other inquiries including copies of publications—contact Information Services on Canberra (062) 52 6627 or in any of our State offices.
- MAIL INQUIRIES** *write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.*

MAIN FEATURES

New Capital Raisings in the March quarter 1985 amounted to \$4,139 million, an increase of \$792 million on the December quarter 1984 and an increase of \$354 million compared with the March quarter 1984.

New Capital Raisings in the March quarter 1985 consisted of \$407 million from share issues and \$3,732 million from debentures, unsecured notes, loans and deposits.

The 'new money' component of the March quarter 1985 raisings amounted to \$591 million; an increase of \$132 million on the December quarter 1984 and an increase of \$435 million compared with the March quarter 1984.

In the March quarter 1985, 'new money' was raised by the following industry groups: Finance, Property and Business Services, \$445 million; Wholesale and Retail Trade, \$116 million; Mining, \$22 million; and Other Industries, \$29 million, with net repayments by Manufacturing of \$20 million.

- (c) all issues of debentures, unsecured notes and loans, loans secured over the entire assets of the company and deposits if any shares or other securities are listed.

The exceptions relate to the following forms of finance, all of which are excluded:

- (a) borrowings from Australian banks in the form of overdrafts, mortgage loans, term loans or debentures;
- (b) deposits accepted by banks and insurance companies;
- (c) temporary advances or short-term deposits from any source;
- (d) complete or partial issues made by Australian companies on overseas markets.

In respect of share issues, new capital raised in a period is calculated by deducting from the amount of cash issues commenced during the period the amount uncalled at the end of the period and adding the amount of calls on previous issues received during the period.

EXPLANATORY NOTES

Introduction

This publication contains particulars of capital raised through share and debenture subscriptions and by way of deposits, unsecured notes and loans.

Coverage

2. In general, these statistics cover capital raised by companies incorporated in Australia whose shares, debentures, or other securities are listed on one or more of the Australian Stock Exchanges.

Definition of items

3. *New capital raised.* This covers, with a few specified exceptions,

- (a) all issues of ordinary shares if any ordinary shares are listed;
- (b) all issues of preference shares if any preference shares are listed; and

4. *Shares.* This includes all forms of equity capital (ordinary shares, deferred shares, stock units, etc.) and preference shares.

5. *Number and total value of issues commenced.* An issue of shares or other securities is included in the period in which funds were first subscribed to the relevant issue or, in the case of issues for consideration other than cash, in the period in which the allotment of shares commenced.

6. *Issues for consideration other than cash.* Shares issued for a consideration other than cash include bonus issues, conversion issues (including conversion of debentures, notes, etc., to shares), issues in exchange for shares in other companies, shares issued to a vendor; etc. Where the issue involves a cash payment by the subscribers to the issuing company and a simultaneous cash payment of similar amount to the subscriber for some other consideration, the issue has been regarded as an issue for consideration other than cash.

7. *Calls.* The amount uncalled at the end of the period on current issues is the amount outstanding at the end of the year or quarter on share issues commenced during the year or quarter to which the statistics relate. *Calls during period on previous issues* is the money received on issues commenced during an earlier year or quarter. Amounts uncalled at the end of a quarter but called in subsequent quarters of the same year are excluded from the annual series and accordingly the annual figures for any year are normally less than the sum of the quarterly totals for that year.

8. *Debentures, unsecured notes, loans and deposits.* Debentures, unsecured notes and similar securities issued, loans, and deposits accepted, are included if they are unsecured or secured by a charge over the entire assets of the company. Debentures and loans secured by a charge over part only of the assets of the company, bank overdrafts, trade credit and other temporary advances are not included. Statistics for this item do not relate strictly to listed companies as some large unlisted companies which were previously listed have been included to maintain comparability.

9. *New money.* This is the net amount of cash transferred from the investing public to the company sector. For this purpose the investing public is defined to include all non-company subscribers, Australian life insurance companies, Australian government and private superannuation funds and banks. In practice, it is necessary to include in new money most subscriptions by companies holding less than five per cent of the ordinary shares of an issuing company as it is not practicable to separately identify all such subscriptions. However, where large subscriptions by companies holding less than five per cent of the ordinary shares in the issuing company are identified they are not included in new money. Subscriptions by Australian life insurance companies and Australian government and private superannuation funds are included in new money irrespective of their holdings of ordinary shares in the issuing company.

10. *Amount not involving new money.* This amount includes cash subscriptions received by issuing companies from associated companies. Also included are amounts which, although subscribed by the investing public are not retained by the issuing company or its associates, but are used to redeem shares, debentures or unsecured notes, etc., or are used to purchase from individuals, existing shares, debentures, etc., in other companies, including existing shares, etc., in associated and subsidiary companies, and therefore do not represent a net transfer of cash from the investing public to the company sector. The amount not involving new money is calculated by deducting the amount of new money from the total new capital raised.

Industry classification

11. In previous issues of this publication the industry classification used was based on broad industry groups derived from the Population Census Classification of Industries (revised 1966). Reporting companies (enterprises) were assigned to industry groups on the basis of

their description of their predominant activity. For the purpose of determining the major activity of holding companies which raised new money, the holding company and its subsidiaries were considered as one organisation.

12. Commencing with the September quarter 1982, companies raising capital are classified to industry Divisions and Subdivisions of the Australian Standard Industrial Classification (ASIC). Because capital raised is normally used for purposes determined within an enterprise group as a whole, each company (enterprise) is classified to the industry of the enterprise group to which it belongs. The industry of the enterprise group represents the predominant industry (based on employment) of the enterprises belonging to the enterprise group.

13. With the exception of the following instances the Divisions and Sub-divisions in the ASIC are comparable with the industry Groups and Sub-groups in the Population Census Classification.

- (a) Under the ASIC, banks are included in the 'Finance' Subdivision whereas under the Population Census Classification, they are included in the Sub-group, 'Other Finance'.
- (b) Under the ASIC, Musical Composition, Literature, Painting and Sculpture and Industrial and Trade Associations are included in 'Other Industries' and all other Business Services are in 'Finance, Property and Business Services' whereas under the Population Census Classification all 'Business Services' are included in 'Other Industries'.

Revisions

14. This publication incorporates revisions made to previous statistics in this series.

Other ABS publications

15. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages

- nil or rounded to zero
- (-) excess of repayments over receipts
- break in continuity of series (where drawn across a column between two consecutive figures).

16. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

R. J. CAMERON
Australian Statistician
