

WHOLESALE PRICE INDEXES

PRICE INDEX OF MATERIALS USED IN HOUSE BUILDING
JUNE 1976

SUMMARY OF RESULTS					
	Percentage change between -		Weighted average of six State capital cities Groups and all groups	Percentage change between -	
	May 76 and June 76	June 75 and June 76		May 76 and June 76	June 75 and June 76
State capital cities					
Sydney	+1.0	+12.2	Concrete mix, cement and sand	+0.3	+14.4
Melbourne	+0.9	+12.4	Cement products	+1.8	+18.0
Brisbane	+1.3	+15.6	Clay bricks, tiles, etc.	+0.9	+12.2
Adelaide	+0.3	+14.1	Timber, board and joinery	+1.2	+11.8
Perth	+1.3	+16.9	Steel products	+1.2	+21.5
Hobart	+1.1	+15.7	Other metal products	+0.5	+12.3
Weighted average of six State capital cities	+1.0	+13.6	Plumbing fixtures, etc.	+1.0	+17.0
			Electrical installation materials	+3.5	+17.9
			Installed appliances	+0.4	+13.8
			Plaster and plaster products	+0.9	+10.7
			Miscellaneous materials	+0.3	+14.6
			All groups	+1.0	+13.6

EXPLANATORY NOTES

Introduction

This bulletin contains index numbers of the Price Index of Materials used in House Building. A detailed description of the index is contained in *Labour Report* No. 58, 1973 (pp. 57-69). A Price Index of Materials used in Building other than House Building is published in a separate bulletin (Reference No. 9.6). *Index numbers for the current month and the previous month are preliminary and subject to revision.*

Scope and composition

2. The index measures changes in prices of selected materials used in the construction of houses. Its composition is in accordance with the usage of materials in actual houses which were selected as representative for the purpose. The index does not purport to represent buildings of any kind other than houses. The house building construction types included are those which use brick, brick veneer, timber or asbestos cement sheeting as the principal material for the outer walls.

Base period and method of calculation

3. The reference base of the index is the year 1966-67 = 100.0. The index is a fixed weights index and is calculated by the method known as *the weighted arithmetic mean of price relatives*.

Derivation of items and weights

4. The items and weights used in the index were derived from reported values of each material used in selected representative houses constructed in or about 1968-69 in each State capital city. Each State capital city has an individual weighting pattern which reflects the difference in the estimated relative importance of given items as between cities. In all cases the selection of materials was based on local usage. The weighting pattern for each capital city is applied to local price measures in calculating indexes for that city. The weights for groups of items are shown in Table 3. Further details concerning the weighting pattern are contained in *Labour Report* No. 58, 1973 (Reference No. 6.7).

Prices

5. Price series used relate to specified standards of each commodity with the aim of incorporating in the index price changes for representative materials of constant quality.

6. In general the point of pricing is *delivered on site*, but in some cases it has been necessary to use the nearest realistic price available, e.g. that for *supplied and fixed*. The price series are obtained in all State capital cities from representative suppliers of materials used in

house building. In the main they are collected as at the mid-point of the month to which the index refers, or as near thereto as practicable.

7. As far as possible, actual transaction prices are used in the index as distinct from *list* prices. Thus measures of special or other discounts are sought where these are believed to be significant. To the extent that they can be determined, significant changes in special discounts are incorporated in the index but this may sometimes be on a partly estimated basis, and may sometimes necessitate revisions.

Index numbers

8. The index has been compiled for each month from July 1966, and for the financial years from 1966-67. Index numbers for the financial years are simple averages of the relative monthly index numbers. Index numbers for each State capital city and for the weighted average of the six capitals are given for all groups combined in Table 1 and for each group of items in Table 3. The separate city indexes measure price movements within each capital city individually. They enable comparisons to be drawn between capitals as to differences in degree of price movement from period to period, but not as to differences in price level.

Percentage changes

9. Table 2 shows, for each State capital city and for the weighted average of the six capitals, monthly and annual percentage changes for all groups combined. The following example illustrates the method of calculating percentage changes:

Sydney -

Index number as at June 1976 224.0 (see Table 1)

Index number as at May 1976 221.7 (see Table 1)

Percentage change = $\frac{224.0 - 221.7}{221.7} \times 100 = 1.0\%$

10. Graphs showing monthly and annual percentage changes are shown on page 4.

Interpretation

11. In interpreting movements in the index, particularly those from month to month, it should be noted that changes frequently occur in an uneven fashion both over time and also, between separate capital cities, at the same points of time. Changes in index numbers for individual months should not be interpreted in isolation and without reference to changes over longer periods.

Other A.B.S. publications

12. Users may also wish to refer to the following price index publications which are available on request:

- . *Price Index of Materials Used in Building Other than House Building* (Reference No. 9.6)
- . *Price Index of Materials Used in Manufacturing Industry* (Reference No. 9.13)
- . *Price Index of Electrical Installation Materials* (Reference No. 9.5)
- . *Price Indexes of Metallic Materials* (Reference No. 9.10)

13. Other ABS publications which are commonly used in conjunction with the above publications include:

- . *Wage Rates Indexes, Preliminary* (Reference No. 6.37)
- . *Wage Rates and Earnings* (Reference No. 6.16)
- . *Average Weekly Earnings* (Reference No. 6.18)

Symbols used

- p - preliminary, subject to revision.
- r - revised.

NOTE. Inquiries concerning these statistics may be made in Canberra by telephoning Mr Martin Van der Hoek on 52 5541 or, in each State capital, by telephoning the office of the Australian Bureau of Statistics.

TABLE 1. - PRICE INDEX OF MATERIALS USED IN HOUSE BUILDING
ALL GROUPS INDEX NUMBERS - SIX STATE CAPITAL CITIES
(Base of each Index : Year 1966-67 = 100.0) (a)

Period	State capital cities						Weighted average of six State capital cities
