

EXPORTS OF MAJOR COMMODITIES AND THEIR PRINCIPAL MARKETS AUSTRALIA 1984-85

PHONE INQUIRIES for more information about these statistics - contact Mr Len Gibson on Canberra (062) 52 5403 or any of our State offices.

other inquiries including copies of publications - contact Information Services on Canberra (062) 52 6627 or any of our State offices.

MAIL INQUIRIES write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.

MAIN FEATURES

The largest increase in the value of exports between 1983-84 and 1984-85 was in coal (from \$3,328 to \$4,654 million) and wheat (from \$1,814 to \$2,867 million). Over the last ten years, the biggest increase was in coal which comprised 15.1% of exports in 1984-85 compared with 8.3% in 1974-75.

The largest decrease between 1983-84 and 1984-85 was in petroleum products (from \$1,226 to \$1,155 million). Over the last ten years, the biggest decrease was in sugar which comprised 1.9% of exports in 1984-85 compared with 7.4% in 1974-75.

EXPLANATORY NOTES

Introduction

This publication contains details of Australia's exports of major commodities and their principal markets, for the year 1984-85 with comparable export statistics for the years 1981-82 to 1983-84 and 1974-75. The commodities included in this publication are listed on page 5.

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from information contained in export entries and returns submitted by exporters or their agents to the Australian Customs Service as required by the Customs Act.

Statistical concepts

3. The statistics of exports presented in this publication are recorded on a general trade basis: i.e. total exports include both Australian produce and re-exports.

4. Australian produce is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

5. Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

6. The following are excluded from recorded export statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) migrants' and passengers' effects exported and parcels post exports of small value, for which Customs entries are not required;
- (c) certain materials for inter-governmental agreements for defence and similar projects for which Customs entries are not required;
- (d) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;

- (e) the sale of any vessel and/or aircraft originally purchased for use on overseas routes;
- (f) fish and other sea products landed abroad directly from the high seas by Australian vessels;
- (g) export consignments where the value of the goods in each transaction is less than \$250.

7. Ships' and aircraft stores. Prior to July 1982 bunkers and stores supplied to foreign owned vessels and aircraft prior to departure overseas were excluded from export statistics but were published separately as ships' and aircraft stores statistics. The United Nations Statistical Commission has recommended (International Trade Statistics, Concepts and Definitions, United Nations Statistical Papers, Series M, Revision 1, 1982) that such bunkers and stores be included in total export statistics. Accordingly, commencing with July 1982 statistics, these commodities have been classified according to the appropriate AECG items. As a result, from July 1982 total export statistics and commodity statistics which include stores for foreign ships and aircraft are not strictly comparable with data for earlier periods.

Statistical Period

8. The statistics in this publication are based on export entries lodged with Customs during the period July 1984 to June 1985.

Valuation

9. Goods actually sold to overseas buyers prior to shipment are valued at the free-on-board (f.o.b.) Australian port of shipment equivalent of the actual price at which the goods were sold. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods are dispatched for sale.

10. The recorded value of exports includes the value of the outside package, other than international containers used for containerised cargo.

Commodity classification

11. Exports are classified according to the items of the Australian Export Commodity Classification (AECG) (1203.0) which, from 1 July 1978, has been based on the Standard International Trade Classification, Revision 2 (United Nations, Statistical Papers, Series M, No. 34, Revision 2, 1975). A detailed description of the commodities included in this publication is contained in the AECG. Copies of, or extracts from, this classification may be obtained from offices of the ABS in Canberra and in each capital city.

Country

12. For the purposes of foreign trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian foreign trade statistics. For exports, country refers to the country to which the goods were consigned at the time of export. Where the country of consignment is not determined at the time of export, goods are recorded as exported "For Orders" and in those cases where it was found to be impossible to determine the destination, as "Destination Unknown".

Treatment of Confidential data

13. To ensure that information about the activities of particular businesses is not disclosed, it is necessary to restrict the release of statistics of certain commodities. These restrictions do not affect total export figures but they can affect statistics at all levels of the AECG.

OTHER INFORMATION AVAILABLE

14. Special returns service: Subscribers to this service can receive computer produced printout of foreign trade statistics at a particular commodity level in one or more of a limited number of formats, for a charge consistent with the level of detail required.

This service is recommended where up to fifty specific commodity items are required on a regular basis.

15. Microfiche service: Foreign trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported, at various levels of aggregation. This service is recommended where the subscriber wishes to obtain foreign trade details for a large number of commodities.

16. Magnetic tape: Statistics for imports, exports and import clearances are available on 9-track magnetic tape approximately 4 weeks after the end of the reference period. This service is recommended where the subscriber wishes to obtain trade data at the most detailed level. Documentation regarding the content and structure of these tapes is available from the ABS Trade and Shipping Section in Canberra.

17. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Relevant application forms and information papers for these services are available from the the ABS Trade and Shipping Section in Canberra or any ABS State office. Payment in advance is required for each of these services.

Related publications

18. Other ABS publications which may be of interest include:
