart from the obvious concentration of activity in Melbourne (C), where turnover of almost \$17,000million was recorded, there was a significant concentration of retail activity in middle-distance Eastern and South-Eastern SRAs. The band of SRAs consisting of Frankston, Springvale, Dandenong, Waverley, Knox, and Nunawading provided aggregate turnover of over \$4,100m, or nearly 16 per cent of the Victorian total. Employment ranges show a similar but less pronounced emphasis in this belt of SRAs.

MAP 1. TURNOVER, STATISTICAL RETAIL AREAS, MELBOURNE STATISTICAL DIVISION, 1985-86.

MAP 2. EMPLOYMENT, STATISTICAL RETAIL AREAS, MELBOURNE STATISTICAL DIVISION,
1985-86.

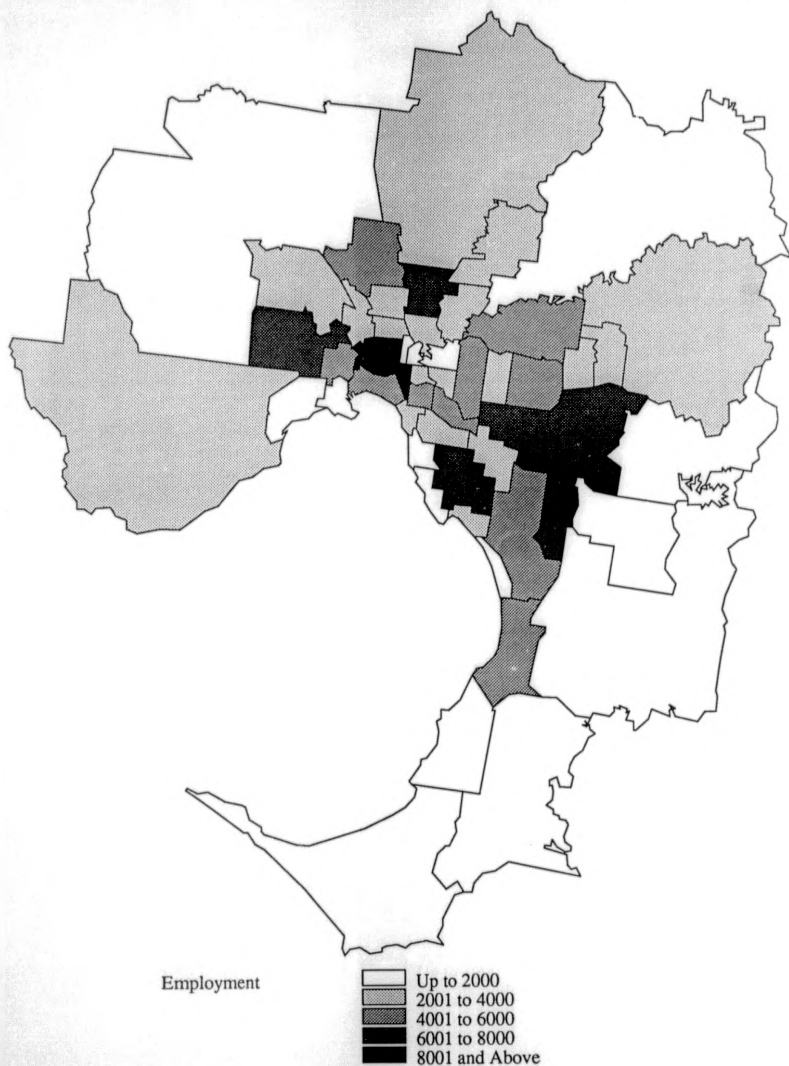

CHART 4. TURNOVER PER HEAD OF POPULATION, STATISTICAL DIVISIONS, VICTORIA, 1985-86.

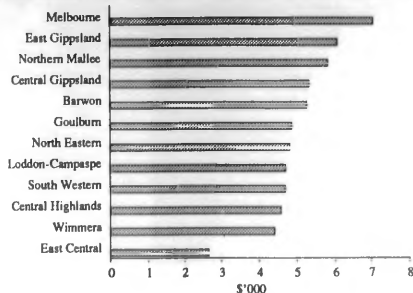

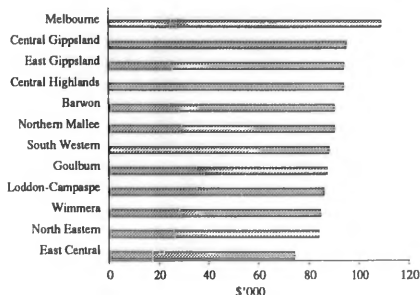

CHART 5. TURNOVER PER HEAD OF EMPLOYMENT, STATISTICAL DIVISIONS, VICTORIA, 1985-86.

The dominance of the MSD is evident in the above charts. The MSD accounts for 77.4 per cent of retail sector turnover and 70.5 per cent of the population of Victoria. Retailers operating in the MSD reported \$109,547 of turnover per head of retail employment. This is equivalent to \$7,066 per head of population (at 30 June 1986). In the ROS the highest ratios of turnover per head of employment occurred in Central Gippsland (\$94,983) and East Gippsland (\$93,885). Lower ratios occurred in East Central (\$74,291) and North Eastern (\$83,889). Turnover per head of population was highest in East Gippsland (\$6,074) and lowest in East Central (\$2,652).

