AUSTRALIAN STATISTICS

OF

TRANSPORT AND COMMUNICATION.

No. 34—1942-43.

PREFACE.

The present issue, which is the thirty-fourth of the series, furnishes particulars of Government Railways; Tramways; Motor Vehicles; Civil Aviation; Traffic Accidents; Shipping; Posts and Telegraphs; Telephones; and Wireless.

The section dealing with Shipping, which was excluded from previous issues, has been reinserted. Information is given for years up to and including 1941-42, with details for the years 1939-40, 1940-41 and 1941-42. Bulletin No. 33 contains details for the year 1938-39.

My thanks for information supplied are due to the Statisticians and the Railway and Tramway authorities in the several States, the Department of Trade and Customs, the Navigation Department, the Postmaster-General's Department, the Department of Civil Aviation, and the several Departments concerned in the Registration of Motor Vehicles and in the recording of Traffic Accidents.

I also desire to express my appreciation of the work done in the preparation of this Bulletin by Mr. J. M. Jones, B.A., officer in charge of the compilation of Transport and Communication Statistics, and the staff under his control.

S. R. CARVER,
Acting Commonwealth Statistician.

(a) Adjusted to include Queensland proportion of Grafton-South Brisbane Line capital cost, previously excluded. (b) Excludes Commonwealth proportion of Grafton-South Brisbane Line capital cost, i.e., the residue after the New South Wales and Queensland proportions have been included for their respective States. (c) Owing to greater uniformity having been obtained the figures from 1935-36 onward are not entirely comparable with those for previous years.

V.—TRAFFIC ACCIDENTS.

NOTE.—For the following reasons caution should be exercised in drawing conclusions from the figures presented in this section:—

- (1) Owing to differences in legislation regarding the reporting of accidents and in the degree to which the legislation can be enforced it is not possible to make a proper comparison between States of the number of accidents registered and, to a lesser extent, of the number of persons injured. Figures for New South Wales, for instance, are comparatively low, because in that State minor accidents need not be reported. In other States, where the figures are very high, it is apparent that most accidents are reported.
- (2) The relating of the number of accidents and of persons killed and injured to population and motor vehicles registered may be criticised, but at present no better method of obtaining State comparisons is available.
- (3) The classification according to cause of accident must be regarded as approximate only. Contributory causes and conflicting or incomplete evidence make precise classification difficult.
- (4) While most States have considerable information available, it is possible to prepare comparable tables for all States for a small proportion of the information collected, because of differences in material available, compilation, &c.

(e) It should be noted that as accidents, as classified according to one type of vehicle may also be classified according to another, totals cannot be obtained by adding across. For instance, in the case of Victims there were 7,004 accidents in which motor vehicles (other than motor cycles) and any other Object were involved, and 505 in which motor cycles and any other Object were involved, but in 255 of the motor motor vehicle (other than motor cycles) also were involved, and therefore this figure (255) is included in the figure 7,004. VL.—SHIPPING.

NOTE.—Information contained herein as to Shipping for the year 1941-42 is incomplete because of these factors:—

- (i) Customs returns have not been obtained for the ports of Thursday Island (Queensland), Broome (Western Australia), and Darwin (Northern Territory), since February, March and April, respectively, of 1942, and particulars of subsequent traffic are therefore not available;
- (ii) The returns of certain ports do not include particulars of vessels carrying war materials only, because the entries and clearances of such vessels are not required by the Customs Department; and
- (iii) The returns of other ports include the numbers and net tonnages of vessels carrying war materials only, but do not include any details regarding the amount of cargo discharged or shipped in respect of such vessels.

No. 45.—Oversea, Interstate and Total Shipping Entered at Principal Australian Ports, 1939-40 to 1941-42.

Note.—The following tables classify the entries of overseas and interstate vessels according to the type of voyage on which each vessel has entered. The heading Overseas Vessels includes particulars of vessels trading between Australia and New Zealand and the Islands while Interstate Vessels refers to those not trading beyond the Australian coast. Totals for all vessels entering, including purely intra-state, are also shown.

Prior to the war it was occasionally found necessary to change the classification of vessels because of changes in routes, e.g., a vessel, that for six months of the year had been trading on the Australian coast, might for the remaining six months be directed overseas. At the present time this type of occurrence, with variations, has increased to the extent of rendering accurate classification difficult. However, classification is as accurate as these circumstances and the information available permit.

1939-40.
