Explanatory Notes

Introduction

This publication contains a summary of the latest statistics available at 30 September 1987. The data are presented according to the Australian Standard Geographical Classification (ASGC), Edition 3.

2. The legal local government area structure has been cross-classified with the statistical division level of the main structure. The use of this cross-classification requires the combination of the Brisbane and Moreton Statistical Divisions, as some legal local government areas cross the contiguous boundary of these two statistical divisions.

3. Legal local government areas (LGAs), as defined under the 'Local Government Act 1936-1987', are spatial units which represent the geographical areas of incorporated local government councils, such as cities (C), towns (T), and shires (S).

4. Statistical divisions, which are groupings of whole or part of legal LGAs, are designed to be relatively homogenous regions characterised by identifiable social and economic units within the region. The Brisbane Statistical Division comprises the Cities of Brisbane, Ipswich, Logan, and Redcliffe, the Shire of Redland, and parts of the Shires of Albert, Beaudesert, Caboolture, Moreton, and Pine Rivers.

5. Statistical districts have been defined around selected urban areas to provide comparable statistics over a period of time. These districts, which are intended to contain the anticipated urban spread for at least 20 years, are generally defined as having a population of 25,000 or more and experiencing urban growth beyond the legal LGA boundaries.

6. Data for certain series are available for statistical districts which are shown on pages 58 and 59.

7. Estimated resident populations shown are based on the 1981 Census of Population and Housing counts adjusted for under-enumeration, as measured by a post-enumeration survey, and the estimated number of residents temporarily overseas.

8. Figures shown for births, deaths, infant deaths, and natural increase relate to the resident population of the area for which they are shown.

9. Statistics of building work approved are compiled from: (a) permits issued by local government authorities in areas subject to building control by those authorities; and (b) contracts let or by labour work authorised by Commonwealth, State, semi-government, and local government authorities. Major building activity which takes place in areas not subject to the normal

Explanatory Notes (continued)

Introduction (continued)

administrative approval processes (e.g. mining leases) is also included. The number of dwelling units created by alterations and additions to existing buildings and through the construction of new other buildings, i.e. buildings other than dwellings, is not included.

10. In connection with manufacturing statistics, the following explanations and definitions should be noted.

11. Establishments. The number of establishments in operation at 30 June relates to establishments as such, and does not include the numbers of separately located administrative offices and ancillary units.

12. Employment. The number of persons employed, including working proprietors and those working at separately located administrative offices and ancillary units in the area. Employment at the end of June for single-establishment enterprises employing fewer than four persons, plus average employment during the whole year for other manufacturing establishments.

13. Wages and salaries. The wages and salaries of all employees of the establishment, including those working at separately located administrative offices and ancillary units in the area. Drawings of working proprietors are not included.

14. Acute public hospitals comprised hospitals under the control of Hospitals Boards and which are listed as 'recognised' hospitals under the 'Health Insurance Act 1973'. Separate establishments providing only out-patient services, which are administered by Hospitals Boards, are also included.

unincorporated islands (21 square kilometres).

(g) Not valued.

(f) Including statistics for

Statistical Districts

Statistical districts have been defined around selected urban areas to provide comparable statistics over a period of time. These districts, which are intended to contain the anticipated urban spread for at least 20 years, are generally defined as having a population of 25,000 or more and experiencing urban growth beyond the legal LGA boundaries. There are currently eight statistical districts in Queensland centred around Bundaberg, Cairns, Gladstone, Gold Coast-Tweed, Mackay, Rockhampton, the Sunshine Coast, and Townsville. The Gold Coast-Tweed Statistical District extends into the Tweed Shire of New South Wales as well as into Albert Shire.

Item	Unit	Gold Coast-Tweed (a)	Sunshine Coast	Bundaberg	Gladstone (b)	Rockhampton	Mackay	Townsville	Cairns
