EXPLANATORY NOTES

Introduction

This publication presents statistics of sales and stocks of certain types of new agricultural machinery.

2. These statistics have been derived from returns collected from 'principals' marketing new agricultural machinery. 'Principals' are businesses in Australia which market new agricultural machinery under their own name (or trade name(s)) or import new agricultural machinery and market it under the name (or trade name(s)) of overseas businesses.

Definitions

3. *Sales* represent new agricultural machinery that 'principals' or their State distributors have sent to their agents or dealers in Australia during the quarter. Direct sales by 'principals' or their State distributors to end users in Australia are included. Exports of new agricultural machinery are excluded.

4. *Stocks* represent implements and machines held by the principals and their State distributors at the end of the period indicated. Stocks held by agents and dealers are excluded. Stocks in transit within Australia are included in the stocks of the State for which they are intended.

5. *Components* which have not yet been assembled into complete machines and *equipment not requiring power units* are excluded from these statistics.

6. *Linkage type (tractor mounting type)* includes semi-mounting type.

7. *Disc ploughs* includes disc cultivating ploughs and disc tillers.

8. *Blade ploughs (sweep ploughs)* are implements used for minimum tillage and consisting of widely spaced tines fitted with wide sweeps or connected by blades which cut roots below ground level without disturbing top soil.

9. *Chisel ploughs* includes implements of the type which usually have narrow pointed tines placed well apart (30cm or more) and which can usually penetrate to a depth of 20cm or more.

10. *Tine scarifiers* includes implements primarily designed for primary cultivation as 'scarifiers'.

11. *Tine cultivators* includes implements primarily designed for secondary cultivation as 'cultivators'.

12. *Tine harrows* includes driven tine, diamond and stump jump harrows. Excludes drill and following harrows.

13. *Disc harrows* excludes disc implements capable of being used for both ploughing and harrowing.

14. *Pneumatic (air) seeders* excludes pneumatic seeders sold mounted on an implement, which is shown under its own category.

15. *Agricultural mowers (rotary)* excludes cylinder reel types.

16. *Pick-up bale loaders for baled hay* excludes combination stacker-loaders.

17. *Bale elevators and stackers* includes units for use at stack site.

18. *Hammer mills (farm type)* includes roughage mills.

Related publications

19. Additional statistics on agricultural machinery are available from this Bureau as follows:

Manufacturing Commodities, Principal Articles Produced, Australia, 1983-84 and 1984-85 (8303.0) contains statistics on production and assembly within Australia of various types of agricultural machinery.

Foreign Trade, Australia, Exports (5436.0) which contains details of exports according to type and country of destination.

Foreign Trade, Australia, Imports (5437.0) which contains details of imports according to type and country of origin.

Sales and Stocks of New Tractors, Australia (8507.0) which contains quarterly details of sales of new tractors.

20. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications advice are available from any ABS office.
