SEASONALLY ADJUSTED SERIES

Original and seasonally adjusted statistics are shown for wage and salary earners in civilian employment in Table 2 and for persons registered for employment, etc. in Tables 12-14. The methods used in seasonally adjusting these statistics are explained in "Seasonally Adjusted Indicators" 1970 (Reference No. 1.10), issued on 29 June 1970.

1. EMPLOYED WAGE AND SALARY EARNERS

The estimates contained in this section, except those relating to government employees and defence forces, are based on comprehensive data derived for the purpose from the population census of June 1966. The statistics shown for June 1966 are referred to herein as "benchmarks". For the period from July 1966 to date the figures shown are estimates designed to measure month-to-month changes in the sector of employment to which the benchmarks relate.

2. The data needed to derive the estimates for periods subsequent to the benchmark date (June 1966) are obtained from three main sources, namely, (a) current pay-roll tax returns; (b) current returns from government bodies; and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. Month-to-month changes shown by current returns are linked to the benchmark data to derive the monthly estimates. At June 1966 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census.

3. The figures in this section, except those in Table 1, relate only to civilian wage and salary earners, not the total labour force. They therefore exclude employers, self-employed persons, unpaid helpers and defence forces. Also excluded, because of the inadequacy of current data, are employees in agriculture and private domestic service.

4. Estimates for the period June 1966 to date are not comparable with those for earlier periods, because of (a) the adoption of a new definition of the labour force in the 1966 population census, from which the benchmarks for the current series were derived and (b) the inclusion of full-blood Aborigines. The new definition resulted in the inclusion of a considerable number of part-time employees (mostly females) who had previously been excluded.

5. The concepts and definitions adopted at the 1966 census conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians. At the census the following questions were asked in respect of all persons fifteen years of age and over:

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)?"

"Did the person do any work at all last week for payment or profit?"

Provided he had not been temporarily laid off by his employer without pay for the whole of the week, a person who answered "yes" to either of these questions was classified as employed. Persons in this category who were stated to be "working for wages or salary", except members of the defence forces, or persons employed in agriculture or private domestic service, have been included in the benchmarks for the current series.

6. The June 1966 figures were derived from particulars recorded for individuals on population census schedules, while the estimated monthly changes are derived mainly from reports supplied by employers, relating to enterprises or establishments. Because the two sources differ in some cases in the reporting of industry, the industry dissection of the census totals has been adjusted to conform as closely as possible to an establishment reporting basis. For this reason and because crews of overseas ships were excluded from the benchmarks figures the estimates for June 1966 differ from those published in census bulletins (e.g. No. 9.6) which show particulars of the occupational status and industry of the population, and in other publications which contain population census results. The industry classification used throughout the series is that of the population census of June 1966.

7. Current data supplied by reporting enterprises or establishments generally refer to persons on the pay-roll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

8. Pay-roll tax returns are lodged at present by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organisations specifically exempted under the Pay-roll Tax Assessment Act 1941-1969).

9. Particulars of employment obtained from other collections, such as the annual manufacturing census and censuses and sample surveys of retail establishments, are used to check and where desirable to revise the estimates. Some figures in this section are subject to further revision as the results of later censuses and surveys become available.

10. Although the series measure reasonably well the short-term trends in employment in the defined field, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and pay-roll data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods.

11. Detailed industry figures for each State and Australia and a revised government employment series for the period June 1966 to June 1969 were published in a special bulletin (Reference No. 6.23) issued on 24 April 1970.

12. In due course the estimates for periods prior to the population census of June 1966 will be revised, but on a basis comparable with that of the 1961 census benchmarks, the information needed to revise these benchmarks on the 1966 census basis not being available.

NOTE. Any discrepancies between totals and sums of components in Tables are due to rounding.

.. means nil or less than 50 persons.

(a) See note (a) page 4. Excludes State and local government employees engaged in agriculture or in private homes as employees of government emergency housekeeper services (4.3 thousand persons in December 1970). Also excludes defence forces (see Table 1 on page 4). (b) Includes semi-government bodies.

2. EMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangements between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

2. The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consistent with those shown by the subsequent estimates of total private factory employment.

3. Employers co-operating in the survey are asked to supply, as at the last pay-day in the month, the number of employees in the factory or on the factory office staff, providing their employment is directly related to manufacture. Selling and distribution staff are excluded.

4. Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate figures have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

5. In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.

(a) Persons who claimed, when registering with the Commonwealth Employment Service, that they were not employed and who were recorded as unemployed. Includes those referred to employers and those who may have obtained employment without notifying the C.E.S. Includes also persons receiving unemployment benefit (see Table 13). (b) Generally at Friday nearest end of month. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) "School-leavers" means persons under the age of 21 who, at the time of registering with the Service, (i) had ceased full-time primary or secondary education within the previous three months; or (ii) were still at school but notified the Commonwealth Employment Service that they would leave school before the end of the school year if a full-time job were available. (f) See Seasonally Adjusted Series on page 2.
