

CATALOGUE NO. 8741.1

EMBARGOED UNTIL 11.30 a.m. 5 FEBRUARY 1992

DWELLING UNIT COMMENCEMENTS REPORTED BY APPROVING AUTHORITIES, NEW SOUTH WALES, OCTOBER 1991

NOTE: There was a break in series from November 1990. For more information see paragraph 2 of the Explanatory Notes.

MAIN FEATURES

Number of dwelling units commenced

The total number of dwelling units commenced in New South Wales in October 1991 (3,310) was 8% higher than the previous month (3,056) and 81% higher than October 1990 (1,831). The number of dwelling units commenced in Sydney Statistical Division in October 1991 (1,452) was 12% higher than the previous month (1,292).

Number of houses commenced

The number of houses commenced in New South Wales in October 1991 (2,417) increased by 17% from the September figure of 2,068, while in Sydney Statistical Division there was a increase of 27% (from 838 to 1,065).

DWELLINGS COMMENCED IN NSW

Indicates a break in series.

DWELLINGS COMMENCED IN SYDNEY (SD)

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics, contact Geoff Howat on (02) 268 4610.
- for information about other ABS statistics and services please refer to the back of this publication.

NOTES

The statistics on dwelling unit commencements are compiled from data supplied in monthly reports provided by local and other government authorities. The statistics relate to the number of new dwelling units reported as commencements of new houses and new other residential buildings.

Explanatory notes are provided at the back of this publication.

GREG BRAY
Acting Deputy Commonwealth Statistician

Unpublished data

The ABS can make available certain dwelling commencements data which are not published, such as floor area, material of roof and floor, sub-LGA level data and value ranges. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms:

- Photocopy
- Microfiche
- Computer printout
- Clerically extracted tabulation

A charge may be made for providing unpublished information in these forms.

For further details please telephone Geoff Howat on (02) 268 4610.

EXPLANATORY NOTES

Introduction

This publication contains monthly details of the number of new dwelling units reported by approving authorities as having commenced.

2. As from November 1990 the data have been compiled using an 'as reported' method. Previously, data were revised for up to five months as councils notified the ABS of commencements occurring before the reference month. A comparison of data compiled using the two methods showed that, while the actual numbers may vary (both on the high and the low side), the trends were very similar. It is not possible for all the previous data to be compiled under the new method, nor can future data be compiled under the old method. Therefore there is a break in series. The advantages of the new method are that there are no revised data and that NSW data are more comparable with similar series issued by other States.

Scope and coverage

3. The statistics were compiled from the monthly reports, provided by local and other government authorities, of commencements of new houses and new other residential buildings for which:

- (a) building permits were issued by local government authorities in areas subject to building control by those authorities;
- (b) contracts were let or day labour work was authorised by Commonwealth, State, semi-government or local government authorities; or
- (c) are valued at \$10,000 or more.

4. The number of dwelling units created by alterations and additions to existing buildings, and through the construction of new 'non-residential buildings' (i.e. buildings other than residential buildings) is not included.

Definitions

5. A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. Units (whether self-contained or not) within buildings offering institutional care (such as hospitals) or temporary accommodation (such as motels, hostels and holiday apartments) are not defined as dwelling units.

6. A *residential building* is defined as a building predominantly consisting of one or more dwelling units. Dwellings can be either houses or other residential buildings as follows:

- (a) a *house* is defined as a detached building, predominantly used for long-term residential purposes and consisting of only one dwelling unit. Thus detached 'granny flats' and detached dwelling units (such as caretakers' residences) associated with

other buildings are defined as houses for the purpose of these statistics;

- (b) an *other residential building* is defined as a building which is predominantly used for long-term residential purposes and which contains (or has attached to it) more than one dwelling unit (e.g. a block of townhouses, a duplex, or an apartment building).

7. *Commencement*. For the purpose of this statistical series, a job is regarded as being commenced on the date when:

- (a) the job is first inspected by a local government or other government authority building inspector or surveyor, whether the work is passed or not. In general, the first inspection is undertaken at the foundations or footings stage of construction; or
- (b) the job is determined as commenced by a building inspector or surveyor.

8. *Ownership*. The ownership of a residential building is classified at the time of approval as either 'private sector' or 'public sector' according to the expected ownership of the completed building.

Statistical areas of New South Wales

9. This bulletin contains data presented according to the Australian Standard Geographical Classification (ASGC). Under this classification, statistical areas are defined as follows:

- (a) *Statistical Local Areas (SLAs)*. These geographical areas are in most cases either identical with, or have been aggregated to, the previously published whole or part of legal Local Government Areas (LGAs) as defined under the (State) *Local Government Act 1919* and comprising cities (C), municipalities (M) and shires (S). In other cases, they are identical to each previously published unincorporated area. In aggregate, SLAs cover the whole of the State without gaps or overlaps. In some cases legal LGAs overlap Statistical Subdivision boundaries and therefore comprise two SLAs (Part A and Part B) or three SLAs in the case of Cabonne (S) (Part A, Part B and Part C).
- (b) *Statistical Subdivisions (SSDs)*. These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.
- (c) *Statistical Divisions (SDs)*. These consist of one or more Statistical Subdivisions (SSDs). Where SSDs are not shown for statistical purposes, statistical local areas are shown ordered alphabetically within statistical divisions. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic

units within the region, under the unifying influence of one or more major towns or cities.

- (d) *Statistical Districts*. To provide comparable statistics over a period of time, statistical districts have been defined around selected urban centres, with a population of 25,000 or more, experiencing urban growth beyond the legal local government area boundaries. Those districts are intended to contain the anticipated urban spread over the next 20 years. In some cases, Statistical District boundaries are identical to those of particular Statistical Subdivisions (e.g. Newcastle SSD and Wollongong SSD included in Table 5 of this publication).

10. Further information concerning statistical areas is contained in the publication *Regional Statistics, New South Wales*, 1989 issue (1304.1) and in the publication *Australian Standard Geographical Classification* (1216.0).

General

11. For purposes of comparison over time, it should be noted that statistics of dwelling commencements are affected from month to month by large projects (such as blocks of flats) commenced in particular months, and also by the administrative arrangements of government authorities.

Comparability of statistics

12. Because of the difference in data sources, collection methodologies and timing of notification of commencements, care should be exercised in comparing quarterly data derived from monthly dwelling unit commencements statistics with the quarterly dwelling unit commencements statistics from the Building Activity Survey (published in *Building Activity, New South Wales* 8752.1).

13. Users may also wish to refer to the following building and construction publications which are available on request.

NEW SOUTH WALES

Building Approvals, New South Wales (monthly) (8731.1)

Building Activity, New South Wales (quarterly) (8752.1)

AUSTRALIA

Housing Finance for Owner Occupation, Australia (monthly) (5609.0)

Price Index of Materials Used in House Building, Six State Capital Cities and Canberra (monthly) (6408.0)

Building Approvals, Australia (monthly) (8731.0)

Building Activity, Australia (quarterly) (8752.0)

Engineering Construction Survey, Australia (quarterly) (8762.0)

Symbols and other usages

C	City
M	Municipality
r	figure or series revised since previous issue
S	Shire
SD	Statistical Division
SLA	Statistical Local Area
SSD	Statistical Subdivision
..	not applicable
—	nil or rounded to zero (including null cells)
—	break in continuity of series

14. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
