NOON 23 FEBRUARY 1983

VALUE OF AGRICULTURAL COMMODITIES PRODUCED, AUSTRALIA, SECOND ESTIMATES, 1981-82

PHONE INQUIRIES *for more information about these statistics—contact Ms Karen Morrison on Canberra (062) 52 5348 or any of our State offices.*

other inquiries including copies of publications—contact Information Services on Canberra (062) 52 6627 or in any of our State offices.

MAIL INQUIRIES *write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616 or any of our State offices.*

EXPLANATORY NOTES

This publication contains preliminary information on the value of agricultural commodities produced by States for the year 1981-82, together with a summary of Australian totals for each of the years back to 1979-80. Final estimates for 1981-82 will be contained in the publication *Value of Agricultural Commodities Produced, Australia, 1981-82* (7503.0), which is expected to be released in August of this year. Preliminary estimates for 1982-83 are expected to be available by July of this year and will be contained in the publication *Value of Agricultural Commodities Produced, Australia, First Estimates, 1982-83* (7501.0).

Information sources

2. **Quantity data.** The estimates contained in this publication are, for most commodities, derived from preliminary quantity data collected in the 1981-82 Agricultural Census. Information covering such commodities as livestock slaughtering, dairy produce, and beekeeping is obtained from separate collections and from organisations such as the Department of Primary Industry, Australian Dairy Corporation, etc.

3. **Price data.** Quantity data is valued at 1981-82 price quotations current at December 1982. The method of collection of relevant prices for the costs of marketing of agricultural commodities is dependent on available data sources and varies between States and between commodities.

Where a statutory authority handles marketing of the whole or portion of a product (e.g. Australian Dairy Corporation, Australian Wheat Board, Australian Barley Board), data are usually obtained from this source. Information is also obtained from marketing reports, wholesalers, brokers and auctioneers.

Period covered

4. The period covered in this publication with regard to crops refers, in general, to the season ended 31 March 1982, and for the remaining commodities refers to the year ended 30 June 1982. For all commodities, values are in respect of production during the year (or season) irrespective of whether or when payments are made. For that portion of production not marketed (e.g. hay grown on farm for own use, milk used in farm household, etc) estimates are made from the best available information and, in general, are valued on a local value basis.

Definitions of terms used

5. The following are brief definitions of the terms used:

(a) **Gross value of commodities produced** is the value placed on recorded production at the wholesale prices realised in the market place. In general the market place is the metropolitan market in each State. In cases where commodities are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the market places.

(b) **Marketing costs** include freight, cost of containers, commission and other charges incurred in marketing. As accurate information on marketing costs is difficult to obtain for many items, differences between States in the relationship of local to gross value should be treated with some reserve.

(c) **Local value of commodities produced** is the value placed on commodities at the place of production and is ascertained by deducting marketing costs from the gross value of commodities produced.

Gross and local values of agricultural commodities produced involve some duplication as they include certain agricultural commodities which are consumed as raw materials to produce other agricultural commodities (e.g. hay consumed by livestock).

(d) Values include any relevant subsidy and bounty payments. Transactions of the Wheat Industry Stabilisation Fund have not been taken into account in the valuation of wheat.

(e) Livestock slaughtering and other disposals. Values for 'livestock slaughtering and other disposals' are published as one figure but include two distinct components:

(i) Value of livestock slaughtered

(ii) Value of net exports (imports are regarded as negative exports)—the total value of livestock intended for slaughter in adjacent State(s) and livestock exported overseas whether for slaughtering or breeding.

Data on value of livestock slaughtering by State of slaughter is available on request.
