I. Wage Rates Indexes

..	Explanatory notes	2
	Adult male wage rates	
	Weekly rates :	
1.	Industry groups, States, 31 October 1975	4
2.	All groups, States October 1973 to October 1975	5
3.	Industry groups, Australia, October 1973 to October 1975	6
4.	Industry groups, States, June 1975 to October 1975	8
5.	Federal and State awards, etc., States, October 1973 to October 1975	10
6.	Federal and State awards, etc., Australia, June 1939 to October 1975	11
	Hourly rates :	
7.	Industry groups, States, 31 October 1975	12
8.	All groups, States, October 1973 to October 1975	13
	Adult female wage rates	
9.	Weekly rates, industry groups, States, 31 October 1975	14
10.	Hourly rates, industry groups, States, 31 October 1975	14
11.	Weekly rates, all groups, States, October 1973 to October 1975	15
12.	Hourly rates, all groups, States, October 1973 to October 1975	16
13.	Weekly rates, Federal and State awards, etc., States, October 1973 to October 1975	17

II. Basic Wages, Minimum Wages, and Increases in "Total Wages"

14.	State basic wage rates	18
15.	Minimum wage, adult males and adult females - Federal awards	18
16.	Minimum wage, adult males and adult females - State awards	18
17.	General increases in award "total wages"	18

III. Average Weekly Earnings Per Employed Male Unit

..	Explanatory notes	19
18.	Average weekly earnings per employed male unit, Australia, September 1966 to September 1975	20
19.	Average weekly earnings per employed male unit, States and Territories, 1966-67 to 1974-75	20
20.	Average weekly ordinary time earnings, full-time adult males, Australia, September 1973 to September 1975	21

IV. Surveys of Earnings and Hours of Employees

..	Explanatory notes	21
	May 1975 survey, Australia	
21.	Weekly earnings : all employees	23
22.	Weekly earnings : full-time employees other than managerial, etc. staff	24
23.	Weekly earnings : full-time employees paid for a full week, other than managerial staff	25
24.	Composition of average weekly earnings : full-time employees other than managerial, etc. staff : industries	26
25.	Composition of average weekly hours paid for : full-time employees other than managerial, etc. staff : industries	27

I. WAGE RATES INDEXES

1. This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100. Less detailed statistics are first published in the monthly statement, *Wage Rates Indexes (Preliminary)* (Reference No. 6.37).

2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations. In the majority of cases the rates are prescribed in awards or determinations of Federal or State industrial authorities or in collective agreements registered with them. Rates prescribed in unregistered collective agreements are used where these are dominant in the particular industries to which they refer.

3. The Wage Rates Indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and collective agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. in the various industries, thereby providing occupation weights.

4. The minimum wage rates used in the indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each period commencing with March 1939 for adult males and March 1951 for adult females. The current index for adult males includes rates for 3,415 award designations prescribed in 501 awards, determinations and collective agreements. As some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 award designations, 187 awards, etc. and 515 individual award occupations. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the indexes. A list of the major awards used in the compilation of the wage rates index for adult males, together with explanatory notes, was shown in the July 1974 and August 1974 issue of this publication. The industry weighting pattern of the indexes is shown on page 74 of *Labour Report* No. 58, 1973.

5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary earners are excluded. Thus awards relating to employees in the Finance and Property industry group (banking, insurance, etc.) are excluded as are awards relating to occupations such as engineers, scientists, architects, teachers, nurses, etc. and to administrative employees in government services. Some awards that specify annual rates of pay for certain occupations mainly in government employment (for example, mail officers, postal officers, drivers, linemen, telecommunications technicians, clerks and clerical assistants, office machine operators, typists, telephonists, etc.) are included.

6. The rates for particular occupations used in the indexes are prescribed in awards, determinations and collective agreements as set out in paragraph 2 above. Relevant rates of prescribed minimum wages for adult males and adult females (see page 18) are used when applicable. For some occupations general loadings of various kinds are included. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the wage rates indexes. Annual leave loadings, prescribed in many awards, etc., are not included in the wage rates indexes. The ten per cent additions to minimum wage rates for adult males first prescribed in some Western Australian State awards in October 1970 are included in the wage rates. The weekly rates used in the index for occupations specified in the National Building Trades Construction Award include the weekly base rate of pay, the special allowance and the industry allowance.

7. In recent years the award rates of pay for some government employees have been based on actual rates of pay for employees in the private sector, which include over-award payments, loadings, etc. Thus award rates of pay for government employees in certain occupations will be higher than those for private employees in comparable occupations. This may affect the relative levels of the weighted average minimum wage rates in industry groups which have a large component of government employees (for example, the Communication group).

8. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in the tables in this section are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these

weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

9. Since 1954 the industrial structure in Australia has undergone changes which are likely to have had some effects on the representativeness of the regimen of the indexes. These effects are mitigated because occupations in new or expanding industries are often covered by existing awards and the wage rates for new occupations usually conform very closely to those for existing occupations. Also, where an entirely new award has been made and the number of employees affected has warranted such action, occupations from the new award have been introduced into the indexes. These latter cases have not been of great significance.

10. Weighted average minimum weekly wage rates for adult males and adult females covered by "Federal awards, etc." and for those covered by "State awards, etc." (as defined below) are shown separately in Tables 5, 6 and 13. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

Relevant definitions are as follows :

"Federal awards, etc." include awards of, or collective agreements registered with, the Australian Conciliation and Arbitration Commission and the Coal Industry Tribunal, and determinations of the Australian Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are dominant in the particular industries to which they refer.

11. The proportion of employees covered by Federal and State awards, etc. varies considerably between States. In addition, the proportions of employees engaged in the respective industries and occupations differ from State to State. As a result there may be relatively wide differences between the weighted average wage rates in the several States.

12. Weekly wage rates for adult males cannot be compared directly with the average weekly earnings series shown in Tables 18 and 19 in Section III, because the latter include the actual earnings of all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) in all industries. The

figures of earnings are quarterly averages and include, in addition to wages and salaries at award, etc. rates, overtime earnings, over-award and bonus payments, and payments made in advance or retrospectively during the periods specified. The series in Table 20, while confined to earnings of full-time adult male wage and salary earners excluding managers, etc., still includes all earnings other than overtime earnings. It therefore cannot be compared directly with weekly wage rates. They also reflect changes in the importance of different industries and occupations. Certain of these differences also apply to the average weekly earnings figures shown in Section IV.

13. Wage rates and index numbers for adult males are available as at the end of each quarter from March 1939 to December 1956 and as at the end of each month from January 1957. Particulars for adult females have been compiled quarterly from March 1951 to June 1967 and monthly from July 1967. For details of wage rates and index numbers from 1939 reference should be made to the following bulletins.

Minimum Wage Rates, March 1939 to June 1965
(Reference No. 6.17)

Wage Rates Indexes, June 1965 to June 1968
(Reference No. 6.21)

Wage Rates Indexes, June 1968 to June 1972
(Reference No. 6.33)

Wage Rates and Earnings, June 1974 (Reference No. 6.16) for final figures July 1972 to June 1973.

Wage Rates and Earnings, June 1975 (Reference No. 6.16) for final figures July 1973 to June 1974.

Figures subsequent to June 1974 will be found in the monthly bulletins, *Wage Rates and Earnings*, commencing with the June 1975 issue and in the monthly statements, *Wage Rates Indexes (Preliminary)* (Reference No. 6.37).

14. In some cases, when awards, etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in wage rates in respect of the occupations included in the indexes. Because of these delays, etc., figures for July 1974 and subsequent months are subject to revision. As such revisions are made they are published in the normal monthly tables of this bulletin. Considerations of space preclude the publication herein of revised figures for each industry group in each State but these are available on request. Final figures for months to June 1974 will be found in bulletins listed in paragraph 13 above. Final figures for months to June 1975 will be published in the June 1976 issue of *Wage Rates and Earnings* bulletin.

TABLE 1. - WEEKLY WAGE RATES: ADULT MALES (a)
INDUSTRY GROUPS, 31 OCTOBER 1975 (b)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and collective agreements; and index numbers of wage rates.

(a) See paragraph 8, page 2. Excludes rural industry; mining and quarrying; and building and construction. For definitions, see paragraph 10, page 3. Figures for July 1974 and subsequent months are subject to revision - see paragraph 14, page 3. (b) The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

II. BASIC WAGES, MINIMUM WAGES, AND INCREASES IN TOTAL AWARD WAGES

The tables in this section give details of basic wages, minimum wages and increases in award total wages. Information on wage determination in Australia is contained in the *Official Year Book* and the *Labour Report*. Figures for earlier periods are published in the Appendix to the *Labour Report* and in earlier issues of this bulletin.

TABLE 14. - STATE BASIC WAGES : WEEKLY RATES (\$)

State	Date operative	Adult males	Adult females	State	Date operative	Adult males	Adult females
N.S.W.	(a) 18 September 1975	51.20	41.90	South Australia		(b)	(b)
Victoria		(b)	(b)	Western Australia	(a) 31 May 1974	(d) 48.50	(d) 43.50
Queensland (c)	22 September 1975	56.30	44.05	Tasmania	(a) 18 September 1975	50.00	50.00

(a) Operative from the beginning of the first pay-period commencing on or after the date shown. (b) Basic wage rates no longer operative. (c) Rates shown are operative in the Southern Division - Eastern District (including Brisbane). District allowances are added for other areas - see Labour Report No. 58, 1973 (page 127). (d) Basic wage plus margin increased by 3.6 per cent in May 1975 and 3.5 per cent in August 1975

TABLE 15. - MINIMUM WAGE : WEEKLY RATES (\$) - FEDERAL AWARDS

1975 15 May	3.6 per cent	1975 15 May	3.6 per cent		
18 September	3.5 per cent	18 September	3.5 per cent		

(a) Operative from the beginning of the first pay-period commencing on or after the date shown.

III. AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT

This section presents estimates of average weekly earnings of civilian wage and salary earners for each State and Territory and Australia. These figures are also published in the quarterly statement, *Average Weekly Earnings* (Reference No. 6.18).

2. This issue also contains a series of estimates of the average weekly earnings, excluding overtime earnings, of full-time adult male wage and salary earners other than managerial, etc., staff (see Table 20).

Definition of earnings

3. The earnings figures used in the calculation of the averages shown in Tables 18 and 19 comprise award and over-award wages and salaries, the earnings of employees not covered by awards, overtime earnings, bonuses and allowances, commissions, directors' fees and payments made retrospectively or in advance during the quarter. Earnings of part-time as well as full-time employees, and of juniors as well as adults, are included.

4. Earnings figures used in calculating the averages shown in Table 20 comprise earnings as defined in the previous paragraph, with the exception of overtime earnings and the earnings of junior employees, part-time employees and managerial, executive, etc., staff.

5. For a number of reasons, average weekly earnings per employed male unit cannot be compared directly with the weekly wage rates shown in Tables 1 to 6. The figures in Tables 1 to 6 are weighted average minimum award, etc. rates payable to adult male wage earners in non-agricultural industry for a full week's work, at the end of each month or year. Those in Tables 18 and 19 represent actual average weekly earnings for all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) and are quarterly or annual averages.

Method of estimation

6. For industries other than agriculture and private domestic service, particulars of employment and wages and salaries are derived from payroll tax returns and from direct returns from government and other bodies. These returns account for approximately 90 per cent of wage and salary earners in these industries, as published monthly in the bulletin *Employment and Unemployment* (Reference No. 6.4). Estimates are made for the unrecorded balance in terms of both numbers and earnings. The level of average earnings estimated for the unrecorded sector is approximately 80 per cent of the level shown by the direct returns. For agriculture and private domestic service, employment and earnings are estimated from other sources and are included in the calculations.

7. For employees reported on more than one payroll, all reported wage and salary earnings are included in calculation of the averages.

Male units

8. Particulars of wages and salaries paid are not available for males and females separately from the sources used for this series; average weekly earnings have therefore been calculated in terms of *male units*, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings. Different ratios of female to male average earnings are used for individual States, based on information from the annual surveys of weekly earnings and hours, and from other sources. Ratios used for the current quarter are as follows: New South Wales 65 per cent, Victoria 65, Queensland 63, South Australia 62, Western Australia 60, Tasmania 65, the Northern Territory 64 and the Australian Capital Territory 60. As the number of male units used in calculating Australian average weekly earnings is the sum of the estimates for the States and Territories, a separate ratio for Australia is not used, but the weighted average of the State and Territory ratios is approximately 64 per cent. Changes in these ratios may be necessary from one quarter to the next to reflect, for example, the extension of equal pay provisions, or appreciable and sustained changes in the levels of male overtime earnings. However, small differences in these ratios have relatively little effect on the earnings figures; if the ratio is understated by one percentage point then average weekly earnings of \$150 would be overstated by about 60 cents.

Seasonally adjusted estimates

9. Quarterly figures are affected by seasonal influences. For example, special payments, including prepayment for holiday periods, tend to raise the December quarter and to depress the March quarter averages. In addition, figures are affected by the varying number of pay-days in different quarters, (with the exception of Australian Government pay-days in the Northern Territory and the Australian Capital Territory, for which special adjustments have been made in the original series). Allowance for these variations, and for recurring seasonal influences, has been made in calculating the seasonally adjusted estimates for all series shown in Tables 18 and 19. The seasonal adjustment factors were derived from a series from which the influence of major changes in awards and determinations and estimates of the effects of pay-day variations had first been removed. While the seasonally adjusted series retains the effect of the major awards, etc. changes, the pay-day effect is excluded. A detailed description of the methods of seasonal adjustment is given in *Seasonally Adjusted Indicators, 1975* (Reference No. 1.10).

IV. SURVEYS OF EARNINGS AND HOURS OF EMPLOYEES

1. This section contains results of surveys of earnings and hours of employees. In this issue preliminary results of the May 1975 survey are published. A list of earlier surveys together with some results were published in earlier issues of this bulletin.

2. In May 1974 and May 1975 surveys were conducted to obtain statistics of the distribution of employees according to weekly earnings and hours, and the composition of weekly earnings and hours for various categories of employees and for the principal occupations. Some results of the May 1975 survey are given below.

