COMMONWEALTH SALES TAX.

NOTE.—An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree. Insufficient information is available to enable adjustments to be made to the crude figures on this account. Monthly totals are compiled on a basis comparable with the monthly averages for preceding years.

(a) The general rate was 4 per cent. to 21st September, 1938 and 5 per cent. to 8th September, 1939. The 10 per cent. rate came into operation on 15th November, 1946, and superseded the general rate of 12½ per cent., which, together with the 25 per cent. rate, operated from 1st May, 1942. On 8th September, 1949, the general rate was reduced to 8½ per cent. From 13th October, 1950, additional rates of 10 per cent. and 33½ per cent. were introduced. On 27th September, 1951, the general rate was increased to 12½ per cent. and rates of 20 per cent., 50 per cent. and 66½ per cent. were introduced. From 7th August, 1952, the rate of 66½ per cent. was reduced to 50 per cent. and the rate of 25 per cent. eliminated. From 9th September, 1953, the rates of 50 per cent., 33½ per cent. and 20 per cent. were eliminated and the rate of 16½ per cent. was introduced. From 19th August, 1954, the rate of 10 per cent. was re-introduced.

NOTE.—In respect of New South Wales the Consolidated Revenue Fund and Business Undertakings—Railways, Tramways and Omnibuses and Sydney Harbour Trust Section of the Maritime Services Board—included in the Annual Budget Papers are represented in the following tables. The following adjustments have been made to the Budget figures for 1954-55 to obviate duplications within the combined accounts and to obtain uniformity with the other States: (i) Treasury transfers to Railway revenue £1,000,000 and (ii) Commonwealth Hospital Benefits £2,380,000 paid to Consolidated Revenue and then distributed to hospitals, have been deducted from the Budget Revenue total of £196,458,000 and from the Expenditure total of £201,154,000. In addition, £2,568,000 has been deducted from expenditure on account of debt charges not re-couped to Consolidated Revenue Fund from Business Undertakings and on account of contributions from Consolidated Revenue Fund towards losses on Trainway and Omnibus Services. Although contributions towards accumulated losses of Business Undertakings have been made from Consolidated Revenue Fund in previous years, no adjustment to aggregate expenditure was made until 1952-53. Particulars for other States are restricted to the transactions of the Consolidated Revenue Fund.

The following Treasury transfers to Business Undertakings have been excluded from Revenue and Expenditure—New South Wales (as stated above)—Railways £1,000,000; Victoria—Railways £2,148,000 and South Australia—Railways £3,200,000.

(a) Refers to those accidents (known to the police) which occurred in public thoroughfares and which resulted in death or in bodily injury to any person to an extent requiring medical or surgical treatment, or in damage in excess of £10 to property. It should be noted, however, that the comparability of the statistics between States, even on this basis, still depends on the degree to which accidents so defined are in fact recorded by the police. Under legislation passed in Tasmania on 10th August, 1954, it is no longer obligatory to report accidents involving only damage to property. (b) Excludes Northern Territory.

(a) Without inter-state duplication. The figures represent the number of distinct organizations and inter-state groups of organizations in Australia. They do not represent the total number of organizations which are practically independent and self-governing.

AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 80 per cent. of total employment) and from estimates of the unrecorded balance. Pay of members of the armed forces is not included. An index of average weekly wage earnings, seasonally adjusted, is published in the *Monthly Review of Business Statistics*.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—As quarterly totals and averages are affected by seasonal influences comparisons as to trend should be made for complete years or corresponding periods of incomplete years.

(b) Automatic adjustment discontinued from 12th September, 1953 (following decision of the Commonwealth Court of Conciliation and Arbitration) until the first pay period in November, 1955 when it was reintroduced by an amendment to the Industrial Arbitration (Basic Wage and Standard Hours) Act assented to on 4th November 1955.

(e) The "living wage" declared for the metropolitan area is also adopted in country areas except at Whyalla where a loading of 5s. is generally payable. The "living wage" is subject to quarterly variation according to the amount of the general automatic quarterly adjustment in the Commonwealth basic wage (now discontinued) for Adelaide.

(f) The Western Australian Court of Arbitration each quarter announces the variation, if any, in the basic wage, after considering movements in the cost of living statements prepared by the Government Statistician.

(g) None declared but rates shown (Hobart) are those commonly adopted by Wage Boards.

(a) The index numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing, and food and groceries, since the cost in each group or combination in 1923-27 is made equal to 1,000.

(b) Rent. — The rent index numbers shown in the table above and elsewhere in this publication measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. They are "price" indexes in the strict sense, i.e., they are designed to measure only the "price" element in rent fluctuations. Rentals of new tenanted houses completed since the end of the war are not taken into account.

PRICE.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used in this index have in the main been obtained directly from manufacturers and merchants and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(Base of each Group: Average 3 years ended June, 1939 = 100.)

(a) Represents only such imported commodities as are included in the Wholesale Price Index. This index does not measure changes in price of imports generally. (b) Preliminary.

FARM PRODUCTION PRICE INDEXES.

The annual indexes shown in the following table relate to average "prices" of farm products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the indexes therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, &c., of products marketed. The indexes for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes shown below are the Revised Series (December, 1952) in which average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.

The preliminary indexes for 1954-55 are based mainly on the recorded or estimated movement in average values for the major farm products. They will be revised from time to time as further "price" data become available.

(a) Preliminary estimate.

EXPORT PRICE INDEX NUMBERS.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals and for wheat (from July, 1945 to September, 1951), the index of prices is derived from average value of current sales or shipments and hence shows some irregularity. From October, 1951, to July, 1953, the prices used for wheat are the estimated average realizations after weighting prices of quota and non-quota wheat. Prices adopted for months since August, 1953, are derived from available information of current sales.

RECENT TRENDS.

Reference to the group indexes shows the great fluctuations and the wide dispersion of prices of export commodities in recent years. Since wool is a predominant export (and comprises 45.63 per cent. of the Base Aggregate of the Index) fluctuations in wool prices obscure the effects which movements in prices of the other components have on the All Groups Index. For purposes of comparison the combined effect of price movements in these other components is shown separately in the column "All Groups excluding Wool".

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production in the case of gold) during the three years 1933-34 to 1935-36.

(g) For All Groups (excluding Gold)—applicable from 1936-37. (h) For All Groups (excluding Wool)—applicable from 1949-50. (i) Nominal. (j) Preliminary.

NOTE.—The index numbers above indicate satisfactorily the trends of export prices, but take no account of the relative quantities actually sold at the different prices ruling during each month. The impact of the price movements on current sales is indicated more directly by the Export Price Index (Changing Weights), published in the Monthly Review of Business Statistics. In computing this index, the "quantity multipliers" are the quantities actually exported in the months (or periods) to which the index numbers relate.

STATISTICAL SUMMARY—AUSTRALIA.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in the September, 1953 issue of the *Quarterly Summary of Australian Statistics*, pages 112 and 113.

(2) Most of the statistics in this summary relate to the periods shown in the table headings. In those comparatively few cases where the statistics relate to other periods, this is indicated in footnotes.
