

OVERSEAS TRADE STATISTICS

PART 1—EXPORTS

NOVEMBER 1974

OVERSEAS TRADE STATISTICS

PART 1 - EXPORTS

CONTENTS

NOVEMBER 1974

Table	Page
.. Explanatory notes	2
I. MONTHLY SUMMARY OF OVERSEAS TRADE JULY 1973 TO NOVEMBER 1974	
1. Exports and imports - Merchandise and non-merchandise original and seasonally adjusted series	5
2. Exports and imports - Merchandise only	5
II. EXPORTS	
3. Exports by State of final shipment	6
4. Exports by Country of consignment	6
5. Exports of Australian Produce (except gold) according to Industrial Groups	8
6. Divisions, groups and selected S.I.T.C. items of the Australian Export Commodity Classification	9
7. Quantity of specified items according to the Australian Export Commodity Classification	26
III. STORES LOADED ON OVERSEAS VESSELS AND AIRCRAFT	
8. Stores loaded on overseas vessels and aircraft	27
GRAPHS	
.. Merchandise exports and imports, monthly January 1973 to November 1974	28

NOTE. (i) This Bulletin is published in two parts: Part 1 - Exports (Reference No. 8.9) and Part 2 - Imports (Reference No. 8.10)

(ii) Figures for 1974-75 are preliminary and subject to revision.

EXPLANATORY NOTES

BASIC DOCUMENTS

The overseas trade statistics published in this bulletin have been compiled by the Australian Bureau of Statistics from information in export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise as required by the Customs Act.

PERIOD COVERED BY STATISTICS

2. Exports and imports are recorded statistically in the month in which entries are passed by the Department of Customs and Excise. Normally this is within a few days of loading or discharge of cargoes. Delays sometimes occur in the lodging of export entries and import entries may be cleared early using the Customs' check-to-arrive system. For exports, the statistical month for Customs outports (generally ports other than those at which the main Customs office in each state is located) closes on the 21st of each month.

VALUATION

3. The recorded value of goods exported includes the cost of the outside package and is determined as follows.

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price at which the goods were sold.
- (b) Goods shipped on consignment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are despatched for sale.

4. The recorded value of imports is the *value for duty* as laid down for Customs purposes, that is, the sum of:

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
- (ii) the current domestic value of the goods; whichever is the higher.
- (b) All charges payable or ordinarily payable for placing the goods free on board at the port of export.

The value of containers or outside packages is excluded, being recorded as a separate item (further information may be obtained from the bulletin, *Overseas Trade* No. 70 — Reference No. 8.11).

CONTAINERISED GOODS

5. Containerised goods forwarded interstate for export through a container terminal are statistically recorded as being exported from the port of location of the Customs House at which the entry was lodged and not from the port of loading in Australia. For example, containerised goods for which entries were lodged at the Customs House, Port Adelaide but forwarded interstate to Port Melbourne for export would be recorded statistically as exports from Port Adelaide, hence from South Australia and not from Victoria. The same method of recording applies to imports of containerised goods forwarded interstate following discharge from an overseas vessel.

STATISTICAL CONCEPTS OF TRADE

Trade systems

6. The statistics of exports and imports presented in this bulletin are recorded on a *General trade* basis, i.e. export figures include both Australian produce and re-exports, while imports comprise goods entered directly for domestic consumption together with goods imported into Customs warehouses. However, Table 3 of Part 2 of this bulletin shows statistics of imports on a *Special trade* basis, i.e. cleared for home consumption. Export figures exclude exports of ships' stores and aircraft stores, separate details for which are shown in Table 8 of Part 1 of this Bulletin. Import figures include defence equipment imported by the Australian Services. These imports are normally classified according to the commodity imported, e.g. warships are classified under *ships and boats*.

NOTE. *Australian Produce* is defined as goods, materials, or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged.

Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

Imports cleared for home consumption differ from imports in scope in that they include withdrawals from bonded warehouses but exclude imports into bonded warehouses.

MERCHANDISE AND NON-MERCHANDISE TRADE

7. Total trade is divided into merchandise and non-merchandise in accordance with international standards recommended by the United Nations. Merchandise trade is the equivalent of total exports or imports less certain items specified as non-merchandise. A complete description of these commodities is contained in the Australian Export and Import Commodity Classifications published by the Australian Bureau of Statistics.

EXCESS OF EXPORTS OR IMPORTS

8. In this bulletin the excess of the value of exports or imports is shown for merchandise plus non-merchandise trade in Table 1 and for merchandise trade only in Table 2. The excess of exports or imports does not, on either of these bases, represent the balance of trade. The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis. Further adjustments are required to obtain an estimate of Australia's total balance of payments. Information on these estimates will be found in statistical bulletins relating to balance of payments.

COUNTRY OF CONSIGNMENT OR ORIGIN

9. *Country of consignment* referred to in export tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported *For orders*.

10. *Country of origin* referred to in import tables means the country of production of goods imported.

COMMODITY CLASSIFICATIONS

11. In providing monthly export and import statistics it has been found impracticable to provide details for every *Australian Export Commodity Classification* (A.E.C.C.) item or *Australian Import Commodity Classification* (A.I.C.C.) item. Consequently, trade statistics have been published in this bulletin by reference numbers which correspond to divisions, groups and selected commodities of the A.E.C.C. and A.I.C.C. Copies of the A.E.C.C. or A.I.C.C., may be obtained from offices of the Bureau in Canberra and in each capital city.

TREATMENT OF AMENDMENTS

12. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this Bulletin. For this reason, monthly figures published in all issues for the current financial year-to-date will not necessarily add to the year-to-date figures shown in this issue.

ROUNDING

13. Any discrepancies between totals and sums of components in tables are due to rounding.

SPECIAL PERIODICAL RETURN SYSTEM

14. A subscription service is available on application to this Bureau to provide for the particular detailed requirements of individual users of overseas trade statistics. These special periodical returns show trade according to items of the Australian Export and Import Commodity Classifications or the statistical key code dissections of Australian Customs Tariff items and are obtainable monthly or quarterly. A nominal charge is made which varies depending on the amount of detail required.

SEASONAL ADJUSTMENT

15. Original and seasonally adjusted monthly series of total exports and imports are shown in Table 1 on page 5. In the seasonal adjustment account has been taken not only of normal seasonal factors, but additionally, of trading-day effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of Easter which may, in successive years, affect figures for different months. However, since these series are subject to large irregular influences (including changes in the composition of exports), which are not removed by seasonal adjustment, particular care should be exercised in interpreting month-to-month movements.

Details of methods used in seasonally adjusting monthly series of total exports and imports and other series published by the Bureau are given in *Seasonally Adjusted Indicators* (Reference No. 1.10).
