

EXPORTS OF MAJOR COMMODITIES AND THEIR PRINCIPAL MARKETS, AUSTRALIA

JULY 1985

PHONE INQUIRIES	for more information about these statistics - contact Mr David Mitchell on Canberra (062) 52 5403 or any of our State offices. other inquiries including copies of publications - contact Information Services on Canberra (062) 52 6627 or any of our State offices.
MAIL INQUIRIES	write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.

EXPLANATORY NOTES

Changes in this issue:
Non-merchandise trade is no longer included in trade totals (see paragraphs 12 and 13) and the list of major commodities has been revised.

Introduction

This publication contains monthly and year-to-date statistics of Australia's exports of major commodities and their principal markets. The commodities included in this publication are listed on page 5. Statistics for 1984-85 and 1985-86 may be amended as a result of continuing quality checks on foreign trade data. Although these amendments usually have little effect on broad aggregate statistics, they may have a significant effect on individual commodity statistics. For this reason, statistics for 1984-85 and 1985-86 should be regarded as preliminary and subject to revision.

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from information contained in export entries and returns submitted by exporters or their agents to the Australian Customs Service as required by the Customs Act.

Statistical concepts

3. The statistics of exports

presented in this publication are recorded on a general trade basis, i.e. export figures include both Australian produce and re-exports.

4. Australian produce is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only minor operations which leave them essentially unchanged.

5. Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported or after having undergone only minor operations which leave them essentially unchanged. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

6. Although items of non-merchandise trade are recorded, they are excluded from exports. The value of non-merchandise trade is shown in Table 1 of publication 5404.0: Exports Australia - issued monthly. (see paragraphs 12 and 13)

7. The following are excluded from recorded export statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) migrants and passengers' effects exported and parcels post exports of small value, for which Customs entries are not required;
- (c) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;
- (d) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;
- (e) the sale of any vessel and/or aircraft originally purchased for use on overseas routes;
- (f) fish and other sea products landed abroad directly from the high seas from Australian vessels;
- (g) export consignments where the value of the goods in each transaction is less than \$250.

Statistical period

8. Exports are recorded statistically in the month in which the entries are lodged with the Australian Customs Service. Regular exporters or their agents may provide details of their export shipments on a periodic rather than an individual shipment basis by submitting weekly or monthly returns. These "periodic returns" must be submitted to the Australian Customs Service within seven days of the end of the period in question covering all shipments during that period. All other exporters are required to report each individual shipment prior to the ship's departure. Approximately 90 per cent of monthly export values are recorded on periodic returns. The statistical month for Customs outports (generally ports other than those at which the main Customs Office in each State is located) closes on the 21st of each month, whereas for mainports the statistical month is the calendar month.

9. Because of these factors export statistics for a particular month do not necessarily represent entries lodged or commodities actually exported during that month. Analysis of past data has shown that in aggregate approximately 30 per cent of export trade by value for a particular month reflects actual shipments during that month, 60 per cent by value was actually exported during the previous month with the remaining 10 per cent by value exported in earlier months. For individual commodities the percentage by value representing actual exports in a month may vary considerably.

Valuation

10. Goods actually sold to overseas buyers prior to shipment are valued at the free-on-board (f.o.b.) Australian port of shipment equivalent of the actual price at which the goods were sold. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods are dispatched for sale.

11. The recorded value of exports includes the value of the outside package, other than international containers used for containerised cargo.

Exports and non-merchandise trade

12. From July 1985, non-merchandise trade is excluded from export (and import) statistics. This is in accord with UN recommendations and practices adopted by Australia's major trading partners.

13. Non-merchandise exports consist primarily of goods which were originally imported on a temporary basis or for repair, alteration or renovation, and exports of goods on a temporary basis (including goods for repair, alteration or renovation overseas) and subsequent re-importation. A complete list of commodities comprising non-merchandise trade is shown under section 9(b) of the AECC. The value of non-merchandise trade is shown in Table 1 of publication 5404.0 : Exports Australia - issued monthly.

Commodity classification

14. Exports are classified according to the items of the AECG (1203.0) which from 1 July 1978, has been based on the Standard International Trade Classification, Revision 2 (United Nations, Statistical Papers, Series M, No. 34, Revision 2, 1975). A detailed description of the commodity items included in this publication is contained in the AECG. Copies of, or extracts from, this classification may be obtained from offices of the ABS in Canberra and in each capital city.

Country

15. For the purposes of foreign trade statistics a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian foreign trade statistics. For exports, country refers to the country to which the goods were consigned at the time of export. Where the country of consignment is not determined at the time of export, goods are recorded as exported "For orders" and in those cases where it was found to be impossible to determine the destination, as "Destination unknown".

Treatment of confidential data

16. To ensure that information about the activities of particular businesses is not disclosed it is necessary to restrict the release of statistics of certain commodities. These restrictions do not affect total export figures but they can affect statistics at all levels of the AECG.

17. The implementation of a new foreign trade processing system has resulted in a revised treatment of confidential data. Consequently, certain statistics in publications first containing March 1982 data are not directly comparable with statistics in previous publications.

18. Reference to table footnotes should assist in the interpretation of these differences.

Revisions to previous figures

19. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this publication. For this reason, monthly figures published in previous issues for the current financial year will not necessarily add to the year-to-date figures shown in the latest issue.

20. Statistics shown in this publication were the latest available at the time of compilation. However, revisions may have since been made to the statistics, which could result in differences between figures in this publication and those in other related publications e.g. Exports by Commodity Divisions, Australia (5402.0).

OTHER INFORMATION AVAILABLE

21. Special returns service: Subscribers to this service can receive computer produced printout of foreign trade statistics at a particular commodity level in one or more of a limited number of formats, for a charge consistent with the level of detail required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

22. Microfiche service: Foreign trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported, at various levels of aggregation. This service is recommended where the subscriber wishes to obtain foreign trade details for a large number of commodities.

23. Magnetic tape: Statistics for imports, exports and import clearances are available on 9-track magnetic tape approximately 4 weeks after the end of the reference period. This service is recommended where the subscriber wishes

to obtain trade data at the most detailed level. Documentation regarding the content and structure of these tapes is available from the ABS Trade and Shipping Section in Canberra.

24. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Relevant application forms and information papers for these services are available from the ABS Trade and Shipping Section in Canberra or any ABS State office. Payment in advance is required for each of these services.

Related publications

25. Other ABS publications which may be of interest include:

Balance of Payments, Australia (5301.0) -issued monthly

Exports by Commodity Divisions, Australia (5402.0) -issued monthly

Exports, Australia (5404.0) -issued monthly (\$1.10, \$1.90 incl. postage)

Exports and Imports (Balance of Payments Basis) at Constant Prices, Australia (5332.0) -issued quarterly

Export Price Index, Australia (6405.0) -issued monthly

Manufacturing Commodities: Principal Articles Produced, Australia (8303.0) - issued annually (\$1.80, \$2.60 incl. postage)

26. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. Both are available from any ABS office.

Symbols and other usages

- nil or rounded to zero
.. not applicable
n.p. not available for publication

27. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

DISTRIBUTION OF EXPORTS BY MAJOR COMMODITIES(a)

JULY 1985—Total exports \$2,707.3m(b)

(a) Exports of the 'major commodities' shown in these charts are significant exports of particular commodities as shown in the summary on page 7 and represent 59% of total exports for July 1985. (b) See footnote (b) to Summary of Exports table.
