EXPLANATORY NOTES

Introduction

This publication contains monthly and year-to-date statistics of Australia's exports of major commodities and their principal markets. The commodities included in this publication are listed on page 4. Statistics for 1981-82 may be amended as a result of continuing quality checks on overseas trade data. Although these amendments usually have little effect on broad aggregate statistics, they may have a significant effect on individual commodity statistics. For this reason, statistics for 1981-82 should be regarded as preliminary and subject to revision.

Source of data

2. These statistics are compiled by the Australian Bureau of Statistics from information contained in export entries and returns submitted by exporters or their agents to the Bureau of Customs as required by the Customs Act.

Statistical concepts

3. The statistics of exports presented in this publication are recorded on a general trade basis, i.e. export figures include both Australian produce and re-exports.

Australian produce is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. Minor operations include blending, packaging, bottling, cleaning, sorting, husking and shelling.

4. The following are excluded from recorded export statistics:

- (a) direct transit trade, i.e. goods being trans-shipped or moved through Australia for purposes of transport only;
- (b) bunkers and stores supplied to vessels and to aircraft prior to departure overseas;
- (c) migrants' and passengers' effects exported and parcels post exports of small value, for which Customs entries are not required;

- (d) certain materials under inter-governmental agreements for defence and similar projects for which Customs entries are not required;
- (e) vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries;
- (f) the sale of any vessel and/or aircraft originally purchased for use on overseas routes;
- (g) fish and other sea products landed abroad directly from the high seas from Australian vessels;
- (h) export consignments where the value of the goods in each transaction is less than \$250.

Statistical period

5. Exports are recorded statistically in the month in which the entries are both finalised by the Bureau of Customs and passed to the ABS for further processing. Regular exporters or their agents may provide details of their export shipments on a periodic rather than an individual shipment basis by submitting weekly or monthly returns. These periodic returns must be submitted to the Bureau of Customs within seven days of the end of the period in question covering all shipments during that period. All other exporters are required to report each individual shipment prior to the ship's departure. Approximately 90 per cent of monthly export values are recorded on periodic returns. The statistical month for Customs outports (generally ports other than those at which the main Customs Office in each State is located) closes on the 21st of each month, whereas for mainports the statistical month is the calendar month.

6. Because of these factors export statistics for a particular month do not necessarily represent entries lodged or commodities actually exported during that month. Analysis of past data has shown that in aggregate approximately 40 per cent of export trade by value for a particular month reflects actual

shipments during that month, 55 per cent by value was actually exported during the previous month with the remaining 5 per cent by value exported in earlier months. For individual commodities the percentage by value representing actual exports in a month may vary considerably.

Valuation

7. Goods actually sold to overseas buyers prior to shipment are valued at the free-on-board (f.o.b.) Australian port of shipment equivalent of the actual price at which the goods were sold. Goods shipped on consignment are valued at the f.o.b. Australian port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched for sale.

8. The recorded value of exports includes the value of the outside package, other than international containers used for containerised cargo.

Commodity classification

9. Exports are classified according to the items of the Australian Export Commodity Classification (AECC) (1203.0) which, from 1 July 1978, has been based on the Standard International Trade Classification, Revision 2. A detailed description of the commodity items included in this publication is contained in the AECC. Copies of, or extracts from, this classification may be obtained from offices of the ABS in Canberra and in each capital city.

Country

10. For the purposes of overseas trade statistics, a country is defined as a geographical entity which trades, or has the potential to trade, with Australia in accordance with Australian Customs provisions. External territories under Australian administration are treated separately whilst self-governing territories and dependent territories under the administration of other countries may be treated as individual countries in Australian overseas trade

statistics. For exports, country refers to the country to which the goods were consigned at the time of export. Where the country of consignment is not determined at the time of export, goods are recorded as exported. For orders and in those cases where it was found to be impossible to determine the destination, as Destination unknown.

Revisions to previous figures

11. Where revisions have been made to the previously published figures for earlier months of the current financial year, appropriate adjustments are made to the year-to-date figures shown in this publication. For this reason, monthly figures published in previous issues for the current financial year will not necessarily add to the year-to-date figures shown in the latest issue.

12. Statistics shown in this publication were the latest available at the time of compilation. However, revisions may have since been made to the statistics, which could result in differences between figures in this publication and those in other related publications, e.g. Exports by Commodity Divisions, Australia (Preliminary) (5402.0).

Other information available

13. Special returns service : Subscribers to this service can receive computer produced printout of overseas trade statistics at commodity specific level in one or more of a limited number of formats, for a charge consistent with the level of detail required. This service is recommended where up to fifty specific commodity items are required on a regular basis.

14. Microfiche service : Overseas trade statistics are also available on microfiche in a variety of tabular formats. Each tabular format covers all commodities exported or imported, at various levels of aggregation. This

service is recommended where the subscriber wishes to obtain overseas trade details for a large number of commodities.

15. To meet subscribers' needs special returns and microfiche are available on a monthly, quarterly or less frequent basis. Payment in advance is required for both these services and relevant application forms and/or information papers are available from the ABS Overseas Trade Section in Canberra, or from each ABS State office.

Related publications

16. Other ABS publications which may be of interest include :

Exports, Australia (5404.0) - issued monthly

Exports by Mode of Transport, Australia (5415.0) - issued quarterly

Export Price Index, Australia (6405.0) - issued monthly

Minerals and Mineral Products, Australia (8404.0) - issued monthly

17. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages

- nil or rounded to zero

18. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
