EXPLANATORY NOTES

Introduction

This publication contains monthly and year-to-date information on government revenue collected on imported goods, in the form of customs duty, and on goods manufactured in Australia, in the form of excise duty. In addition some information is provided on export duty paid on coal and uranium exports and primage duty paid on imported goods. Statistics for 1982-83 may be amended as a result of continuing quality checks on overseas trade data. Although these amendments usually have little effect on broad aggregate statistics they may have a significant effect on individual commodity statistics. For this reason, statistics for 1982-83 should be regarded as preliminary and subject to revision.

Source of data

2. Details of customs, primage and export duty payable are compiled by the ABS from documentation submitted by importers, exporters or their agents to the Australian Customs Service.

3. Details of excise duty payable are compiled by the ABS from documentation submitted by Australian manufacturers to the Australian Customs Service. Further details on, or copies of, the Excise Tariff are available from the the Australian Customs Service, Department of Industry and Commerce, Canberra or the Customs house in each State.

Statistical period

4. The statistical month for the statistics in this publication is the month in which documents were passed by the Australian Customs Service for processing by the ABS. For customs duty this may not be the month of arrival in Australia of the imported goods or the month in which duty was actually paid. Similarly, for excise duty this may not be the month in which the goods were manufactured or the month in which the duty was actually paid.

5. Attention is drawn to the fact that delays in the receipt of Customs documents for petroleum products can have a significant effect on recorded monthly excise revenue. See Table 1, footnote (c).

Description of terms

6. Customs duty: Duty paid under the Customs Tariff Act 1966 on imported goods entering Australia for home consumption. Duty is paid when the goods are cleared for home consumption which can be either on arrival in Australia or, if the goods have been stored in a Customs approved bonded warehouse, upon clearance from the warehouse.

7. Excise duty: Duty paid under the Excise Act 1975 on certain goods manufactured in Australia.

8. Primage duty: An ad valorem duty imposed in addition to the normal rates of duty on specified imported goods.

9. Export duty: Duty levied on a few specific export commodities to be paid prior to exportation, or as the Collector of Customs determines. (Currently, coal and uranium attract export duty, see Tables 9 and 10.)

10. Refunds and drawbacks: A claim for refund of duty arises in most cases because goods on which duty has been paid are subsequently granted by-law admission. Claims can also arise because of goods being damaged during shipment, short-shipment of goods (i.e. the expected shipment on which duty was paid was larger than the actual shipment), or where an importer overestimates the duty payable and is subsequently reimbursed. A claim for drawback arises when goods on which duty has been collected are subsequently exported or re-exported.

11. State: The State details shown in this publication refer to the State in which the relevant documents were lodged with the Australian Customs Service i.e. they represent the State in which duty was paid and refer to amounts collected in each State. It is important to note that excise duty levied on a particular commodity may have been paid in a State other than the State in which the commodity was consumed. For these reasons State figures shown should not be taken as an accurate measure of consumption or usage in that State.

12. Quantity: Quantities shown in this publication are those quantities of imported and locally manufactured goods which attract duty. Quantities for DUTY FREE items are excluded.

13. Petroleum credits: Australian government departments, most Commonwealth authorities and all diplomatic missions can claim a refund of the duty paid on certain petroleum products. As details of these refunds are not available to the ABS, refunds and drawbacks statistics on petroleum products contained in this publication are understated and net revenue statistics overstated, on this account.

OTHER INFORMATION AVAILABLE

14. Special returns service: Subscribers to this service can receive computer produced printout of foreign trade statistics at a particular commodity level in one or more of a limited number of formats, for a charge consistent with the level of detail required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

15. Microfiche service: Foreign trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported at various levels of aggregation. This service is recommended where the subscriber wishes to obtain foreign trade details for a large number of commodities.

16. Magnetic tape: Statistics for imports, exports and import clearances are available on 9-track magnetic tape approximately 4 weeks after the end of the reference period. Documentation regarding the content and structure of these tapes is available from the ABS Trade and Shipping Section in Canberra.

17. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Relevant application forms and information papers for these services are available from the ABS Trade and Shipping Section in Canberra or any ABS State office. Payment in advance is required for each of these services.

Related publications

18. Other ABS publications which may be of interest include:

(a) Excludes export duty. See paragraph 9 of Explanatory Notes.
(b) On 1 January 1982, the number of tariff classifications subject to primage duty was reduced from 120 to 5, and from 1 January 1983 no tariff classifications are subject to primage duty.
(c) Since monthly excise revenue statistics are compiled from documents passed to the ABS during the month in question, delays in receiving documents can cause sharp increases or decreases in monthly revenue data. The months affected by these delays, particularly in the receipt of documents relating to crude petroleum, are April and June 1982.
