Acknowledgments

The materials used in preparing this thesis have been collected from many sources in Australia and England.

In Australia, permission to use business records retained by them was readily given by Goldsbrough, Mort & Co. Ltd., the Australia and New Zealand Bank Ltd., T.S. Beaumont & Son Pty. Ltd., and the Victorian and South Australian Wool-buyers' Association, all of Melbourne, and by the Australian Pastoral Co. Ltd. (through the managing agents, Gibbs, Bright & Co. Ltd. of Melbourne). The Librarians of the Mitchell Library, Sydney, and the Victorian Public Library made available for my use manuscript collections, noted in the bibliography, which are in their care. Many people in these concerns, and in these and other libraries, have shared their knowledge with me and endeavoured patiently to correct my misconceptions. Messrs. G.A. Manning, T. Young, R.S. Southey, D. Gibbs, D.H. Merry, C. Greenwood and G. Dewez, in particular have been of great assistance.

In England, Robert Jowitt & Sons Ltd. of Bradford, and Browne, Eagle & Co., Hughes, Willans, Irwell & Co. and Kreglinger and Fernau Ltd. of London kindly consented to my use of their records. Manuscript collections from the Brotherton Library in the University of Leeds were made available to me, and many publications not procurable in Australia were held by the British Museum, the Goldsmiths' Library, the libraries of the Royal Empire Society and the Royal Statistical Society. The Hon. G.C. Gibbs and Messrs. R. Mackenzie and G. Renouf shepherded me through the City of London.

A financial grant from the Commonwealth Bank of Australia made it possible for me to use these libraries and records in England. It also made possible a fruitful contact with workers in the Dean Research Project and the Department of Economics at the University of Leeds and in the London School of Economics.

To all these organisations and persons I tender my deep thanks.
