13. At average 1966-67 prices	16
14. Selected income aggregates (original and seasonally adjusted)	17
15. Implicit price deflators (derived from seasonally adjusted current price and average 1974-75 price series)	18,19

EXPLANATORY NOTES

This supplement provides quarterly estimates of the main components of gross domestic product and national expenditure at current and constant prices from September quarter 1959 to June quarter 1977. It thus extends to earlier periods, on a consistent basis, some of the series given in *Quarterly Estimates of National Income and Expenditure, December Quarter 1977* (5206.0). The estimates, as well as the definitions and concepts, are consistent with those of the forthcoming *Australian National Accounts, National Income and Expenditure, 1976-77* (5204.0), selected details of which have been published in three preliminary statements (5201.0, 5202.0 and 5203.0).

Estimates at constant prices given in this bulletin are expressed on two bases. Those for the period September quarter 1959 to June quarter 1975 are based on average 1966-67 prices and those for the period September quarter 1966 to June quarter 1977 are based on average 1974-75 prices. In rebasing the estimates from the basis of average 1966-67 prices to that of average 1974-75 prices, the opportunity was taken to review the previously used methodology and to draw upon a significantly wider range of price indexes and data on expenditure patterns that has become available in recent years. The differences between the growth rates exhibited by the estimates at average 1974-75 prices and the estimates at average 1966-67 prices are therefore attributable to two sources: the rebasing of constant price series to average 1974-75 prices, and the use of new methodologies and new data sources in revaluing the current price estimates.

This bulletin contains series of implicit price deflators of selected major aggregates contained in the domestic production account. The implicit price deflator series are derived from seasonally adjusted series at current and average 1974-75 prices. A discussion of the nature of implicit price deflators and factors to be borne in mind in their interpretation is included in the December quarter 1977 bulletin (5206.0).

It should be noted that estimates at both current and constant prices for the more recent quarters may be revised by subsequent quarterly bulletins and that quarterly estimates for some past years may be affected by later revisions to annual totals.

Brief descriptions of the items, together with notes and references on seasonal adjustment, are given in the December quarter 1977 bulletin (5206.0).

The procedures used in preparing this bulletin may occasionally result in rounding differences between figures in this bulletin and corresponding figures in other publications.

Discrepancies between totals and sums of components in the tables are due to rounding.

All publications produced by the ABS are listed in *Catalogue of Publications 1977* (1101.0) which is available free of charge from any ABS office.
