AUSTRALIAN BUREAU OF STATISTICS, VICTORIA

CATALOGUE NO. 3207.2

INQUIRIES Inquiries concerning these statistics may be made by telephoning Information Services on Melbourne (03) 615 7000; for advice on the interpretation of these statistics ask for Robin Rothfield.

MAIN FEATURES

POPULATION AT 30 JUNE 1989

- * The estimated resident population (ERP) in Victoria was 4,321,500.
- * The population (ERP) for the Melbourne Statistical Division (MSD) was 3,043,500.
- * Children (aged less than 15 years) represented 21.5 per cent of Victoria's population. Within the MSD, the highest concentrations were found in the Shires of Melton (30.9 per cent) and Bulla (28.8 per cent). The Cities of Prahran (10.0 per cent), St Kilda (10.4 per cent) and South Melbourne (11.5 per cent) had the lowest proportions. Outside the MSD the highest proportions of children were located in the Shires of Grenville - part A (30.6 per cent) and Huntly - part A (30.0 per cent) while the lowest proportion was located in the Shire of Barrabool - part A (10.6 per cent).
- * The aged (65 years or more) represented 11.2 per cent of Victoria's population. Within the MSD, the highest concentrations were found in the Shire of Flinders (24.4 per cent), the City of Brighton (19.7 per cent) and City of Caulfield (19.2 per cent). The Shires of Melton (3.3 per cent), Bulla (4.3 per cent) and the City of Werribee (4.2 per cent) had the lowest proportions. Outside the MSD, the highest concentrations of aged persons were located in the Borough of Queenscliffe (28.9 per cent) and the Shire of Phillip Island (23.0 per cent) while the lowest proportions were located in the Shires of Barrabool - part A (4.1 per cent) and Traralgon (4.1 per cent).

CHANGES FROM ONE YEAR AGO

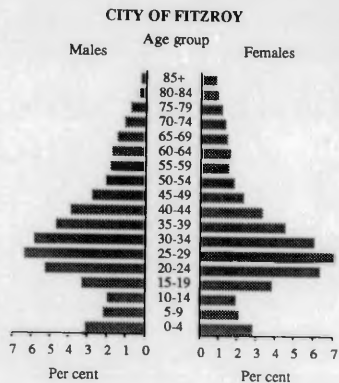

- * The population (ERP) in Victoria increased by 59,500 (1.4 per cent) and in the MSD by 41,100 (1.4 per cent).
- * The age group with the greatest increase was for persons aged 45 to 49 which increased by 10,700 (4.6 per cent), followed by the 40 to 44 age group with an increase of 10,400 (3.5 per cent).
- * The number of children in Victoria increased by 2,000 (0.2 per cent).
- * The number of aged persons in Victoria increased by 13,000 (2.8 per cent).

CHANGES FROM TEN YEARS AGO

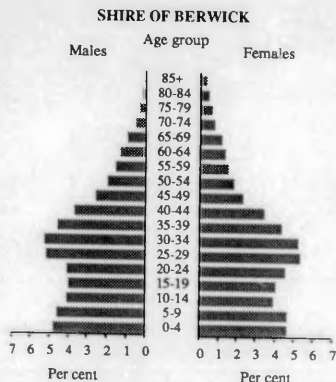

- * The population (ERP) for Victoria increased by 435,100 (11.2 per cent) over ten years.
- * The population (ERP) for the MSD increased by 272,500 (9.8 per cent) over this period.
- * The number of children in Victoria decreased by 63,100 (6.4 per cent).
- * The number of aged persons in Victoria increased by 107,800 (28.7 per cent).

The age/sex distribution of the population varies between Statistical Local Areas. In order to illustrate the differences in various regions in Victoria, the distribution of four SLAs within the MSD are outlined below.

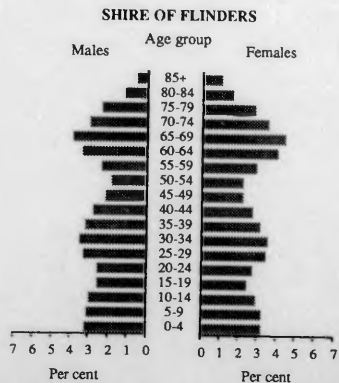

PERCENTAGE OF POPULATION IN AGE GROUPS BY SEX, FOR SELECTED STATISTICAL LOCAL AREAS, 30 JUNE 1989

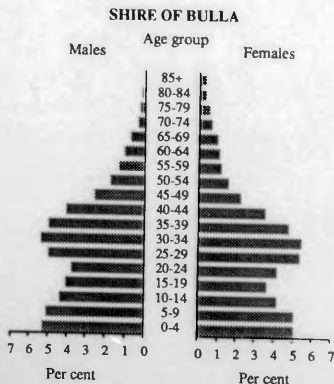

The City of Fitzroy is an inner Melbourne suburb. Its population has declined from 19,100 in 1981 to 18,300 in 1989. The distribution is characterised by a high proportion of persons aged 20-44.