TEN LARGEST STATISTICAL RETAIL AREAS SELECTED BY TURNOVER SIZE, VICTORIA, 1985-86.

SRA	No. of establishments	Employment (No.)	Wages and salaries (\$'000)	Turnover (\$'000)	Floorspace ('000m ²)
Broadmeadows	596	4,373	51,965	2,289,961	107.2
Dandenong	1,183	6,253	67,938	1,207,040	160.8
Melbourne (Inner)	1,289	15,513	221,854	1,100,936	348.2
Moorabbin	1,155	6,890	67,476	697,153	182.7
Preston	992	6,625	59,901	673,796	166.6
Waverley	758	7,307	97,147	627,535	158.6
Knox	827	6,704	63,378	601,198	167.8
Melbourne (Remainder)	998	5,304	51,777	589,020	103.3
Nunawading	703	5,538	54,221	580,102	136.3
South Melbourne	513	2,900	32,737	578,982	49.4

The ten largest SRAs, based on turnover, were located in the MSD. Geelong (C) was the first SLA in the ROS to appear on a list ordered by turnover magnitude at position 17, with 600 establishments and turnover of \$415.9m. Establishments classified to ASIC Group 486 (Motor vehicle dealers, petrol and tyre retailers) can have a significant impact on the total turnover for individual SRAs. For example, in Broadmeadows (C), ASIC Group 486 contributed 89.4 per cent of turnover recorded, similarly, in Dandenong (C) the contribution of this group was 73.9 per cent. ASIC Group 486 contributed a more typical 26.4 per cent to turnover in Preston (C) and 34.0 per cent in Waverley (C).

Growth since 1979-80.

For ease of analysis, 1979-80 turnover data has been adjusted to 1985-86 prices and for scope differences. Each Victorian SD recorded an increased number of establishments compared with 1979-80 with the exception of Wimmera, which showed a decrease from 716 in 1979-80 to 686 in 1985-86. There was significant growth in turnover for each SD with the largest percentage increases being 40.5 per cent in Central Gippsland (\$537.7m to \$755.4m) and 29.3 per cent in East Gippsland (\$285.5m to \$369.1m). Employment within SDs also increased between 1979-80 and 1985-86 apart from Wimmera, which recorded a 2.7 per cent decrease in total employment (from 2,797 to 2,720). The largest increases were in North Eastern, 30 per cent (3,634 to 4,725); Central Gippsland, 26 per cent (6,313 to 7,953); and East Central, 25.9 per cent (1,408 to 1,772). Employment in the MSD increased by 19.1 per cent (154,167 to 183,610). Between the two Retail Censuses, estimated resident population reflected growth in all SDs except Wimmera. The most significant increases were in East Central (26.9 per cent), East Gippsland (13.4 per cent), and Central Gippsland (11.4 per cent).

PERCENTAGE GROWTH BETWEEN 1979-80 AND 1985-86, STATISTICAL DIVISIONS, VICTORIA.

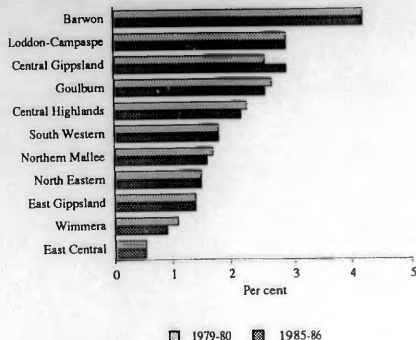

<i>Statistical division</i>	<i>No. of establish- ments</i>	<i>Employment</i>	<i>Turnover</i>	<i>Population*</i>
Melbourne	4.8	19.1	24.0	5.2
Barwon	6.3	15.6	22.4	7.3
South Western	1.4	11.7	21.8	3.4
Central Highlands	2.8	6.9	18.0	9.3
Wimmera	-4.2	-2.7	0.9	-2.2
Northern Mallee	10.4	10.4	16.1	5.2
Loddon-Campaspe	6.6	12.5	23.5	10.6
Goulburn	14.4	14.4	19.2	9.5
North-Eastern	7.8	30.0	26.0	10.3
East Gippsland	16.5	24.4	29.3	13.4
Central Gippsland	14.7	26.0	40.5	11.4
East Central	6.4	25.9	24.5	26.9
Total Victoria	5.7	18.1	23.8	6.3

*Percentage change in estimated resident population between 30 June 1980 and 30 June 1986

SDs in eastern Victoria showed consistent growth in both population and retail activity. The East Central SD recorded very strong growth in population due to its proximity to the outer Eastern suburban areas of Melbourne. Its retailing growth was not as strong however, suggesting that a proportion of the potential retail growth in this SD has been absorbed in outer Eastern suburban SLAs. The growth in retailing activity recorded in Central Gippsland SD may have been assisted by major construction activity in the area as the growth in resident population was of somewhat smaller proportions.

