-----	----------------------	----

Preface

Particulars of new motor vehicles (excluding motor cycles) registered during the year ended 31st December, 1951 have been compiled in collaboration with Government Statisticians from details made available by the Road Transport Authorities in each State and are published herein.

Tables for the Australian Capital Territory are included in this bulletin but no details are available for Northern Territory.

A change in the method of collection and tabulation of data was introduced as from 1st July, 1951. Because of resulting differences in definition and coverage it was not practicable in all cases to combine the relevant tabulations for each period of six months for the purpose of presenting composite tables for the year 1951 and it has therefore been found necessary to publish separate tables for each half of the year, giving combined yearly tables in abridged form where possible.

Particulars of each set of tables for the two six-monthly periods and the year are given below.

Six Months ended 30th June, 1951.

As in previous annual publications covering registrations of new motor vehicles, details for each make are shown under the following headings:-

- (1) Motor Cars. (2) Utilities. (3) Panel Vans. (4) Trucks, Lorries, etc.
- (5) Other and Not Stated.

The separate tabulation of Sedans as well as Total Motor Cars is a new feature of the tables.

During this period ambulances and hearses were classified as "Other and Not Stated" and Commonwealth-owned vehicles were excluded from the tabulations.

Following past practice, particulars of each make were classified according to horse-power groupings.

The Traffic Act of Western Australia specifies that the Dendy Marshall formula shall be used in calculating horse-power for the purpose of vehicle registration in that State. The formula is as follows:-

- (1) If cylinder is measured in inches - Horsepower =

$$\frac{(\text{Diameter of Cylinder})^2 \times \text{Number of Cylinders} \times \text{Stroke}}{12}$$
- (2) If cylinder is measured in millimeters - Horsepower =

$$\frac{(\text{Diameter of Cylinder})^2 \times \text{Number of Cylinders} \times \text{Stroke}}{200,000}$$

The application of the Dendy Marshall formula has the effect of reducing the specified horse-power of the vehicle concerned by from 2 or 3 h.p. in the case of light models to 10 h.p. in the case of heavier models.

In the metropolitan area of Western Australia the horse-power for all motor vehicles has been recorded according to the Dendy Marshall formula during this period, but for some country areas the normal vehicle horse-power rating has been shown.

Owing to this anomaly the figures relating to horse-power in respect of Western Australia, although in the main according to the Dendy Marshall formula, nevertheless include some horse-powers according to Manufacturers' or R.A.C. ratings.

Six Months ended 31st December, 1951.

The new system of collection and tabulation which has operated from 1st July, 1951 permits of the preparation of tables in greater detail.

Particulars are shown herein for every make registered.

The difficulty caused by the use of the Dondy Marshall formula for horse-power in Western Australia has been overcome by tabulating registrations for each make of motor vehicle under R.A.C. ratings. A summary of total registrations of cars and of commercial vehicles classified according to horse-power groupings is included in the tables below.

Cars have been classified according to Sedans and Total while Motor Vehicles other than Cars appear under the following headings:-

- (1) Utilities. (2) Panel Vans. (3) Lorries. (4) Omnibuses.
(5) Station Wagons. (6) Other Vehicles.

For purposes of the tabulations since 1st July, 1951 a more comprehensive list of definitions has been adopted. The definitions are as follows:-

CARS

(a) SEDAN

Coupe
Limousine
Saloon
Sedan
Sedan Coupe
Sports Sedan

(b) OTHER

Ambulance
Calèche
Convertible
Hearse
Open Sports
Roadster

OTHER MOTOR VEHICLES

(a) UTILITY

Coupe Utility
Pickup
Utility

- (b) PANEL VAN is defined as a "van body moulded in one unit with the cab integral".

(c) LORRY

Articulated Truck	Lorry Type Tractor	Skeleton Wood Cart
Bolster Truck	Low Loader	Timber Jinker
Cab and Chassis	Ment Wagon	Tipper
Cowl and Chassis	Mobile Winch	Tray
Furniture Van	Platform Truck	Tray Top and Sides
Horse Float	Prime Mover	Truck
Log and Winch Truck	Sanitary Wagon	Wood Chassis
Lorry	Semi Trailer	

(d) OMNIBUS

Coach
Omnibus
Parlour Coach

(e) STATION WAGON

Estate Car
Station Coupe
Station Wagon

(f) OTHER

Concrete Agitator	Straddle Truck
Milk Wagon	Street Flusher
Petrol Wagon	Tanker
Spray Wagon	

Vehicles such as the Land Rover and Willys Jeep are included under the heading of the body type constructed on the chassis but in general these vehicles are classified as "Utility".

As ambulances and hearses are almost invariably built on car chassis it was decided to classify them as Cars as from 1st July, 1951.

Commonwealth-owned vehicles have been included in the tabulations since that date.

Year ended 31st December, 1951.

Registrations of new motor vehicles are presented under the same headings as to type and the same makes as were adopted for the first six months of 1951. It was impracticable however to combine the two six-monthly tabulations giving details of horse-power.

Commonwealth-owned vehicles are included for the second half of the year only.

The tables throughout this and previous bulletins exclude the following:-

Air Compressor	Grader
Bull-dozers	Industrial Barrow
Concrete Mixer	Mobile Crane
Electric Welding Plant	Rotary Hoe
Fork or Air Lift	Street Sweeper
Front End Loader	Tractor

Separate registrations of trailers or any other vehicle without an engine are also excluded.