3. Because of differences in sample design the results of the survey are not directly comparable with those of other surveys and series such as the October surveys *Earnings and Hours of Employees* (Reference No. 6.40), the May 1971 *Survey of Weekly Earnings (Size Distribution)* (Reference No. 6.30) and the quarterly series of *Average Weekly Earnings* (Reference No. 6.18). In the October surveys and the May 1971 survey, adults included persons under 21 years of age who were paid at adult rates; in the May 1975 survey such persons were included with others under 21 years of age.

Scope

4. The survey covered most civilian wage and salary earners. Excluded were employees in agriculture, employees in private households employing staff, waterside workers employed on a casual basis and persons employed by private employers (other than hospitals) not subject to payroll tax. At the time of the survey payroll tax was payable by employers paying more than \$400 a week in wages and salaries (other than

certain Government bodies, religious and benevolent institutions, public hospitals and other similar organisations specifically exempted under the Australian and State Pay-roll Tax Acts 1971-1974).

Survey design

5. Australian and State Government bodies were completely enumerated; for other employers separate stratified random samples of private employers, non-government hospitals not subject to payroll tax, and local government authorities were used. The majority of employers were required to supply returns for only a sample of their employees.

Industry classification

6. The industry classification used for the survey was the Australian Standard Industrial Classification (ASIC) described in *Australian Standard Industrial Classification (Preliminary Edition) 1969, Vol. 1*.

Definitions

7. *Specified pay-period* is the pay-period which included 30 May 1975. In general, where an establishment was closed down for part or the whole of that pay-period or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply survey particulars for the nearest normal pay-period.

8. *Employees* comprise male and female wage and salary earners (as defined in paragraph 4) who received pay for the specified pay-period.

9. *Full-time employees* are employees who received pay for the specified pay-period and whose

standard (or rostered) weekly hours of work (see paragraph 11) for that pay-period were at least 30 hours. Included are full-time employees on short time, full-time employees who began or ceased work during the pay-period and full-time employees on paid annual leave, paid sick leave and paid holidays. Some government employees (e.g. teachers, university lecturers), although paid for a weekly attendance of less than 30 hours, were classified as full-time.

10. For private employees, *other than managerial, etc. staff* were defined to include foremen or supervisory employees, leading hands, apprentices, trainees or cadets, clerical and office staff as well as ordinary wages employees. They exclude *managerial, executive, professional and higher supervisory staff* who, for the private sector, were not further defined. For government employees, *managerial, executive, professional and higher supervisory staff* were generally defined as those employees who (i) were ineligible to receive payment for overtime, or (ii) although subject to payment for overtime, were in charge of a significant number of employees in a separate establishment (or establishments).

11. *Standard (or rostered) weekly hours* refers to the number of hours constituting a full week's work for the specified pay-period.

12. *Weekly hours paid for* refers to the hours for which payment was made. It comprises *ordinary time hours* (see paragraph 13) and *overtime hours*, which are those in excess of ordinary time hours. Weekly hours paid for were not reported for managerial, executive, professional staff and higher supervisory staff.

13. *Ordinary time hours* refers to award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours, and that part of paid annual leave, paid sick leave and long-service leave taken during the specified pay-period.

14. *Weekly earnings* refers to gross earnings before taxation and other deductions have been made. It comprises *overtime earnings*, which refers to payment

for overtime hours as defined above, and *ordinary time earnings*, as defined in paragraph 15. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly and paid annual or other leave taken during the specified pay-period. Pay in advance, retrospective pay and annual or periodical bonuses, etc. are excluded.

15. *Ordinary time earnings* refers to that part of weekly earnings which is attributable to ordinary time hours, as defined in paragraph 13. It comprises award or agreed base rates of pay for ordinary time hours paid for, including all allowances (other than overtime) specified in the award, etc.; payment by measured result, i.e. payment by incentive, piecework, task bonus, commission, etc.; and other earnings, i.e. attendance and good timekeeping bonuses, profit-sharing and any other forms of over-award, etc. pay.

16. *Median earnings* is the amount which divides the distribution into two equal groups, one having earnings above the median and the other having earnings below it. Medians were calculated from grouped data, linear interpolation being used within the class interval in which the median fell.

17. *Mean (or average) earnings* is the amount obtained by dividing the total earnings of a group (e.g. full-time employees) by the number of employees in that group. In calculating the means in Tables 21 and 23 it was assumed that observations were spaced evenly across class intervals, the mid-point of each interval being used in calculating group aggregates.

Reliability of estimates

18. As the survey was based on a sample of employers the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. Information on the reliability of the estimates will be given in later publications.

NOTE. Any discrepancies between totals and sums of components in tables are due to rounding.
