P R E F A C E

This Bulletin contains an analysis of registrations of new motor vehicles for the month of February, 1961.

Vehicles owned by the Commonwealth Government are included, except those belonging to the Defence Services. Vehicles belonging to the Department of the Navy are included up to 31st December, 1955 but have been excluded from that date. For all new motor vehicles (excluding motor cycles), the analysis relates to make, horsepower and type of vehicle registered. Motor cycles are shown according to make of vehicle.

All figures for horsepower shown in this Bulletin are in terms of R.A.C. rating. Whole numbers only have been shown. For example, an R.A.C. rating of 17.9 h.p. is recorded in this Bulletin as 17 h.p.

Motor cars are classified according to whether they are (1) sedans or (2) tourers, sports cars, convertibles, etc. All other vehicles are classified as listed on page 3. Metropolitan registrations are shown separately. Diesel-powered vehicles are indicated and dissected from petrol-driven vehicles.

Monthly statistics are available as from July, 1951 and have been compiled in collaboration with Deputy Commonwealth Statisticians from data made available by the Road Transport Authority in each State. Particulars for motor cycles are not available for periods prior to January, 1953.

REGISTRATION

For various reasons the total number of new motor vehicles shown herein may not agree in all cases with figures compiled by the registration authorities in each State as published in the Monthly Review of Business Statistics and other publications issued by this Bureau, but the differences will usually be small and of little significance. "Registered during the month" means passed through the Central Registration Authority of respective States during the month. Occasionally, in some States, new registrations effected in Branch offices are not "passed" into the statistics until some time after actual registration. In Western Australia, all extra-metropolitan registrations are incorporated in the tabulations for the month following.

CLASSIFICATION

Registrations are classified in these statistics according to eleven major types of vehicles as set out below. Examples are given of vehicles for which the classification may not be indicated explicitly by the brief description used for "major type".
