<u>MORNING PAPERS</u>	<u>FRIDAY, 10TH SEPTEMBER, 1954.</u>

RETAIL SALES OF GOODS : AUSTRALIA

JUNE QUARTER, 1954

Estimates of the total value of goods sold at retail in Australia during the quarter ended 30th June, 1954, have been derived from returns of a representative sample of retail traders and are summarized in this Bulletin with comparisons for previous periods. The statistics herein relate to the value only of retail sales. To assess the movement in the volume of retail sales made, it is necessary to allow for variations in prices.

Because of the seasonal nature of retail trade, sales made in one quarter should not be compared with those made in the previous quarter without making allowance for seasonal influences. Consequently, where percentage increases are shown in this Bulletin (Tables 1, 3 and 6) quarterly figures of retail sales are compared with sales made in the corresponding quarter of the previous year.

The returns used in these estimates for June quarter, 1954 cover approximately 40 per cent of all retail sales in Australia. The estimated totals for Australia have been calculated by methods appropriate to a stratified sample.

A Census of Retail Establishments was conducted for the year ended 30th June, 1953 and results will be available shortly, when it may be necessary to make some amendments to the estimates published herein in respect of the year 1952-53 and other periods subsequent to the 1948-49 Census.

The figures relate to goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) sold to the public from retail establishments with fixed premises (shops, rooms, kiosks and yards). Hotels, wine saloons and refreshment rooms are included in respect of goods sold; but clubs and guest houses are entirely excluded. Goods sold at retail from farms direct (e.g. milk and eggs) and from factories direct (e.g. bread delivered from factories) are excluded. The tables relate to rather more than 90 per cent of consumer retail expenditure on goods, but include also some producer expenditure made at retail, mainly in respect of motor vehicles, petrol, etc.

More complete descriptions of the types of retail establishments covered and of the commodity groupings are contained in Bulletins issued in connection with the Census of Retail Establishments, 1948-49.

Particulars throughout this statement exclude the Australian Capital Territory and the Northern Territory, for which retail sales shown at the Census of Retail Establishments in the year ended 30th June, 1949 were £2.4 million and £2.0 million respectively.
