FOREWORD

This supplement provides quarterly estimates of the main components of gross domestic product and national expenditure at current and constant prices from September quarter 1959 to June quarter 1972. It thus extends to earlier periods, on a consistent basis, some of the series given in *Quarterly Estimates of National Income and Expenditure, December Quarter 1973* (Reference No. 7.5) and incorporates revisions advised in corrigenda to that bulletin which was issued on 8 May 1974. The estimates, as well as the definitions and concepts, are consistent with those of the forthcoming *Australian National Accounts, National Income and Expenditure 1972-73* (Reference No. 7.1), selected details of which have been published in three preliminary statements (Reference Nos 7.2, 7.3 and 7.4).

It should be noted that estimates for the more recent quarters may be revised by subsequent quarterly bulletins and that quarterly estimates for some past years may be affected by later revisions to annual totals.

Brief descriptions of the items, together with notes and references on seasonal adjustment, are given in the December quarter 1973 bulletin (Reference No. 7.5).

Discrepancies between totals and sums of components in the tables are due to rounding.
