

OVERSEAS TRADE

(PRELIMINARY)

1969-70

PART 1—EXPORTS

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS
CANBERRA, AUSTRALIA

Ref. No. 8.15

OVERSEAS TRADE

OVERSEAS TRADE

1969-70

PREFACE

The statistics in this Bulletin are preliminary and are published to meet the urgent demand for up-to-date details of Australia's overseas trade. The annual printed bulletin "Overseas Trade" to be issued later this year will contain final and more detailed statistics.

To reduce the size of the volume to manageable proportions, separate details are given only for those countries for which the exports or imports were valued at 40,000 or more for any particular statistical item. The remaining countries are grouped under "Other countries".

The Bulletin consists of the following sections:

- Part 1 : Exports -
- (i) Statistical Items by Countries of Consignment, pp. 1-66
 - (ii) Exports by Countries of Consignment, p. 67
 - (iii) Exports by Principal Countries of Consignment and Divisions of the Australian Export Commodity Classification, pp. 68 and 69
 - (iv) Exports by Divisions of the Australian Export Commodity Classification, pp. 70 and 71
 - (v) Index to Articles of Trade 1969-70, pp. 72-74
- Part 2 : Imports -
- (i) Statistical Items by Countries of Origin, pp. 1-161
 - (ii) Imports by Countries of Origin, p. 163
 - (iii) Imports by Principal Countries of Origin and Divisions of the Australian Import Commodity Classification, pp. 164 and 165
 - (iv) Imports by Divisions of the Australian Import Commodity Classification, pp. 166 and 167
 - (v) Index to Articles of Trade 1969-70, pp. 168 and 169

Basic Documents

Overseas trade statistics are compiled by the Commonwealth Bureau of Census and Statistics from copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise as required by the Customs Act. The entries show the port of shipment and country of consignment for exports and port of entry and country of origin for imports, the date, the description, quantity (where required) and value (f.o.b.) of the goods. The export statistical item number is inserted by the exporter or his agent. The importer or his agent is required to insert the Tariff Item number under which the goods are admitted and the Statistical Key Code. These are verified by officers of the Department of Customs and Excise in the local offices of the Collector of Customs.

Scope of the statistics

Inclusions

Overseas trade statistics are not confined to goods which are the subject of a commercial transaction, and all goods moving into or out of Australia are recorded, except for those exclusions listed below. Among the items included are:

- (a) Exports and imports on government account including defence equipment.
- (b) Outside packages (containers, crates, etc.). These are included as a separate item in the tabulation of imports (statistical item 931.00.21) but in exports the value recorded for each item includes the value of the outside package.

Exclusions

The following are excluded from overseas trade statistics:

- (a) Direct transit trade, i.e. goods being transhipped or moved through Australia for purposes of transport only.
- (b) Bunkers and stores supplied to vessels and aircraft (included in a separate "Ships' Stores" collection).
- (c) Those migrants' and passengers' effects for which a customs entry is not received.
- (d) Those parcel post exports and imports of small value for which a customs entry is not received.
- (e) Certain materials imported for inter-governmental defence projects for which customs entries are not required.
- (f) The value of ores and concentrates exported or imported includes the value of the gold content and the latter is therefore not included in exports or imports of gold.
- (g) Vessels and aircraft engaged in the transport of passengers or goods between Australia and other countries.
- (h) Vessels and aircraft purchased for use on overseas routes and any subsequent sales made overseas of such vessels and aircraft.
- (i) Fish and other sea products landed abroad directly from the high seas by Australian vessels.

Areas applying

The area to which all overseas trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania, the Northern Territory and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries, and trade transactions between Australia and those non-contiguous territories are part of the overseas trade of Australia. Such transactions are shown separately, i.e. the trade of Australia with each particular area is separately recorded and tabulated.

Period covered by statistics

Exports and imports are recorded statistically in the month in which the entries are passed by the Department of Customs and Excise. Normally this is within a few days of loading or discharge of cargoes although delays sometimes occur in the lodging of entries. Due to the distances involved entries from outlying ports are terminated on 21st of the month. Exports shipped by container from the terminal ports of Sydney, Melbourne and Fremantle are recorded in the same manner as other exports. Entries at the feeder ports of Brisbane and Adelaide are lodged prior to the movement of containers to terminal ports.

Since July 1914, detailed trade statistics have been compiled for financial years (July to June). Prior to that details were compiled on a calendar year basis.

Valuation

All values in overseas trade statistics are determined on a 'free on board (f.o.b.) port of shipment' basis. This means that all charges (in particular the cost of freight and insurance) incurred after the goods have been exported from the port of shipment are excluded. Only transport and service charges incurred, or usually incurred, prior to export are included in the determination of trade values.

The procedure adopted to value exports and imports is as follows.

Exports

The recorded value of goods exported includes the cost of containers and outside packages and has been determined as from July 1937 as follows.

- (a) Goods sold to overseas buyers before export are valued at the Australian f.o.b. port of shipment equivalent of the actual price at which the goods were sold.
- (b) Goods shipped on commitment are valued at the Australian f.o.b. port of shipment equivalent of the price paid for similar goods of Australian origin in the principal markets of the country to which they are dispatched for sale.

An account of the bases of valuation in operation prior to July 1937 is given in Year Book No. 37, page 396.

Imports

The recorded value of goods imported is the amount on which duty is payable or would be payable if the duty were ad valorem. Value for duty is the f.o.b. port of shipment equivalent of either:

- (a) the actual price paid or to be paid by the Australian importer plus any special deduction (transactions value); or
- (b) 'the current domestic value' of the goods; whichever is the higher. 'Current domestic value' is defined as, 'the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country'.