The SD of Wimmera recorded a decrease in population, number of retail establishments and employment while turnover showed only marginal growth compared with other SDs.

CHART 6. TURNOVER, CONTRIBUTION TO TOTAL STATE, STATISTICAL DIVISIONS, VICTORIA, 1979-80 AND 1985-86.

The turnover contribution of each SD to the State total was quite stable between the two census years. The largest movement occurred in Central Gippsland which also recorded higher levels of real growth than most other SDs. The largest decline in the contribution of a SD to the aggregate State turnover was recorded for Wimmera which in 1985-86 contributed only 0.9 per cent to the State total.

Major Country centres.

The table below shows key data items for the major urban centres outside the MSD. These centres have been identified as the statistical sub-divisions (SSD) of Geelong, Ballarat, Bendigo, Shepparton-Mooroopna, Wodonga, and Morwell together with the Cities of Mildura, Warrambool, Traralgon, and Wangaratta. Data for the growth centre of Albury-Wodonga is also provided. Albury-Wodonga is constituted by combining data for the SSDs of Albury (NSW) and Wodonga (Vic.). These SSDs are commonly linked in any economic analyses.

KEY DATA ITEMS, MAJOR COUNTRY CENTRES, VICTORIA, 1985-86.

Country centres	No. of establishments	Employment (No.)	Wages and salaries (\$'000)	Turnover (\$'000)
Geelong (SSD)	1,450	9,588	9,252	895,059
Ballarat (SSD)	788	4,741	40,635	455,923
Bendigo (SSD)	684	4,483	38,949	393,101
Shepparton-Mooroopna (SSD)	482	3,289	30,280	312,708
Wodonga (SSD)	319	1,677	14,463	164,626
Morwell (SSD)	267	1,583	15,485	159,766
Mildura (C)	325	2,261	21,065	209,651
Warrambool (C)	326	2,257	17,646	208,319
Traralgon (C)	222	1,572	14,656	174,846
Wangaratta (C)	220	1,795	13,783	137,011
Total Country Centres	5,083	33,246	216,214	3,111,010
Albury-Wodonga	923	5,210	46,486	476,477

The country centres listed above account for 39.7 per cent of establishments located outside the MSD, 50.4 per cent of extra-metropolitan employment, 40.8 per cent of wages and salaries paid outside the MSD, and 53.0 per cent of turnover recorded by establishments outside the MSD. Conversely, these centres represented only 12.1 per cent of total establishments and 12.0 per cent of turnover recorded for the State of Victoria.

Selected shopping areas.

The following table details the ten largest shopping areas in the MSD and their recorded turnover together with the percentage contribution to the SLA in which they are located. Data provided for selected shopping areas excludes the activities of establishments classified to ASIC Group 486 (Motor vehicle dealers, petrol and tyre retailers). SLA aggregates used in calculations for Table 5 have been adjusted to exclude ASIC group 486 also.

TURNOVER AND CONTRIBUTION TO STATISTICAL LOCAL AREA, SELECTED SHOPPING AREAS, VICTORIA, 1985-86.

<i>Shopping area</i>	<i>Turnover (\$'000)</i>	<i>Per cent contrib. to SLA</i>
Dandenong	237,920	75.4
Frankston	226,366	59.0
Ringwood	192,009	80.4
Prahran	186,024	55.2
Doncaster Shoppingtown	162,641	49.2
Northland Centre	154,576	38.0
Chadstone Centre	153,951	50.0
Greensborough	151,236	77.4
Footscray	144,869	69.7
Highpoint West Centre	141,590	37.0

Turnover of \$1,100.9m was recorded for the central business district (CBD) of Melbourne (SLA of Melbourne - Inner). This is equivalent to turnover of \$1,024.7m when ASIC group 486 is excluded. The ten areas listed in the above table together with the CBD accounted for 25.5 per cent of turnover recorded for the MSD (excluding ASIC Group 486). Each of the ten areas listed in Table 3 either constitutes or includes one or more 'shopping centre' developments. Despite the CBD's pre-eminence among shopping areas (in turnover terms), it is attracting a declining proportion of total MSD turnover. The CBD accounted for 7.0 per cent of turnover in the MSD in 1979-80. By 1985-86 this contribution had declined to 5.5 per cent.

(a) Appendix 1 of this publication links each statistical retail area code with component Statistical Local Area(s). (b) Includes working proprietors. (c) Industry class 4861 (New motor vehicle dealers) consists of establishments mainly engaged in wholesaling or retailing new motor vehicles, in retailing new parts or accessories for motor vehicles, or in motor vehicle repair (except smash repair). (d) The turnover figure for this industry does not reflect sales of petrol on commission. See paragraph 19 of the Explanatory notes. (e) The definition of floorspace could not be strictly applied for nurseries (ASIC class 4896) and therefore the figures should be used as a guide only. In general, the floorspace for nurseries includes both inside and outside selling areas but the treatment of outside growing areas may differ.
