EXPLANATORY NOTES

This publication provides quarterly estimates of the main components of gross domestic product and national expenditure at current and constant prices from September quarter 1959 to June quarter 1978. It thus extends to earlier periods, on a consistent basis, some of the series given in *Quarterly Estimates of National Income and Expenditure, Australia, December Quarter 1979* (5206.0). The estimates, as well as the definitions and concepts, are consistent with those of the forthcoming *Australian National Accounts, National Income and Expenditure, 1978-79* (5204.0), selected details of which have been published in three preliminary statements (5201.0, 5202.0 and 5203.0).

2. The estimates at constant prices presented in this publication are expressed on two different bases. From September quarter 1959 to June quarter 1975 estimates are based on average 1966-67 prices, while for the period September quarter 1966 to June quarter 1978 they are based on average 1974-75 prices. The differences between the growth rates exhibited by the estimates at average 1974-75 prices and those at average 1966-67 prices are attributable to two sources: (i) the different weighting patterns being used because of changes in relative prices between 1966-67 and 1974-75 and (ii) the use of improved data sources and methodologies in deriving the estimates at average 1974-75 prices.

3. This publication contains series of implicit price deflators of selected major aggregates contained in the domestic production account. The implicit price deflator series are derived from seasonally adjusted series at current and average 1974-75 prices. A discussion of the

nature of implicit price deflators and factors to be borne in mind in their interpretation is included in the December quarter 1977 publication (5206.0).

4. It should be noted that estimates at both current and constant prices for the more recent quarters may be revised by subsequent quarterly publications and that quarterly estimates for some past years may be affected by later revisions to annual totals. The reliability and interpretation of the estimates are discussed in more detail in the related quarterly (5206.0) and annual (5204.0) publications.

5. Brief descriptions of the items, together with notes and references on seasonal adjustment, are given in the December quarter 1977 publication (5206.0).

6. The procedures used in preparing this publication may occasionally result in rounding differences between figures in this publication and corresponding figures in other publications.

Related publications

7. Current publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

Symbols and other usages

8. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