The City of Berwick has increased from 37,300 in 1981 to 63,900 in 1989. The distribution is characterised by high proportions of persons aged 0-9 and 25-39.

The Shire of Flinders is part of the Mornington Peninsula. Its population has increased from 27,000 in 1981 to 38,800 in 1989. The distribution is characterised by a high proportion of persons aged 65 and over.

The Shire of Bulla has increased from 18,800 in 1981 to 35,300 in 1989. The distribution is characterised by high proportions of persons aged 0-9 and 25-44.

(a) Estimated Resident Population figures for Lady Julia Percy Island and Tower Hill Lake Reserve are not available for intercensal years. (b) Portland(S) in the South Western Statistical Division has been renamed Heywood(S). (c) Estimated Resident Population for Bass Strait Islands is nil. (d) Estimated Resident Population for Yallourn works area is nil.

EXPLANATORY NOTES

Introduction

This publication contains estimated resident population by age and sex of Statistical Local Areas (SLAs) and broader Statistical Areas of Victoria at 30 June 1989. Estimates in this form were first published for 30 June 1988.

2. The estimated resident population is compiled according to the place of usual residence of the population. An explanation of the conceptual basis is given in the ABS Information Paper entitled *Population Estimates: An Outline of the New Conceptual Basis of ABS Population Estimates* (3216.0).

Methodology

3. The methodology used to determine the estimated resident population for total persons (all ages) for each Statistical Local Area (SLA) is consistent with methods used in the calculation of equivalent estimates for previous years.

4. Estimates of the age and sex of SLA populations in this publication were obtained by the demographic cohort component method. Estimates for 1989 were updated from 1988 using SLA population estimates by age and sex at 30 June 1988, recorded births and deaths during the year 1988-89 and the total population estimate at 30 June 1989. The total population growth for an SLA during 1988-89 was split into natural increase and net migration components, the latter being the difference between total growth and natural increase during 1988-89. Age-sex estimates of natural increase were obtained from vital registrations (i.e. births and deaths), and those for net migration were derived as follows:

(i) the net migration component was subdivided into internal arrivals and departures and overseas arrivals and departures, and proportionate age-sex distributions were allocated to each of these subdivisions for each SLA

(ii) a small number of migration profiles (the proportionate age-sex distributions) for inter-SLA arrival, inter-SLA departure and overseas arrival to each SLA were obtained from the 1986 Census data on usual residence one year prior to the census date

(iii) age-sex migration profiles for overseas departures were based on an average of overseas departures from the State/Territory which incorporated the SLA during the period January 1985 to December 1987 as obtained from passenger cards.

Reliability

5. Estimates for each age and sex category are shown to the nearest unit without rounding; accuracy to this level is not claimed and should not be assumed. Estimates in catalogue 3203.2 are published to the nearest hundred persons in the Melbourne Statistical Division, and the nearest ten persons in the rest of Victoria. Rounding was not done in this publication however because rounding of small cells could result in substantial year to year fluctuations owing to the rounding process rather than the actual population change.

Australian Standard Geographical Classification

6. The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification (ASGC)*, (1216.0).

Changes to Statistical Boundaries

7. All population data contained in this publication are on a 30 June 1989 boundary basis.

Data on Floppy Disk

8. Estimated resident population classified by age and sex for 30 June 1986, 1987, 1988 and 1989 is available on floppy disk - a separate disk for each year. Order forms can be obtained from the Victorian Office by contacting the ABS Bookshop on (03) 615 7000.

Electronic services**DISCOVERY**

Key *656# for selected current economic, social and demographic statistics. For further information ring (06) 252 6161.

AUSSTATS

Thousands of up-to-date time series are available on this ABS on-line service through PAXUS COMNET.

For further information ring the AUSSTATS help desk on (06) 252 6017.

TELESTATS

There are two parts to this service. Firstly there is the provision of foreign trade statistics tailored to user's requirements and further information is available on (06) 252 5404.

Secondly there is the provision of selected main economic indicator publications and further information is available on (06) 252 5405.

FLOPPY DISK SERVICE

Selected ABS statistics are available on floppy disk and further information is available on (06) 252 6684.