Imports into Australia prior to 15 November 1947 were recorded in British currency values. Full explanatory notes on the methods of recording import values before and since 15 November 1947 are given in Year Book No. 37, page 396.

Quantity data

Where quantities are shown they are generally, but not invariably, expressed in terms of the normal trade unit. Where 'cental' is used, the unit is equivalent to 100 lb avoirdupois. Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities that cannot be recorded under a uniform unit of quantity).

Statistical concepts of trade

Trade systems

There are two generally accepted systems of recording overseas trade statistics, namely (a) special trade and (b) general trade. The Statistical Office of the United Nations defines the two systems as follows.

System of Trade

The systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

(a) Special Trade

Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalised goods. (Nationalised goods are goods which, having been included in special imports, are then exported without transformation). Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption.

(b) General Trade

General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouse or free zone without having been transformed. General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone.

Statistics in this volume are compiled on the 'General Trade' basis.

Australian produce (national produce), is defined as goods, materials or articles which have been produced, manufactured or partly manufactured in Australia, except goods which were originally imported and have undergone only repair or minor operations which leave them essentially unchanged.

Re-exports are defined as goods, materials or articles originally imported which are exported in the same condition in which they were imported, and goods, materials or articles originally imported which are exported after undergoing repair or minor operations which leave them essentially unchanged. 'Minor operations' include blending, packing, bottling, cleaning, sorting, husking and shelling.

Merchandise and non-merchandise trade

Total trade is divided into merchandise and non-merchandise trade, merchandise trade being the equivalent of total exports or imports less certain items specified as non-merchandise. Since July 1965 merchandise and non-merchandise trade have been defined in accordance with international standards recommended by the United Nations: a complete description of the commodities included is contained in the Australian Export and Import Commodity Classifications published by the Bureau.

Balance of trade

Statistics of the balance of trade for balance of payments purposes are derived by making certain adjustments, relating both to scope and valuation, to statistics of merchandise exports and imports. Statistics on the adjusted basis are published in statistical bulletins relating to the balance of payments. The adjustments include the following: imports are adjusted for the overall excess of recorded value for duty over the actual selling price to the importer; exports and imports of goods for repair and return and the value of repairs are deducted from merchandise trade; exports and imports of ships and aircraft for use on overseas routes, certain imports of defence equipment, and other trade items for which customs entries are not required are added. Adjustments are also made for timing differences between the change of ownership and the lodgment of import entries, in the case of certain large items of equipment (e.g. warships).

The balance of trade is derived by comparing statistics of exports on a balance of payments basis with statistics of imports on that basis.

Balance of payments

Estimates of the balance of trade do not measure Australia's total balance of payments which includes other transactions such as freight and insurance charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profit and interest, and private and government borrowing overseas. Estimates of these transactions will be found in statistical bulletins relating to the balance of payments.

Country of consignment or origin

'Country of consignment' referred to in export tables means the country to which goods were consigned at the time of export. Where the country of consignment is not determined at the time of export the goods are recorded as exported 'For orders'. 'Country of origin' referred to in import tables means the country of production. Classification of imports according to country of shipment was discontinued after the year 1920-21. A brief account of the dual system of import classification by country, operating prior to the year 1921-22, was given on page 500 of Year Book No. 31.

Commodity classifications

From July 1965 imports have been classified according to the new Australian Import Commodity Classification and from July 1966 exports according to the new Australian Export Commodity Classification. Prior to those years the statistics were based on the Statistical Classification of Imports and Exports. The new classifications are based on the Standard International Trade Classification, revised (S.I.T.C.) which is closely related to the Brussels Tariff Nomenclature used in the new Australian Customs Tariff introduced in July 1965.

Description of commodities

In this Bulletin it has been necessary to abbreviate descriptions for some export and import items. Generic headings have been used extensively and descriptions of commodities appearing thereunder have been indented appropriately. The extent of such indentation is shown by the number of asterisks (*) which appear before the first line of a description. A full description of any export or import item can be obtained from the Australian Export and Import Commodity Classification.

Rounding

Any discrepancies between totals and sums of components are due to rounding.

Abbreviation

N.E.I. means 'not elsewhere included', and N.E.S. 'not elsewhere specified'.

Special periodical return system

A subscription service is available to provide for the particular detailed requirements of individual users of overseas trade statistics. These special periodical returns show trade according to items of the Australian Export and Import Commodity Classifications or statistical key code dissections of Australian Customs Tariff items and are obtainable monthly or quarterly. A nominal charge is made which varies depending on the amount of detail required.

Details of exports and imports are given in the following publications relating to overseas trade.

Overseas Trade, Major Groups of Countries (Ref. No. B.14)
Highlights of Overseas Trade Statistics (Ref. No. B.23)

Overseas Trade, Exports and Imports (Preliminary) (Ref. No. S.1)
Exports of Principal Products of Australian Origin by Country
of Consignment (Ref. No. S.5)
Imports of Assembled New Passenger Cars (other than Buses or
Special Vehicles) (Ref. No. S.8.5)
Exports by Commodity Divisions and by Country (Ref. No. S.15)
Imports by Commodity Divisions and by Country (Ref. No. S.15)
Monthly Bulletin of Overseas Trade Statistics, Part 1 - Exports (Ref. No. S.9)
Part 2 - Imports (Ref. No. S.10)

In addition current statistics on overseas trade are contained in the Official Year Book, the Pocket Compendium, the Quarterly Summary of Australian Statistics, the Monthly Review of Business Statistics, the Digest of Current Economic Statistics and in the statement Balance of Payments. Additional unpublished details can be supplied on request.

Commonwealth Bureau of Census and Statistics.
