EXPLANATORY NOTES

This bulletin contains, for each month from June, 1954 to June, 1962, particulars of the principal series of estimates of numbers of wage and salary earners in employment currently published in the monthly bulletin Employment and Unemployment.

2. The series herein are based on comprehensive data (referred to as "benchmarks") derived for the purpose from the Population Censuses of June, 1954 and June, 1961. Figures for periods between and subsequent to the two benchmark points of time are estimates obtained from three main sources, namely, (a) Pay-roll Tax returns; (b) returns from Government bodies; and (c) some other direct current records of employment (e.g. for hospitals). Data from these sources have been supplemented by estimates of the changes in number of wage and salary earners not covered by the foregoing collections.
 3. Particulars of employment obtained from other collections, such as the annual factory census and the censuses and sample surveys of retail establishments, have been used to check, and, where desirable, to revise estimates in relevant sections. Because the figures for periods subsequent to June, 1962 are still subject to further revision, they will be issued in a separate bulletin.
 4. The benchmark figures were derived from particulars recorded for individuals on population census schedules. The estimated monthly figures were derived mainly from reports supplied by employers, relating to enterprises or establishments. These two sources differ in some cases in scope and in reporting of industry; however, the industry dissection of the benchmark totals was adjusted, as nearly as may be, to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the Population Census of June, 1961.
 5. Pay-roll Tax returns are lodged at present by all employers paying more than £200 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1962). At June, 1954 this Act required employers paying wages of more than £80 a week to lodge returns. The exemption limit was raised to £120 a week from 1st September, 1954 and to the present level of £200 a week as from 1st September, 1957.
 6. Employees in rural industry and in private domestic service are not included in the estimates, because of the inadequacy of data.
 7. The figures herein relate to "Wage and Salary Earners" on payrolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.
 8. The prime purpose of this series is to measure, as nearly as may be with available data, monthly trends in employment in the defined field. The estimates are subject to less reliability for longer term measurement.
 9. For reasons of space it has not been possible to include certain monthly series, such as that showing employment in the main industry groups and sub-groups in each State. However, many of the State details will be found in the relevant publications of the State offices of the Bureau.
